FIRES five shots—you simply pull the trigger for each shot. Action always sure. Recoil reloads for you. A simple gun to shoot—and simple to take down. Has three positive safety devices making accidental discharge impossible.

Hammerless—Solid Breech—Safe

Send for a complete description of the "Autoloader that works."

Next time you go out, try a *Remington-UMC* "*Perfect Shooting Combination.*"

"A Perfect Shooting Combination"

At the Traps :: In the Field :: And for Ducks —A *Remington-UMC* Autoloading Shotgun and Either Arrow or Nitro Club STEEL LINED Shells.

REMINGTON UMC

THE SHELLS

IT was at a big trap event in Ohio about a month after the Arrow and Nitro Club steel lined shells first came out that a happy sportsman nicknamed them the "Speed Shells"—the name stuck and spread from coast to coast. The *Remington-UMC* Steel Lining is one of those simple but fundamental discoveries that come along now and then and revolutionize standards all along the line. The speed shells eliminate the guess work—you take a shorter lead and get to the mark faster. You can buy them everywhere.

2:11 Pace (Sept. 1)..... 750

Famous Spokane Derby and World's Championship Relay Races will be given this year. Write for particulars. Special folder concerning running races sent on application.

Due principally to the fact that Walla Walla has the same dates as our Fair, only four days harness and running races will be put on, same to commence Wednesday, September 15th. This arrangement will make it possible for those who might be at Walla Walla to make entries for our races also. Our program will be so arranged that races held at Walla Walla on Monday will be given by us on Thursday, and so on.

The Walla Walla Fair Association together with this Association will do everything possible to arrange for cars and service on the part of the railroad companies, so there will be no delay in getting horses to Spokane in plenty of time.

CONDITIONS

The closing date is stated in each schedule or in each event. Early events close June 1, when 1 per cent is payable and horse must be named; 1 per cent on July 1, and 1 per cent August 1. Deduction of 7 per cent from money winners. In early closing events fifteen entries will be required. Entrymen may declare out at any time, but must be paid up to date of declaration, and must declare out in writing.

Late events close fourteen days before the opening of each fair unless otherwise stated. Five per cent to enter with five per cent from money winners. Not less than seven entries required and five starters in each event.

Races designated as the "three heat plan" or "every-heat-a-race" end with the third heat and each heat is a race. Ten per cent of the whole purse or stake is held out to be divided 75 per cent to first horse which takes the record or mark, and 25 per cent to the second horse, according to summary of the three heats. The standing of the horses will be determined under "the old placing system." Thirty per cent of the whole purse is placed on each heat to be divided 50, 25, 15 and 10 per cent. Horses draw for position in each heat of the "three-heat-plan." If at the end of the three heats two horses are tied for the first money of the summary, they may be sent for a decisive heat, the two horses only participating, only winner getting record.

Two-year-old and three-year-old events are for colts bred and owned in Oregon, Washington, Idaho, Montana, Utah or British Columbia; two in three heats; no colt race longer than three heats.

Send all entries to the Secretary of the Fair and not to the Circuit Secretary.

A stake book is issued containing more details as to conditions, etc., to be had from any Secretary or at the office of this paper.

NOTICE: Each track has a programme of Running Races, Special Features, Relay and Novelty Races—ask for it.

Dates have been assigned to the following tracks; programmes to be announced later.

ROSE CITY SPEEDWAY, PORTLAND, OREGON, AUG. 2-7
FRED J. MERRELL, Secretary
CHEHALIS COUNTY FAIR, ELMA, WASH., SEPT. 1-4
J. E. PINKHAM, Secretary.
COLUMBIA RIVER INTERSTATE FAIR, VANCOUVER, WN., Sept. 6-10
J. E. NORELIUS, Secretary

Stake books to your address by a postal card to any secretary or to JOHN W. PACE, Circuit Sec., Seattle, Wash.

Colt Distemper

You can prevent this loathsome disease from running through your stable and cure all the colts suffering with it when you begin the treatment. No matter how young, SPOHN'S is safe to use on any colt. It is wonderful how it prevents all distempers no matter how colts or horses at any age are "exposed." All good druggists and turf goods houses and manufacturers sell SPOHN'S at 50c, and $1 a bottle; $5 and $10 per dozen. All druggists and manufacturers.

HE VICTORIA CROSS OF TURF JOURNALISM.

Of a surety, kind friends, the paths to greatness re of diverse and varied natures; no measure of riginality do we claim for the promulgation of this heory, as it has long been one of the accepted xioms of daily life. Some are born great, some chieve greatness, while others have greatness thrust pon them, according to the ancient adage, and to his latter process must we lay our latest laurels. Long have we pursued our humble path devoid of spiration to position above that of our fellows, ontent with some small meed of comfort as we went our daily way, greeting rich and poor alike and rejoicing in a circle of warm personal friendships hat rippled far into the highways and byways of that portion of the world familiar to the great common people.

Now, however, all is changed, and if we pass you by in supercilious dignity, whom once we were wont to hail as friend in our former low-browed, common manner, bear with us kindly as ye may, for we are no longer as an ordinary mortal but have been elevated to a position of glory and greatness undreamed of in our wildest flights of fancy in youthful days long gone. Bear with us, friends, for at one fell, sudden, unsuspected swoop we have been transformed from a personification of democracy to a sitter in the seats of the mighty. From the position of a lowly turf scribe we have risen to that proud eminence, that pinnacle of fame, embodied with membership in the circle of great Americans who have incurred the grave displeasure of that most esteemed contemporary, the Horse Review—a coterie of notables so long and so ably presided over by Mr. Daniel J. Campau, a select assemblage whose membership was so recently and so richly augmented by the admission of that other old friend of our boyhood, Secretary Charles Downing of the Indiana State Fair.

Lest there be those among you who, from knowledge of the fact that on occasion we are wont to qualify as a free-handed, open-faced, fourteen carat, full-jeweled liar, may be inclined to doubt the truth of our claims to greatness, we submit the following patent of nobility as issued by the Review in its current spasm:

Some while back—in the winter, as we recall it—we dropped a few words en passant (that is the correct phrase, we believe), regarding the unrivaled Italian climate enjoyed by Chicago and its vicinity. In doing so we were utterly devoid of anything but the purest motives and the utmost innocence of intention. But that has not sufficed to preserve us from the slings and arrows of our California contemporary, the "Breeder and Sportsman," which immediately took umbrage at both the atmosphere and the local color of our observations, and has not ceased since then to gird at us, not only covertly, but openly, and to reiterate opprobrious insinuations regarding not only our remarks themselves, but that which they celebrated—to-wit, the unrivaled Italian article aforementioned.

For some time we have, in the current vernacular, stood for this unchecked flow of uncalled-for animadversions. We felt that California was a long way off, a locality known only to members of the geography classes in the grammar schools, or to those old-timers with memories extending back to 'Forty-Nine; that to all ntents and purposes it was otherwise "terra incognita," nd that few of the Review's readers, while perhaps familiar with its name, would be sufficiently interested in its climatic peculiarities to admit of our giving space to any protest against the slurs which our contemporary of the Barbary Coast was giving vent to. However, even the most perfect poise and correctly calculated self-restraint upon occasion cease to be virtues; and we have at last got to the turn in the lane that, sooner or later, must, in similar circumstances, always be reached. That we are justified in these statements will be at once apprehended by a perusal of the following excerpts from the editorial page of the "B. and S." of May 8:

Our "esteemed contemporary," the Horse Review, in its benighted ignorance of truly decent climatic conditions, is liable to draw a few comparisons in support of its theory that the northwestern hamlets of the grand old state of Illinois are situated in a "climatic paradise" of such mellifluence as to "arouse the envy of California."

Yes, Genevieve, that's just what we think, too—"The nerve of some people's children!"

Can you imagine Chicago folks traveling south for seventy minutes on May Day and seeing M. and M. candidates trot halves in 1:03, and three-year-old trotters reel off miles in 2:20½, 1:09, :32¾, :15¼?

Or, maybe, go east for a couple of hours' ride and see free-for-all pacers step two-lap tracks in 1:01¼?

Or 2:20 pacers go halves in 1:03 over the same dirt?

Or 2:20 trotters go the short route in 1:05?

Or folks sitting around on the lap of good old Mother Earth, with long green grass for cushions, eating picnic dinners of friend chicken and all those things?

Splash! The Review outfit has "done fell in the lake!"

While in a sense, the levity, the frivolity, characterizing these paragraphs would render them, ordinarily, beneath the notice of a journal not wholly abandoned to such pernicious practices, at the same time we can, while ignoring the said verbal gargoyles, get at the meat of the matter.

While eastern indifference to California climatic conditions—owing to reasons already explained—may be admitted (and without apology), it is nothing in comparison to Californian ignorance concerning the glorious climate of the civilized portions of the U. S. A., of which the most favored, by unanimous consent, is that of northern Illinois. The period of salubrity in the Barbaryous regions of the remote wild west, according to the testimony of its own press-agent, begins only on May Day; whereas in and about Chicago, as early as April, we had enjoyed a temperature of 86 above (official), at which period the picnic season was already on the wane. As for fried chicken, it is to be said that east of the Mississippi river that viand is unknown north of Mason and Dixon's line, nor is it considered en regle at al fresco affairs. (Will the "B. and S." excuse our French?—it is not expected to comprehend it. But in discussions so wide in sweep as the present, the resources of one language are often inadequate—particularly when the said language has already been grossly man-handled by the party of the second part.) As for the little speed riffles so boastfully exploited above as evidences of climatic superiority, we laugh them to scorn—reely! In this part of the country such lizard-like displays would not be thought worthy of oral comment, to say nothing of journalistic record, in any month of the year.

If we have "fallen into the lake," as our contemporary alleges, we can assure it that the water is deliciously warm and that a stroll along the bathing beaches adjacent to this fair city will disclose the fact that myriads of other inhabitants of Chicago are standing in line for a chance to "come on in." And here we will pause to remark that, having ourselves, in past days of daring and bravado, penetrated even unto the Pacific coast, we retain vivid recollections of the chill of the water at that edge of the jumping-off place. Never will we forget the colossal icebergs that we saw strewn along Coronado Beach in the month of May, or the howling blasts that we encountered about the same time in the streets of San Francisco. Not even the papier-mache palms in the cafe windows took the frost out of our toes, and it was not until our return to Chicago that we really got thawed out.

We call the files of the Review to witness that we are the reverse of egotistical—yet we are justly proud of our eligibility to the society of bone-fide explorers known to have visited California, withstood the rigors of its climate and returned to civilization to tell the tale. If this seems vainglorious, however, we will add that we had never summoned to our aid the necessary fortitude for so appalling an undertaking but for the knowledge that we had Chicago to come back to! We will conclude with a famous quotation from a classic poet:

O, California, thy climate is a fake—
Give me Chicago and its sun-kissed lake!

It's a long, long way to Tipperary, if our readers will pardon our use of this much overworked phrase, but the way is evidently no longer than the mental processes required by the author of the above screed for its composition, as it has, from all surface indications, been in course of preparation since some months ago, when we made some jocular allusions to the weirdness of our esteemed contemporary's conception of a "climatic paradise." It has been a long, long task, the various stilted and bombastic paragraphs showing evidence of having been polished and re-polished in an effort to display the vast and superior erudition of their composer, but "mieux tarde que jamais," as Will Durfee so aptly remarked to Messrs. Shank, Andrews, Murphy, et al., when he grabbed the fourth, fifth and sixth heats of the Kentucky futurity, and we feel that the result shows time well spent. There is one sentence that would be worthy of Henry James—almost.

Really, the Review has "laid for us" at a bad moment, knowing that we would be so engrossed in enjoying speed displays at the exposition track that we would have none of the time for the preparation of our acknowledgment of their "appreciation" of us that marked its construction at their hands, our response being of necessity delivered on the spur of the moment, extemporaneously, one might say, or prepared "poco damn prontito," if the Review will pardon our Texas Spanish. This is workout day and we fain would be on deck to witness more of those "lizard like displays" that "would not be thought worthy of comment" in Chicago. "Would not" is erroneous; "will not" is more nearly proper, as there is no danger of Chicago ever witnessing such displays, judging from the bush meeting held there last season when free-for-all pacers "electrified the expectant throngs" by going in 2:11, or from that great Fourth of July some five years gone when the fastest heat of the day was 2:14¼ and "elicited cheer after cheer from the enthusiastic multitude." "Will not" is right, worthy or unworthy, as the case may be.

However, enough of this "serious" consideration of a minor affair, and let us return to the spirit of levity, with malice toward none, which has characterized our former remarks in this connection.

Ain't it awful, Mabel, the way these here easterners behave when they get away from home and arrive on our hospitable shores? Of course, kid, we ain't sticklers for the proprieties only up to a certain point, but there are limits past which no perfect gen'leman is going to went, Genevieve. The idea of a man in his position lickin' up so many highballs at Coronado an' gettin' so in the habit of lookin' at the bottom of the glass that, by th' inebriate conceptions of his feeble intellect, the innercent crystal was tooken fer icebergs! Can you beat it? An' then coming to San Francisco an' spendin' so much time on th' Barb'ry Coast that he thinks that's all there is in the city! An' him married maybe, or engaged! Uh course, Clarice, no tiene diferencia para nosotros, as it ain't really none of our business an' them places is kept goin' merely for "towerist consumption," but when a guy like him carries things as fur as he did the truth had ought to be told.

An' about that fried chicken—that just nacherully ain't so. Uh course that cheap joint of Al Fresco's that he mentions we don't know nothin' about, though oncet when we was in Chi a gen'leman friend who was on the Review took us to Pittsburg Joe's an' purt near foundered us without gettin' but twenty-seven cents punched out of his meal ticket. Al Fresco's is prob'ly one of them cheap French places where you don't reconnize fried chicken when you get it, cause them foreign cheefs always do something to their chicken that hadn't rightly ought to be done to chicken, but I'm gonna write to John R. Thompson, Mabel, an' tell him about them libels th' Review sprung on his cafays. No fried chicken in Chicago? Why, John will simply rare up an' fall back! No fried chicken? Why, hownell could ya run a Methodist conference without fried chicken, or a G. A. R. picnic?—an' them th' leadin' political powers of the republican party in Illinoy!

An' them poetic closin' words, that they got Bath House John t' write for 'em! Ain't them too cunnin' fer any use? They just clinches th' theery, Myrtle, of poeta nascitur, non fit, which in plain lingo means poets is nastier than fits. Ain't it th' truth!

The fit they threw merely goes to show that the Review, after all is said and done, is very much "obunge solge"—if they will pardon our Creek (or maybe it is Choctaw; these aboriginal tongues are confusing)!

LEXINGTON RECORD MEETING.

Blue Grass horsemen held their first record meeting of the season at Lexington on Tuesday, May 18, earlier than usual, fourteen trotters being provided with standard records, two from the Devereux stable, two from John E. Madden's establishment, and the balance from Hillanddale Farm, a number of the latter being the get of Atlantic Express (3) 2:08¼. One of the nice performances was that of the three-year-old Barbara King (3) 2:15¾, by King Bellini and out of Helen Simmons, the dam of the green trotter Spriggan that is showing so nicely here for Will DeRyder. These are the newcomers to the list:

To beat 2:30¼ trotting:
H. K. Devereux's b f Faralie (2) by John a McKerron—Croppy by Onward.....(Curry) 2:29¾
H. K. Devereux's ch h Jack Murray (4) by John A. McKerron—Lea by Sidney.....(Devereux) 2:16¼
J. E. Madden's b c Maple Tree (2) by Siliko—Bertha Leyburn by Arion .....(Hayes) 2:21¼
J. E. Madden's b f Walnut Tree (2) by Siliko—Markala by Peter the Great.....(Hayes) 2:18½
Hillanddale Farm's br m Pilatka (13) by Bingen—Hatteras by Wilkes Boy.....(Hayes) 2:14¾
Hillanddale Farm's b m Amina King (4) by King Bellini—Operetta by Elyria .....(Dickerson) 2:22
Hillanddale Farm's br f Harvette (3) by The Harvester—Beatrice Bellini by Bellini...(Dickerson) 2:13¼
Hillanddale Farm's ch f Barbara King (3) by King Bellini—Helen Simmons by Simmons.(Dickerson) 2:15¾
Hillanddale Farm's br f Stellamaris (2) by Atlantic Express—Nettie King by Mambrino King.....(Dickerson) 2:23½
Hillanddale Farm's ch f Atlantika (2) by Atlantic Express—The Huntress by Onward Silver.....(Dickerson) 2:20½
Hillanddale Farm's br f Saskia (2) by Atlantic Express—Milady Axtell by Axtell.....(Dickerson) 2:29
Hillanddale Farm's ch c Opera Express (2) by Atlantic Express—Operetta by Elyria..(Dickerson) 2:26½
Hillanddale Farm's bl f Choisle (3) by Bingen—Ciociara by Bellini.....(Haynes) 2:18
Hillanddale Farm's bl f Ondiva (2) by Atlantic Express—La Notte by Bellini.....(Dickerson) 2:25

E. R. Dunne, one time of Seattle but more recently a temporary resident of San Jose, has clinched the matter of permanent residence in California by purchasing a bit of ranch property near Morgan Hill and stocking it with a nice herd of pure bred Holstein heifers. Alfalfa and dairy checks look good to E. R., but at that not so good as his two-year-old Cochato filly, who is working at the trot well inside the standard limit.

2:10 List for 1915 Gets Its Start in California

With two new additions to the 2:10 list, a number of other nice record performances by trotters and pacers of various ages and a fast free-for-all pace, the regular racing season of 1915 on the Pacific coast was ushered in Saturday, May 22, at Woodland, when the horsemen of that section of the Sacramento valley staged the program originally scheduled to take place on May 15. Owing to the removal of the Silva-Daniels combination to the exposition track the field for the free-for-all was cut down a bit and one or two youngsters that were due to acquire breeder's records were absent, but there was always plenty doing for the entertainment of the good crowd in attendance.

Will Ivey drew the distinction of piloting the season's first new 2:10 trotter, when he sent Frank Ruhstaller's brown son of Walnut Hall and Daisy Wilkes by Moko—Moko Hall—over the course for a nicely rated mile in even time, 2:10 flat. Having made a winning performance the big trotter could not be sent for a lower record on the same day, but just as a "clincher" Ivey repeated him an unofficial mile in 2:09¼, many of the horsemen present considering that the lad was equal to a mile in 2:08 had it been necessary. Ivey also put Moko Hall in the table of sires through the performance of the three-year-old filly Tennie Hall, out of Tennie by Temescal, giving her a trotting record of 2:23 immediately following the performance of her sire. Dr. E. J. Weldon of Sacramento also had a standard ride behind a three-year-old trotting filly, giving a mark of 2:29½ to Banostine Belle by Lijero, out of Mater Expedio (dam of Expedio 2:09¼) by Knight, both the fillies mentioned being candidates for futurity honors later in the season.

MOKO HALL 2:10, THE FIRST 2:10 TROTTER OF THE YEAR.

Prince Ansel (2) 2:20½, Woodland Stock Farm's premier stallion, whose yearlings in the stable of Hunter Moody at Lexington have been the cause of so much favorable comment this season, has three new performers as the result of the day's operations, the first one being the bay pacing mare Josie Ansel, out of Josie D. by Nutwood Wilkes, who annexed a mark of 2:14 with apparent ease. His sidewheeler safely put in the list, Harry Dowling turned his attention to the trotters, driving the two-year-old filly Sadie Ansel, sister to Laura Rogers 2:11¼, a nice mile in 2:23½, and the three-year-old Ruth Ansel to a record of 2:21, the latter lass being a sister to the fast trotters Prince Lot 2:07¾ and Lottie Ansel (2) 2:14¼, the coast champion for her age and gait in 1912. Sadie and Ruth are also futurity entries that, from present indications, should give pretty good accounts of themselves in November. Robert Bingen, who shares with Prince Ansel the stud duties of the Considine establishment and who has a winrace record of 2:11¼ as a pacer, gave evidence of his versatility by trotting, well within himself, in 2:15½, making a good new one for both Bingen 2:06¼ and the great brood mare Episode 2:18.

Hi Hogoboom also piloted a couple of trotters of his own breeding into the year book, Honest Boy and Beautiful Girl. The Boy is a four-year-old gelding by Hogoboom's speed sire, Palo King (2) 2:28½, out of Miss Ione by Iran Alto, and trotted in 2:23¾, while the Girl, who is a daughter of Iran Alto and the double producing matron Beautiful Bird by Nutwood Wilkes, grandam famous old Expressive (3) 2:12½ by Electioneer, went the route in 2:29¾.

Elmo Montgomery sprung the sensation of the day, however, with the five-year-old gelding Lock Logan, whom he sent out to beat 2:25¼ pacing and who reeled off a well rated mile in 2:07¼. This lad has always had a great turn of speed but has not, until the last few weeks, developed much ambition to put it to use, as he preferred to fuss along in company with anything that happened to be jogging on the track. Late last fall, Elmo gave up the idea of keeping him a stallion and put him under the knife, with the gratifying results so greatly in evidence Saturday. In his early work this spring he still had many of his former general characteristics, but about a month ago surprised the stable staff by working to a cart for Tennessee Bill Morrison in about 2:16, since which time he has been showing real race horse inclinations. He was well hardened and came so rapidly that Saturday's performance was only the tenth time that he has beaten 2:20. He "looms large" as a successor to Jim Logan as a racing tool for Montgomery's future campaigns as he has never been hurt and is bred to both fast and lasting—by Zolock 2:05¼ and out of the coast's champion producer of extreme speed, Effie Logan, dam of Jim Logan 2:01¾, Sir Albert S. 2:03¼, Dan Logan 2:07¼ and Lock Logan 2:07¼. Following Will Ivey's system of "double shooting 'em" by putting the new 2:10 performer in the table of sires as well, Elmo set sail with the two-year-old pacing filly Carolyn M., by Lock Logan 2:07¼, dam Trilby Maid (dam of Maxine (3) 2:15) by Black Ralph Jr., and completed the circuit in 2:21, which makes her look good for the junior pacing divisions of this year's classics. Statisticians and other interested parties need not look for Lock Logan's list to grow, however, as Carolyn M. is his only foal.

Teddy Bear's defection cut down the field in the free-for-all pace, but his absence had no effect on the time hung out, as Jim Logan, Booze and Clara Mac tramped two merry miles in 2:06 and 2:08, the coast champion winning both comfortably. Booze, with Ivey up, put up a nice race, and Clara Mac, though unsteady, paced very fast at various portions of her miles.

The day's officials were F. E. Emlay, T. B. Hutchins and W. S. Harkey, timers; A. C. Stevens, R. J. Gibson and J. H. Haile, judges; F. E. Wright, starter, and G. B. Kelley, clerk of the course and representative of the N. T. A. Here are the details of the occasion:

To beat 2:11¼ trotting:
Moko Hall, br h (8) by Walnut Hall—Daisy Wilkes by Moko .....(Ivey) won
Time—:33, 1:05½, 1:37½, 2:10.

To beat 2:30¼ trotting:
Tennie Hall, br f (3) by Moko Hall—Tennie by Temescal ..... (Ivey) won
Time—:45¼, 1:10, 1:46, 2:23.

To beat 2:30¼ trotting.
Banostine Belle, br f (3) by Lijero—Mater Expedio by Knight .....(Weldon) won
Time—:37½, 1:14½, 1:53, 2:29½.

To beat 2:25¼ pacing.
Josie Ansel, b m by Prince Ansel—Josie D. by Nutwood Wilkes .....(Dowling) won
Time—:34, 1:08, 1:40½, 2:14.

To beat 2:30¼ trotting.
Sadie Ansel, b f (2) by Prince Ansel—Lauress by Mendocino .....(Dowling) won
Time—:36, 1:12¾, 1:47¾, 2:23½.

To beat 2:25 trotting.
Ruth Ansel, b f (3) by Prince Ansel—Lottie Whipleton by San Diego.....(Dowling) won
Time—:36, 1:12½, 1:45½, 2:21.

To beat 2:20 trotting.
Robert Bingen, b h (10) by Bingen—Episode by Ambassador ..... (Dowling) won
Time—:33½, 1:07½, 1:41, 2:15½.

To beat 2:30¼ trotting.
Honest Boy, b g (4) by Palo King—Miss Ione by Iran Alto .....(Hogoboom) won
Time—:37, 1:13, 1:46¾, 2:23¾.

To beat 2:30¼ trotting.
Beautiful Girl, b m (4) by Iran Alto—Beautiful Bird by Nutwood Wilkes .....(Hogoboom) won
Time—:37, 1:14, 1:49½, 2:29¾.

To beat 2:25¼ pacing.
Lock Logan, br g (5) by Zolock—Effie Logan by Durfee ..... (Montgomery) won
Time—:32, 1:04, 1:35½, 2:07¼.

To beat 2:25¼ pacing.
Carolyn M., b f (2) by Lock Logan—Trilby Maid by Black Ralph Jr. .....(Montgomery) won
Time—:36, 1:11½, 1:46½, 2:21.

Free-for-all pace, 2 in 3.
Jim Logan, b h by Chas. Derby.....(Montgomery) 1 1
Booze, b g by Dupe.....(Ivey) 2 2
Clara Mac, br m by Expressive Mac.....(Dowling) 3 3
Time—:31¾, 1:03, 1:33, 2:06.
:32½, 1:02½, 1:35, 2:08.

REMINDERS FOR JUNE FIRST.

Tuesday, June first—next Tuesday—is a date which coast horsemen must not overlook, as it marks the closing of numerous classes here at San Francisco and at other points in the west where they will probably race during the season.

At the exposition there are a number of things to be borne in mind for action upon. It marks the final date of closing for the four great $20,000 stakes at the June and November meetings, and is also the limit for the making of substitutions for horses entered on the first closing date, September 1, 1913, declarations of substitution, which can be made only by an original nominator, to be accompanied by a payment of $200. Nominators to the four colt stakes to be raced at the June meeting must also make declaration at this time as to whether they will race at the trot or at the pace, unless their entry is already properly classified. Two-year-olds may be transferred from either class to the other without payment of any kind, the amount of the stake being the same, but those having paid entrance on three-year-olds in the pace and wishing to start in the trot must pay the difference in the entry fee. Conversely, colts paid up as trotters and starting as pacers will have a refund coming to them.

In addition to these matters, there also remain the ten class races which failed to fill on April first and were reopened to close next Tuesday. In all but one instance the events are for the same classes as previously announced, the exception being the 2:08 pace, which, in the new programs, has been changed to a 2:07 class at both meetings, admitting a number of horses that are here and which were not eligible to the 2:08 class. For the summer meeting the classes to close Tuesday are the 2:07 pace for $2500, the 2:13 trot for $1,000, the 2:13 pace for $1,000, the 2:17 trot for $1,000, and the free-for-all trot for $2,500, while for the fall meeting, to close at the same time, these are available: the 2:12 trot for $1,250, the 2:10 pace for $1,250, the 2:07 pace for $1,500, the free-for-all pace for $2,500 and the free-for-all trot for $2,500.

Horsemen are especially cautioned that horses entered at the June meeting and not in condition to start must be paid up on at three per cent and declared out on or before June first or be held for full entrance fee.

Parties going east after the exposition races should also give consideration to the three-day meeting at Denver on June 30 and July 1 and 2, when $9,000 will be hung up for 2:12, 2:20 and 2:05 trotters and 2:07, 2:20 and free-for-all pacers, full particulars appearing elsewhere in this publication. Entry is on a three per cent basis and John O. Talbott is the secretary.

Throughout the northwest June first is an important date, as there are events closing then for the various meetings on the North Pacific Circuit, which provides a couple of months of continuous racing that will doubtless attract a number of California stables, owing to the dearth of racing here aside from the exposition meetings. Purses on this circuit range from $300 to $2,000 and the different meetings

e held under the most satisfactory of general conditions. The entire program appears elsewhere and most respectfully commended to your consideration, as this circuit has kept the industry alive when thers have fallen by the wayside, and is worthy of very support. Provision is made for a wide range f speed, so that stable managers will be able to find lasses that will give their horses ample earning apacities.

For the Regina Exhibition to be held July 26 to 1, entries to which were originally announced to lose on May first, June first has now been named as closing day with Secretary D. T. Elderkin, two per ent to accompany entry, three per cent due on July 5. Regina's early closers are for $800 each for 2:30, 2:20 and 2:15 trotters and 2:25, 2:15 and 2:10 pacers, ntries made after May 15th being no bar. Entries also close on this date for a few of the earlier meetngs of the Colorado and Wyoming Circuit, of which J. A. Burnett of Denver is secretary.

Nor are trotting horse breeders the only coast horsemen to whom the date is important, as lovers and raisers of gaited saddle horses have their major classic, the California State Fair Gaited Saddle Horse Futurity Number Two, closing at this time. Five thousand dollars is the total offering of this classic, to which the original nomination fee is but $2, eligibility to the stake being defined as follows: the foal of any mare bred in 1914 to a stallion registered with either the American or Pacific Coast Gaited Saddle Horse Association. There are no long waits for action on your money in this event as first awards will be made this fall on weanlings, the money being allotted to four different ages—weanlings, yearlings, two-year-olds and three-year-olds. Most breeders are familiar with the full conditions, but any whose memory needs refreshing will find all they wish to know on a business page.

Under the conditions of the last Horseman futurity, which also closes June first, there are forty ways to make money, and by hanging up records for half-mile track performances coast horsemen can share in the distribution of the stake and never leave home. A dollar a mare is the first payment, and if you are unaware of full conditions and have a good prospect coming on, you can afford to enter and investigate at your leisure. Give the youngsters a show.

WHERE WAS THE MARK?

Every once in a while there bobs up a "new one for the book," but the prize for the present season, to date, must be accorded to the chapter below, an excerpt from a letter to the well known northwestern horse fancier, Clinton A. Harrison, from a party in one of our central western states:

Dear Sir Enclosed please find your photograph which I am returning with many thanks for the kind favor and wish also to inform you that I have discovered the mistake regarding the objecktions that I stated in my other letter that I had to Maggie Ansel and wish also to inform you how this mistake occured it was this way when I received the photograph I gave it to a friend of mine who is a Vetternary Sergeon and claims to be so me what of anexpert on being able to pick the good points and the weak points in a horse from a photograph so I was very anxious to get his opinion regarding this filly good points as well as her weak ones if she hzad any so that the only objection that he found and I had him to mark what he claims is her tail so will see the little cross mark that he made he contends that is her tail I made a little strait mark on what I contend is her tail after I had examined it closely he still contends that he is wright and I am eaqualy as positive that I am wright I am so positive that I am wright that I am willing to acknowledge the mistake and with draw that objection but he is very anxious that you shall say who is wright in this matter his contentions is that they have aimed to give her the appearance of and English park horse and had given her a little to much and had spoilt the looks of her. when I wrote to you last I was in ahurry and forgot to mention about the artical that you sent me that was published in the horseman of february I appreciate that very much as the arti cal was writen by and old acquaintance of mine I met Mr. A L Thomas in the early spring of eightythree when I was only a Boy helpin my Uncle in a garden he came over from Illinaisto Lexington Ky take charge of Major H C McDowells string of trotters and drove for him till in the summer till after the Chicago races he boarded with my uncle the most of the time while he was with McDowell he has been trainer For Colonel John Donovan of St Joseph Mo For the last few years up to Cononel Donoven Death in regard to me buying your two year old horse I have been considering it but dont think that I can handle him at this time will consider it further and let you know positively what I can do about it well I dont believe that I have any thing else to say till I hear from you

Evidently the heathen Chinee has nothing on the vet mentioned above when it comes to ways that are dark and tricks that are queer, for this is a real departure in determining breeding, speed, individual excellence and all those things that modern breeders strive for. The color theory, beside it, pales into insignificance, and in order that we may learn something of this new science we beg of Mr. Harrison that he furnish us and an expectant public the following information: Wherenell did the wise guy mark the tail? Which end should it really be on for speed, according to the new dope?

Gahagan's Los Angeles Letter

Among the welcome visitors drawn from the east to California by reason of the harness meet next month at the exposition is Tom Gahagan, who for several years has ranked among the foremost of trotting turf correspondents, covering the country from Phoenix to Boston and from Dallas to the Canadian tracks in the interest of some of the eastern horse journals and a string of the leading dailies. For the present he is representing, in addition to his daily bunch, the Western Horseman and the Horseman, the first of his local stories to find its way east and back again being the following interesting review of the exposition stake candidates at Los Angeles, appearing in the current number of the Horseman:

After a 68-hour ride from Chicago I landed here on May 6 and since that time I have been listening to alibis or excuses, if you prefer, from native sons for the wretched weather with which this American Riviera has been afflicted during the past few weeks. The native Californian is strong on the alibi and the nature of it depends upon what part of the country you happen to be infesting at the time. Here it is the weather. Theoretically, it never rains in this section between the months of March and November, and the weather is popularly supposed to be of that brand generally associated with stories of southern Italy. Actually, it has been raining more or less since April 1 and the temperature is frequently such as to make an overcoat a necessity.

Enter the alibi. "This weather is abnormal," you are confidentially informed by the native son. "Nothing like this has ever occurred within the memory of the oldest inhabitant, and it probably never will occur again. Going up to Frisco? Well, you want to take your overcoat along up there, for you may need it anytime." How they do love each other, the residents of these two great coast cities. That of the burglar for the cop, the cowboy for the sheepherder or the Irishman for the A. P. A. is tame by comparison.

I arrived at Exposition Park just in time to find Lon McDonald and Will Durfee giving their horses their last workout and the men packing up for the trip to the Panama-Pacific Exposition. These two stables, three carloads strong, shipped out on May 8, which leaves less than a dozen horses at the local track which are scheduled to race for the big money at the June meeting at the exposition, and these will depart northward about May 22.

Lon McDonald seems to have found the California climate agreeable, for he is considerably over weight, and in spite of the rather bad weather of late, states that this country suits him as a permanent place of residence. His stable is eleven strong, and under the supervision of himself and his efficient second man, Ed Avery, all but one of them are in the best of condition, the trotting stallion Hallmark 2:11¼, which McDonald considered a great stake prospect, having been lame all winter and is not liable to be seen at the races this season. As I arrived on the eve of the northward ship I saw only the work of a few members of the stable.

With that handsome, gamecock trotter Star Winter 2:05, McDonald on May 7 set the season's trotting record for the local track at 2:08¾. The fast gelding is carrying a lot of fiesh, in fact there are few ribs to be seen among the horses which have been or are being trained here this season. This is accounted for by the fact that there has been but little extremely warm weather and the trainers say that especially during the month of April it was almost impossible to get a "scrape" on any of the horses. McDonald is hoping that the free-for-all trot at the exposition meeting, reopened to close June 1, will fill, as he can't quite figure where any of the coast trotters have an even chance to head Star Winter.

McDonald was working McCloskey 2:06¼ when I arrived, and in warming up the wrong way of the track the white faced gelding showed somewhat lame in front. When turned the right way of the course and the steam turned on, however, he squared away, forgot all about his troubles and breezed an easy mile in 2:10. If it was not for the fact that he rather disappointed his trainer, after showing great form in his work last season, he would be figured as a real star prospect for the stakes.

I did not see Laramie Lad work, but was informed that he had also been in 2:10, and is doing everything asked of him in his early work. As he has been accused of beating 2:05 in his work last season, it is likely that he will be selected to carry the McDonald colors in the $20,000 stake at the exposition meeting, providing that he continues to work as satisfactorily at the exposition track as he has here.

The Duchess 2:06¼, the roan mare who worked a mile a full second faster than her record at Phoenix last fall, has worked in 2:12, but has been a quarter in 30 seconds at the end of one of these workout miles, and Laramie Lad will have to show a lot if he beats her out of a chance of starting in the M. & M. at Detroit. The four-year-old colt Adbell M. 2:09¾ has been in 2:13 and is also working satisfactorily.

Both McDonald and Avery are still repining over the death of the great three-year-old pacer Squantum 2:09¼, who died at Phoenix last fall. They believe the gelding was a two minute or better pacer and had depended upon him to show the way in the big pacing stake at the exposition meeting. Now the dependence is the little mare Margot Hal 2:04¼. While she is a useful little mare when right, she has only been in 2:10 as yet and hardly looks to class with such speed demons as Dr. Burns Jr. and Homer Mac, who have been burning the track here of late. The big Hedgewood Boy youngster, Hedgewood Patchen, worked a mile right in the same notch with Margot Hal.

Will Durfee shipped about fifteen head to San Francisco on the same train which carried the McDonald stable. Owing to his early departure I did not succeed in getting the dope on all of his stable, but I saw the phenomenal filly Virginia Barnette (3) 2:08¼ work around 2:14 (she has been one mile in 2:13 this spring) and she showed that she has fully recovered from her hurried trip of exploration through the Los Angeles streets some weeks ago, a trip which landed her in the manhole of a sewer with a splintered hoof. For pure speed she no doubt has it on any trotter which has been trained here, not excepting Star Winter. In a workout a few days before being shipped away she was some distance back of The Duchess at the three-quarter pole. The roan mare has some whiz and negotiated the last quarter in 30 seconds, but the filly was right on even terms with her when she passed the wire, and it looks that she can step a quarter in 29 seconds any time the question is asked of her.

Durfee has a real two-year-old trotter in the little brown filly which he calls Miss Rico. She is a daughter of the futurity winner Manrico 2:07¼, out of the dam of the fast pacing mare White Sox. She has already been a mile in 2:21, and I saw her finish a mile at a 2:10 shot on the outside of two aged horses. She is scheduled to start in the baby trotter class at the exposition meeting. The four-year-old pacer Contention B. was the only other member of the Durfee stable which I saw work, Bob Smith of Sweet Marie 2:02 fame, who was volunteer second trainer for Durfee while here, working him a mile in 2:11½.

For the pacing speed honors of the local track there is considerable of a battle on between the local horse Homer Mac 2:06¼ and the Cleveland-Chicago owned stallion Dr. Burns Jr. 2:04¼. Up to date the former has a slight edge on Burns by his mile late in March in 2:05½, which he has not beaten since, Jim Stewart being content with working him miles around 2:08 after he had hung up a mark for the others to shoot at. He is a big, rugged looking pacer, wears the hobbles and is one of the kind which apparently thrives on hard work, as he was taken to the Canadian ice races the past winter, where he was a star, and has had no letup since coming back from the ice carnival.

Al Whitney has been bringing Dr. Burns Jr. along carefully and up to May 9 had not beaten 2:09 with the big stallion. Some weeks ago his leg had Al worried a bit, but now he is apparently right on the pin. On the 9th Whitney worked him six miles, the fifth in 2:07¾ and the final in 2:06 flat, going to the half in 1:04. Whitney says that he will not attempt to beat this before shipping to San Francisco, the date of his departure now being scheduled for May 22.

Bessie Custer had been working finely for Whitney up to her last workout, having been an easy mile in 2:13, and her trainer expected to work in 2:10. The chilly weather, however, apparently tied the chestnut mare up and she worked disappointingly on the 7th. Whitney is confident, however, that a few days' letup will bring her around all right. Up to this time she had been one of the best liked trotters at the track.

Ted Hayes has just commenced to brush the rangy chestnut gelding Bon Courage 2:12¾ along, no fast miles having been attempted with him as yet. Little Bernice is under the supervision of Bob Carnathan, but her owner, Sam Watkins, is in the pilot house when the mare is asked for speed. This season she is going free-legged and is apparently taking her work satisfactorily. She is another which is headed for the 2:06 pace at 'Frisco. There is considerable friendly rivalry between her owner and Will Durfee over the respective merits of the mare and White Sox, and Durfee has the long end of a $500 to $250 wager that the latter heads Little Bernice in the summary of the big stake at the exposition.

Jim Stewart has, in addition to Homer Mac, the sensational half-mile track youngster Patrick de Oro, but he has not been in form since being brought back from the Canadian ice races and will not be ready to start at San Francisco. Stewart also has a yearling full brother to Patrick which is a perfect little pacing machine.

While he insists that he has retired from the sport, one of the frequent visitors at the local track is Joe Thayer, formerly of Lexington, one time owner of The Bondsman and other harness horses, but now owner of The Kentucky, a handsome apartment house in Hollywood, one of the most beautiful of the Los Angeles suburbs. John Shepard of Boston is another who makes frequent trips to the track from his home in Pasadena.

Eleven Days' Racing Panama-Pacific International Exposition's

On a track that the work of the past fortnight has proven to be one of the fastest pieces of new dirt ever laid, the first races of the long awaited race meeting at the Panama-Pacific International Exposition will be staged next Saturday afternoon, three good fields being guaranteed for opening day. Two o'clock is the time set by the exposition officials for the beginning of each day's program, and promptly at that hour, one week from today, Starter Updegraff will call the horses for the first heat of the 2:30 trot, sandwiching in order the heats of the 2:07 pace and the 2:08 trot. Seldom it is that a Grand Circuit meeting has staged such a program for its opening day, and the best horses of both gaits from all sections of the country will appear in their respective classes.

For the 2:30 trot there was a possible field of twelve starters, and though it is known that one or two of the entries may be declared out by June first, there will be left a field of generous size and exceptional excellence; it would be a good field in a much faster class, and for a green class there are in evidence some remarkable performers, a number of which have worked miles this spring from 2:08 to 2:10. Spriggan and The Proof, who hold the Pleasanton training season record of 2:08½ for green trotters, will have a chance to show which is best, while Will Durfee will start either Miss Quealy or Virginia Barnette, the latter lass having shown her ability to trot the local track in 2:08. McCloskey, who has a non-winning record of 2:06¼ and already has over ten thousand dollars to his credit as a campaigner, gets his first start of the year in this event, as does Dr. Burns Jr.'s stable mate, Bessie Custer, who is credited with ample capacity for beating 2:10. Robert Bingen snared a record of 2:15½ at the Woodland meeting Saturday and has worked his home track some seconds faster, while Bon Cres has a breeder's mark of 2:10¼ gained as a three-year-old, and has gone right around that figure this year. Miss Perfection has had no work faster than 2:15 since her let-up a few weeks back, and A. R. G. has traveled over the exposition track in 2:14¼.

The 2:08 pace failing to fill, the re-opened event was made for sidewheelers eligible to the 2:07 class, there being several horses present eligible to that class which could not qualify for the 2:08. The entries do not close until June first so that no definite data as to the probable starters is available. Among the horses that are eligible, however, and whose owners will hardly overlook the opportunity afforded them for picking up a bit of cash are Hal Boy, The Beaver, College Gent, Princess Patch, White Sox, Homer Mac, Dick W., Little Bernice, Walnut Grove, Booze, Zulu Belle, Teddy Bear, and perhaps one or two others overlooked "in the shuffle." There should be a fair sized field and the crowd will get a line on a number of the candidates for the money in the big stake that is dated for getaway day.

The 2:08 trot will also bring out a select aggregation of well tried campaigners, including a number that will figure in the major event for horses of their gait and that are also staked down the big line. Vallejo King and Wilbur Lou probably will not start and Judge Colburn's Colorado trotter, Passall, has not yet registered at a California port of call, but the balance are "there like a wolf at the door." Albaloma, one of the most consistent trotters on the coast and the identical lad that put Maymack into her second position in the world's record table last year, will tangle up for the first time with the big Peter the Great stallion entered against him in numerous eastern stakes, Peter McCormick, who put a crust on the oval at Pleasanton early this week with a mile in 2:06½. Durfee will start either Rags, Esperanza or Virginia Barnette and Lon Daniels will pilot Kid Cupid. Alberta Dillon will up hold Canada's end of the argument, Electric Patch will probably appear for the 1:55 stables, while McDonald and Charley DeRyder will team their M. & M. candidates, The Duchess and Mahomet Watts. Fields like these are hard to beat in any country.

Loren Daniels came down from Woodland last Saturday with the Silva horses, including Teddy Bear 2:05, the green pacer Potrero Boy, Bondalean (2) 2:20½, heralded as the real article among three-year-old pacers, and the trotters Columbia T. (2) 2:22½, Eloise Dell 2:26 and Kid Cupid 2:08¾. Teddy Bear "won a main" Sunday in 2:08 and the other members of the stable have had brisk work, Potrero Boy especially showing a great flight of speed, having paced the Woodland track in 2:07 and, on another occasion, having gone to the half in 1:11 and home in 2:10. Joe McGuire collared him at the head of the lane one morning this week with Red Rock and the pair buzzed to the wire in :28¾, which is not exactly standing hitched. Red Rock missed a few workouts after getting cast in his stall some days ago, but has come to his speed very fast and promises to fill his engagement in the big stake. McGuire has only worked him in 2:13 so far but he goes good and is mighty handy. Incidentally, the Colorado reinsman uncovered a likely green pacer Tuesday when he worked Direct Line a shade faster than 2:09, coming through the stretch with Virginia Barnette at a 1:56 gait.

McCLOSKEY 2:06¼ AND A SIDE PARTNER ROUNDING THE FIRST TURN AT THE P.-P. I. E.
The timbered hills of the Presidio in the background.

Monday witnessed the arrival of three of the Pleasanton stables, those of Charley Durfee, A. F. Ruthven and C. A. Spencer. Durfee brought down Twinkling Dan and San Felipe for the big stakes and has turned the local track with them in 2:09 and 2:09¼. With Horseshoe Boy, the big trotter who makes Rags look like a weanling, he has gone in 2:23, while Tim Sexton's Future Tramp is just being started up again. Durfee pere (the Horse Review has given us this blamed habit of ringing in French) also has Dr. Ralph Hagan's two-year-old filly Carleta, that trotted here early in the week in 2:22¼, and the three-year-old brother to Esperanza, Carl, who has progressed this week to a mile in 2:15½.

Ruthven has his full stable headed by Walnut Grove 2:05¼, his main dependence for the fast classes both here and down the big line. The black fellow is standing up well and before leaving Pleasanton turned the trick in 2:07½, 1:01¾. He was due for a fair work here yesterday or today, and is the only member of the string that has yet been let down very far.

Spencer was also due for a workout with Bonnie Ansel and The Proof just too late for publication, but both have been beating 2:10 of late and will furnish competition for the folks they race against, while the two-year-old filly, The Expense, worked at Pleasanton in 2:22, 1:10, :32½. Charley tried her a bit here Thursday, going the route nicely in 2:24¾, with the last half in 1:08. Frank Goularte also came down from Pleasanton early in the week with his trio of matinee horses, J. C. Simpson, now pacing, Decoto Boy and Aerolite Jr. Frank is entered for Sunday's fray.

Thursday morning horses came in pretty fast for a few hours, the Woodland delegation arriving a little in advance of the second column of the Livermore valley reserves. From Woodland Stock Farm Superintendent Harry Dowling brought the brand new trotters Sadie Ansel (2) 2:23, Ruth Ansel (3) 2:21 and Robert Bingen 2:15½, as well as the older standbys Lottie Ansel (2) 2:14¼, who has worked in 2:13¾ so far this year, and the free-for-all pacer Clara Mac 2:04½, who has turned the Woodland track in 2:07¼. Harry also brought along the high school saddler Prince Arista to familiarize him with metropolitan life. Will Ivey has the season's first new 2:10 trotter, Moko Hall, and his daughter Tennie Hall (3) 2:23, with a trial to date in 2:19; Jim Donnelly, Frank Wright's matinee pacer, who has worked in 2:12, and the D. D. McDonald gelding Donald, with a trial of 2:09¼ and some very fast fractional distances.

Elmo Montgomery had a quartette of pacers in the car, headed by that old war horse Jim Logan 2:01¾, winner of Saturday's free-for-all pace in 2:06 and 2:08. He has been the route in 2:05½ and Elmo believes that if the track here suits him he can pace some very fast miles, as he is sound and hard as nails, having had a lot of work from seven to eleven. Dan Logan 2:07¼ has been beating ten, and Booze, the Sacramento sidewheeler, was second in 2:06 last week and Jack Lauffer has decided to start him in the big pace. Elmo's bunch is rounded out by Lock Logan 2:07¼, the year's first new pacer for the ten list, and a husky, racy looking lad he is.

Charley DeRyder had the big string of the Pleasanton contingent, bringing down about all of his stable with the exception of Bertha Carey. Joe Patchen's work last week in 2:05 is about the boss performance of the year in this neck of the woods, and Maymack has been working fast and well. Zomblack turned the Pleasanton oval Saturday in 2:06¾, which ought to mean that he has the lick to annex a little of the cash here, and Madame Mac delivered her "valedictory" at Pleasanton in 2:10, 2:09, 2:08, something of a green pacer her own self. Mahomet Watts has nearly equaled his record of 2:08¼ and Anvilite and Miss Perfection are both doing nicely. Bert Webster has Frank Perry (1) 2:15 in tiptop shape and also brought down Rodney Patchen for the three-year-old pacing stake.

Frank Childs also pitched camp on the beach with a string of five, of which but one, Bon Guy, has failed to beat 2:10, and he is rapidly coming nearer to that figure. Loe Blossom has had a mile and a repeat right around 2:08 recently, and while she has some bearcats to go up against in the big trot she ought to be a contender all the way. O. U. C. had a stiff workout early this week in 2:08¾, 2:07, 2:08, and the Frank Anderson pacers, Imbro and Jim Hill, have both been traveling in 2:09, so that Frank will be pretty muchly in evidence throughout the meeting.

V. L. Shuler and Peter McCormick are another pair that arrived Thursday, after having "plum ruined" the Pleasanton track on Tuesday. They burned it up so that Monte hasn't been able to stick a harrow into it yet and threaten to do the same kind of a trick to Mr. Maxwell's brand new course here. A mile in 2:08½ with a repeat in 2:06½, the last half in 1:01½, is enough to crack any ordinary dirt. Peter has had a good deal of experience on the twice arounds and is going to be a tough customer to handle. Shuler also brought along John Gwynne, who has improved in his gait and has been showing some nice halves and quarters. Millard Sanders still has Shuler's pacer, Fleeta Dillon (2) 2:08¾, and came down with her and two other members of his stable, the guideless pacer Barney Oldfield and the green trotter Howard's Comet, who has worked for him in 2:12½. Fleeta has a raft of speed, as she has shown 2:07¾ for Millard, and if she behaves like a lady she will be wearing a new record before the season is over.

With this bunch of horses on hand the clockers have quite a bit of trouble keeping cases on all of them, and next week their time pieces will be worked harder than ever, as most of the Pleasanton late arrivals who were content to go easy for two or three days will be "sitting on their tails," as will the Woodland contingent, and by Tuesday or Wednesday at the latest all the horses that are to start here will be on hand. All during the week the morning workouts have attracted a good deal of attention from exposition visitors and the interest shown in the trotters and pacers, both on the track and by visitors at the stables, augurs well for the success of the meetings. The final quarter is perhaps the fastest in the land, and it is not a short one, either. The way both trotters and pacers come through the lane from :28¾ to :30 brought up this

June Race Meeting Begins Next Saturday

World's Best Horses

question and early in the week the stretch was measured by a number of horsemen and found full length. White Sox has traveled the course in 2:06½ and repeated in 2:06¼; Margot Hal in 2:07¾; Virginia Barnette in 2:08 and repeated in 2:08½; Esperanza in 2:09¼; The Duchess and Star Winter in 2:09, Laramie Lad in 2:10, while there have been numerous miles from 2:10¼ to 2:13, and "everything," apparently, has come through the lane in :32 or better.

Saturday, June 5, will be one big day.

GOOD ENTRY LIST AT HARTFORD.

Hartford's Grand Circuit meeting last year may have had its bumps owing to the competition in evidence at Detroit, but most assuredly no fault can be found with the patronage afforded its early closing events for this year's program, scheduled for September 6 to 11. For the nine events recently closed the fields average well over twenty, while the 2:21 trot has fifty-four nominations. Here are the entries to the major events in which coast horses are engaged:

2:08 Class Trotting. The Charter Oak, $5,000.

Samuel Harris, ch s Axtien by Axworthy, dam Protein by Glenwold.
Pastime Stables, b s Lee Axworthy by Axworthy, dam Gaiety Lee by Bingen.
Hillanddale Farm, ch s Bonington by Bellini, dam Nettie King by Mambrino King.
Walter Cox, ch m Lady Grattan by Joe Grattan, dam Lady Downing by Hershow; b s Worthy Prince by Prince McKinney, dam Nell Worthy by Axworthy.
A. McDonald, ro m Duchess by Alertine.
E. A. Colburn, blk s Pass All by Crystallion, dam Miss Daisy Deane.
V. L. Shuler, br s Peter McCormick by Peter the Great, dam Pearl Cecil by Cecil W.
I. L. Borden, br s Albaloma by Almaden D., dam Loma B. by Stam B.
E. F. Geers, blk m Dorsh Medium by Red Medium, dam Vicanora by Viceroy; blk s J. Malcolm Forbes by Bingen, dam by Grand Sentinel.
T. W. Murphy, b s Peter Scott by Peter the Great, dam Jenny Scott by Bryson; b g Bright Axworthy by Axworthy, dam Honor Bright by Antonio; b m Lulu Lumine by Orator, dam Lumine by Stately.
Algot Johnson, ch g Reusens by Prince of India, dam Miss Sligo by Sligo.
J. H. Carmichael, ch g Jack London by Constenaro, dam Polly D. by Dumas.
James Butler, ch m Allerta by Directum Kelly, dam Anne Allerton by Allerton.

2:11 Class Trotting—$2,000.

Samuel Harris, ch s Axtien by Axworthy, dam Protein by Glenwold.
A. M. Watson, b s John R. Dillon by Sidney Dillon, dam Miss Grattanwood by Grattan Boy.
C. A. Valentine, b g Victor Star by Star Simmons, dam Evictus by Tinder.
Walter Cox, b s Worthy Prince by Prince McKinney, dam Nell Worthy by Axworthy; bl m Fair Virginia by Zombro, dam Fricka by Bingen.
Edw. C. Quin, b m High Born Lady by The Northern Man, dam Mary Lloyd by Vice Commodore.
A. McDonald, b s Adbell M. by Moko, dam Miss Adbell by Adbell.
V. L. Shuler, b s John Gwynne by McMyrtle, dam by Secretary.
I. L. Borden, b m Baby Doll by Tom Smith, dam Kate Lumry by Shadeland Onward.
E. F. Geers, b m Russian Dame by George Muscovite, dam by Expedition.
T. W. Murphy, b m Lulu Lumine by Orator, dam Lumine by Stately; b s Great Isle by Peter the Great, dam Belle Isle by Actell; br m Sadie S. by Archdale, dam Catherine S. by Patronage.
James D. Sullivan, b s J. D. S. by Earl of Chatham, dam Fylie by Sherman Wilkes.
C. H. Ridgley, ch s Captain Cacada by The Captain, dam Catania Maide by Allerton.
Robert Proctor, b g Baron Abberdeen by Baron Wilkes, dam by Abberdeen.
W. T. Crozier, b g Earlwood L. by Earl of Chatham, dam Marietta L. by Nouredain.
Beaumont Farm, b m Lady Watts by Gen. Watts, dam Belle Andrews by Billy Andrews.
George A. Graves, br g Bronson by Bingen, dam Myrtle R. by Monaco.
F. L. McQuilty, b g John Mack by Geo. A. Fuller, dam Ida Purple by Cuting.
E. B. Oates, b s Nathan Axworthy by Axworthy, dam Bertha Bennett by Prodigal.
Edward Peterson, b g Tom Smith by Greenroi, dam Specks by Conrad.
W. H. McCarthy, b g Parcliffe by Stormcliffe, dam Parla by Parole.

2:06 Class Pacing—$2,000.

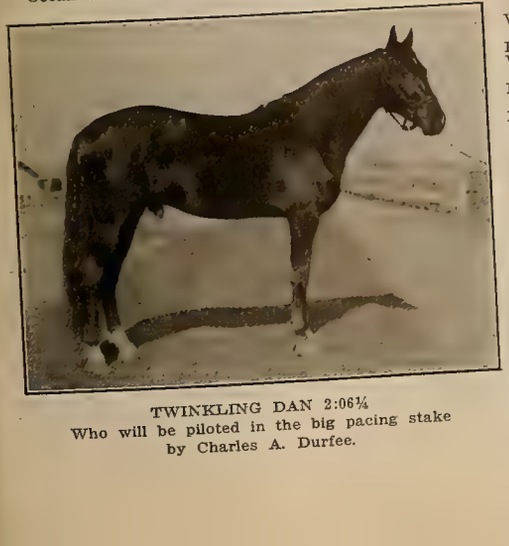
C. A. Valentine, blk m Beth Clark by Joe Patchen, dam Ocean Chimes by Shadow Chimes.
W. L. Snow, Agent, blk m Lelia Patchen by Dan's Brother, dam Jessie Stanley by Indianapolis Jr.
W. B. Barefoot, b s Single G. by Anderson Wilkes, dam Little Gyp by Shoo Fly Gyp.
Walter Cox, b s Baron A. by Baron Medium, dam Elcara.
A. McDonald, br g Rastus by Liberty Boy, dam Georgia Rose by Grants Abdallah.
A. F. Ruthven, blk s Walnut Grove by Constantine, dam Lindis by Jackdaw; br m Rose Equity by Equity 6866, dam Anna Rose by Orphan Knight.
T. W. Murphy, b g Major Ong by Major Gantz, dam Bessie J. by Iowa Sentinel; b s Peter Farren by Peter the Great, dam Nellie Farren by Jay Bird; r g Hal S. by Hal Chaffin, dam Bessie Hal by Red Hal.
W. P. Leech & A. G. Ireland, b h Dr. Burns Jr. by Dr. Burns, dam Topsy by Jessie Pennington (time allowance claimed).
J. B. Jones, b h Our Colonel by Col. Cochran, dam Berene by Bernal (time allowance claimed).

2:10 Class Pacing—$2,000.

C. A. Valentine, blk s Judge Ormonde by Ormonde, dam Hazel Banks by Sirliss.
W. L. Snow, Agent, blk s Thistle Patch by Joe Patchen, dam Sarah Ann by Thistle.
H. H. Stokes, blk g Patrick M. by Norbells, dam by Gamester.
Walter Cox, b g B. M. by Reardale; b s Aconite by Aquilin, dam Mattie S. Wilkes by Simmons.
S. S. Bailey, b g O. U. C. by C. The Limit, dam Rosie Woodburn by Guy Wilkes.
E. J. Rochon, b h The Beaver by Searchlight, dam Ripple by Glenbrook.
A. F. Ruthven, blk s Walnut Grove by Constantine, dam Lindis by Jackdaw.
E. F. Geers, br c Hal Plex E. by Empire Hal, dam by Duplex.
T. W. Murphy, b g Major Ong by Major Gantz, dam Bessie J. by Iowa Sentinel; b s Dustless McKinney by McKinney, dam Dustless Queen by Mamb. King; b s Peter Farren by Peter the Great, dam Nellie Farren by Jay Bird.
Ellis Franks, b s Russell Boy by Rustic Patenter, dam Maud F. by Vatican.
Nat Ray, b s Tredel by Tregantle, dam Delchalence by Delmarch.

DR. BURNS JR. 2:04¼
The leader of the eastern invaders and his trainer, Al Whitney, at Los Angeles.

Maplewood Farm, blk m Anna Carll by Arbitrage, dam Corosis by Orotorio.
A. S. Rodney, b g Lustrous McKinney by McKinney, dam Splendor by Mamb. Startle.
Bergen Horse Co., ch g Ashlook by Ashland A., dam Miss Look by Drestell.
Edward Peterson, b g Hal Boy by Hal B., dam Altalena by Altamont.



2:14 Class Pacing—$2,000.

C. A. Valentine, gr m Altawood by Allenwood, dam by Alcyon.
G. R. Snedeker, b s Colonel Echo by Echo Todd.
W. L. Snow, Agent, b s Bingen Pointer by King Bingen.
Walter Cox, br m Camelia by Cummer, dam Veta S. by Sidney Prince. (Time allowance claimed.)
S. S. Bailey, b g O. U. C. by C. The Limit, dam Rosie Woodburn by Guy Wilkes.
E. F. Geers, br g Budd Elliott by Prodigal, dam by son of Harold.
T. W. Murphy, b g Peter L. by Como; ch s Derby Custer by Ed. Custer, dam Princess Derby by Chas. Derby; ro g Hal S. by Hal Chaffin, dam Bessie Hal by Red Hal; b m Jean by Flosco.
W. L. Eaton & G. B. Daley, b s Ben Locanda by Locanda, dam Emma T.
D. F. Keefe, Agent, b g Kid Downey.
W. T. Crozier, br s John A. P. by Bingen, dam Lady Margaretta by Alliewood.
Maplewood Farm, b m Baby Bertha by Silk Cord, dam Bertha Derby by Radium Silk.
M. L. Smith, blk s Madison Square by Walnut Hall, dam Sister Min by Moko.

Another matinee of six races will be held Sunday at the exposition track.

◈◈◈

Philip C. Byrne, one of the well known members of California's older generation of horsemen, died some days ago at Bakersfield in a stall at the track there, having been taken suddenly ill at the conclusion of the second heat of a matinee race in which he was a participant. Mr. Byrne in years gone by was editor of the Dutch Flat Times, later serving as deputy sheriff and eventually getting into the trotting horse business, of which he was a loyal supporter. At the time of his death he was the owner of the stallion Scott McKinney, and throughout the winter and spring had maintained a training stable at Hanford.

TWINKLING DAN 2:06¼
Who will be piloted in the big pacing stake by Charles A. Durfee.

BABY DOLL 2:10¼
I. L. Borden's substitute for Albaloma 2:08¼ in the $20,000 stake for 2:10 trotters.

SILVER CUP FOR NORTHWESTERN CLASSIC.

A silver loving cup for the two-year-old colt or filly that wins at the state fair this fall is offered by C. A. Harrison, Seattle horse owner and fancier, according to a letter received yesterday morning by secretary of the fair, Frank Meredith. The only condition imposed by donor is that the horse should be foaled, bred, raised and trained on the North Pacific circuit. The cup is to be known as the C. A. Harrison cup.

"Mr. Harrison is a great horse lover, and wants to see the best of them perpetuated," said Mr. Meredith yesterday, after receiving Mr. Harrison's letter. "He is himself a horse owner, and his letter to me declares that he is especially enthusiastic on the subject of colt raising. It is the voluntary things like these that make the life of the fair secretary easier to travel."

Mr. Harrison is the manager of the New Richmond hotel in Seattle.—Yakima Morning Herald.

Horsemen finding themselves in need of more paraphernalia for getting their horses safely around the short turn at the P.-P. I. E. will find a full line of Sell goods at J. David West's, 1267 Golden Gate Ave. Mr. West has catalog Number 58, the new one, ready for distribution to applicants.

◈◈◈

Mr. and Mrs. Thomas D. Newton of Detroit were among the passengers aboard the Finland from New York to San Diego, arriving at the southern exposition city some days ago and making their way leisurely to San Francisco, where they are enjoying the exposition to the uttermost. Mr. Newton, as ex-president of the Michigan State Fair and present owner of the fast pacers Grand Marshall 2:07¾ and Thistle Patch, the lad that was second to King Couchman in last year's C. of C. at Detroit, finds the speed barns and the track a great "drawing combination," and has renewed many former acquaintances among the horsemen gathered here for the summer maneuvers.

F. W. KELLEY, Secretary
EXPOSITION GROUNDS, SAN FRANCISCO

Initial Matinee Is an Unqualified Success

All doubt as to the popularity of harness horse racing with the exposition crowds was dispelled Sunday afternoon when, in spite of lowering skies that promised a bit of rainfall—a promise which was duly to be fulfilled—a crowd considerably in excess of the two twousand mark made its way to the race track at the exposition to witness the opening matinee of the San Francisco-California Driving Club. All morning there was a good crowd of devotees of the sport on hand to watch the warming up of various candidates for the day's honors and the workouts of numerous other horses due to make their appearance in professional company during the June trots, and shortly after noon the turnstiles began clicking away as the two-bit pieces rattled into the gatemen's strong boxes and the crowd began gathering in the big grand stand.

In any ordinary amphitheatre the spectators would have made a big showing, and as it was they filled several sections of the big P.-P. I. E. stand, with its seating capacity of over thirty thousand, the topmost tiers of the sections near the wire finding as much favor as did the chairs in the lower boxes. In fact, "climbing a little higher" merely adds to the general enjoyment of a visit at the P.-P. I. E. track, as no matter how high your fancy dictates that you go the horses are always right under your eyes, and each succeeding rising tier of seats adds so much in the way of a vantage point for viewing the matchless panorama of San Francisco bay and its bordering hills, from "the gate" to the crest of the coast range rising far away to the eastward above the heights of Berkeley. Never was a track constructed in such a wonderfully beautiful location from a scenic viewpoint, and at no mile track in the land is afforded a finer view of the track itself and the fields of racing horses. Nor, by the same token, have there been laid many speedways where the footing was as fast and safe, for new dirt, as is the course provided by the executives of the P.-P. I. E.

The crowd was a good natured one, composed pretty largely of folks who know horse racing when they see it—and who also knew the horses and their drivers, though many strangers were in evidence as well. Stadium standbys were on deck in generous numbers and their favorite horses and drivers of former seasons were given hearty greetings when they appeared, while horsemen from Sacramento, Marysville, Woodland, Pleasanton, San Jose, Los Angeles and numerous other outlying points met and "swapped notes" on training operations and indulged in the ever-cherished pastime of the lovers of man's next and nearest friend, conjecture as to future winners and the time to be made. Not long did it require for most of the "wise ones" present to learn that grand old Effie Logan had been since the day before the dam of four performers in 2:07¼ or better, or that Joe Patchen II had gone the route at Pleasanton in better than 2:05 with his old pilot, Billy Fleming, at the helm. A nicer gathering, for the opening of the season, could hardly have been made to order.

Early in the afternoon, with the crowd still gathering, Starter Dwyer called the 2:30 trotters, and after a false score or so the word was given and the racing season of 1915 was really on. Joe McTigue, with his big brown trotter Darby Mac, opened up a good lead in the early portion of the mile, but could not stave off the rush of Valeen M. in the stretch, Ernest Doyle winning handily with the former member of Marvin Childs' stable. The second heat was a race from wire to wire between the same pair, Joe and Darby contesting every foot of the way and putting up a finish that brought as much applause as if the mile had been many seconds faster, Ernie and Valeen again proving just a little too much for them.

The 2:15 pace brought out a pretty well matched quartette of Stadium favorites—Bradmont, Hamburg Belle, May Belle Dillon and Delilah. The Cohen mare broke before getting out of the stretch and the other three gained a good bit of ground on her. Delilah led the way to the wire, with Hamburg Belle second, but a protest on the part of T. D. Sexton, who had the mount behind Bradmont, was sustained by the judges after a bit of consideration and the heat was awarded to the Ginocchio mare. Hamburg Belle and Delilah went up to the half in the lead the second time out, with Bradmont trailing, Sexton coming through in the stretch for a nice win in 2:13½. In the third heat Cohen went to the front before getting out of the straight, but the black mare broke in the third eighth, everything passing her. In spite of her jimmy she responded to a good drive in the stretch and finished a fairly close second to the Bradmont horse, who paced a consistent, well behaved race all the way through. Any one of this four can be counted on to race not far from ten in the not far distant future, from Sunday's indications.

With the 2:15 sidewheelers going better than fourteen it was an odds-on spec that the free-for-allers would ramble along below ten, and on this score no one was disappointed. Teddy Bear was accorded a whole lot of respect owing to his earlier showing at Sacramento and Dixon, and Silva had many well-wishers in the crowd; Zulu Bell had worked the exposition track two or three times in merely fractions slower than nine; Vera Hal can always be depended upon for a contest, and Dick W., with a new pilot and not an enviable record of late for first-class behavior, was properly given the least consideration. Vera Hal was scarcely settled from a break in the stretch when the field got the word, A. Ottinger—the A. standing for Adolph or Admiral as you choose—going away good with the Belle and scurrying to the quarter in :32¼. Cohen set sail down the flat and collared the black mare at the half in 1:03¾, taking the lead around the turn. At the head of the lane Silva was coming fast and found himself out in front at the wire in 2:08, Vera Hal breaking in the stretch. Going away in the second heat the three contenders were nicely lined, with Sexton trailing, Zulu going to the front on the turn, Vera again moving up in the back stretch and Teddy comfortably moving along in Zulu's wake. At the three-quarters Silva took out into third position and again outfooted his opponents to the stand in 2:08, a mighty nice showing for an amateur at this season of the year.

Jimmy Ryan, still carrying a bad leg from his tumble at the Stadium last year, was on deck to see his Irish trotter, St. Patrick, deliver the goods in the free-for-all trot after two nice drives at the hands of Freddy Lauterwasser. Pat really is a cosmopolitan, as he was owned successively by a German, an Irishman and another Irishman, has had some experience in a roundabout way with Belgians, is trained at present by Al Schwartz, was driven Sunday by Lauterwasser and was timed and judged by members of diverse nationalities. However "they are all good American names," but at that the big trotter doesn't seem to be a genuine neutral, as he has a hankering for beating folks that makes him a rabid partisan. He won the first heat nicely after Birdeye had set the pace for a good part of the way, and landed the second after displaying a handy turn of speed in the stretch. Graham Bellini acted like a horse that would "do" with a few more races under his belt.

Wm. Tell, driven by "Shorty" (alias Richard) Roberts indulged in a runaway break while scoring for the first heat of the 2:20 pace, and was given scant consideration by the starter when the field did get the word, settling, however, in time to make up considerable ground and finish well inside the flag, Zorankin going to the front down the back stretch and never being headed. Jack, who was evidently feeling the effects of a mishap early in the afternoon, was not strung out extensively by McDonald and the judges allowed his withdrawal, while Billy Malough and Emma M. were always trying. Showers interfered with the latter portion of the day's program, Zorankin's teamster refusing to finish the race and indulging in a rather uncalled for performance, the balance of the field going another heat without any apparent grave consequences to either men or horses. William Tell was on his good behavior the second time out and at once stepped to the front and stayed there, the judges declaring the race finished and making the award of the cup to Roberts.

Owing to the rain the 2:25 pace was made a mile dash, Golden Buck cutting out the pace with Marie Fitzsimmons and Marin hanging right with him to the half, where the Idaho mare went to the front. Until well down the stretch it was a three-horse race, but Buck went off his feet and the northern lass outfooted Marin to the wire by just a comfortable margin.

Early in the afternoon Millard Sanders sent Barney Oldfield, the guideless pacer, a nice half in 1:04½, the chestnut fellow operating on the strange track as unconcernedly as though he had been there often before, only one incident showing his unfamiliarity with the surroundings. He has been getting most of his work on the small ring at Pleasanton, and after starting on the back stretch at the exposition course evidently had it in his head that a full route was required of him as usual, dodging past his caretaker and cutting back into the pole for another mile. The crowd gave him a hearty hail and farewell and enjoyed the feature very much. Here are the day's details:

2:30 Trot—T. D. Sexton Cup.

Valeen M. (E. M. Doyle)	(Doyle)	1	1
Darby Mac (Jos. W. McTigue)	(McTigue)	2	2
G. M. S. (D. E. Hoffman)		3	3
Jonesie Mac (D. E. Hoffman)	(Hoffman)	4	4

Time—2:26½, 2:26½.

2:15 Pace—J. P. McLaughlin Cup.

Bradmont (G. J. Giannini)	(Sexton)	2	1 1
Hamburg Belle (J. Ginocchio)	(Smith)	1	3 3
May Belle Dillon (B. Cohen)	(Cohen)	3	4 2
Delilah (Jack Welsh)	(Lauterwasser)	4	2 4

Time—2:13¼, 2:13½, 2:16.

Free-for-all Pace—L. E. Clawson Co. Cup.

Teddy Bear (Chas. F. Silva)	(Silva)	1	1
Zulu Belle (A. Ottinger)	(Ottinger)	2	2
Vera Hal (H. Cohen)	(Cohen)	3	3
Dick W. (A. Ottinger)	(Sexton)	4	4

Time—2:08, 2:08.

Free-for-all Trot—Jack Welsh Cup.

Saint Patrick (J. J. Ryan)	(Lauterwasser)	1	1
Eloise Dell (Chas. F. Silva)	(Silva)	2	2
Graham Bellini (G. J. Giannini)	(Sexton)	3	3
Birdeye (A. Combatalade)	(Cambatalade)	4	4
Ateka (Boyle & Cohen)	(Boyle)	5	5

Time—2:16, 2:16.

2:20 Pace—A. L. Hoffman Cup.

KANSAS SETS PACE WITH FREE STATE FAIR.

Topeka, Kan., May 20.—The first free State Fair to be held in the United States will be held in Topeka next September by the Kansas State Fair Association.

Topeka and Shawnee county have just voted a special tax levy with which to pay the Fair premiums and this enables the Fair Association to announce that the general admission gate will be thrown open for the entire week.

The tax levy will give the Fair Association a total subsidy of $27,000, which will be ample to pay all premiums in the various departments. It is believed that the free gate will double or treble both exhibits and attendance. The race premiums, as well as all other expenses not included in the premiums to be paid by the county, will be taken care of with funds secured from concessions, privileges, grand stand and other sources.

While the free fair will be an experiment, it is felt that its success is certain. Letters received when the proposition was first launched from leading live stock exhibitors, manufacturers and agriculturists in various parts of the country manifested deep interest in the project, and all indicated their purpose of becoming exhibitors in case the fair was made free. Leading fair men also took a lively interest.

The fair grounds are centrally located in the city of Topeka only six blocks from the State House. They cover 78 acres and represent an investment of $325,000. The property is owned by the county. Four years ago the county voted $50,000 worth of bonds for improvements and the business men of the city contributed $45,000 more. A number of new buildings were added and much general improvement made.

The Topeka fair is one of the oldest in the west although in one of the comparatively new states. It was begun some thirty years ago and with one or two exceptions has never missed an exhibition.

NO PLEASANTON FAIR THIS YEAR.

At a meeting of the directors of the fair association held at the association's building in the driving park on last Saturday it was definitely decided to hold no fair in Pleasanton this year. The local association has simply followed the example of nearly every fair district in California in this step. Without exception, those who have taken definite steps thus far have decided to do away with the fairs this year. This includes even the state fair. It is a foregone conclusion that any fair attempting to hold a meeting this year would have little or no exhibits as the best of everything has been collected for the big show in San Francisco and there is little left in the country districts with which to make a display. While Mr. MacKenzie has not given his consent to doing away with the show on the local grounds this year, the association is reasonably assured that he will do so and that he will not demand that an exhibition be held simply to hold the lease which the association has with him.

An assessment of $10 a share was levied on all outstanding stock to pay indebtedness.—Pleasanton Times.

ROY JOHNSTON'S DILEMMA.

The individual who said that trotting speed and pacing speed are so closely allied and interwoven that either one will produce the other, certainly rang the little bell by plunking the bull'seye squarely in the middle of the center. Roy Johnston bred and developed the pacer Strathtell 2:14¼ and did so good a job at it that it was the most natural thing in the world to try it again. Also, he went about it in the most practical and logical manner by breeding the same dam, who, by the way, is a daughter of Strathberry p. 2:04¼, to that famous old pacer, Charles Simmons 2:07¼. Certainly this looked to be the winning combination, both sire and dam fast pacers themselves. The result of the mating is a beautiful chestnut colt, now two years old, a fine, husky, upstanding youngster, as handsome as one can see in many a day's travel. But listen! He is as square and pure a trotter as ever wore a toe-weight! And another colt, a year younger, out of the same dam and by Iowa Todd p. 2:04¾, is likewise a trotter. What do you know about this breeding business anyway?—Horse Review Correspondent.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

A NEW NATIONAL MATCH.

The civilian rifle shooters are to have a competi-on of their own, the Assistant Secretary of War aving approved of a national competition to be held nnually for civilian rifle club teams to determine he club championship of the United States, the hooting to be done with the military rifle over mili-ary ranges at military targets. Designs are being ubmitted to the War Department by prominent rophy makers of the country and every indication oints to a very handsome prize which will be worth triving for. Instead of making this competition a eries of interclub matches the same as the indoor hoot, it was decided by the Executive Committee f the National Rifle Association of America, under whose auspices the competition will be run, to have ne match, to be shot simultaneously by the club eams all over the country. A period of several weeks will be designated in which the official scores can be shot so that a club can select a day when weather conditions are good and no club will be handicapped on account of weather conditions, as would happen if only one day was selected. The shooting will be done under an executive officer and range officer appointed by the N. R. A. and official targets and score cards for this purpose will be issued by the N. R. A.

The conditions of the match will be as follows: Each civilian rifle club affiliated with the N. R. A. and in good standing can enter one team, the team to be composed of ten members of the club who have been members for six months preceding the match.

Distance and number of shots—200 and 300 yards rapid fire on Target D, using the battle sight. Ten shots at each range.

Time limit and position—200 yards, kneeling from standing, time limit 1½ minutes. 300 yards prone from standing, time limit 2 minutes. Two sighting shots and 10 shots for record at 300, 500 and 600 yards, slow fire. Target A at 300 yards; Target B at 500 and 600 yards. Sand bag or other rest can be used at 600 yards.

Entrance fee, per team, $5.00.

Prizes.—A set of ten silver medals will be given to the winning team and a set of ten bronze medals to the winning team in each of the lower classes. To determine the classes, all clubs at the close of the competition will be divided into classes of ten or twelve clubs and the medals awarded accordingly. The standing of all clubs will be decided by their aggregate score, ties being figured in accordance with the N. R. A. rules, and the way this will work out is as follows:

One advantage in making the conditions of the match the same as the firing course laid down for rifle clubs is that scores made by team members in the match may be counted for qualification if desired.

If thirty clubs enter the competition the club standing No. 11 in order of scoring will be the winner in the second class and the club standing No. 21 will be the winner of the third class. This will bring an element of uncertainty as to prize winners in the competition which will make it more interesting. It is possible that special medals will be given for the highest individual aggregate for all the matches and the highest individual score for rapid fire and slow fire. With nearly 500 clubs now on the N. R. A. roll this should be one of the most important shooting competitions of the year and should have an entry of not less than fifty clubs for the first competition. It is proposed to hold the competition during the month of July and entries can be made at any time up to the first of July.

Rifle and Ammunition.—The service rifle model 1898 or 1903, with service ammunition, will be used. Reloaded ammunition can be used provided the bullet is so seated that it can be worked through the magazine. The "Krag" ammunition issued by the Ordnance Department to clubs may be used in this competition.

Plans for the National shooting competition for 1915 are materializing. Under the present state of the public mind and the almost universal demand for better national defense and some form of training of our citizens, this year's shooting competitions have more than usual interest. Attention has been called in the public press to the lack of proper training with the service rifle in this country. Records have shown that not more than 40 per cent of the National Guard was taken to the rifle range during the year 1914. Congress established the national matches solely with a view of increasing rifle training among Uncle Sam's services. Owing to the unusual condition of affairs this year, undoubtedly the matches will be more generally attended than ever before as States are brought to the realization of the importance of this training. It is probable that there will not be a State in the Union that will not be represented in the 1915 matches. Even West Virginia, whose appropriation for the maintenance of the National Guard was omitted this year, has declared its intention of finding some way of sending a team to Florida where these national matches are to be held. Congress at the last session still further gave its approval and assistance to rifle teams by appropriating $50,000 to assist States which have to send teams from long distances in paying transportation charges so that such States as Washington, Oregon and Maine will not be handicapped this year in the sending of rifle teams to Florida.

The range in Florida, where the matches of 1915 are to be shot, is the second largest in the United States in point of target facilities, it being outranked only by the Camp Perry, Ohio, range, and it is second in point of attractiveness and salubrious location, being led only by the famous Sea Girt, N. J., range, which is located on the Atlantic seaboard. The Florida range is only eight miles from Jacksonville, with which it has direct communication by both railroad and steamboat services on the St. Johns river. Railroads serving the Florida shoot have announced a special rate which will also be of great help towards a large attendance. This is the first time in five years that special rates have been granted.

The Executive Officer for the matches is Col. Richard M. Blatchford, U. S. A., Commandant of the Army School of Musketry at Fort Sill, Okla. The teams to represent the cavalry and infantry of the U. S. Army have not yet been organized nor have the captains been appointed. It is rumored that the infantry team will be captained by Maj. Geo. C. Shaw, U. S. A., who is now on his way back from the Philippines. A team representing the Naval Academy will be sent to the national matches again this year and efforts will be made to overcome the prejudice of the officials of the Military Academy at West Point to again be represented by a rifle team. Only in one national match has a team from the Military Academy participated. As is customary, the organization and control of the matches, as well as those of the National Rifle Association of America, which will precede the national matches, will be in the hands of the regular army, and soldiers will be sent to pitch the camp and do the marking. The scoring will be done by a special company of marines, thus insuring the highest standard of services for this important duty.

Very few changes have been made in the conditions of this year's matches. A course consisting of 200 and 300 yards rapid fire, ten shots at each range and 300, 600 and 1000 yards, slow fire, 15 shots at each range, has been adopted. Every team must have on it at least six new men, and all State teams must be selected by preliminary contests held on State ranges. The service rifle and ammunition as issued by the Ordnance Department will be used by all teams. The matches will begin the morning of October 18 with the National Individual Match, to be followed by the Team Match and the National Pistol Match; October 15 and 16 are designated for the preliminary team practice. The six days preceding this or from October 8 to 14, will be held the matches of the National Rifle Association of America. For the first time the National matches will be thrown open to entry of teams from universities and colleges maintaining military instruction and military schools schools and academies.

THE SOUTHERN HANDICAP TOURNAMENT.

[Special Report.]

The Interstate Association's tenth Southern Handicap Tournament was held at Memphis, Tennessee, May 11, 12 and 13, under the auspices of the Memphis Gun Club. It was one of the best tournaments ever given south of the Mason-Dixon line, and was a success in every way. It far exceeded anything expected by the members of The Interstate Association and the Memphis Gun Club. States as far west as Colorado and as far east as Delaware were represented. Something like 170 different trapshooters took part, among them being three previous winners of the Southern Handicap, namely, C. G. Spencer, St. Louis, Mo.; Geo. L. Lyon, Durham, N. C., and S. L. Dodds, Hickman, Ky. H. N. Bellinger, president, A. H. Campbell, vice-president, and Ed. Crook, secretary, of the Memphis Gun Club had attended to all preparatory arrangements and everything during the week moved without a hitch.

The Handicap Committee was composed of A. H. Campbell, Memphis, Tenn., J. W. Bell, St. Louis, Mo., G. M. L. Key, Meridian, Miss., Geo. W. Clements, Little Rock, Ark., and H. N. Bellinger, Memphis, Tenn.

Practice Day, Monday, May 10.—The field that gathered practice day was a most brilliant one, the stars entered representing men who have taken titles ranging from the national amateur champion down to some half-dozen or more State champions. It was stated that the 97 entrants on practice day, in five 20-bird events, marked the largest crowd ever competing on inaugural day at a Southern trapshooting tournament.

Charles G. Spencer, who won the Southern Handicap when that feature was open to pros and amateurs, was the highest among these honor men, with 96.

The 90% and better men were: Woolfolk Henderson 97, A. B. Richardson (Dover, Del.) 97, Chester C. Hawkins (Memphis) 96, J. H. Noel (Nashville) 96, R. A. King (Delta, Col.) 96, George Lyon (Durham, N. C.) 96, G. M. F. Key (Meriden, Miss.) 94, J. B. Duncan 94, Bart Williams (winner of Mississippi championship 1914) 94, G. B. Crag 93, M. F. George 93, A. C. Conner 92, J. W. Bell 92, W. H. Cochran 92, Sam Huntley 91, W. H. Joyner 91, G. L. Dearing 91, B. F. Duncan 90, F. F. Fleming 90, Dr. W. L. Henderson 90.

The high "pros" were: W. D. Gibbs 98, Homer Clark 97, W. R. Crosby 96, C. G. Spencer 96, T. H. Fox 95, Ed. Banks 94, C. E. Goodrich 94, Fred Bills 93, T. A. Marshall 92, Walter Huff 92, J. R. Hinkle 91, R. W. Clancy 91, H. J. Donnelly 91, Geo. Maxwell 90.

The "Little Joker" trap was an added attraction and gave the contestants an opportunity to try their skill between events. This trap furnished much amusement and always attracted a large gallery of spectators.

First Day, Tuesday, May 11.—Although hampered to such an extent by rain that the double target event had to be postponed, a field of 141 faced the traps on the opening day of the tournament. The card was ten 15 bird events.

Geo. L. Lyon was the leader, breaking 147 out of a possible 150 targets. He was given a hard run by S. A. Huntley of Omaha, Neb., who finished second with one target less.

Charles G. Spencer, professional, was third with 145, while A. B. Richardson, who tied with Woolfolk Henderson, Monday, for high amateur, was fourth with six missed. Ties then came into play which were carried down to very nearly the last man of the field. It was generally agreed that the day was one of the closest for competition ever witnessed so early in the tourney. Scores were phenomenal, Lyon's being considered somewhat in the nature of a record under existing conditions. Showers started during the morning and continued with short letups until along toward the late afternoon, when the downpour became steady and very nearly reached the point where further sport was impossible.

John Noel, of Nashville, was fourth, with 143. Charley Spencer led the "pros" with 145; "Jack" Gibbs* and J. R. Hinkle* were second, with 143; Geo. Maxwell* and T. H. Fox, third, with 142, and W. R. Crosby* fourth, with 141. Those with 90 per cent and better were: A. J. Hill and J. N. Knox, 142; Woolfolk Henderson and J. T. Austin, 141; A. C. Connor, Fred King and R. W. Clancy*, 140; H. Clark, Walter Huff*, E. Caldwell, T. Cassity and J. K. Warren, 139; W. H. Cochrane, J. B. West, W. Williams, J. R. Livingston, Tom Marshall*, J. B. Snowden, 138; J. Bell and Dr. W. L. Henderson, 137; J. T. Chipley, L. J. Robinson, 136; Bart Williams, Fred Bills*, Ira Galbraith, J. C. Wright, B. Finley and J. S. O'Sullivan, 135.

The best long runs were: A. B. Richardson 113, G. L. Dearing 88, R. A. King 74, Woolfolk Henderson and J. B. West 67 each, J. H. Noel 52, J. N. Knox 51.

Second Day, Wednesday, May 12.—Shooting a wee bit erratic, yet in such good form that he outfinished a field of classy amateurs, J. I. Chipley, of Greenwood, S. C., 18 yards, broke 92 of a possible 100 targets in the Preliminary Handicap and took first honors for the day. He was second only to Walter Huff, trade representative, who shot from the 21-yard mark and scored 93.

Chipley, while a veteran in the game and recognized as an able shooter, had never won a big event of importance. Old enthusiasts recall that he attended many meetings and always placed well up in the money, but today's laurels were about his best. In winning the trophy and first money prize, the South Carolinian displaced over a dozen favorites, including Woolfolk Henderson, S. A. Huntley, A. B. Richardson, George L. Lyon, and other seasoned trapshooters.

Chipley, who was shooting from the 18-yard mark, started fairly well with 18 of his first 20, but slumped to such an extent that when he recorded 16 in his next event the outlook appeared pretty blue. A 20 and two 19's followed in order.

Seven contestants, breaking 91, tied for second and third moneys and trophies. J. T. Austin, Monroe, La., won second trophy, in the 20-target shoot-off, losing one. Isaac Andrews, of Spartansburg, S. C., when he broke 18, displaced the remaining contestants and took third trophy. The money, following an agreement between the men before the shooting, was evenly divided. Those in addition to Austin and Andrews, who were in this tie were Bart Williams, S. L. Dodds, W. F. Henderson, E. R. Tansil, and Andy Meaders. Meaders did not compete in the last 20, leaving before the shoot-off was held.

Interest in the afternoon for the better part centered around the squad in which Woolfolk Henderson, Huntley, Richardson, King and Lyon were shooting. One of the largest galleries of the week walked from trap to trap as this quintette started down the line. Lyon was liked by many as the winner of the event, but when he dropped nine targets in the first 20 and immediately followed this with eight lost in the next event all hopes were given up. He finished with a 78. Richardson, though shooting with apparently all the confidence in the world and in an easy manner, did not score better than 18 in any of the five 20's. King, 22 yards, could not better this.

Huntley started fairly well when he scored two 18's, but losing three in the third event and two on the last placed him with no better than a total of 90. Henderson's 16 at the outset badly impaired his chances. These five men were, with the exception of King, on the 23-yard mark. All told, 117 faced the traps in the preliminary. Scores ranged from the winning 92, for an amateur, and Huff's 93, down to 58. Nearly 75 per cent of the field finished with scores of 80 or above.

In the forenoon events, S. A. Huntley and A. B. Richardson were high amateurs, with 98 breaks; C. C. Hawkins came second, with 96; J. A. Blunt, Geo. Lyon, J. N. Knox and Woolfolk Henderson were third with 95, and H. N. Bellinger, B. H. Finley, Chas. Green, J. Canale and J. W. Bell, fourth, with 94. The professionals: C. G. Spencer, first, 98; Geo. Maxwell and T. H. Fox, second, 97; W. R. Crosby and Homer Clark, third, 96, and H. D. Gibbs, fourth, 95; Walter Huff and Tom Marshall, 94. Others with 90 per cent and better were E. Caldwell, A. J. Hill, J. Noel and R. W. Clancy, 93 each; R. L. Chesshire, T. Cassity, J. K. Warren, 92; Walter Williams, J. A. Chipley, C. O. LeCompte, S. L. Dodds, O. Williams, A. H. Campbell, C. M. Farrell, G. M. L. Key, J. R. Livingston, C. E. Goodrich, J. A. Anderson, 91; E. G. Hardy, L. J. Robinson, J. B. Snowden, Bart Williams, C. C. Wheeler, G. L. Dearing, Andy Meaders, J. R. Hinkle*, Guy V. Dering, R. A. King and Fred Bills*, 90.

Third Day, Thursday, May 13.—Fine weather, a clear sky and practically no wind had much to do with the high scores made the third day. The crowd, which had been increasing every day, was larger than at any other time during the tournament, many of the spectators being of the fair sex, who took a keen interest in the competition.

Among the amateurs, in the regular events of five 20-target races, A. B. Richardson was first with a score of 100 straight, followed by Dr. W. L. Henderson and Woolfolk Henderson with 99; S. A. Huntley 98; W. H. Cochrane and J. H. Noel 97; J. R. Duncan and J. R. Livingston 96. Among the professionals J. R. Hinkle, George Maxwell, Homer Clark, H. D. Gibbs and C. G. Spencer were in first place with 99, followed by Ed. Banks and T. A. Marshall with 96 and H. J. Donnelly and E. M. Daniel with 95. T. H. Fox, Fred Bills, 94.

Promptly at 1:15 o'clock Mr. Shaner called up the first squad for the Southern Handicap, the main event of the program. There were 149 entrants, of which number 3 forfeited. W. H. Cochrane, of Bristol, Tennessee, who broke 97 out of his 100 targets, his handicap being 19 yards, was the winner. Mr. Cochrane won the first trophy and the first money prize without having to shoot off any tie. George L. Lyon, who broke 95 from 23 yards, won the second trophy and second money prize without a tie. J. A. Hardy, 16 yards, J. B. Duncan, 18 yards, and J. B. Snowden, 18 yards, tied on 94 for the third trophy and shot off at 20 targets. Snowden won with 18 to Hardy's 17 and Duncan's 16.

The handsome trophy presented by the Board of Trade of Columbus, Georgia, was won by S. A. Huntley, who broke 523 out of the 550 targets on the program for the three days, made up of the 350 from 16 yards and 200 shot in the handicaps. This trophy was presented by the Columbus Board of Trade to be competed for at each succeeding Southern Handicap, the man winning it three times to become the owner of the cup. Mr. Huntley, therefore, becomes the holder of the trophy until next year's event.

The trophies were presented to the respective winners by Mr. Irby Bennett, ex-President of The Interstate Association, whose home is in Memphis. Mr. Bennett made an eloquent address and received a round of applause at its conclusion.

Southern Handicap Purse.—74 entries at $8.00, $592.00; 4 penalty entries at $13.00, $52.00; 1 penalty entry "for targets only," $5.00; 70 entries "for targets only"—149 entries, $649.00. Added to the purse, $200.00. Total purse, $849.00.

A. B. Richardson 342 broke, $20.00; S. A. Huntley 342 broke, $20.00; Geo. L. Lyon 335 broke, $11.20; W. Henderson, 335 broke, $11.20; J. N. Knox, 332 broke, $9.60; R. A. King, 324 broke, $8.00.

Sweepstake Purses, May 11.—150 targets, $5.00 optional sweep. 23 entries at $5.00—$115.00 purse:

Geo. L. Lyon, 147 broke, $28.75; S. A. Huntley, 146 broke, $19.55; A. B. Richardson, 144 broke, $16.10; J. N. Knox, 142 broke, $12.65; W. Henderson, 141 broke, $10.35; J. T. Austin, 141 broke, $10.35; R. A. King, 140 broke, $6.90; J. K. Warren, 139 broke, $5.75; L. J. Robison, 136 broke, $4.60.

May 11.—$1.00 optional sweep. 28 entries in first five events, 15 birds at $1.00—$28.00; 26 entries in second five events at $1.00—$26.00. Event No. 1, 15's $5.45, 14's $1.00. No. 2, 15's $4.65; No. 3, 15's $4.65; No. 4, 15's $3.10; No. 5, 15's $3:10; No. 6, 15's $5.05, 14's 50c; No. 7, 15's $4.35; No. 8, 15's $2.85; No. 9, 15's, $4.65, 14's 40c; No. 10, 15's $5.05, 14's 60c.

May 12—100 targets—$5.00 optional sweep. 11 entries at $5.00—$55.00 purse:

A. B. Richardson, 98 broke, $16.50; J. N. Knox, 95 broke, $8.80; W. Henderson, 95 broke, $8.80; Geo. L. Lyon 95 broke, $8.80; H. N. Bellinger 94 broke, $6.60; R. A. King 90 broke, $5.50.

May 12—$1.00 optional sweep. 15 entries at $1.00—$15.00 in each event. No. 1, 20's $6.00, 19's $1.50; No. 2, 20's $3.75; No. 3, 20's $7.50, 19's 80c; No. 4, 20's $3.75, 19's $1.50; No. 5, 20's $5.00.

May 13.—100 targets—$5.00 optional sweep. 11 entries at $5.00—$55.00 purse:

A. B. Richardson 100 broke, $16.50; W. Henderson 99 broke, $11.00; S. A. Huntley 98 broke, $8.25; H. N. Bellinger 95 broke, $6.85; J. N. Knox 95 broke, $6.85; G. V. Dering 94 broke, $2.75; R. A. King 94 broke, $2.75.

May 13.—$1.00 optional sweep. 19 entries at $1.00—$10.00 in each event. No. 1, 20's $3.15; No. 2, 20's $7.60, 19's 40c; No. 3, 20's $2.35; No. 4, 20's $3.80; No. 5, 20's $3.15.

Jokelets.—The Little Joker Trap purse, May 10, 1915: Each 8 paid $37.10; each 7 paid $22.30; each 6 paid $14.85.

Purse May 11, 1915.—Each 10 paid $42.90; each 9 paid $27.50; each 7 paid $15.45.

Purse, May 12, 1915.—Each 10 paid $30.30; each 9 paid $18.95; each 8 paid $2.50.

At the Traps

Smashing Clays at Sea.—Trapshooting is as rapidly growing in favor as a sport with naval officers as it is among sportsmen on land. Nearly all battleships carry a trap and a supply of clay "birds," and officers practice when daily drills are over, shooting from the side of the ship. With the vessel under way the sport is attractive, even though the usual 16 yard rise cannot be had, as the wind and motion of the vessel compensate for the lack of distance of rise of the targets.

The Red Cross Gun Club of the Hospital Ship Solace had a 25 "bird" practice shooting en route to New York May 9, and the following scores were made: Surgeon Garton, 20; Surgeon Strine, 23; Paymaster Williams, 23; Surgeon Garrison, 15, and Surgeon M. E. Higgins, 22.

The sport is new to most of the club's members, as the club was only organized when the Solace joined the fleet at Guantanamo last February. A three-ma nteam defeated the team from the U. S. S. Florida during the stay in Cuban waters, but only by a close margin. The club challenges any navy team for a match at any time.

* * *

Garden City Traps.—Dick Reed motored to San Jose to shoot with members of the San Jose Blue Rock Club. He tied with O. N. Ford for high gun of the day, breaking 93 out of a possible 100. Ada Schilling made 91 out of a possible 100. C. H. Nash won a Class A championship of Santa Clara county for the third time this year. Louis Baumgartner was in a class by himself in the doubles with 21 out of 12 pair. H. H. Clark jumped into second place in the Class C division.

Scores: O. N. Ford 93-100, R. C. Reed 93-100, Ada Schilling 91-100, C. H. Nash 90-100, R. C. Hogg 90-100, A. F. Lewis 88-100, H. H. Clark 85-100, Harry Barthern 84-100, A. B. Jones 84-100, C. B. Smith 82-100.

Doubles: A. F. Lewis 21-24, Nash 20-24, Reed 18-24, Hogg 17-24, Ford 16-24, Clark 14-24, Smith 13-24.

The big three-days' registered shoot will begin today at 9 o'clock a. m. If the weather is good it is expected that about the largest crowd of shotgun artists that has been together in California this season will be on hand. O. N. Ford, secretary of the local organization, has already received notices from many clubs saying that representatives would be sent. Several championship titles will be competed for, among which are: Single championship of California, double championship of California, three-man team championship of the Pacific Coast. The three-man team championship of the Pacific Coast is the event which is causing much interest among the gun fans up and down the Coast. San Francisco, Sacramento, Martinez, Vallejo, Reno, Stockton, Modesto, Newman, Lindsay, Fresno, San Diego, Los Angeles, Eureka, Salinas, Hollister and Watsonville, so Forstates, will enter teams in the three-man event. Motion pictures will be taken of shooters in competition.

* * *

At Easton Traps.—The Exposition City Gun Club program for this season comprises monthly shoots at 100 blue rocks. The schedule will be shot in two 50-bird matches—25-bird frames at a time. The Du Pont added bird handicap system will be in vogue, shooters being handicapped on each section of 25 birds shot. According to scores made the contestant's bird allowance is increased or decreased as will be noted in the summary of results appended. This system is intended to place the blue rock smashers all on an even plane. In the shoot at Easton last Sunday Charles H. Knight, who shot minus any bird allowance, broke a total of 92 clay pigeons out of 100 shot at. E. Straessler's total string, including added birds of 7, 3, 5 and 5, also totaled 92. A good example of the equaling averages the system is expected to develop. J. F. Dodds of the San Diego Pastime Gun Club had a bird allowance in three frames and shot from scratch in the fourth. He scored 91. George Stall , a Nevada crack shot, also made a total of 91. He had a small added allowance in the first two sections, scoring 48 out of 50, the best score in the first half of the match. Shooting without any plus targets in the final frames of 25 each, he broke 43 clays, a total of 91. In the second 50 birds Straessler was high gun with 47 (including 10 birds added). The two high scratch scores, at 25 birds, were made by Knight and Hoelle, 25 each. The scores:

Club match, 100 birds, added bird handicaps—

C. H. Knight	24—|	23—|	47	
	22—|	23—|	45	92
E. Straessler	18-7	17-3	45	
	17-5	20-5	47	92
J. F. Dodds	21-1	22-2	46	
	21-1	20—|	45	91

Martinez Notes.—The ten-man team shoot between the Alhambra Gun Club scheduled for last Sunday was postponed until June 6 or 27.

The Alhambra shooters turned in and held a 50 bird shoot for a silver cup. H. Veale's 47 was the winning score; F. K. Burnham 46, Dr. Merithew 45, J. J. Anderson 44, J. Randino 42, D. Joslin 40, J. Hamer 40, W. Dutcher 39, F. Stewart 43, B. Woolbert 44, Al Blum 44, A. J. McMahon 37.

The Alhambra three man team at the San Jose shoot is composed of Fred K. Burnham, Billy Sears and "Bud" Havens.

The club is open to shoot any team of from three to fifteen men, representing any club within 100 miles of San Francisco, writes President Fred K. Burnham.

TRADE NOTES.

What Du Pont Does.

At the tournament held at Sumner, Wash., L. H. Reid, F. C. Riehl, and P. J. Holohan, all using duPont Powder, broke 99x100 blue rocks—a very exceptional record.

Winchester Winnings.

Another State Championship was added to the many Winchester victories last week when E. J. Chingren of Spokane, Wash., smashed 99 targets out of 100 and tied with Frank Troeh of Vancouver, Wash., Chingren winning in the shoot-off with the fine score of 39 out of 40. This makes Mr. Chingren the champion of the great State of Washington and he will represent that State at the Grand American Handicap in Chicago. Mr. Chingren won this splendid victory with the famous Red W Brand, "Leader" factory loaded shells—the same kind that won for Lou Rayburn the Championship of Oregon.

Rem-UMC Notes.

The newly organized Round Lake (Ill.) Gun Club held an interesting shoot May 2. Geo. McDermott was high amateur gun, scoring 96x100. He shot a Remington pump gun and Nitro Club shells, as did D. E. Hutton and Geo. Frazer, who won second and third places, respectively.

At the Garden City, (Kan.), Gun Club, May 6 and 7, B. F. Simonds won first place, with the high average of 145x150 for the two days, shooting Nitro Club shells. The 25 bird sliding handicap was won by C. T. Rankin and Frank Luther. Both used Nitro Clubs. Mr. Luther also shot a Remington pump gun.

FLY-CASTING CONTESTS.

San Francisco Fly-Casting Club members competed Sunday and Saturday in the fifth of the series of medal contests for 1915. In event five, several excellent scores were made with the half-ounce lure tackle. F. J. Cooper's casts Sunday, 175 and 166 feet, were top scores for the two days. S. Forbes, in event six, with the same outfit, the "slam" casting event, sent out the light tackle twice for a distance of 220 feet.

"In-and-out" casting is improving. Burgin's run of 10 points is the best so far this season. Forbes was next up with 7, Kierulff 6.

Considering weather conditions Sunday, good scores are shown in event three, heavy trout tackle fly-casting for distance results. In events one and two, accuracy and delicacy fly-casting percentages, the scores are remarkably high. Event four shows accuracy percentages with half-ounce bait tackle. The results:

Saturday Contest No. 5. Medal Series, Stow Lake, May 22, 1915. Wind, south. Weather, fair.

Judges, T. C. Kierulff, C. H. Gardner. Referee, C. H. Kewell. Clerk, E. O. Ritter.

Fish Lines

Faraway trips by local trout anglers will be in vogue from now on, providing pleasant weather and good roads will permit. The Kern river country is known to a few rod enthusiasts and will be familiar to hundreds more later on. Harry Leap and party recently returned from a two weeks' fishing trip in that section, a locality about 100 miles east of Bakersfield. Good fishing water was found where trout weighing four pounds were numerous. These big fish were landed with both spoon and bait. In the Mt. Whitney Sierra territory there are streams where, it is claimed by Deputy Fish Commissioner Andy Ferguson of Fresno, the fishermen of this whole State could find room, in one day, to enjoy rod and reel sport.

In Madera county Bass Lake is the locality from which comes another bit of pleasing information that not only good trout fishing is on tap, but there is the opportunity to indulge in acceptable black bass fishing. Trout from 17 inches up to 22½ inches long and weighing over four pounds and two-pound black bass have recently been caught. The trout were landed with artificial minnows, the bass with royal coachman flies.

The San Mateo coast creeks and lagoons tempted Graham Ridley, Fred Kahn, George Seeley and A. Thomsen to leave this city in a machine at 2 o'clock Sunday morning . If the coast roads were in better shape than the previous week, when several autos were stalled at different uoints, the party should have reached Pescadero in time for a morning flirt at the trout. Possibly the week's fishing of Al Polett, who fished in the Waddell, Pescadero creek and lagoon and San Gregorio creek and lagoon, 6 to 8-inch trout were caught, will also tempt other rodsters down the peninsular coast tomorrow.

What may be expected in a measure can be surmised from the reports of different fishermen, who have tried the creeks recently. A. L. Dickman, Bob Brown and Clarence Haywood of San Mateo recently had good luck in the San Gregorio waters. In Bean Hollow lagoon, below Pescadero; Haywood also was successful in catching with a Kewell-Stewart spoon a number of nice sized striped bass.

Purissima creek is one of the most reliable streams along the ocean shore.

The headwaters of Aptos creek were good for nice catches recently. "Buzz" Lent Tuesday landed a limit fish that ran from 5 to 9 inches in length.

Throckmorton lagoon was good for limit baskets last Thursday, when Dr. M. E. Simon and Dr. H. Lacoste fished there. Lake Lagunitas has not been overly well patronized during the rainy spell. Charley Breidenstein, Baldo Ivancovich and Fred Willet drew limit dividends of trout from the pretty mountain lake last Monday.

Up Cazadero way the headwaters of East Austin creek, "towards the Red Slide," offer excellent trout temptation.

Stoney creek, near Fouts Springs, has always been well thought of by the fishermen who have tried it. C. W. Tuttle's experience, fishing where the two creeks meet, landed a basket of trout, some weighing 2 and 2½ pounds. The roads were very hard going at the time and were not in any too good condition last week.

It may be just as well to state here that the use of spawn or roe for bait in any of the Nevada streams or lakes—the Truckee river is the main fishing water—is illegal and arrests will follow the discovery of use of roe or spawn eggs by any fisherman. Local fishermen who visit Floriston or Verdi might make a note of this.

The output of trout fry from Sisson and other State hatcheries this season will be so prolific, by the millions, that the Fish and Game Commission officials will put in service an extra fish distributing car. The annual work of transplanting trout fry will probably be started next week. Deputy Fish Commissioner R. B. Heacock intends to liberate 500,000 troutlets in the streams of Santa Cruz county. There will also be an allotment of about 400,000 fry for Santa Clara and Monterey counties. These young trout will come from the Brookdale hatchery.

The many tributaries of Eel and Mad rivers, in Mendocino, Humboldt and Trinity counties, as well as the main streams, are now accessible to the fishing fraternity by railroad via the newly constructed extension of the Northwestern Pacific Railroad from Willets.

The Eel river steelhead fishing has a well deserved reputation for dishing up thrillers that will satisfy the most exacting rodster. The fly patterns most in favor for Eel river fishing are the Vance, Soule, Carson, red ibis and royal coachman. The first mentioned three flies were designed by well known Eureka anglers. All of these flies are dressed with jungle cock wings.

The recent rains, from the viewpoint of an experienced angler, cannot fail to have a beneficial effect in from a week to a fortnight from the present time. The unsatisfactory fishing conditions in the Sierra streams recently were caused by cold weather and turbulent high water. Notwithstanding the season should be a good one for the trout-angling fraternity. Rivers and creeks have been thoroughly cleared of rubbish, debris and sand, leaving the bottoms and holes nicely cleaned out for the fish, when the waters recede and clear up. Such conditions are very favorable for runs of steelhead in the coast streams clear up to the headwater tributaries. The same conditions also apply to salmon.

A recent report from Boca from R. C. Weeks states that fly-casting sport has hardly begun, although early this month quite a number of good catches of trout were made near Boca with fly lures. Stormy weather has prevented the appearance of insect life over and about the river. Both the Truckee and the Little Truckee have been far from clear. Bait fishing, however, is excellent and good catches are being made daily at Boca, with angle worms and other baits.

Late this week it was reported that the river was low and clear and fishing better than at any time last year.

As a matter of fact, most of the big trout taken in the Truckee river are caught with minnow baited hooks. The large trout lay out in the stream close to big rocks or in the deep holes too far out for the fly caster to send his light tackle. A long cane pole and a leaden weighted line do the trick for the knowing and unconventional fisherman on the Truckee, and this individual lands good catches of large fish, too. Instances are not unknown where the proud owner of a fine Leonard rod and all the expensive tackle that goes with such a rig scrupled not to purchase a nice string of trout from one of the despised cane slam-casters. These fish, of course, were bought to send to friends—not to show to anybody.

Upper Sacramento fishing points were not inviting last week. What fishing there was was with bait lures, and not overly good at that. Prior to the last heavy storm fly-fishing was most promising.

From the Big Meadows country advices are that "lots of fish are being caught in the big reservoir." The trout are large and are taking trolling with a spinning spoon.

Colonel William Ellery, Harry Blatchley and Chris Ellery are back from a two weeks' trip to the McCloud river. The river was high and will not be worth while trying for a week or two.

The Williamson river in Oregon bids fair to be in high-class shape June 1. Two Kansas City anglers, who visit that fishing resort every year, H. Hoops and M. McGowan, are now in this city outfitting for an early trip to the Oregon home of big trout. At the present time the trout in Williamson river and its tributary, Spring creek, rise steadily to the artificial insect lures.

Feather river reports have been taking on a more pleasing hue since the weather has shown signs of moderation. Alfred Grunewaldt, who is making a stay at Big Bar, has been having fair success during the past week. The best results are found in the small creeks of that section. Within a few days conditions should improve materially. Advices from Belden last week were that the river had gone down considerably, and that fishing in the river and nearby creeks was improving—good-sized rainbows have been taken. The immediate outlook for that stretch of the river "looks good." Bait fishing, or with a spoon, is the game now.

From Cresta, Ed Thompson sent down a box of nice trout, averaging three-quarters of a pound in weight, and in fine condition they were. The Feather river trout spawned early this year and are now in fine shape.

The Marin county creeks are getting in line again for the rodster. James Andrews picked up forty nice trout in the White House pool, near Point Reyes. Several of these trout scaled from one to one and a half pounds. A new run of steelhead came in the Paper Mill creek waters since the last storm. Farther up the creek, near Camp Taylor might be worth trying,, for John Barr landed almost a limit basket along that part of the creek a week ago. Up higher in the hills Lagunitas branch headquarters yielded a fine catch to Milton Frankenburg and John Cattermole.

Dogs Can Be Imported Free Now.—The proper steps to take in order to bring dogs into this country free of duty are outlined in a bulletin issued by the Bureau of Animal Industry at Washington. These, in brief, are as follows: First—The dog must be registered in a recognized foreign club and a pedigree of the dog secured. Second—The pedigree of the dog must then be stamped—that is, certified to—by the secretary of the above mentioned club, and a certificate of registration of this dog in the club must also be secured from the secretary of the club. Third—A vendor's certificate must be secured from the seller of the dog or his agent, which shall give the name and registration number on each dog sold to the importer, the date of sale, place of purchase, and the name and address in this country of the purchaser. Blanks for this certificate may be secured from the custodian of the foreign book of record, in Washington, or a suitable form can generally be secured from one of the American express companies doing business in Europe. Fourth—A bill of sale, showing price paid for the dog, must also be secured from the seller of the dog.

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Drink Jackson's Napa Soda.

THE FARM

BREAKING COLTS THAT BALK AND KICK.

In breaking the colt to draw a vehicle the horse may develop bad habits unless he is properly handled. The most common cause of balkiness among horses is punishment to make them do something that they can not do or that they do not understand how to do, says U.-S. Department of Agriculture Farmers' Bulletin No. 667, "Breaking and Training Colts." If the horse balks because the load is too heavy, and he is not allowed occasionally to rest and regain his breath, the use of whip or spur will very often provike further and more stubborn rebellion. He should be given a short rest, and while he is resting, rub his nose, pick up a front foot and tap the hoof a few times, or adjust the harness, and he may forget his balkiness. Take up the lines and give the command to go ahead, turning slightly to the right or left to start. If the horse does not start it is either a case of over-load or a chronic balker. If the former, the load should be lightened, but in the case of the latter, training will be necessary to overcome the habit.

Where the balking habit is fixed, the horse should be trained to obey all commands with promptness without being hitched to the wagon. First put on the double trip ropes which consist of a strong surcingle, four 2-inch iron rings, two straps to go around pasterns, and a rope about 25 feet long. Fasten two 2-inch rings to the underside of the surcingle and put straps with rings on front feet. Run end of rope through near ring on surcingle, through ring on near foot, up and through off side surcingle ring, down, and tie to off fore foot. A pull on the rope when the horse steps will bring him to his knees. Always use knee pads or have the horse on soft ground, where he will not injure his knees.

Use the ropes until the horse stops and stands when he hears "whoa." Next put on the guy line, which should be managed by an assistant, while you drive and attend the trip ropes. The guy line is a rope fastened around the horse's neck and a half hitch over the lower jaw. It is very severe and should not be used to excess. If the horse shows any tendency to balk, give the command "whoa" before he stops of his own accord. When ready to start, the assistant should take a position in front of the horse and smartly jerk him forward with the guy line at the same time you give the command "get up." Repeat the process of stopping and starting until the horse shows no signs of self-will. Use the guy line, and use it severely, on the slightest intimation that the horse is going to balk. After a few of these lessons the horse may be hitched to the wagon. The trip ropes and guy line should be kept on until he is well broken of the habit.

In treating the colt to overcome kicking put on the harness and trip ropes. Let the assistant take a stick about four feet long, wrap a gunny sack around one end and tie it. With this the assistant, if he stands at the colt's shoulders and holds the halter with one hand, can rub the colt's hind legs without being placed in danger of his heels. If the colt kicks, do not hit him but allow him to examine the stick again, and proceed to stick him and poke him all over, that is, make him become accustomed to being touched on any part of his anatomy without kicking. After he becomes submissive to the stick, tie sacks of hay to the traces and breeching and continue the lesson until he pays no attention to it.

Fasten a long pole on either side of him, with one end to drag on the ground, the other end to be fastened to the shaft carrier. Drive the colt around with these, and if he attempts to kick, steady him and pull him to his knees. This should be continued until he submits to the poles dragging between his legs and all around him. This is also a good lesson to be given a colt that does not kick, before trying to drive him single.

It is claimed that the dairymen of our northern counties use more careful methods in dairying than in central and southern California. By the use of silos into which the first cutting of alfalfa is put with corn they figure on feeding one cow for each acre of alfalfa.

Kern county has increased her alfalfa acreage more than 10,000 acres in the past year. The uses of alfalfa and its value are becoming better known as time passes.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

"VACATION 1915"

THE GUIDE TO

Summer Outing Places

Tributary to the

Northwestern Pacific Railroad

Make your vacation plans beforehand by consulting its pages. Profuse illustration and reliable descriptive text afford an instructive and reliable guide to this inviting VACATIONLAND, lying in Marin, Sonoma, Mendocino, Lake and Humboldt counties. It contains a complete list of Hotels, Town and Rural Homes and Camp Resorts.

Copies of "VACATION" may be had free at 874 Market street (Flood building), Sausalito Ferry Ticket Office, or on application to J. J. GEARY, G. P. & F. A., 808 Phelan Bldg., San Francisco, Cal.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

THE HORSEMAN. 538 So. Dearborn St., CHICAGO, ILL.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼ (dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MRS. W. J. MILLER,
L. B. DANIELS, Chico, Cal.

Woodland, California.

$5,000.00 Guaranteed | $3,000 TO FIVE-GAITED DIVISION :: $2,000 TO THREE-GAITED DIVISION | **$5,000.00 Guaranteed**

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE FUTURITY No. 2.

FOR FOALS OF 1915. **OPEN TO THE WORLD**

ENTRIES TO CLOSE JUNE 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by June 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On July 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JUNE 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the Ca ornia State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10 00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10 00
Yearlings, 1916	500 00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.

The right is reserved to declare the stake off prior to August 1st, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead coalt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

CHAS. W. PAINE, Secretary, Sacramento, Cal.

No. 2. 2:20 Trot..... 1,000 — No. 5. 2:20 Pace..... 1,000

THIRD DAY, JULY 2nd

No. 3. 2:05 Trot..... 2,000 — No. 6. Free for All Pace..... 1,500

CONDITIONS

Ten to enter, six to start. Enter any time. Records after entry no bar.
Entries close June 1, 1915.
3% to enter. 7% from first money winners; 6% from second; 5% from third; 4% from fourth. Full 3% of purse must be paid at time of entry. No entry will be accepted without this payment.
One horse may enter two classes and be held for but one entry fee, unless two starts are made. Entry fee must be for the larger purse. Two horses may enter one class for one entry fee unless both start, in which case an additional entry fee must be paid.
Three heats. Combination plan.
In $2,000 purses, $600 to each heat, extra purse $200.
In 1,500 purses, 450 to each heat, extra purse 150.
In 1,000 purses, 300 to each heat, extra purse 100.
Money divided 50, 25, 15 and 10% at the end of each heat. The extra purse goes to the horse standing best in the summary at the end of the race. Should two or more horses be winners of an equal number of heats at the completion of the three heats, such horses only to start in the fourth heat for the EXTRA PURSE, the whole of which shall go to the winner of that heat.
A horse distancing the field or any part thereof shall be entitled to one money only. A distanced horse in any heat will be entitled to money already won. There will be no more moneys than there are starters.
In determining the eligibility of horses to compete, only records made by winners of races shall be considered. Records made against time or by non-winners not considered. Rules of The American Trotting Association, of which we are members, shall govern all races.
The right is reserved to declare off any race that does not fill satisfactorily or change program, if necessary. In case class in which horse is entered does not fill satisfactorily, entry will be transferred to another class in which horse is eligible, subject to the approval of the owner.
Any race not finished on the last day of the meeting may be declared ended and the money divided according to the summary.
No stall rent will be charged.
UNLESS DECLARED OUT BEFORE 5 O'CLOCK P. M. THE DAY BEFORE THE RACE EVERY HORSE ENTERED WILL BE CONSIDERED A STARTER AND WILL BE HELD AS SUCH.
Entry blanks may be secured from The Breeder and Sportsman office..

SAVE-THE-HORSE

TRADE MARK REG'T.

¶ No "Blue sky" advertising, nor whirlwind up-to-date and down-to-morrow, career marks Save-The-Horse. Its sale is greater today than ever because throughout the whole worle, against all comers, it has **stood up and "made good"** under every test.

¶ That is why the druggists say: "They come again for Save-The-Horse."

BEATS OUT THE HUMANE SOCIETY

Youngstown, Ohio, May 4, 1914.

I used Save-The-Horse for splint when the veterinary said I must let her up and blister her—however, I sent for Save-The-Horse, used it as directed and never let her up. I would take her out to jog when she was so dead lame that the "Humane Society" would have had me arrested had they seen her. But she was worked right throgh it, and won five races, one after the other a week apart, and no one ever saw her take a lame step.

Very respectfully yours,
C. O. BROWN.

HIS FEARS GROUNDLESS

Newton Falls, O., Oct. 25, 1915.

I have followed the horse business all my life and I never saw anything that took effect so soon.

I broke my middle finger a year ago—and it has bothered me ever since, and when I commenced to use the medecine on my horse, I also rubbed the brush on my finger twice and I could see the biggest difference, but I am afraid it might be too powerfool and would like to know if ti would hurt the human body. If not, you should recommend it for broken bones.

Yours respectfully, C. M. HOOVER.

For **19 Years** Throughout the Whole World it Has Stood Up and **"Made Good"** Under Every Test

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¼
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.
And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¾
Second dam Santos, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

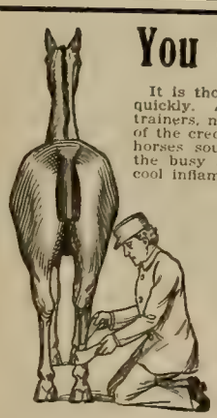
LICENSED PURE BRED
CERTIFICATE No. 1029



From the family of Bingen 2:06¼, foremost among present day champions of all ages and gaits.

Son of The Exponent 2:11¾ (by Bingen, dam Iva Dee by Onward 2:25¼), sire of 32 performers including The Temptress 2:08½, 6 three-year-olds, 20 two-year-olds and 1 yearling.

First dam Chord 2:27 (dam of 4) by Wilkes Boy 2:24½, sire of 4 and the dams of 11 in 2:10; second dam Sonata (dam of 3) by Dictator 113, sire of 2 and the dams of 7 in 2:10; third dam Cadenza (dam of 2) by King Rene 1278, sire of the dams of 2 in 2:10; fourth dam Virgie Wilkes (dam of 4) by Geo. Wilkes 2:22, sire of the dams of 16 in 2:10.

In the stud, season of 1915, at Pleasanton Driving Park, at $50 the season with return privilege. We have colts in training to show his qualities as a sire. Grandsons of Bingen are siring champions such as Etawah 2:03½, Anna Bradford (3) 2:00¾, etc. Address for all particulars,

KEEFER & SPENCER, Pleasanton, Cal.

You Can Rely Upon ABSORBINE

It is thoroughly dependable and reliable—it penetrates and acts quickly. ABSORBINE is used season after season by successful trainers, many of whom do not hesitate to give ABSORBINE much of the credit for their success. They use it to get lame, blemished horses sound and fit for spring training or work, and, through the busy season, to put vim and energy into jaded muscles, to cool inflamed tendons and to prevent "next-day" stiffness.

ABSORBINE does not blister or remove the hair, and horse can be used.

It is economical, as only a few drops are needed at an application. A bottle of ABSORBINE, diluted as directed on label, makes 3 gallons of effective liniment at a cost of 80c. a gallon.

USE ABSORBINE to reduce Bursal Enlargements, Bog Spavins, Thoroughpins, Puffs, Shoe Boils, Capped Hocks, Swollen Glands, Infiltrated Parts, Thickened Tissues, Rheumatic Deposits, Enlarged Veins, Painful Swellings and Affections; to reduce any strain or lameness; to repair strained, ruptured tendons, ligaments or muscles; to strengthen any part that needs it.

SEND FOR FREE HORSE BOOK H

ABSORBINE, $2.00 a Bottle at Druggists or Postpaid

W. F. YOUNG, P. D. F., 54 Temple St., Springfield, Mass.

Makes Them Sound SMITH'S WONDER WORKER Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $2.00 per bottle, prepaid on receipt of price. $16.00 per dox.; $10.00 per gal.

Peter The Great

Is the world's foremost progenitor of extreme speed; sire of 30 in 2:10, etc.

HIS SON

PETER McKLYO 3, 2:12 1-2

Cal. State License Pure Bred 2339

will make the season of 1915 in the training stable of James Thompson at the San Jose Driving Park beginning March 15 and ending July 1.

PETER McKLYO (3) 2:12½, the only California-owned son of Peter the Great of an age permitting stud duty, is out of a great-bred young matron by Jay McGregor 2:07¼—Klyo (2) 2:29½; second dam Miss Spears 2:21¾ (dam of 6 including Shakespeare (3) 2:09¾); third dam Medium's Last (dam of 7 including Trampfast (2) 2:14¼); fourth dam Suzanne (dam of 1 and grandam of 10 including Susie J. 2:06½).

This colt is four years old, having obtained his record last season with a very limited amount of work. He came into my hands perfectly green in February, 1914, and developed speed so fast that I had to take his shoes off and jog him for two months barefooted. Being by Peter the Great, the sire of the century, and, as you will notice, out of a daughter of Jay McGregor, another wonderful family of horses, he is one of the best bred young horses in the world and I can truthfully say he is one of the very best individuals that I ever had the pleasure of looking at. He can trot a quarter in 30 seconds, and I am firmly of the opinion that he will trot a mile this fall in 2:06 or better.

Fee, $75 the season with return privilege. Mares pastured at usual rates and accorded best of care, but no responsibility assumed for accidents or escapes. Service fee and pasture bills must be paid before removal of mares. Address for all particulars

VICTORIES OF PARAMOUNT

PARKER GUNS 1915

Look, Read, Remember!!!

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

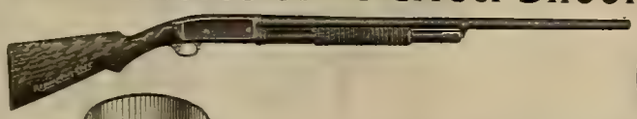
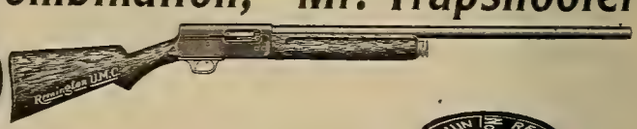
WINCHESTER



.22 CALIBER
AUTOMATIC RIFLE



Name over all the good points of other makes of .22 caliber recoil-operated rifles, and you mention only a few of the many that can be claimed for the Winchester .22 Automatic. Others are: real beauty of outline; a handsome and clean receiver (having no pins, screws or unsightly protruding parts); a reliable, strong and sure Winchester action; and the accurate Winchester shooting qualities. The Winchester .22 Automatic was the first and is the best rifle of this type and caliber on the market—proven so by use in the hands of thousands of shooters, who have given it every possible test. It holds ten shots, which are fired by simply pressing the trigger for each shot, thus enabling great rapidity of shooting with *accuracy*. It weighs only 5¾ pounds, takes down, and is easy to clean and keep in good order. A rifle like this is a great sport maker, while at the same time it has no equal for shooting the smaller kinds of game. It lists at $25.00 and is sold by dealers everywhere for less.

A COMPARISON WILL CONVINCE YOU OF THE MERITS OF THIS WINCHESTER

FAIR BILL UP TO GOVERNOR.

Though no mention of the same was found in the Sacramento dailies at the time, owing to the pressure of legislative news at the last moment, we were informed one day this week by Senator Benjamin Rush that the district fair bill, providing for eight fairs, had passed both houses of the legislature and was up to the governor for his consideration. As his excellency has in the past expressed himself as in favor of a conservative measure of this kind it is more than probable that the same will meet with his approval, though interested parties can do their cause no harm by informing him of their desire for his signature. Under the bill's provisions no fairs will be held this year, the appropriations becoming available for next season, and if it becomes an enactment the outlook for the future will be greatly improved.

NEW ENTRIES FOR THAT CLIMATIC HANDICAP

The editors of our two contemporaries, the Breeder and Sportsman, of San Francisco, and the Horse Review, of Chicago, are having a heated argument as to which enjoys the better climate. Of course, we know that the golden sunshine of the Occident must be glorious, and the balmy February zephyrs of the breezy city should be exhilarating, but, if either desires to spend a real pleasant summer, we would invite him to come to Boston.—American Horse Breeder.

While a spirited engagement between two contemporaries regarding the good and bad qualities of Chicago and San Francisco as winter training points was crowding European war news into the background, a trotter with a record around 2:16 worked the Indianapolis track in 2:10, or a shade slower, two-year-olds of the lateral gait were pulled up to keep them from beating 2:20 and ruining the speculation in the futurities of the year, and the heavy pair of draft horses used for working the track reeled off a quarter in 33¾ seconds at the end of a slow mile—hitched to the sprinkling wagon. Yes, there are apparently worse places for trainers to winter than the Indiana State Fair grounds.—Western Horseman.

The Tampa Morning Tribune is published in Tampa, Fla., a fact which is about all the explanation necessary for its editorial attack upon the climate of California. Easterners having discovered that Florida is not the only pebble on the summer beach and that you can have glorious sunshine without malaria and with two expositions on the Pacific coast, the Tampa Tribune editor is pleased to give prominence to the atrabilious bunkum of a disgruntled visitor to San Francisco. He informs his home-town paper that his impressions of California are: "Beastly climate, darned liars and fleas, with the odds in favor of the liars." That he is a very bad case of chronic grouchitis is amply demonstrated by the following outburst of pessimistic piffle: "The native son, physically speaking, is a large, portly fellow of fine appearance, but, as a rule, he possesses a flea-bitten, shriveled-up soul and a disposition that would disgrace a Missouri mule. The standard of morals is a little better than that of the South Sea islander, except in a business way, and in that respect they have neither morals nor conscience." Some one must have sold him the Tower of Jewels or the battleship Oregon.—S. F. Chronicle.

P. H. SEXTON PASSES ON.

The ranks of California's well known pioneers were again invaded last Sunday when death claimed Mr. P. H. Sexton of Oakland, who had long ranked as one of the coast's most steadfast friends of the horse. Some two years ago Mr. Sexton suffered a fall which brought on a cancerous growth that could not be checked, and for two weeks prior to his death he had been confined to his bed.

Mr. Sexton was in his seventy-fourth year and had been a resident of California since 1868, making his way here from his birthplace in Limerick, Ireland, by way of Montreal, Boston, and the Isthmus of Panama and taking up his residence across the bay from this city. He was married to Miss Jane Lamping of Marysville not many years after coming here, and they became the parents of twelve children, eight of whom are living, all residents of this section. Mrs. Sexton survives her husband, and the entire family was present at the end.

Mr. Sexton, a contracting plasterer by profession, not only left his wife and family in independent circumstances, but built up a profitable business in which he has been succeeded by some of the younger generation, he having not been actively engaged therein for some years. He never missed a race meeting, and while never the owner of race horses of prominence he always bred from one to half a dozen youngsters annually, and was passionately fond of road driving. Only a few weeks ago, bright and cheerful, apparently in most excellent health for a man of his years, he was an interested visitor at the Pleasanton track, and one of his last conscious concerns expressed was for the welfare of Tim's young trotter, Future Tramp. Mr. Sexton had looked forward eagerly to the exposition races and had steadfastly refused to visit the local track until the contests should be in full sway.

Services were held at the home and at St. Andrews Church Tuesday afternoon, hundreds attending to pay their last measure of honor and respect, after which the remains were laid at rest in St. Mary's cemetery, Oakland.

Good Fields for First Six Days' Races

With a card of three races, every one of which will bring out a field of exceptional excellence, the long awaited race meeting at the P.-P. I. E. opens this afternoon under the auspices of the Pacific Coast Trotting Horse Breeders' Association. For the last several days the weather has been very good, with less wind than attended that of last week, and if the weather man is gracious enough to give us a couple of weeks off the same pattern as Thursday's sample was cut from there will be no doubt of the success that will attend the exposition meeting.

Of the races which were scheduled to close on June first, but one was declared filled, the 2:07 pace, which attracted eleven high class sidewheelers and which promises to be one of the greatest contests of the entire program. No deviation will be made from the schedule originally set for the racing of the various events, and the management announces that the vacancies in some of the daily programs will be filled out with special events, so that each afternoon's sport will be completely rounded out.

We present herewith the program up to and including next Saturday, June 12, giving the entry and driver for each event as accurately as possible at this time. There are a few instances of horses entered that have not yet appeared on the scene, and possibly some of those given below may be declared out, though it is not probable that much alteration will be made in the fields as given here, save in case of accident. Wherever known, the driver appears with the horse in place of the owner or nominator:

SATURDAY, JUNE 5.

No. 1, 2:30 Trot, $2,,000—Bon Cres, Fred Chadbourne; Spriggan, Will DeRyder; Virginia Barnette, Will Durfee; A. R. G., Joe McGuire; Bessie Custer, Al Whitney; The Proof, Charley Spencer; Miss Perfection, Charley DeRyder; Robert Bingen, Harry Dowling; Golden State, Blackwell & Hendrickson.

No. 14, driving club 2:15 pace.—Edith Light, Hugh Boyle; Trix McAdrian, P. J. Chalmers; Mabel Dillon, Ben Cohen; Francisca, J. V. Galindo; Bradmont, George J. Giannini; W. J. K., W. J. Kenney; Jack, W. J. McDonnell; Casey Jones, M. J. McKiernan; Alton S., A. Sperry; Jim Donnelly, Frank Wright.

No. 15, 2:17 pace, $2000.—O. U. C., Frank Childs; Athol R., Schuyler Walton; Lizzie Dillon, Marvin Childs; Dicto, Will DeRyder; Contention B., Will Durfee; Budweiser, Sam Gilbert; Baby Gommet, Al Schwartz; Pointer Belle, J. M. Kidd; Zoetrix, Fred Chadbourne; Zomblack, Charley DeRyder; Hedgewood Patchen, Lon McDonald; Donald, Will Ivey; Direct Line, Joe McGuire; Buzz Patch, Railey Macey; Fleeta Dillon, Millard Sanders; Potrero Boy, Loren Daniels.

SATURDAY, JUNE 12.

No. 16, driving club 2:30 trot, $1000.—Brutus, S. Christenson; Muggins, Harold Cohen; Birdeye, A. Combatalade; Sultan, J. J. Gethin; Horseshoe Boy, A. S. Hanks; Howard's Comet, P. J. Howard; California B., A. W. Longley; Berta Lou, Worth Parsons; Eloise Dell, Charley Silva; Harold K., C. A. Soto.

No. 17, 2:10 trot, $20,000.—McCloskey, Lon McDonald; Peter McCormick, V. L. Shuler; Kinney de Lopez, Budd Doble; Baby Doll, John Quinn; Virginia Barnette, Will Durfee; Loe Blossom, Frank Childs; Spriggan, Will DeRyder; Kid Cupid, Loren Daniels; San Felipe, Charley Durfee; Electric Patch, Railey Macey; A. R. G., Joe McGuire; John Mack, F. L. McQuitty; Dione II, Ben Walker; Bonnie Ansel, Charley Spencer.

No. 18, free-for-all pace, $5,000.—White Sox, Will Durfee; Dr. Burns Jr., Al Whitney; Leata J., J. N. Jones; Jim Logan, Elmo Montgomery; Joe Patchen II, C. L. DeRyder; Homer Mac, Jim Stewart; Margot Hal, Lon McDonald; Walnut Grove, Albert Ruthven; Zulu Belle, Al Schwartz; Little Bernice, Sam Watkins; Clara Mac, Harry Dowling; College Gent, Barney Barnes; Dan Logan, Warren Pugh.

If the $20,000 trot looks to you like it would be some horse race, and it probably does so appear, if you have been keeping cases on the various entrants, the $20,000 pace for getaway day must look like two horse races, as there are nearly a score of fast birds entered and ready to race, and if Dr. Burns Jr. happens to be a bit ouchy or draw a bad position he will have his work cut out for him if he heads this bunch of horses: Frank Perry, Twinkling Dan, The Beaver, Little Bernice, Hemet, Homer Mac, College Gen, Walnut Grove, Hal Boy, Red Rock, San Jacinto, O. U. C., Margot Hal, White Sox, Booze, Princess Patch, Teddy Bear and Dr. Burns Jr. There may be more in the mail, as this list was taken from the recorded entries Thursday. Give this field the once over, then study it some more, and see if it alone isn't worth a long, long journey to see!

Matinee Pacers Wage Merry Battle

Another good crowd turned out Sunday afternoon at the exposition race track to witness the second of the matinee programs of the San Francisco-California Driving Club and were rewarded by seeing some fast time and spirited contests.

Frank Goularte of Decoto, who brought his trio of pacers down from Pleasanton some days ago in order to get in on the matinee fun, made a good beginning by taking his first start in straight heats with Aerolite Jr., a blocky lad by Aerolite 2:06¾ and out of Cricket 2:10 by Steinway, outfooting Marin in the stretch in both heats, Golden Buck and Darby Mac finishing third and fourth, respectively, in both heats.

Marie Fitzsimmons was the choice of a good many of the prophets for the 2:15 pace, which brought out a field of eight that bothered the starter considerably, and while she delivered the goods all right for the first heat she was outfooted in the next two and ranked only second in the summary when the smoke of battle died away. Greatness, who took the overland route, stood a hard drive in the first heat and very nearly finished winner; she was a bit unsteady in the stretch in the other heats but went a consistent race and made a nice showing for a three-year-old. King Pointer won the second heat handily, having command of the situation from early in the second quarter, but a break on the first turn cost him the third heat, as he had too much ground to cover to catch William Tell and Emma M., though he succeeded in collaring most of the balance of the field.

The free-for-all pace brought out the speed of the day, as usual, and Charley Silva and Teddy Bear were again returned winners, but not in straight heats as was the case on the previous Sunday. Vera Hal, the great little Expressive Mac pacer owned and driven by Harold Cohen, went out in front all the way in the first heat until well into the stretch, when Teddy caught her and beat her to the wire by a neck, the time as announced being 2:07, with the last half in 1:02½ and the last quarter in :29. Zulu Belle, driven by E. M. Barber of San Diego, broke on the first turn and came in with a flat tire. In the second heat Cohen took his bay mare in behind Silva and Teddy and stayed there until well toward the stretch, Silva being content to go past the half in moderate time. Before rounding into the stretch both leaders went at it for all they knew and the stand "rose to 'em" as they raced nose and nose through the stretch in :28½, Vera Hal winning by a scant head in 2:09¾, the final quarter being the fastest ever paced in a local matinee. Zulu Belle went to the lead in the last heat and led the procession to the head of the stretch, when Silva and Cohen pulled out for the race through the straightaway. It looked like another quarter below :30 at first, but Vera went off her feet before coming far and Teddy had no trouble disposing of the Petigru mare in 2:10¾.

Charley Silva played "whole hog" on the free-for-alls, as after annexing the pace he turned his attention to the trotters and straight-heated them with Kid Cupid, the starter again having some difficulty in getting the field away. Agnes Carter, with a strange driver, spoiled a few starts but trotted steadily after the word was given and finished third, the announcement that she was set to last position for running leading many in the grandstand to the belief that either the judges or the announcer had the horses mixed, as Muggins was the principal offender, St. Patrick and Birdeye furnishing the major portion of the competition.

The 2:12 pace followed the pattern of its predecessors on the afternoon card, the event for 2:15 side-wheelers, by being split three ways insofar as heat winners were concerned. Mabel Dillon grabbed the first heat from Bradmont and W. J. K., but couldn't repeat, the following heats going one-two to W. J. K. and Bradmont, respectively. Hamburg Belle, who should have been among the contenders, had trouble with her hobbles breaking and was distanced in the first heat. Lassie M. disposed of the 2:30 trotters in straight heats and slow time.

Messrs. J. A. McKerron, J. Holland and Bert Edwards officiated as judges; E. T. Ayres, J. M. Kidd and Fred Clotere as timers; Dick Dwyer did the starting, and the day's details are as follows:

First race—2:25 mixed:

Aerolite Jr.	(Frank Goularte)	1	1
Marin	(P. F. Kane)	2	2
Golden Buck	(W. G. Walkup)	3	3
Darby Mac	(Joe McTigue)	4	4

Time—2:22, 2:21½.

Second race—2:15 pace:

King Pointer	(H. Campodonico)	3	1 4
Marie Fitzsimmons	(J. W. Swank)	1	4 7
William Tell	(R. Roberts)	5	6 1
Greatness	(O. Martin)	2	2 3
Emma M.	(William Malough)	4	3 2
Jack	(McDonnel and Conlon)	6	5 8
J. C. Simpson	(F. Goularte)	7	8 5
Little Dick	(G. Erebout)	8	7 6

Time—2:16½, 2:17½, 2:20¾.

Third race—Free-for-all pace:

Teddy Bear	(C. F. Silva)	1	2 1
Vera Hal	(H. Cohen)	2	1 3
Zulu Belle	(A. Ottinger)	4	4 2
Dick W.	(A. Ottinger)	3	3 dr

Time—2:07, 2:09½, 2:10¾.

Fourth race—Free-for-all trot:

Kid Cupid	(C. F. Silva)	1	1
Birdeye	(A. Combatalade)	2	3
St. Patrick	(J. J. Ryan)	4	2
Agnes Carter	(A. Ottinger)	3	4
Muggins	(H. Cohen)	6	5
Graham Bellini	(G. J. Giannini)	5	dr

Time—2:18, 2:18.

Fifth race—2:12 pace:

Bradmont	(G. J. Giannini)	2	2 1
W. J. K.	(W. J. Kenney)	3	1 2
Mabel Dillon	(B. Cohen)	1	3 3
Delilah	(J. C. Welsh)	4	4 5
Decoto Boy	(F. Goularte)	5	5 4
Hamburg Belle	(J. Ginocchio)	ds	

Time—2:14¾, 2:15, 2:15½.

Sixth race—2:30 trot:

Lassie M.	(M. M. Bates)	1	1
Ella Wilkes	(C. B. Borromeo)	2	2
Jonesie Mac	(D. E. Hoffman)	3	3
G. M. S.	(William Sicotte)	4	4

Time—2:33½, 2:34½.

GOOD MATINEE AT PETALUMA.

Several hundred lovers of light harness racing gathered at Kenilworth park to witness the opening day's racing of the Petaluma Driving Club Sunday afternoon, May 23. The fair sex turned out in goodly numbers. Much enthusiasm was manifested, there being some closely contested heats which keyed the spectators up to a high pitch of excitement. The track was slow, caused by a drizzling rain, and for a time it looked like there would be no racing. The time made in the different events was good, considering the condition of the track. Eight scored for the word in the first event. Ike M., driven by Frank McGovern, won the initial heat handily; Pacific finished second and Billy Van third. Billy Van won the next two heats and the race in decisive fashion. The second event was a two horse affair between Healey's trotter Springtime and Ed Millerick's pacer, Glenwood. Springtime won both heats and the race in a hot drive down the stretch. The heats were negotiated in 2:38 and 2:39.

The last race on the card was a pacing race. Glenwood, Petaluma Girl, Tom Mc and Lady M. going to the post. Glenwood won the two straight heats and the race from Petaluma Girl. Petaluma Girl took the lead in the first heat at the tap of the bell, with Glenwood close up. They raced like a double team the greater part of the distance and a blanket could have covered both horses. Glenwood, admirably handled by Jack Grimes, outfooted the game mare in a hot drive down the home stretch, winning by a length and a half. The time was reeled off in 2:27. In the second heat Petaluma Girl and Glenwood raced the back stretch and won the heat and race handily. The time was 2:27. Liberal prizes were offered for the events.

Sunday, June 6, the Petaluma Driving Club will hold a meet at Sonoma, and the following Sunday races will be held again at Kenilworth Park.

The officials of the meet were: Starter, Joe Ryan; marshal, Thomas Caulfield, Jr.; timer, F. Theller; judges, Alec Davis, L. Fourault. The chart:

First race, mixed:

Billy Van, pacer	(Laveroni)	3	1 1
Ike M., trotter	(F. McGovern)	1	3 4
Ned, trotter	(Seguin)	4	2 2
Pacific, pacer	(Brubeck)	2	4 3
Baby Doll, pacer	(Barboni)	5	5 5
Lady O., pacer	(Offutt)	6	6 6
Rosy Clay, trotter	(T. Silva)	7	7 w
Chicken, trotter	(G. Silva)	8	8 w

Time—2:33, 2:36, 2:42.

Second race, mixed:

Springtime, trotter	(Healey)	1	1
Glenwood, pacer	(Millerick)	2	2
Alameda Maiden	(Leoni)	4	3
Cyclone	(D. McGovern)	3	5
China	(Harris)	5	4

Time—2:38, 2:39.

Third race, pacing:

Glenwood Mc.	(Grimes)	1	1
Petaluma Girl	(Ramatici)	2	2
Tom Mc	(Carpenter)	3	3
Lady M.	(D. McGovern)	4	4

Time—2:27, 2:27

WHO GETS THE MONEY?

There has been quite a lot of speculation among turf writers during the past two or three months as to whether Nathan Axworthy 2:12¼ was owned by a single individual, or by a partnership or a syndicate, and no one has come forward with authoritative information on the subject; but there is no longer any need of speculation in the matter, for it is positively stated that the splendid five-year-old son of Axworthy 2:15½ and Bertha Bennett was sold last week by Mr. E. B. Oates, of Paterson, to Mr. Theo. S. Miller, of Newark, former president of the Road Horse Association of New Jersey, and a foremost booster in that virile organization. The price is reported to be $10,000, but we do not vouch for this part of it. At any rate, Mr. Miller has secured a grand young trotter, and Nathan Axworthy has an owner that is just as worthy. He took his record on the half-mile track at Troy, N. Y., last July as a four-year-old, and there is not any doubt that he can show considerably better than 2:10 when made ready and given the word. As a two-year-old he was second every time he started in four races of nine heats, ranging from 2:13½ to 2:12½, and it is probable that he could have stepped in 2:12 or better had it been deemed wise to give him a record. As a three-year-old he did not race, but last year, as a four-year-old, he was defeated but once, and then by an accident. Mr. Miller is to be congratulated upon acquiring such a grand young trotter.—Trotter and Pacer.

DEATH CLAIMS E. E. ANDERSON.

Sunday afternoon at St. Francis hospital in this city occurred the death of Edward E. Anderson, a well known young business man of Portland, Oregon, widely known among horsemen on the Pacific coast through his association with his brothers Frank and David, foremost among Portland's owners of trotting and pacing campaigners.

For nearly two years Mr. Anderson had been a sufferer from locomotor ataxia in a certain measure, though up to some few weeks ago he had missed but very little time from his business affairs. In April he came to this city for a course of special treatment and was able to be up and around the greater portion of the time, spending several days at Pleasanton, where he had many friends and where the horses owned by his brother Frank (the pacers Imbro 2:12¼ and Jim Hill 2:09¼) were in training in the stable of Marvin Childs. Gradually, however, in spite of all that could be done for him, the gravity of his condition increased and on Sunday, May 24, he entered the hospital which he was not to leave alive.

For some time Mr. Anderson had realized that his opportunity for recovery was very slight, but he never grew morbid from brooding over the dark outlook, nor lost entirely his natural cheerfulness. He repeatedly asserted that he would prefer to pass away quickly than to linger along for months in a hopeless condition, and at various times of consciousness during his confinement realized that he had entered upon the final stage of his journey through life. His brother Frank was with him here most of the time, and Mrs. Anderson arrived some days prior to her husband's death and was with him to the end. The body was removed to Portland Monday for interment.

GOOD FIELDS AT COLUMBUS.

No. 1—Hoster-Columbus Breweries, 2:14 Trotters, Value $10,000.—Belzona, Lettie Lee, Todd Temple, Tommy Todd, Montferris, Billy Mead, Miss Directed, Lusitania, Mawitza, Eclear Kurtz, Slip Past, Brooklyn Hal, Peter Scott, Sadie S., Mirthful, Great Isle, Peter Johnson, Binola, Mabel Trask, Miss Rilda, Russian Dame, Princess Welcome, Allerta, Loe Blossom, McCloskey, Ames Albingen.

No. 2—The Capital City, 2:08 Trotters, Value $3000.—Junior Watts, Reusens, Victor Star, Linda Wrona, Par McKerron, Grand Marshall, Bronson, Bonington, Wilgo, Lizzie Brown, Axtien, Bright Axworthy, Lulu Lumine, Peter Scott, Worthy Prince, Lady Grattan, Fair Virginia, J. Malcolm Forbes, Dorsh Medium, Lee Axworthy, Pass All, King Clansman, Lucille Spier, Peter McCormick, Dean Swift, Duchess, Albaloma, Baby Doll, John Mack.

No. 3—The Hartman Hotel, 2:13 Pacers, Value $5000.—Mary S., Judge Ormonde, Altawood, Belle Rex, Baby Bertha, Thistle Patch, Bingen Pointer, Lustrous McKinney, Miss Miriam, Colonel Echo, Hal S., Peter Farren, Jean, Derby Custer, Aconite, Camelia, Clara Walker, Rella E., Presolite, Budd Elliott, Hal Connor, Goldie C., O. U. C., Hal Boy.

No. 4—The King, 2:06 Pacers, Value $3000.—Nutmoor, Harry The Ghost, Our Colonel, Queen Abbess, Single G., Beth Clark, Judge Ormonde, Altawood, Dr. Burns Jr., Anna Carll, Lelia Patchen, Russell Boy, The Beaver, Mary E. Pick, Major Ong, Hal S., Peter Farren, Baron A., Tommy D., Rastus, Walnut Grove, Rose Equity.

No. 5—The Buckeye, 2:12 Trotters, Value $5,000.—Tom Smith, Junior Watts, Nathan Axworthy, Evelyn D., Belzona, Lettie Lee, Todd Temple, Tommy Todd, Bida, Victor Star, Montferris, Billy Mead, Lewis Dillon, Lettie Hall, Bronson, Lusitania, Mawitza, Lou Jennings, John R. Dillon, Virginia Brooks, Peter Scott, Sadie S., Mirthful, Margaret Parrish, Peter Johnson, Worthy Prince, Baron Aberdeen, Alice McGregor, Miss Rilda, Russian Dame, The Guide, Princess Welcome, Pass All, Miss Directed, Allerta, Loe Blossom, Adbell, Laramie Lad, John Mack.

No. 6—Chamber of Commerce, 2:09 Trotters, Value $3,000.—Hesperus Chimes, Linda Wrona, Par McKerron, Grand Marshall, Lizzie Brown, Newzel, Lulu Lumine, Bright Axworthy, Peter Scott, Lady Grattan, Fair Virginia, J. Malcolm Forbes, Dorsh Medium, King Clansman, Peter McCormick, Albaloma.

No. 7—The Arch City, 2:10 Pacers, Value $3,000.—Hal Boy, Periolat, Queen Abbess, Donald B., Josie B., Patrick M., Dwight Logan, Fred Mack, Thistle Patch, Judge Ormonde, Rex Heart, The Importer, Anna Carll, Bingen Pointer, Russell Boy, Prince B., Lustrous McKinney, Miss Miriam, Colonel Echo, The Beaver, Major Ong, Peter Farren, Jean, Dustless McKinney, Camelia, B. M., Present Queen, Budd Elliott, Presolite, Hal Connor, O. U. C., Walnut Grove.

No. 8—The Board of Trade, 2:07 Pacers, Value $3000—Our Colonel, Single G., Tommy D., Beth Clark, Judge Ormonde, Altawood, Baby Bertha, The Climax, Major Ong, Hal S., Derby Custer, Aconite, B. M., Hal Plex, Rastus, Walnut Grove, Rose Equity.

T. R. Murphy of Portland, who handles a number of race prospects occasionally and deals considerably in mules and draft horses, has been in this vicinity of late, taking in the fair and incidentally keeping one eye peeled for bargains in army horse material.

Ted Hayes, now a sedate and substantial "business man" of Butte, has been among the exposition visitors of late, spending the greater portion of his time with his numerous friends in the vicinity of the race track. Ted came to Los Angeles from his Montana stronghold a few weeks ago in order to put the finishing touches on the prep of Bon Courage (2) 2:12¾ for the exposition trots, but decided that the lad would hardly be ready for the first meeting and declared him out of his engagements for that event, though he hopes to have him in good shape for the fall session. With the exception of Virginia Barnette none of the present crop of juvenile trotters on the coast have shown as much natural "lick" as Bon Courage, and Ted's friends are hoping that he will be in condition to start in his late engagements and do himself full justice, as he should by all indications be far better than a 2:10 trotter.

AUTO PARTY HAS CLOSE CALL.

The Chicago contingent in attendance at the June race meeting at the exposition have promised the spectators some genuine thrills when they hook up with the free-for-all and 2:06 pacers with Doctor Burns Jr., but no matter what the doughty Doctor does, the thrills administered to the crowd will not be so absolutely hair-raising as the one given to his managing owner and trainer, with their wives, while en route to this city from their winter home in Los Angeles.

Now when the rear guard of the Angeleno invaders headed for their position in the trenches, Messrs. Watkins, Carnathan and McQuitty were satisfied to take the "kivered kars" for theirs, but Messrs. and Mesdames A. G. Ireland and Al Whitney decided they would derive more genuine enjoyment from the journey by making it by auto through the gorgeous scenic settings for which California is famous, so they set forth bravely in Sam Watkins' car, with Ireland at the helm. All went well until Wednesday afternoon, when the whole party had an experience that they do not care to repeat.

They were well toward the summit of the pass across the Santa Lucia range this side of San Luis Obispo, and started to pull around a team and wagon just as another team started to pass the same from the opposite direction, the driver throwing up his hand in the stop signal. Mr. Ireland immediately brought the car to a halt, but the brake failed to operate and in a second the heavy machine had started down grade, gathering speed momentarily. The ladies and Mr. Whitney managed to jump, but Mr. Ireland couldn't get in the clear and went off the grade with the machine for a downward shoot of some seventy or eighty feet. By the grace of good fortune the car remained upright and landed solidly against a tree, the only thing that saved a plunge of hundreds of feet that could have meant nothing less than death to the driver.

By the aid of tackle and power supplied by the teams and the party's ingenuity the car was put back on the road and towed to San Luis Obispo, where the needed emergency repairs were made and the quartette resumed their journey, completing it safely after a twenty-four hour delay. Save for a few scratches and bruises no ill effects were experienced, but none of them care to try the tumble over again just for the fun of it.

More Pacing Blood in the Trotter

Seattle, May 17, 1915.

Editor Breeder and Sportsman:

I have read the several articles published in The Horse Review and The American Horse Breeder regarding the pacing blood in the trotter, and after reading Mr. Hervey's latest on that subject I am reminded of a sale held in Portland, Oregon, some ten years ago by C. X. Larabee, at which sale a chestnut filly named Zircon by Vice Regent was sold to James Anderson of Victoria, B. C.

Now to begin with, Vice Regent was a full brother to Prince Regent, a respectable trotter, also full brother to Heir at Law, a respectable trotter and also a respectable pacer and sire of Minor Heir 1:58¼, pacing. Zircon's dam, if I remember correctly, was a daughter of Alcone, a trotter of strictly trotting lineage. Zircon was a trotting bred mare, bred by a man who did not like pacers and often told me so.

Well, Zircon was a trotter with quite a lot of lick but was a high strung, rearing, plunging filly who had three qualifications—she could gallop fast, walk fast and trot fast, but could not pace nor did she ever show any pacing symptoms, for I had many wild rides behind her around the roads of East Portland and on the old Irvington track while she was in my stable, as Mr. Anderson left her with James Misner, who was working for me, his assistant being the late Butch Gunderson.

Well, Mr. Anderson failed to pay Mr. Larabee for Zircon and Mr. Larabee was in a quandary as to what to do with her. I went up to his hotel one evening while in Portland and we talked about Zircon and I suggested that she be bred to Hal B. 2:04¼. Well, my friend Larabee was offended to think that I would ask him to breed a beautifully bred trotting mare to a pacer and a non standard one at that, but I stuck to my point and said, "Zircon is an erratic, foolish filly, well bred, and her sire being a full brother to Heir-at-Law, pacing 2:05¼, it is possible the foal from Zircon and Hal B. may be a champion." Mr. Larabee said "No," but I hung on till he finally said, "Well, you win; go and do as you like and I will pay the bill." I went out to my stable, sent for Harry Ossman, the man who had Hal B. in charge for Paul Wissinger, the owner, and had Zircon served by Hal B.

She produced from that mating the trotting mare Hallie B. 2:24¼. Now Hallie B. was foaled a pure gaited trotter and has raced as a trotter and as a two-year-old was a good trotter and is still a good trotter, and while she has never done anything sensational she is a trotter with enough speed to be pretty well up when the winner was going right around 2:08, and I am sure that if her early education had been given under real first class auspices she would have been a very fast trotter.

Well, the fact remains that her dam was trotting bred and a trotter by instinct; her sire was a pacer and a good one, a good sire of pacers, sired by a pacer and a sire of good pacers; moreover, her sire was out of a mare by a son of that Indiana sire Blue Bull. Now Blue Bull has of late been given a lot of cutting and slashing by the critics—possibly he deserved it for ever having been alive—but here comes Hallie B., a trotter, and she has a chance to be a fast trotter; she is by Hal B., a pacer; Hal B. is by a pacer and out of just a mare by an obscure pacing son of pacing Blue Bull, and Hallie B. had for a dam a trotter by an aristocratic trotting bred sire. Now, why does Hallie B. trot?

Yours truly,

C. A. HARRISON.

M. E. Penrose of the Windsor Dairy, Denver, made a trip to the coast recently to supervise the selling of a big consignment of registered Holsteins from his establishment, incidentally coming on to San Francisco to take in the fair. Mr. Penrose found the livestock department and the track claimed a good deal of his time, as he is a lover of the trotter and has at present in training at Denver two first-rate prospects in the mares Windsor Direct by Baron Direct, dam Cecil Woodline by Woodline, and Windsor Belle 2:22 by Sherman Bell. Mr. Penrose enjoyed the workouts at the exposition track while here and the only regret his trip aroused was by reason of its brevity, business at home preventing him from remaining for the June meeting.

Some Recent Telegrams Which We Have Not Received

Honolulu, June 1, 1915.—The renewed and extraordinary activity apparent today on the part of the large corps of divers and naval experts who for some weeks past have been engaged in endeavoring to raise the sunken submarine, F-4, caused considerable curiosity among the general public, so much that in answer to various inquiries the engineers in charge authorized the following statement:

"We wish to state for the benefit of all concerned that the 'steam' which we are putting into our operations at present does not arise from our own free will and accord, as we are government employees, and would not willingly do anything to cast discredit upon the inefficiency of the service under ordinary conditions, and as palliation for our unprecedented actions in putting in two full days' work of four hours each, in succession, we will say that we are actuated solely by a desire to extend a favor to a gentleman with whom many of us have enjoyed an acquaintance while visiting the races, at various times in the past, when on shore leave in California ports, Mr. Charles Amiability Durfee.

"Mr. Durfee has somewhat of an unusual task before him in the training of the race horse Horseshoe Boy, generally accredited as being the largest trotter in captivity, at least on the Pacific coast. In the days of the high wheeled sulky the task of seeing the way in front of him would have been less of a problem to the driver, but Mr. Durfee is nothing if not progressive and his pronounced preference for the modern, low-hung bike has put him in a precarious condition, as, seated in such a rig, the veritable mountain of horseflesh before his eyes shuts off all chance of seeing where or how to drive. Mr. Durfee has appealed to the naval department for aid in solving his difficulties in this matter, and this delicate compliment to the service is the direct cause of our seemingly unpardonable activity.

"With the F-4 on the surface her superstructure can be readily and safely removed, and we are arranging now to send to Mr. Durfee by aerial express the major portions of the periscope of the ill-fated submarine. Immediately upon their arrival in San Francisco a corps of engineers from the Mare Island Navy Yard will proceed to make the proper adjustments and alterations of the same that will permit of its attachment to Mr. Durfee's favorite sulky. With this innovation perfected Mr. Durfee will have an unobstructed view of the surroundings that will relieve him from worry as to what may or may not be in the path of his hay-destroyer and allow him to devote his entire skill and energy to obtaining the highest rate of speed of which the Boy is capable.

"We wish further to state that our efforts of the two days last passed have been rewarded by great progress and we are much encouraged. While both men and officers are tonight greatly fatigued, the work will be renewed promptly at an early hour tomorrow, in all probability not later than ten-fifty-nine, and will be prosecuted with unabated vigor until one-forty-three, unless the corps is utterly exhausted before that time. We realize that we are violating some of the most sacred precedents and traditions of the governmental service, but we plead the existence of an imminent emergency, arising from the sacred call of friendship."

Cleveland, Ohio, June 3, 1915.—As I can see no chance for Dr. Burns Jr. in the 2:06 classes I wish you would see if you can find me a buyer for him at a hundred dollars, fifty commission to you. I know he is a pacer but a stallion as intensely trotting bred as he is ought to be a sire and I hope you can dispose of him to some good man. Two minute performers bred like he is were a rarity even in the palmiest days of J. C. Simpson or S. W. Parlin. If my price is too high, shade it a little or offer to pay express on horse to any point in the United States south of Key West.

Yours for business,

W. P. LEECH.

Rockport, Ohio, May 31, 1915.—I wish to state that Mr. Robert S. Strader of Lexington will preside at our race meeting at this place again this fall, this course having been decided upon owing to the popularity of some of his rulings last season, our decision being strengthened by the firm stand taken by the parent association in backing up Mr. Strader, though perhaps we should say "in backing Mr. Strader up." Such concerted action on the part of judges and the N. T. A. is the best thing in the world for the good of the sport. Would suggest that you use your influence with P.-P. I. E. officials to have Strader at once appointed presiding judge of November meeting, wiring me confirmation of same, in which case I can guarantee entries from a certain Cleveland trainer in the big stake and all classes to which a 2:05 trotter with a mark of 2:13¼ is eligible.

Yours sincerely,

A FRIEND IN EARNEST.

Chicago, May 31, 1915.—A crowd estimated variously from one to two million was present at the West Side track today to witness the matinee harness races held there, a matinee at which all records for speed at this season of the year went by the boards, no less than ten new 2:10 performers appearing as a result of the day's festivities. Not the least interesting of the afternoon's performances was that of a green trotter in the stable of Napoleon Plantagenet Emanuel Hohenzollern, who started for a record in a special event against time. When the starter gave the word the bold going fellow fairly boiled to the quarter in :33, stewed to the half in 1:09, simmered to the three-quarters in 1:48 and came home well done in two minutes, twenty-nine and fifteen-sixteenths seconds. The performance is all the more remarkable owing to the fact that the horse is but eight years old and was never trained until a weanling past.

From a social standpoint, also, the event was a great success, many of our society leaders entertaining friends in private boxes, beautifully decorated. Motor and tallyho parties were much in evidence, prominent among the latter being a jolly, congenial sextette composed of Messrs. J. C. Bauer, Charles Downing, D. J. Campau, Jimmy Tranter, Bob Strader and Vance Nuckols. They prolonged their celebration of Memorial Day well into the evening, dining at Hinky Dink's chop suey joint and afterwards revelling in the presentation of a silent drama entitled "The Lion and the Lamb," or "The Love of David and Jonathan."

The day was marred by but one untoward event, the departure of Magnus Flaws on a tour of western exploration. This intrepid adventurer, who has followed to its lair many of the most wary and elusive pedigrees known to the modern world, has, against the advice of friends and relatives, steeled himself for a journey to the uttermost confines of the country, the little fishing hamlet of San Francisco, perched precariously upon the rockbound southern point of the heads that form the fabled Golden Gate. The hardy pioneer contemplates making the journey and return, but such grave fears were apprehended for his future that many downcast friends bade him a sorrowful, perhaps a final, farewell.

Memphis, June 1, 1915.—I didn't intend coming out to the exposition race meeting, but I see by the accounts sent out by the publicity department that I will be there with all the Hamlin horses. Doggone the luck, I hate to make any man out a liar so I reckon you'd better act as my agent and enter the Hamlin stable clear through the program. The 2:13 trot is still open and I want Belle Hamlin in that sure. If you all can arrange to get me in that three-year-old trot I reckon Fantasy ought to be right good, so get her in if you can. Enter the balance of them as you think best, and don't overlook The Abbott for the free-for-all trots. Doggone them ol' mountains, I don't like 'em, but I reckon the altitude won't bother this bunch of hosses much.

As ever,

ED F. GEERS.

P. S.—Doggone, I forgot to say that if I bring these hosses, Mr. Hamlin will come along, but don't reserve any box unless you hear from me.—E. F. G.

All Ready For The Exposition Trots

These must be nice, quiet days at Pleasanton now, and Sam and Soga, the smiling little Japs who have been putting in long hours providing for the keen outdoor appetites of a big army of caretakers and trainers, must be wearing relieved smiles of the genuine variety in these times of ease, as the Pleasanton colony almost made it unanimous when it came to a matter of moving to the exposition.

Sutherland & Chadbourne's stable of seven came down Saturday and have had numerous trips over the local track during the week. Zorene 2:10¼ and Zoetrix, the mares by Zolock 2:05¼, have both paced around 2:08 this year, and the green pacer A. B. C. went the route at Pleasanton in 2:08¾. Bon Cres (3) 2:10¼ and Trix McAdrian worked in the ten mark before coming down, and Harold C. has been but a second away from it. Vallejo King was also brought down but has not had much asked of him since his recent operation. Fred gets a number of starts early in the fun and his horses have not been sent along any faster for the full route than they were going at home, though they have all had stiff work and some fast brushes.

PETER McCORMICK 2:08¾—SHULER UP.

The balance of the bunch planned to come Monday, but ran foul of a holiday, so decided to stay at home and work Tuesday and come to the city Wednesday, arriving in time to jog everything and get fairly well located before nightfall. Railey Macey, with the horses of the International 1:55 establishment, had the largest string of this shipment and occupies most of the south row of stalls in barn six. Much to the disappointment of both Messrs. Macey and Savage their horses have been more affected by the change of climate than most of the others, probably owing to their custom of being stabled in winter in steam heated quarters, and they will in all probability be in much better shape to put up a hard race at the fall meeting. Nevertheless, Railey has his charges looking and acting well, and has a good deal of speed on tap. Princess Patch, substituted for Dazzle Patch, has beaten ten at Pleasanton and Electric Patch, their four-year-old trotter, has gone the route nicely in 2:10¼. Buzz Patch and Jean Arion have both trialed in 2:11 and the other aged members of the stable have shown in fifteen or better. They have two nice junevile pacers, the three-year-olds Agnes Patch who has made the circuit in 2:17 with a half in 1:07, and the two-year-old Judith Patch, who has been in 2:26 with a half in 1:09.

Marvin Childs showed Hal Boy to a number of interested parties Wednesday afternoon, and the big little pacer looks fit as can be for the scrap for the big stakes. Hal Boy has raced a whole lot on bull rings and wears about as little as any pacer in the business, two things that are not going to work to his disadvantage in the least in the exposition events. He is pretty well regarded as a one-two proposition in the big stake and has worked at Pleasanton in 2:07, 2:06¼ and 2:08, while Marvin's other pacer, Lizzie Dillon, has turned the trick in 2:07, with a repeat in the same notch. Tom Smith has trotted in ten.

Marvin's Montana patrons got cold feet from some unknown source, and have declared Blue Finch and R. C. H. out of their local engagements and a representative is expected daily to arrive to accompany the pair on their homeward journey. Both have done wonderfully well in Marvin's hands during the months he has had them and had developed into 2:10 trotters, R. C. H. having gone the route in even figures and Blue Finch in 2:11. They go home in the best kind of shape and if their owners are planning to hold them over they should be good campaigners next season.

The Canadian contingent also arrived Wednesday, though the advance guard composed of Messrs. Carson, Rochon and Savage had previously "registered" in the city. Before leaving the MacKenzie plant Barney Barnes had ridden in 2:06 with College Gent and 2:09 with Strathtell, so somebody can "look a little out" for this Irishman when he goes to the bat a la Knapsack McCarty. Will Fleming also has something up his sleeve for some unsuspecting sucker, as he has worked The Beaver in 2:07, Tropic Dawn in 2:11 and Seneca Boy in 2:12, with more to come. Will's fastest ride this year has been a mile in 2:05 behind Joe Patchen II, and very probably he will have the mount behind his old pupil in the free-for-all pace, in which case there will be some fair moving, as Will seems to be on the inside with the big fellow.

The Hemet, Borden and McKiernan car from San Jose came in Monday but was "marooned" in the yards owing to the "holiday" until Tuesday, when it was spotted at the exposition chute and the horses safely unloaded. Much to Mr. Doble's disappointment Wilbur Lou was not in shape for a hard race so was left at San Jose with the youngsters that were not entered here. Kinney de Lopez, Mr. Doble's aged trotter, has worked handily in 2:11 and is one of the nicest gaited fellows on the grounds—also a nice headed one, as Mr. Doble, who at this time of life is no Samson, generally drives him without the use of handloops on the lines. Hemet showed over the San Jose track in 2:08¼, so that he seems to have the steam as of old, and Blackwell has been in 2:15 with both his three-year-old stake prospects, the trotting filly Allie Lou (2) 2:25 and the pacing colt Oro Lou.

John Quinn brought up four in his section of the car, headed by that consistent campaigner Albaloma, who has been taking his work nicely this spring and who looks fit for the fray. John hasn't buzzed him quite as fast as some of the other trotters have been going, but he has given him a raft of work from 2:10¼ to 2:14; that he has his speed was attested Wednesday the first time John cut out the muffler for the trip through the lane at the exposition track, the lad negotiating that fast bit of footing in a flat twenty-nine seconds. Baby Doll, who is the stable's substitute for Albaloma in the big trotting stakes, has had a bit of trouble recently with an abscess on her jaw that caused her to miss a bit of work, but she is in good shape at that. Saturday she had four heats below 2:16, and Wednesday worked this track in 2:13½. John will start Sheldon B. in the three-year-old pace and has progressed to a mile in 2:16½ with him; Major's By Guy, the green trotter that showed so well this spring, has been declared out of his June engagements but will probably be O. K. for fall, as he has practically recovered now from the slight ailment that caused his let-up.

Mr. Borden decided Lock Lomond would hardly be up to a hard race this early in the season and was on the market for a pacer, but failed to "mak connections." Margot Hal came to his attention, bu as he and Mr. McDonald couldn't get together o price they compromised by an arrangement whereb she will race in Mr. Borden's colors in the 2:06 pac on getaway day, with the redoubtable Alonzo doin the teaming.

Joe McKiernan was a bit dubious about his fu pacer, Casey Jones, when he first landed, but h took kindly to the exposition track and worked i Wednesday for Tim Sexton in 2:14¾, with a half i 1:05, which is not so worse for an "amachure."

The drag of the Los Angeles winter colony drifte in on the breeze one afternoon late last week—Littl Bernice 2:06¼, Homer Mac 2:06¼, John Mac 2:12¼, Bessie Custer and the eagerly awaited Dr Burns Jr. 2:04¼. Sam Watkins has been scullin Little Bernice over the course here and had her le down to about 2:06 before shipping; Sam will d the driving in her races here as the sport was on thing he entered for, and when he sends a lift alon the lines he gets about as much response as the nex one. Homer Mac is husky as a beef bull and look dangerous in any company up to 2:04, or perhap faster. "Long Jim" stayed at home until near rac day in order to continue training operations, an Kelley has been working the big Petigru pacer pend ing Stewart's arrival. John Mack and Bessie Cus ter have not been quite so good here, so far, as the were at Los Angeles, but they will probably furnis some hot competition when the races start, whil Dr. Burns Jr. seems to have plenty of sizzle, a shown by a quarter in :28½ on the end of a mil around 2:11. He is a bit touchy in his bum fin an the dope may be spilled all over the beach wher they take him in the free-for-all and the 2:06 paces but he still looks to have the class of the field.

About everybody is on deck at this writing (Thurs day morning) that is known positively to be headed this way with the exception of Ben Walker and Joe Jones, the Fresno delegation not having been heard from. Ben intended shipping Monday but failed to land and Joe was down Sunday looking things over and getting accommodations for a "bush pacer" named in honor of his daughter. Some of you may have had some acquaintance with this sidewheeler parading under the name of Leata J., and from the way she is performing at present you may know her better in the near future, as she worked the Stockton track Saturday in :31, 1:01½, 1:33½, 2:04¼, the fastest mile that has been shown this year in any state.

While the newcomers have been getting their traps located in their new quarters and jogging horses fresh from the cars, most of the former members of the fraternity present have been indulging in rides anywhere from 2:11 down. Jim Logan worked a pair of miles last Saturday right in the neighborhood of 2:05¾, which up to this time stand as the local record—unless somebody prized up a little cain Thursday morning—Dan and Lock Logan have taken things easy in 2:12, and Booze has turned 2:09½. Saturday morning he came around the turn rolling and feeling for the hobbles—which he found. Elmo landed in the clear but jarred the joints of his legs a bit, managing to keep on his feet and qualifying as one man who was able to get Booze down, reversing the usual formula.

Harry Dowling traveled three miles better than ten Saturday with Clara Mac 2:04½, and worked Robert Bingen, who starts in the 2:30 trot on opening day, in 2:14. Ruth Ansel went the route for him in 2:19 and he showed a nifty candidate for this fall's two-year-old events when Sadie Ansel trotted in 2:22.

George Nugent with Dr. D. C. and Princess Louise, his Del Coronado trotters, has had some nice rides around 2:14 and some fast quarters, both in the lane and getting away from the wire, traveling both ends right at a two-minute clip. V. L. Shuler and Peter McCormick make their debut Saturday in the 2:08 trot, and are no strangers to the exposition footing, having gone all the way in 2:09 and repeat in 2:08¼. Just how good this pair is remains to be seen, but they look like a real team to the railbirds. John Gwynne has not been asked to beat fifteen since his arrival, and Fleeta Dillon, while pacing for Millard in 2:08, will probably be switched to trotting again after this meeting, as she developed a good deal of speed at that way of going formerly and seems less fussy at the trot. Peter Howard is working the trotter that Millard has been training for him, and has been in sixteen with him. Matawan is knocking at the door of the select company room for Hans Frellson, with a mile in 2:11½.

San Felipe is showing some of his old time form for Charley Durfee, and has been beating ten whenever called on, with a half in 1:03 and quarters in :30, the latter trick being something that the big lad does in a pretty convincing way. Charley and Twinkling Dan have an argument occasionally and the pacer is getting some long works, which don't hurt him any, and paces fast when he decides to do so. Carleta, the Hagan two-year-old, carried C. A. around the course Tuesday in 2:23½ with a half in 1:10, but Carl, who has a sore finger just now, hasn't been stepped fast. Tim Sexton's I. W. W. trotter is round-

ing to and Charley let him down to a couple of miles in 2:24 and 2:23 Wednesday.

Lon McDonald's "individual" string seems to have a jinx tied to 'em, as Hallmark, McCloskey and Baron Todd are all a bit off from one thing or another, but McCloskey will start in the big trot, in all probability, and his other engagements as well, as his bit of lameness doesn't seem to worry him much. Laramie Lad and Hedgewood Patchen have both done 2:10 even recently, Adbell M. 2:11½, Baron Todd 2:16, The Duchess 2:08½, Star Winter 2:09, Margot Hal 2:08 and Miss Harris M. 2:10¼. This lassie nods a little, but pays no attention to it, apparently, and Alonzo regards her very highly as a candidate for the year's championship among her kind. Lon is also working S. Christenson's two-year-old trotter, Natalday, and the youngster has come steadily for him, trotting this week in 2:24 with a quarter in :33½.

Lon has had his fastest ride so far behind Loe Blossom, the mare he came very nearly owning last fall at Phoenix when her purchase by Mr. Peterson was hanging in the balance. Frank Childs warmed her a few miles Wednesday morning, driving her one in 2:09½, and then turned her over to McDonald "to let her step along a little." Lon really didn't mean it, but the mare slid away so easily that he was going faster than he thought, hanging up a new record for trotters, at this track, of 2:06½. The chestnut mare is a real trot horse and is showing Grand Circuit calibre of a high order just now; she is liable to keep on showing it, too, for she has had enough hard times in the past to have placed any ordinary lady on the shelf for life. She is going to prove real bothersome to some one both here and down east. Nor is she the only keg of sizzle that Frank has tapped, as he has ridden behind Bon Guy in 2:14, Jim Hill in 2:12 and Imbro in 2:09, while one of the early part of the week's nicest workouts was that of the S. S. Bailey pacer, O. U. C., who reeled off three sparkling miles Tuesday in 2:07¼, 2:07, 2:08, going both ends of different miles better than thirty seconds.

Spriggan worked Tuesday for Will DeRyder in 2:10, 2:09¼, 2:08½, and his owners can cash him right now for several times his cost, but are a bit inclined to risk owning him, as they are not in much on him and he looks to have a fair earning capacity here, entered in the main stake at both meetings and a number of class events. Dicto appears to have retrograded a bit, as 2:10 seems as much labor here as 2:08 was for him at Pleasanton. When Brother Charley came down he brought Asa Pointer for Will, and all asked of him so far is a mile in twelve. Incidentally, while speaking of Brother Charley, there was a story making the rounds Wednesday and Thursday that this lad had "shooed" Madame Mack under the wire Wednesday morning in 2:05½, but Charley stands firm on a figure three seconds slower. No matter who's a liar (and we are strong for Charley's watch owing to the fact that he is too big for us to think of tackling in a scrap) the fact remains that the Expressive Mac lady is working very nicely indeed. Joseph P. Patchen the two-eyed has 2:08½ to his credit in a stiff wind, Zomblack a like figure, California B. 2:15 and Sis Bodaker, Charley's 1916 stake model, 2:17. Miss Perfection trotted like a race horse Tuesday in 2:12 by DeRyder's watch, though the sea-gull clockers gave her a better credit, around 2:11, as she went away a bit behind Dan Logan and Frank Perry and they couldn't outfoot her to the wire, their mile being in an even twelve. For Charley, Maymack has made the trip in 2:10¼. and for A. W. Longley, who may drive her in the free-for-all trot in the absence of R. J. MacKenzie, in 2:12, behaving like a perfect lady.

Bert Webster gave Frank Perry a seven heat work Tuesday with four of the trips below 2:13, and later in the week rode in 2:20 behind his three-year-old stake pacer, Rodney Patchen. The Perry horse is standing up fine for Bert. Al Ruthen has decided to start only Walnut Grove at the early meeting, but has him well engaged and well prepped, up to a mile in 2:08 over this dirt, with a half in 1:01, a quarter in :28½ and an eighth in :13¾. You heard us right the first time, and don't overlook this black fellow when you see him.

Red Rock has been coming rapidly for Joe McGuire and paced around 2:10 during the week, with several trips through the lane in 29 to 30 seconds, while Direct Line, though not asked to go quite as fast as he showed last week, has had a lot of healthy work in about the same notch. A. R. G. and Monk are coming steadily but a bit more slowly, and with Peter E., his three-year-old trotter, Joe has ridden in 2:23½. Charley Silva shows Teddy Bear to good advantage every Sunday by annexing a free-for-all pace in the matinees, and Kid Cupid also got the brackets Sunday. Will Ivey has ridden right at the ten mark since coming here with Moko Hall, the season's first 2:10 trotter, and Donald showed three miles better than 2:11 early in the week. Jim Donnelley, Frank Wright's mount in the amateur classes, is working nicely for Will in 2:11¼, with repeats in like time.

Charley Spencer has ridden in 2:09¼ this week behind both his aged trotters, The Proof and Bonnie Ansel, giving them a number of heats from that figure to 2:11, and they both stand well with the railbirds. Charley also promises to be real troublesome in that two-year-old trot, too, as The Expense has worked this track for him in 2:21 and seemed to have some left; she is a fine sized, rich colored filly and comes in for a lot of fussing over from the visitors, as she differs from her dad by having the nicest kind of a disposition both in harness and out.

One of the nicest workouts that Will Durfee has had this year was on Tuesday with Virginia Barnette. The lass had a number of fair miles, and the most pleasing one was in company with Dicto and Will DeRyder, Donald and Will Ivey, Bonnie Ansel and Charley Spencer. Durfee went away in the bunch and placed the Moko filly everywhere at some portion of the mile, putting her in the ruck, going around the field, taking back again, and finally coming home in 2:10½ on even terms with the leaders. All of the quartette are short on racing experience, but they behaved like old campaigners. Esperanza for some reason is less steady than of yore in her work, but has all her speed when on the trot. Durfee's pacing queen, White Sox—queen that is to be, he hopes—is doing everything asked in an impressive manner and his youngsters number some real stars, as their races will show when the time comes.

———o———

A brief and hurried note from C. A. Harrison, devoid of details, brings the sad tiding of the death of John McClintock in Southern California Saturday afternoon. Only pure grit and love has kept Mr. McClintock alive for months past, and the news of his passing was not unexpected. Through the assistance of horsemen friends some measure of comfort and relief was added to his closing days, and they will join with us in expressing to his devoted wife, who survives him, our most profound sympathy and respect.

◈◈◈

Messrs. Ed Peterson and Tom Dennison arrived in the city from Omaha Thursday morning and are more than enthusiastic over the condition shown of late by the Peterson candidates for the big trotting and pacing stakes both here and on the Grand Circuit—Loe Blossom and Hal Boy. They arrived too late to see the former trot the local track in 2:06½ in her work, but will be on deck to see her in all her races, when she may trot a bit faster.

◈◈◈

Mr. and Mrs. M. W. Savage and son Harold, with Mrs. Savage's sister, Miss Bean, came in from Southern California Thursday on the Lark and will remain here for some weeks. The party is in the best of health and have been enjoying their California sojourn immensely.

◈◈◈

Pleasanton is not yet "strapped" for speed if these recent workouts are any guide:—Grattan Boy in 2:08½, last half in 1:01¼; George N. Patterson (3) 2:09¾ trotting; Tango (3) 2:12½ trotting; Surety (2) 2:18½ pacing, with a half in 1:06½, and Verna McKinney (2) 2:19 pacing and repeat in 2:18. Hardly!

DON PRONTO MAKES FAVORABLE IMPRESSION

Letters arriving by recent mails from the lands across the Pacific tell of the safe arrival of Don Pronto 2:02¼ in his new home in Australia. The first of the epistles, mailed from Papeete, tell of good weather and calm seas to that port, with all on board doing nicely, but from New Zealand on the story was different. For five days, according to Will Green's account, things looked squally for Don in the heavy seas as they broke over the Moana, the engine room becoming flooded at one time to a point that sent the stokers to the decks in a hurry. Port was finally made in safety on April 28, and the horse was placed in quarantine for the customary period. Twice en route, at Papeete and at a New Zealand port, the steamer was at the docks long enough for the Don to be unloaded for a night's rest, and he arrived in excellent shape.

Dr. Simpson, the owner, was on hand at Sidney to meet his new purchase and immediately proceeded to fall very much in love with him. In quarantine the Don has had many admiring visitors, and so well pleased are the Australians with him that the owners of Ribbonwood 2:09, the island continent's premier sire, are said to be seriously contemplating his purchase, for use as an outcross for Ribbonwood mares in their breeding operations.

Green, who has been in the employ of Dr. Simpson since his arrival in Sidney, writes glowingly of the situation there and is much pleased with that portion of the country he has seen so far. He describes it as "the greatest horse country ever," and every week seems to be race week. The war does not interfere with their customary sports to any great extent, and Willie is inclined, at present at least, to tie up and call it home. He sends regards to all the boys from the bushes to the big line and asks any who are interested in Australia to write him in care of Dr. R. C. Simpson, Armidale, New South Wales.

———o———

The English government is still buying horses at the Denver market and is loading out from 800 to 1,000 head a week to Montreal for shipment over the water. Seventy per cent of these purchases are for the artillery, five years old or better, and weighing from 1,100 to 1,400 pounds for which $185 is paid for everything accepted. The other thirty per cent is made up of cavalry mounts weighing from 1050 to 1150 pounds, 15.1 to 15.3 in height, for which $135 is paid. The contractors send the rejects out to pasture near town and after they are bloomed up a bit they are brought back and submitted again for inspection. The other day twenty-four carloads of Idaho stock arrived and the most of the stuff was taken. They seem to like old plow horses with shoulder galls which show they have been used to hard pulling.—Field and Farm.

THE DUCHESS 2:07¼—McDONALD UP

WAR HORSE PRICES STIFFENING.

Prominent horse dealers who have been selling horses to the warring governments of Europe asserted yesterday that the demand for remounts had not declined in any particular since the beginning of the war, army officers representing the governments of France, England, Belgium and Russia still being spread over the horse centres of the country actively engaged in passing on stock brought before them for inspection and possible purchase. In fact, it was stated that the entry of Italy into the war would in a measure stimulate horse buying. Military officers representing the Italian Government have been in this country for some time making purchases of horses, and several large shipments have already been made, while in the outlying sections of the city thousands of horses were being quartered until steamers could be secured to transport them to Italy.

It was reported from Chicago yesterday that agents of the British, French and Belgian governments were ordered to hasten horses to the Atlantic seaboard, and that the work of inspecting horses is being carried on day and night. It is stated that the accelerated demand for horses had resulted in advance in the price on artillery stock, which is now bringing $200 per head, against $160 per head paid recently. In the local market it was reported that a contract for 25,000 horses had been closed for shipment to one of the Allied nations, the consignment having a value close to $5,000,000.

In the local horse markets much activity is witnessed during the morning hours when, with the streets clear, the horses are taken out for wind tests. The agents of the Allied governments have, up to the past few weeks, been very strict as to the type of horse they purchased, and as a result rejections, it is stated, have averaged as high as 75 horses out of each 100 offered. The horse dealers have felt that the time would come when animals rejected for minor imperfections would be wanted by the foreign agents, and it was stated yesterday that the continued drain on the stock of horses in this country had brought the situation to a stage where the foreign agents were being forced to purchase horses previously disqualified or limit their purchases to an amount entirely insufficient for the wants of their governments.

It was stated yesterday that the specifications first laid down by the foreign horse buyers are not now being strictly adhered to owing to the scarcity of prime horses. In fact, the increased demand combined with the dearth of high grade stock had brought about higher prices for horses that were discarded by the agents in the recent past. The large horse dealers in this city have been purchasing stock freely in the west and bringing the horses here for inspection. With the high number of rejections it was feared that there would be a surplus of horses in the East, and for a time attempts were made to sell them to horse users in the East at low prices. When it became evident, however, that these horses would eventually be required they were sent to the suburbs to be housed.

According to the summary of foreign commerce for the month of March, a total of 33,694 horses were exported from the country, as compared with a total of 3,071 horses exported in March, 1914. The number of mules exported in March this year was 6,433, as compared with 569 mules shipped during the same period last year. The horses shipped in March had a value of $8,088,974, while the mules were valued at $1,255,759. The value of the 185,023 horses shipped since July 1 (the war began on August 4) according to the Government returns, reaches a total of $40,695,037. How the horse trade has expanded can be reflected by the figures giving the value of horses shipped in the same period of nine months in 1913-14 (July 1 to March 31) when a total of 15,078 horses, valued at $2,243,168, were shipped.

Up to March 31 a total of 88,932 horses were shipped to France having an aggregate value of $21,464,447. Last year no horses were shipped to France, so that shipments this year can safely be attributed to war purposes exclusively. To England, in the nine months' period ending March 31, a total of 57,456 horses, having a total value of $12,403,243, were shipped, while in the same period last year England took 12,558 horses valued at $2,924,125. Last fall, when the St. Lawrence route was opened, England arranged to secure horses from this country through Canada. This move was taken because of the fear that docking facilities would not be available in American ports, while by commandeering wharfs in Canada shipments of horses would be assured. Since July 1, and up to March 31, a total of 26,142 horses, having an aggregate value of $3,952,254, were shipped to Canada and undoubtedly have since found their way to England and France.

In the steamship charter market it is stated there is no active demand for steamers to transport horses to Europe. The activity that prevailed last fall, when every steamer arriving in this country along the Atlantic seaboard was sought for horse transport, has in a measure supplied the tonnage required for this purpose. Steamers that were taken on charter last fall were taken for six months to nine months. Owners demanded such long term charters in view of the cost in equipping steamers to transport horses. It was stated yesterday that the cost of ripping out ordinary partitions in the hold of a steamer and substituting stalls, runways, etc., so that horses could be accommodated, averages from $10,000 to $20,000 per steamer, and in view of this cost owners demanded that they receive charters which would warrant such expense.

Some representatives of horse dealers who, instead of selling to buyers of the foreign governments, have undertaken to send horses to Europe with the hope that once the horses were aboard the various governments would be so anxious to purchase them that they would waive their strict specifications. Toward this end there have been in the steamship markets inquiries for the purchase of tonnage, the horse dealers seeking, it is said, about ten steamers of low speed. It is asserted that it is cheaper for them to purchase the steamers than to endeavor to attempt to close chartering arrangements.

The various shipbuilding companies along the Atlantic coast have reaped a harvest as a result of the shipments of horses, as the work of altering steamers for this purpose has been turned over to them.—New York Journal of Commerce, May 21.

A BRIGHT OUTLOOK.

On different occasions we have called attention to the export of horses because of the war abroad in which nearly all of the European nations are engaged. The present week has witnessed the transformation of Italy from a neutral to a belligerent nation. We can accordingly count, at the present time, practically all of Europe engaged in a war for supremacy and the dominant note prevailing at this time is the crushing of the foes that oppose each individual nation.

Each and every country involved seems to regard their present struggle as a war for existence and it is an easy matter to find justification for each and all of those nations in a perusal of the public press. The duration of the present conflict is beyond conjecture, but it is certain that if no decisive results are obtained by the respective opposing sides that in the end peace will be declared because of the exhaustion of the resources of the warring states. This would necessarily mean what we Americans call a draw and ordinarily, in our acceptance of the term, we would regard it as a case where everybody breaks even, but in the present conditions such a draw will mean that each and every participant in the present strife will be a loser.

They will exhaust all of the resources of their nations before the question of peace will be considered and their respective states will be thoroughly combed for food stuffs, ammunition and all sorts of war supplies before they will admit any occasion to seek peace has arrived. In the meantime the United States will be the selected purchasing place to eke out the necessary food and war supplies that are demanded for a continuance of the struggle and all of the nations that are reasonably secure of safe transit by the sea will be actively engaged in buying their necessities in this country. Prior to the conversion of Italy from a neutral to a warring nation, there had been a great demand for horses in this country and, if we can believe the reports that have been made public, Italy was one of the largest buyers of horseflesh. However, those purchases were made for the purpose of placing their war establishment in a position to meet any emergency that might arise, and the apparent emergency has been made plain by the fact that Italy has finally declared war against Austria.

In the absence of Italy actively engaging in war, it was necessarily only a question of time until that country would succeed in purchasing all of the horses needed, but engaged in actual warfare, it necessarily becomes a fact that she must continue to purchase so as to be enabled to fill the blanks arising from the losses in war. Of all the nations involved, Russia is the only country that can supply the needed horses from her own resources and, aside from Russia, the United States is the only nation in the world able to sell horses in large quantities.

This nation, it is estimated, owns a trifle more than one-fourth of the world's supply of horses, our available supply being variously estimated at from twenty-two to twenty-five millions, so that there is no occasion to fear that the foreign demand will seriously interfere with our necessities, but it should be accepted by horse breeders the country over as presenting to them the greatest opportunity in recent years.

This appeals especially to the breeder of the harness horse, as, with the exception of heavy artillery horses, the demand is for types of the harness horse breed, and that demand is so active that up to date statistics note that over 250,000 horses have been purchased for war purposes. Great as this may appear, the fact remains that this vast number of horses is largely made up of animals unable to procreate their species and are designed wholly for war purposes. Naturally we are justified in the conclusion that these purchases are forced and the respective countries to which these horses are being exported are practically swept clean of animals of that type.

These purchases are for war purposes pure and simple, but when peace is declared the demand for breeding animals will necessarily arise and then will come the golden opportunity for the stock raisers of the United States. It is not possible to name the day, hour or year when distracted Europe will see peace agreements signed, but it is certain to come and, with the cessation of war, the task of the different governments to repair the ravages of the conflict will begin.

It is pleasing therefore to note that already an organization is under way in New York City to arrange to supply the European nations with horses to rehabilitate their breeding establishments when peace is finally declared. In that great shipping point, it is universally recognized that such a demand will follow the cessation of the war and steps are now being taken to meet the call when it will come.

We consider that the breeders of this country are justified in accepting the formation of such an organization in the greatest city of our country as an indication of the fact that no matter what has occurred in the past to depreciate the value of horses, the future holds nothing but golden promise.—American Sportsman.

A DEPLORABLE CONDITION.

Kamms, O., May 16, 1915.

Mr. Robert S. Strader, Lexington, Ky.

Dear Mr. Strader—I am writing you a letter that I don't like to do, but am forced to. Now, I cannot have you in my stand, as I am afraid there will be a riot of I do. I am very sorry, for I think you the best man in the world, but you know how things are here with no racing law. We have nothing to say. Now, I had you engaged, and whatever you say I owe you let me know, and I will send you a check. Hoping this is satisfactory, I am,

Very truly, HARVEY ERNEST.

This letter coming immediately after the statement in the New York Herald, "There will be no racing at Rockport with Strader in the stand, the sheriff will see to that," credited to J. B. Dawley, lawyer for Vance Nuckols, seems to bear out the statement frequently made, and often denied, that an attempt would be made to stop betting at Cleveland if Nuckols was not reinstated. To say the least of the situation pictured by these statements, it is pitiful, and the sooner it is brought to a crisis the better. If the management of an association is held in such abject fear that he cannot employ the man he considers "the best man in the world" to judge his races, without a riot, then that community does not want clean racing and is a menace to the entire sport. The sooner the better class of people take the matter up and either pass laws which will defy any such intimidation, or stop racing, just that soon will the influence of those who defy law and order be eliminated. This goes further to prove that there is only one salvation and that is to clean house, from top to bottom, and put all racing under state commissions. Then all are safe alike. The interest of associations will be safeguarded by the state. The interest of any horseman who may be accused of any infraction of the law will be heard by an impartial tribunal that no threats of any kind can bias. Evidence will not be furnished by affidavit, for the commission has one of its number on the ground, whose evidence is sufficient. Furthermore, with a steward on the ground representing the court of final resort, there will be fewer attempts to put over jobs. And above all things the bookmaker will not show his hand in so many things, unseemly as is too often the case. It has been said that the betting privileges had been sold for $500 per race. If this be the case, then the buyers become joint owners with the management. It was this state of affairs that broke up racing of the thoroughbreds, and if it prevails at any track of the trotting turf it is an octopus for evil. As it now stands it seems that there is no tribunal in Ohio to appeal to for relief, and the parent associations dare not come to the aid of a member, even with a suggestion, for they have no power except to collect fines, and this only by suspension. Organization is imperative.—H. M. Jones in the Horseman.

W. J. Andrews and his stable of high-class young trotters which have been in winter quarters at Thomasville, Ga., reached Randall last Thursday and are now in permanent quarters in the private barn of H. M. Hanna. "Billy" and his pupils are in excellent condition and the entire combination looks ready to begin the strenuous life. His string consists of Lee Axworthy (3) 2:08, the great colt which raced in 2:05 last fall and is in line to do battle with the select aged stake candidates. He is in grand form, has taken on weight and his owners naturally repose great confidence in him. While his best mile this season is 2:21, he peeled off some fast fractions of the distance over the sandy two-lap ring; Newzel 2:05¼, the steady going aged gelding; Hazel Laing 2:08¼, the John A. McKerron 2:04½ mare which pulled off a good victory last fall and seems in tip-top form; Honeysuckle 2:14½ by the same sire and right now a great prospect, having just trotted the two-lap ring in 2:18¼ before coming north with the ease of a stake performer; John R. Dillon 2:11¼, holder of the Thomasville, Ga., track record by reason of a mile in 2:16. This stallion is figured on throwing a surprise into the big line contingent some time during the summer. Rusticoat (2) 2:13¾, the main dependence in the three-year-old futurities; Bacelli (2) 2:15, a highly regarded three-year-old; Bitumen (2) 2:27, the same age, and by the same sire; Nutworthy, a clever Axworthy (3) 2:15½ youngster; Siliho by Siliko (3) 2:11¼; Leonor McKinney (2) 2:18¾, now three; Volga (2), a full sister of Peter Volo (3) 2:03½ and accounted a coming star; Margie by Peter the Great 2:07¼; Great Minnie and Peter Valpa, also a couple of likely juveniles by the premier of Patchen Wilkes Farm.—American Sportsman.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FOX-HUNTING WITH A CAMERA.

[By Winthrop Packard.]

Hunting the fox is a national pastime in England where, indeed, it is a cruel sport. The fox is run down by numbers of mounted men and dogs and killed by the dogs when caught. There is little chance for Reynard. His "earths" are blocked by the gamekeeper and beaters drive him from all hiding places. In spite of all that the English fox often escapes, overmatching the odds against him by almost preternatural cunning.

American fox-hunting has, at least, the negative virtue that it is not so cruel at the English form. Here, the fox is chased by a few dogs which he can easily outrun and out-distance. The cruelty occurs when the dogs drive the fox within range of the gun of the huntsman who lies in ambush. Competent naturalists claim that so far as the dogs are concerned the fox looks upon it all as a game. He has a hundred schemes for outwitting his pursuers and he runs, as one might say, on the broad grin. Indeed, the American fox has learned so well how to live that he thrives in numbers in thickly settled communities, rarely seen by man. As many as ten in a season have been known to dwell in the Arnold Arboretum, within the city limits of Boston, and the Blue Hills Reservation, bordering the city of Quincy for miles and close by Boston, is a noted rendezvous of these elusive wild creatures. They have learned that the reservation is sanctuary and they retreat to it to avoid danger. Civilized man has been good to the fox on the whole, for he has killed off his worst enemies—the wolf, the panther, and wild cat, leaving him only man himself to outwit. And that is easy. He hunts a good deal in the early morning and at twilight. Yet, he does not fear to go out in the full glow of day, slipping noiselessly along like a shadow. A favorite trick of his is to follow a man, shadow him—one might well say—but if the man turns the fox slips behind a bush and makes off, usually unseen. But the fox is a brainy animal and because he has brains he sometimes gets into "a brown study" and walks right into danger without realizing it. More than once I have met a fox strolling in meditation along a woodland path, his hands behind his back—so to speak—and had him pretty nearly bump me before he realized that I was there. At such a time it is amusing to see the expression of incredulity that comes over Reynard's mobile face. For a fraction of a second he cannot believe it possible that he has sauntered right up to a man. Then consternation holds him for another fraction of a second, followed by a swift summing up of the chances and a bound behind some object. The way he floats away into the distance after that is a marvel.

Such chance encounters are not common. One may walk among foxes for a whole summer season and not see one, and it would hardly seem possible that the sport of hunting with a camera could be successful with these clever strategists. One man, however, has done this. Howard S. Adams, photographer of animals, has succeeded in getting some wonderful pictures of these wary creatures and has found the sport far more exciting and adventurous than hunting with a gun. However shadowy and elusive the fox may be in the field there is one spot where Reynard is to be found daily—that is the burrow; in the spring and early summer when the family is large and hungry the burrow is a busy place. There may be six or eight half-grown youngsters there always hungry and the mother fox must hunt constantly, in the full glare of day as well as in the twilight, to supply the need. It is by watching the "earth" and there matching his wit against that of the fox that Mr. Adams has met success. Great patience has been necessary and a woodcraft that takes into account all conditions. A fox can scent a man a long way off when the wind is right. He can hear his slightest movement at a surprising distance, but strangely enough he does not readily notice a motionless man. The huntsman first finds the "earth," studies the conditions of light and shade, the direction of the wind and the approaches most feasible for the fox. The animal has at least two entrances to his den as do most burrowing animals which further complicates the situation. The best stand being decided upon, the camera is set up and everything made ready. The photographer takes a position sitting or perhaps prone on the ground beneath it with the bulb in hand.

The wait may be long or but for a moment. Once the camera-armed huntsman had just reached a burrow with a friend and the two were talking of what might happen, when a fox came trotting right up, looked at them with curiosity as they stood motionless, then, not seeming to realize the situation, popped into the hole. There was ample time to set up the camera and focus it, but who would believe she would come out again? Yet, in just a moment she did, stood in splendid pose but a few feet away, sniffed, caught a taint of their presence and vanished, a red-gray streak down the wind.

At another time the camera had been carefully focussed on one burrow entrance and the photographer had lain for a long time beneath it cramped but watchful, without results. By and by, hearing a slight whine behind him, he looked cautiously around. There stood the mother fox erect on the mound at the other entrance to her earth. About her were grouped all her youngsters, half a dozen of them, begging for food; a picture in a thousand! With the utmost care the huntsman swings the camera to take in the scene, but some slight sound, or perhaps the white flash of his moving hand, betrayed him and with a short bark of warning the mother bounded away while the youngsters scurried down into the den.

Such incidents as those, however, merely add zest to the sport and make its final triumph all the more enjoyed. Fox-hunting with a camera is to be recommended as a fine substitute for other forms of the sport. It takes the highest type of sportsman to succeed at it, and its prizes are immeasurably greater than those obtained with gun and dogs.

Feeding foxes to preserve birds is the commendable practice carried out by a Massachusetts citizen.

For the past six summers, the clerk of courts of Barnstable county, Massachusetts, Alfred Crocker, has driven from his summer home in the delightful old village of Centerville to the Court House mornings and returned at night. The distance by the "Sand Road" is about seven miles and for the entire way there is not a habitation It is an ideal rendezvous for foxes and ruffed grouse, bob-whites and meadow larks, in the neighborhood of far-famed "Shoal-Flying" hill and picturesque "Nine Mile Pond."

Mr. Crocker, being a great lover of all bird life, conceived the idea of feeding the foxes during the breeding season of the birds. He has made it a practice to take a bucket of "whiting" from the fish trap three times a week and to distribute them in lots of three or four, along cow-paths, wood roads and "blind" roads for the entire distance between the two villages. He found that as soon as the foxes learned of the food there were very few fish left upon his return in the morning and practically none on the second morning. Ae he drove along he would see fox after fox skulking in and out of the different feeding places, apparently waiting for their supper.

It is a well-known fact that the ground birds throw no scent during the period that they are rearing their young and the only way that the fox gets them at this period is by running onto them during their many weary miles of wandering in search of food. Whenever they do find them, they stay in this vicinity until they capture the whole brood.

Mr. Crocker's method of distributing the "whiting" through this natural breeding ground has reduced the hunting for food of the fox to the minimum. The increase, especially of the quail, has been very marked.

BULLDOGS PAST AND PRESENT.

One is often asked the question, "Do you think bulldogs have improved during the last ten or fifteen years?" Now it is somewhat difficult to answer that question satisfactorily, says Mr. S. H. Deacon, a veteran English breeder, as we older fanciers are very prone to magnify the good qualities of our heroes of days gone by. Just at the moment the male sex is undoubtedly comparatively weak. The leading dogs are not to be compared with those exhibited eight or ten years ago; but it is only quite recently that there has been this backward tendency, which is caused almost entirely by the expatriation of our best dogs to America. As soon as a dog makes a name in the exhibition world, and a sufficiently big price comes along, in nine cases out of ten he departs across the Atlantic. We have very few exhibitors now who will, or perhaps can, afford to refuse the tempting offers that are made. One really cannot blame them, but, nevertheless, it is most detrimental to the breed in this country. These remarks really only refer to the leading dogs. If one looks carefully at the exhibits at recent good class shows, one observes that the type generally is improving, and becoming more uniform, and this is an exceedingly good sign; and it has come none too soon. I quite admit that there have been a few instances recently of grand-headed dogs, but with bodies not in accordance with the standard, winning high honors, and this will always occur occasionally; but I am referring more particularly to the dogs taken en bloc at a good average show. I have myself done very little exhibiting during the last seven or eight years, and I have now entirely abandoned the show bench; but it struck me, when taking a dog into the ring after some years' absence, that it was no easier to get into the money—in fact, not quite so easy—as in my busier exhibition days, and, in my opinion, there are fewer duffers.

This all-around improvement has no doubt been acquired at the expense of an impairing of certain exaggerated points; but, after all, it is the all-around uniformly good dog that takes the premier position, or should do so. For instance, we have not, in my opinion, a dog on the bench today with a head to equal that of either King Orry or Ch. Boomerang, or one with the body properties of Ch. Bromley Crib. The efforts in the direction of breeding long skulls have certainly resulted in a curtailment of wrinkle. Where can dogs be found nowadays with the beautiful skull and wrinkle of, for instance, Ch. Baron Sedgemere? But these long-skulled dogs often lack breadth of skull and cheek bumps, or development of the cheek muscles, which increases the holding power, which is a very necessary property in a bulldog. I hope I am in no way conveying the impression that I deprecate long skulls, they are necessary, but the other necessary points in connection with the skull should be carefully borne in mind. In ears, one sees a vast improvement on the mediaeval days, more especially with regard to their carriage. A button ear is now very rarely seen, whereas a few years ago they were plentiful, especially in the South of England.

As I have already hinted, we have to a large extent mastered the problem of producing a low, thickset dog with a correct type of head. By that I mean a well-smashed-up face, with a good wide underjaw. It is, and always has been, comparatively easy to produce the body with a head that ought to be put in a sack if the animal was to pass as a bulldog, or the great head on a terrier body. Even now the two grand properties combined, which is the acme of bulldog culture, come none too often, although to the everlasting credit of the modern breeder be it said, in a larger proportion than in years gone by.

The bitches have been excellent during the last few years, and, to my mind, the gem of the lot is Ch. Roseville Blaze, who, in my humble opinion, has never been surpassed in all round excellence. She has the correct roach back, and her body lines are great; her head is also good, and she is a big one—not too big, but big enough to convey that look of sturdiness, strength and endurance we all so much admire. However this bitch ever came to be beaten after arriving at maturity was always a matter of perplexity to me. Unfortunately, I never had the pleasure of judging her, but I have very carefully run the rule over her on more than one occasion.

In dogs we are for the moment without a real flyer—a top sawyer—although Mr. Sam Crabtree's young dog, Failesworth White Knight, who made his debut at the recent Cheetham Hill Show, may easily develop into one, and I hope, for the sake of the breed, that he will do so. We have a large number of good, sound dogs of average merit, and the way they change places at shows under various judges confirms my opinion as to the absence of a dog that really stands out, although we have many dogs which any exhibitor may well feel proud to own.

In these few notes I would like to say a word about the excessive inbreeding which prevails today. Inbreeding, to a certain extent, is necessary in order to fix "type" in connection with all exhibition livestock. I have had this brought home to me very forcibly during the last few years in connection with poultry breeding. In a breed such as the bulldog it should be resorted to with the greatest caution. A large amount of it was done years ago, but all breeders know that in-breeding overdone impairs the stamina and constitution of stock, and bull puppies so bred are not the easiest animals to rear sound and strong. Besides, breeders often overlook the fact that in-breeding accentuates faults as well as good properties, and when bad faults are bred in in this way they are very difficult to eradicate.

A statement recently appeared in the daily press that, as the bulldog was generally looked upon as typifying the English character, there would be a boom in bulldogs during these terrible war times. I hope this boom may be the means of bringing into the bulldog ranks new fanciers, who will take up the pursuit and make it a hobby purely in the interests of the breed. The atmosphere of the show ring is not, I fear, so free from the commercial taint as it used to be. Possibly it may be more orderly and orthodox, but there appears to be a great "business" flavor about it, and one longs in vain for the days when the spirit of true sport reigned supreme. In the old days exhibitors took their dogs to shows for the pleasure of winning, and that derived from meeting kindred spirits and congenial company. It is probably the tendency of the age to make a business of all one's pleasures, more or less. This spirit seems to have crept into almost every species of sport; but it is none the less to be deprecated as really detrimental to any hobby in the long run.

First, second, third, fourth, fifth, and sixth high guns, at the Paducah (Ky.) Target Club, on May 7, all shot Nitro Club shells. A. E. Mercer won the shoot, breaking 190x200. W. T. Hardy and Tom Russell tied for second place, each scoring 186x200, while F. W. Wyler was a close third with 185x200.

Mr. J. W. Bell, of St. Louis, Mo., won the Interstate Association's first trophy, at Moberly, Mo., May 4 and 5, with the high amateur score, 292x300. He shot Arrow shells, as did A. C. Connor, of Springfield, Ill., who captured the second trophy; while H. J. Goldsby, of La Platte, Mo., used Nitro Clubs in winning third place.

THE VALUE OF FISH AND GAME.

The value of the fish and game of any state should not be estimated by its food value alone. It has a value far in excess of that for the stomach's sake, a value not even estimated by many people who pursue it for the so-called sport or otherwise. It has a worth that cannot be estimated by figures, says George Neal, a Pacific Coast game warden.

The benefit derived by the mental and physical relaxation is incomprehensible, except to those who have learned the secret. The exhilaration of the pursuit is advised and recommended by physicians of world prominence as the one tonic and cure for the indoor brain worker, recreation for the factory hand, store or office employe. The knowledge obtained in the use of firearms in its pursuit by the young American is of more value than all the game in America. The skill attained by our forefathers in its pursuit is responsible for the liberty we now enjoy.

Northern California, especially those counties comprising the Sacramento division of the northern administrative district, are no doubt the most important in the state, if valued by the fish and game asset.

The Sacramento district contains twenty-two counties, as follows: San Joaquin, Calaveras, Amador, Sacramento, Solano, Yolo, El Dorado, Placer, Nevada, Yuba, Sutter, Colusa, Glenn, Butte, Sierra, Plumas, Trinity, Tehama, Lassen,Shasta, Siskiyou and Modoc. The coast counties of Marin, Sonoma, Napa, Lake, Mendocino, Humboldt and Del Norte are equally as important and valuable as the counties of the Sacramento division, but are not included therein.

The twenty-two counties contained in the Sacramento district, says Warden Neal, have an area of approximately 45,409 square miles, or nearly the entire area of the state of New York. The district contains 14,500 miles of streams, besides the thousands of lakes, many of them world-famous. These counties are inhabited by possibly a larger variety and number of game birds, animals and fish than any other given amount of territory in the United States.

Opportunities for the angler and hunter, be he resident or non-resident, to enjoy and partake of the pleasures of the chase, are many. Nowhere else in the United States can be found as great an area of land and water populated with fish and game, where anyone may fish or hunt, as in this district, and where there is almost an entire absence of trespass signs. A courteous request to the owner or lessee, whenever possible, to be permitted to shoot is generally acceded to. It is the man who presumes to enter the lands of others without obtaining consent who is ejected or arrested for trespass. Many of the land owners and lessees shoot and fish, and there is a kind of brotherhood among sportsmen that is of a strong fraternal quality. The writer, in over thirty years' experience in the field in California, has always requested the owner's permission to hunt or fish, and has been denied only a few times, and on asking the reason for the objection found that some irresponsible vandal and torn down fences or shot live stock. Who can blame the owner for objecting?

In order to enforce the fish and game laws in the Sacramento district the fish and game commission maintains twenty-three salaried deputies under the supervision of F. M. Newbert, president of the commission, with offices in the Forum Building, Sacramento.

It is necessary to procure an angler's license for catching the game fishes, which are trout, salmon, black and striped bass, steelhead or white fish in this district. An angler's license for a resident citizen is $1, $3 for non-residents and aliens.

A resident citizen's hunting license costs $1; non-residents', $10, and aliens, $25.

There is also a commercial fishing license for catching fish for the market which costs $10.

All these funds are used in the maintenance of hatcheries and for the preservation of fish and game.

The Sacramento, San Joaquin, Mokelumne, Consumnes, American, Bear, Yuba and Feather rivers, with their many forks and tributaries, are formed by living springs and eternal snows, and at or near the junction of these streams, where they enter the Sacramento, they are alive with the finny tribe. In these waters may be found the quinnat salmon, striped bass, black bass of both large and small mouth varieties, shad that are pronunced superior to the Delaware product, from where our shad came, the blue and yellow catfish, Sacramento perch, the imported bluegill, crappie and yellow perch from Michigan, and about twenty other varieties of native or introduced fish, more or less of commercial importance.

California has a population of nearly two and a half millions of people, of which 159,166 procure a hunting license. Owing to the diversified topographical, meteorological and climatic conditions of the northern fish and game district, it is peculiarly adapted for the perpetual protection of its game because the rough, inaccessible portions will always remain a barrier to any but the most persistent and hardy hunter. There is no other section of the United States that could withstand the demands made upon this district. Notwithstanding a season bag limit of two deer allowed by law, I believe the deer are holding their own, at least in the district of which I am writing. It is an easy matter for anyone who is properly equipped physically and can use his rifle efficiently to secure his two bucks.

This district consists of the white tail and black tail deer, a few of what are known as the small chapparal deer, also the large mule deer, weighing as much as 300 pounds dressed. There are a few antelope remaining, which, with the elk imported recently by the Elks' lodge of Redding, are protected at all times under a severe penalty.

Black and brown bear are somewhat numerous and a few grizzly remain in the mountain fastnesses of Trinity, Siskiyou and Shasta counties.

The game birds of the upper mountain counties are the sage hen, grouse and mountain quail. These are fairly numerous, providing you know where to find them. Should you not you will return to camp weary, but more wise.

The Sacramento and San Joaquin valleys are the winter homes of large numbers of ducks, geese and shore birds of many varieties. The ducks predominating are numerically in the order named and known mostly as mallard, sprig, green-wing teal, widgeon, canvasback, gadwell or gray duck, spoonbill, black-jack, bluebill, cinnamon and blue-wing teal, scaup, wood-duck, goldeneye, ruddy and several of the merganser or sawbill family.

Of the geese and brant the most numerous visitors are the Canada goose and three varieties of brant of a smaller size, two or three varieties of white or snow geese, the gray or speckled breast, and a large gray goose as large as the Canada goose, but locally known as the tule goose. Occasionally an emperor or crowned goose is a visitant, also a number of whistling swans.

In the valleys and lower foothills can be found the bush and cottontail rabbit, the hare and jackrabbit, the gray tree squirrel and the dove. At certain seasons large flocks of band-tailed pigeons may be seen, but they are protected at all times. In the valleys and lower foothills may also be found a typical Californian, the grandest game bird in the world, the California valley or blue quail. This bird may be found from sea level to an altitude of 2,500 feet, but is scarcely ever seen over three thousand feet above sea level.—American Field.

A WIRE-HAIRED POINTER—THE NEWEST DOG FOR HUNTING PURPOSES.

[By Ray Zeigler in Phila. Public Ledger.]

A new hunting dog, the wire-haired pointing Griffon, has been added to the list of sporting dogs in this country. The first kennel of these Griffons has been established by Dr. E. B. Ilyus of Lancaster, Pa., and he hopes to breed these dogs as successfully as the French. Heading his kennel with the champion stud dog, Miche de Moulignon, Doctor Ilyus now has four of the finest specimens he could purchase in France.

Owing to the war Doctor Ilyus had great difficulty in bringing these dogs to America, and it was not until late in the winter that the first brace he purchased to follow Miche de Moulignon to this country arrived. The names of this pair are Marquis de Merlimont and Mamselle de Moulignon. Later he purchased Bolero, one of the best bred in the world.

Under the conditions existing on the other side, Doctor Ilyus was indeed fortunate in getting these dogs out of France. The brace came direct from the war zone, 25 miles from Boulogne. Marquis de Merlimont won first at Paris last June, and is expected to produce a sensation in this country. Masmellee de Moulignon won limit at Lyons, and open at Touquet and Paris-Plage. With the pair came several puppies which Doctor Ilyus sold to C. H. Rivenberg, of Chester, Mass.

Bolero was trained by a high official in the Griffon Club of Germany for his own private use. It was possible for Doctor Ilyus to secure this dog through the kind efforts of Mr. Leinma, vice consul for the Netherlands and vice-president of the Griffon Club. The dog, by Champ Rabot, one of the best working Korthals in Germany, is thoroughly trained and finished on pheasants, quail, snipe, hare, all marsh and waterfowl, and also on all big game, and is a perfect retriever from land and water, making him the most versatile hunter ever imported to America.

The name "Griffon" first appeared toward the end of the sixteenth century, in a letter by Henry IV of France to Count Montmorency, dated April 12, 1596. The Griffon is also mentioned by Charles d'Arcussia in 1598, in a book called "The Conference of the Falconers." Nearly a century later, 1683, J. E. de Selincourt, in his book, "The Perfect Hunter," speaks of them as the "gun-dog," giving many interesting details.

The pointing Griffon, known favorably all over the continent of Europe, is represented by several groups or families, presenting differences under influence of climate, food, mode of hunting and type of country, but which are all similar in their robe, or coat, which is hard, harsh, or wiry. For centuries they have been used in hunting afield, in woods, but above all in swampy or marshy ground, their wiry coat, together with the under coat, fine, woolly, or fur-like, giving them a perfect protection against cold and dampness.

Three grand groups are formed: The "Spinone," of Italy, which seems to be the oldest; the "Griffon, a Poil Dur," of France, and the "Stickelhaar," the specialty of Germany.

There are several groups or families of Griffons; but without any doubt the family or strain best and most favorably known is Griffon-Korthals. Edward Karel Korthal began in Holland in 1870 the breeding of a pure strain of Griffons, selecting seven of the finest specimens to be found. In 1877, Korthals accepted the offer from Prince Albrecht de Solms Braunfels to direct his kennel of Griffons at Wolfsmuhle, whence comes the strain of pure-blood Griffon-Korthals, the purest and best representatives of the breed.

So popular have these dogs been in Continental Europe that there are several clubs organized for their elevation; the Griffon Club, of Belgium, French Griffon Club, South German Club, and the International Griffon Club.

The career of Doctor Ilyus' kennel of Griffons will be watched with interest by sportsmen all over this country.

DOINGS IN DOGDOM.

The Airedale Terrier Club of America has formed a committee of women members to encourage the breeding and exhibiting of Airedales by women. Mrs. Crawford of the Vickery Kennels has been elected chairman; Mrs. Paul Revere Reynolds, Scarsdals, N. Y., secretary, and Mrs. Edgar Baker, Jr., of New York, Mrs. Merrill E. Gates, of New York, Mrs. Mulford, of Philadelphia, and Mrs. Theodore Offerman, of Brooklyn, are the other members of this committee. A five dollar special will be offered in any state where the Airedale Terrier Club of America has two woman members for the best Airedale owned and shown by a woman.

* * *

The American fancy will shortly be the richer by the inclusion of the typical dog, Merry Courtier, Henry Dickman having sold him to a fancier on the other side of the Atlantic. Merry Courtier is a black, and the winner of five firsts and one championship on the only two occasions on which he has been shown—namely, Southampton and Manchester in 1914. In the thirty years in which Mr. Dickman has been breeding Newfoundlands many big winners have emanated from his kennels, including six full champions, five of them white-and-blacks; and in which variety Mr. Dickman has, of course, always specialized. Merry Courtier is by Ch. Gipsy Duke ex Ch. Queen of the Roses, and he was bred by Mr. Dickman in 1911.

* * *

What probably is a record price for a Pekingese puppy was received by Mrs. A. McClure Halley for the seven months old Sun's Son, one of the most promising puppies ever reared in her kennel. Miss Cox of East Orange visited Mrs. Halley in quest of a good Peke. She saw Son, and wanted him. None of the other dogs would do, and as Mrs. Halley had great hopes of Son's becoming a great show dog, she was reluctant to sell him. Finally Miss Cox offered $1500, and as this was such a record price for a puppy, Mrs. Halley decided to let him go, and now Son is the cherished pet of Miss Cox.

* * *

To promote the interest of Fox-hounds (American, English and half-bred), and Beagles in America, it has been decided to form a society known as The Bryn Mawr Hound Show Association. This association is to hold an annual Hound Show in connection with the Bryn Mawr horse show, at which time members of the Hound Show Association will be granted the same privileges as the Horse Show Association members, viz.: free admission to both shows, use of club house, etc. It is proposed to make the annual dues $10.00 Application for membership can be made to St. George Bond, Crozer Building, Philadelphia. The committee is composed of John R. Valentine, W. Plunket Stewart, Samuel D. Riddle, J. Stanley Reeve.

At the Traps

The California Wing Club, the oldest shooting organization in the United States, will hold its regular monthly shoot at Sobrante tomorrow.

* * *

The shoot of the San Jose Blue Rock Club during the Decoration Day holidays was one of the most successful that has been held in this section for a long time. Over fifty men faced the trap and ninety-five to ninety-eight per cent average was not unusual. J. F. Couts of San Diego cleaned up the fifth annual registered blue rock shoot of the San Jose Blue Rock Club by finishing his score with 476 out of 500 birds. O. N. Ford of San Jose made second high total score with 470; Flickinger was third, 468; Ogilvie fourth, 465, and Halliburton fifth, 463.

Couts also contributed to the San Diego club's victory in the team shoot. Couts shot 48 out of a possible 50. Evarest and Dodds were also on the team.

Couts won the doubles for the championship of Southern California with 45 out of 25 pair.

Tony Prior of San Francisco was second with 43. Prior also won the miss and out event, with C. H. Nash of San Jose second.

All the shooters observed Memorial Day by standing with bared heads for five minutes at noon. It was announced that the Pacific Coast handicap has been awarded to San Diego, July 8, 9 and 10.

* * *

The ten-man team shoot between the Alhambra Club of Martinez and the Family Club of San Francisco scheduled for last Sunday was postponed until June 6 or 27.

About fifty Alhambra shooters turned up, however, and they had it out for a silver cup. H. Veale with 47 turned the winning score. The other members finished as follows: F. K. Burnham 46, Dr. Merithew 45, J. J. Anderson 44, J. Randino 42, D. Joslin 40, J. Hammer 40, W. Dutcher 39, F. Stewart 43, B. Woolbert 44, Al Blum 44, and A. J. McMahon 37.

The club is open to meet any club within 100 miles of San Francisco to a club shoot of from three to fifteen men.

* * *

Trapshooting is as rapidly growing in favor as a sport with naval officers as it is among sportsmen on land. Nearly all battleships carry a trap and a supply of clay "birds," and officers practice when daily drills are over, shooting from the side of the ship. With the vessel under way the sport is attractive, even though the usual sixteen-yard rise cannot be had, as the wind and motion of the vessel compensate for the lack of distance of rise of the targets.

* * *

An interesting incident in connection with the Coast to Coast Fred Gilbert Shoots held recently, was the development of the fact that when Mr. Gilbert won his first big event, twenty years ago, he used the old style Green Remington-UMC Shot Shells. It happened that Mr. Gilbert retained some of these shells, and has had them stored for all this time. He brought the old-timers along East with him and put them on the testing range at the Du Pont plant at Wilmington. Of three of the shells tested two made perfect patterns. All of which which would seem to indicate that shot shells made when some of us were too small to lift a gun, were not so bad after all.

* * *

E. V. Fisher of Oklahoma City won high amateur average as well as high general average at the Medford (Okla.) Gun Club, May 18. Shooting a Remington pump gun and Arrow shells in a wind and rain storm, he made the excellent score of 140x150.

* * *

It is an interesting fact that W. B. Severn and Harry Eyre, both of the S. S. White Gun Club, tied for high average in the seven shoots of the Philadelphia Trapshooters League, extending from October to May. Both broke 326 out of 350, and both used Nitro Club shells. This is an exceptionally good record, considering that the matches were shot through the winter in all sorts of weather conditions.

* * *

At a registered shoot held at the Waterloo (Ia.) Gun Club May 11 and 12, Chas. Hummel carried off first honors, scoring 385x400. J. R. John was a close second with 365x400. They both shot Remington pump guns and Notro Club shells. Hummel also made the long run of the shoot, breaking 160 straight.

Fish Lines

The reports received from the nimrods who spent the Decoration Day holidays on the streams show that the best sport at the present time is to be found on the Feather river.

Everyone who returned from this section caught the limit. In many cases their sport was ended in a few hours.

* * *

Thomas Mahoney and E. C. Boucher, deputy fish and game wardens, arrested thirteen men in San Mateo county during the ten days ending last Sunday and were able to get convictions in every case.

Last Sunday they took in four Italians who had seventy-five abalone in their possession, fifty-six of which were undersized. They were convicted in court at Redwood City and San Mateo county is $200 richer in fines.

* * *

Dr. G. Koenigstein and wife have returned from Camp Rodgers on the Feather river with one of the best baskets of trout this year, having fish from 11 to 18 inches.

* * *

Joe Springer and Carl Matheus were two others who got the limit at Camp Rodgers. They spent last Sunday and Monday on the stream and only spent part of the day fishing as they were biting fast.

* * *

E. H. Humphreys fished the Tunitas, San Gregorio and Pompono creeks, Sunday and Monday. They bring back reports of rare sport and fine baskets.

* * *

Dr. H. T. Moore left Wednesday for a two weeks' fishing trip at Shady Rest Camp on the Feather river.

B. H. Reddy and wife will leave for a two weeks' fishing trip in Lassen county.

* * *

Fred Gantner and Moe Uri fished the Nicasio, Olema and Pine Ridge creeks Sunday and Monday, bringing in the limit of good-sized fish each day.

* * *

George A. McCallum and James D. Roundtree fished Carmel for the limit over the holidays.

* * *

Bob Murdoch, Ed Smith, Louis Gothell and Lincoln Bemis fished at Middle River for black bass and brought back reports of fine sport for the two days outing.

H. Heney fished the Tunitis creek and returned with a limit basket for the two days.

* * *

Mr. and Mrs. George Klarmann, Miss L. Bischoff and Walter Hanna fished the headwaters of the Garcia and Ranchery creeks with limit baskets for last Sunday and Monday. Mrs. Klarmann was high hook.

* * *

Milton Frankenberg and John Cattermole report striped bass fishing poor at Rodeo, where he fished last Sunday.

* * *

Charles Isaac and Dr. L. T. Cranz were also at Nicasio last Sunday and report fine sport.

* * *

J. V. Jurvis and S. R. Burmister took the limit at Gold Lake Sunday and Monday last.

* * *

Floyd Spence and Al Christensen returned with one of the best baskets so far this season from Tobin, on the Feather river, where they fished over the holidays.

* * *

Charles Gibb and George Creon came home last Sunday night from Slide Ranch with the limit of eels.

* * *

Frederick Schneider spent the holidays at San Gregorio creek, where he had good sport and got a fine basket.

"SHUST VON CHUMP PEHIND."

[Sewell Wardner, in The American Field.]

Recently I read in an Adirondack paper of the taking of a huge black bear just beyond Loon Lake Mountain. This bear measured twelve inches between his ears and was thought to have weighed in the neighborhood of 500 pounds. The article brought to mind the taking of a bear in the same locality some years ago, which may be of interest to the lovers of the "Silent Places." The principal actors in this hunt were two brothers, James and Seth Wardner, and Alfonso Rand. As the first snows came in the fall these three hardened woodsmen would take to the woods with rifles and provision sufficient to last seven or eight days, and never return without three or four fine specimens of Adirondack black bear hides.

On this particular hunt they left their homes at Rainbow Lake and traveled due north. About noon they struck a fresh track on the shore of Round Pond (now called Lake Kushequa, where is situated a fine large sanatorium for working girls. This place ils called "Stony Wold," and is maintained by rich New Yorkers.) Judging from the size of the track, the bear was a monster, and from the businesslike trail he left, convinced the three that he was headed for Loon Lake Mountain, there to "hole-up" for the winter. So, with a hitch to their belts and a glance at their Winchesters, these three veterans of the "trail" settled down to the swinging jog of the trained woodsman.

In an hour or thereabouts they reached the foot of the mountain and started the slow, heart-breaking climb upwards. Slipping and sliding, they forged their way on, and after another hour's hard work they were rewarded by coming to the end of the trail, a blank, bare rock, with only a huge crack to show where Bruin had entered. A council of war was held, and all agreed that the quickest, if not the safest, way to get at the bear was for one to crawl into the cave and "beard the lion in his den," so to speak. After peeling a near-by birth and rolling this into an impromptu torch, Seth took his .45-calibre revolver in one hand, the lighted torch in the other, and started in. At first, he said, he had to crawl on his hands and knees, but after ten or fifteen feet the walls rose so he could walk upright, and then he saw the two round balls of fire that showed where Bruin was. Taking careful aim at a point midway between the two burning balls, he fired, and at the report of his revolver the torch went out. He said afterwards that his heart bumped against the roof of his mouth. Holding the revolver in front of him, he waited, but only a muffled moan came to him. He then called back to his companions, who came crawling in with a fresh torch. The heavy .45 ball had entered the shaggy head directly between the eyes and pierced the brain. One crawled over the dead bear, and with the others pulling and hauling, they soon had him outside the cave.

It was the first bear of the season, and they wanted some fresh meat besides the oil, so it was decided to "skid" the carcass to a shack used the previous summer by a road-building gang who were putting a road through the mountains to Malone, N. Y. There they could leave it and come with a team next day. After depositing their kill safely inside and closing the door, they started for home through the woods, it being a more direct route than the winding road.

About the time they were struggling down the mountain with the bear a Jewish pack peddler stopped at the home of James and asked Mrs. J. the way to Plattsburg. Mrs. Wardner told him as best she could, and cautioned him against taking the new, unfinished road that bore off to the left, but this was exactly what he did. As the way grew steeper, his pack, no doubt, grew heavier, and dusk was coming on. He then decided it was time to turn around and retrace his steps, when his eyes fell on the little "shack." Here, he thought, he could stay till daylight, and hastened up to the door, never dreaming what was to happen in the next few minutes. Pushing open the door, he slipped off his pack and began to feel around for a "bunk," or some place to lay down. His foot touched something, and then his hand touched the same something. With a shriek of terror that would have put a wildcat to shame, he dashed out of the door and down the road at breakneck speed. James Wardner was just finishing supper when this fellow burst in at the door and fell, panting, into a chair. In broken English he gasped out his story: How he had run every step of the way, some seven or eight miles, and how the bear was just one leap behind him every jump he made.

Not until they took him back the next morning and showed him the dead bear and his unharmed pack could they make him believe that the bear really was not "shust von chump pehind."

TRADE NOTES.

More Remington-UMC Top Scores.

The Keystone State, with 402 gun clubs, according to the last census, is a leader in trapshooting activities in the United States. It is a significant fact that this important body of shooters shows a continued preference for Remington-UMC, both in State tournaments and in the general run of club shoots.

Mr. Chas. H. Newcomb of Philadelphia, won the State Championship with 98x100, shooting Arrow Speed Shells. Mr. Newcomb was also high over all with 437x450, using the same ammunition.

Mr. Walter Behm, of Reading, was second, high amateur, 428x450, shooting a Remington pump gun and the Speed Shells, and won the doubles championship, 44x50, using the same shooting equipment.

Two-man team race won by Harrisburg; Reading, second, both teams shooting Remington-UMC.

* * *

Du Pont Loads.

At Milton, Penn., May 18-21, twenty-five shooters, participating in the Pennsylvania State tournament, made straight of 50 runs or over. This performance won for them the beautiful Du Pont gold watch fob or an engraved bar to attach to the fob already won. Incidental to winning the trophy bars, Charles H. Newcomb of Philadelphia won the Interstate and State championships.

The popularity of the Du Pont long run trophy at Milton was further demonstrated by the continued interest displayed during the tournament. The 25 long run shooters made 43 runs of 50 or over.

There is some talk of dividing the English setter classes by weight, says the American Fancier. The idea is catchy but has no real merit. What setter breeders are after is not a division of weights or size, but a consensus of type opinion. We are very much divided on that, yet the standard is explicit enough and is not an extreme type suggestion. If we can squeez the big, heavy old Mallwyd into a standard form, then most anything may happen.

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy, and the winner of sixth place guaranteed $50 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments— Pacific States and Territories:

June 3, 4, 5—Annual Tournament of Rocky Mountain Interstate Sportsmen's Association, under auspices of Mile High Gun Club, Wm. M. Bowman, Secretary, Denver, Colo.

June 7, 8, 9—Sportsmen's Ass'n of the Northwest Tournament, under the auspices of the Portland Gun Club, J. A. Addleman, Secretary, Portland, Ore.

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club. Max Weick, Secretary, Laramie, Wyo.

July 10—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Drink Jackson's Napa Soda.

WHAT SOME TRAINERS CONSIDER SUCCESS.

Editor The Horseman: Having read a number of books issued by mail-order colleges on how to train horses and also having noted the free, easy and affluent life followed by these gents, I write to ask your advice on the subject and also for pointers as to adopting this for a profession, as I want to get into something that is lucrative, yet has no hard work attached to it. Thanking you in advance for this information, I remain—A. L. Egpuller.

This is rather a delicate subject to advise you about, as we do not know your disposition or grafting abilities. Of course if you want to advance to the top of the profession, "It is a long, long way to easy-giving-up owners." You read about trainers who have great wealth, as the owners they have struck have been from in and around St. Louis or other points in the same state. There are many others, however, whose names have not become prominent, who are living off the fat of the land, yet never seem to do much for all this affluence. We will endeavor to advise you as to how they got theirs.

In order to travel in this class you must hunt up some real live stove-circuit for winter instruction and when such a one is found, listen intently to the man in the crowd who has the most to say about what he did the season before or many seasons prior to that. Such men are always reliable and you can depend that every word dropped from their lips is gospel, the same kind as you would get in church, only with a different flavoring.

These loud talkers on training or racing are all very liberal, as they give advice, while the more prominent ones are silent; take for instance, the "Silent Man" from Tennessee, he never became a member of any stove circuit. The man you have selected for your example has had more experience, as he changes owners every year, not because the owners want him to go, far be it, but because he wants to try out different men and localities. He never thinks of that old saying "That a burnt child dreads the fire," but his favorite motto is, "There is a sucker born every day," and outside of talking, his one aim in life is to fish for suckers and many of them have great success, but their moving expenses are very large and the mileage mounts up.

Every race track has these types from which to copy, so you may settle in any section of the country and find good examples. After you have listened intently to a number of these human megaphones of their own glory, start out and find some owner who wants cheap training and will stand for a lot of verbal massaging. If he already owns a horse look the beast over and compare it to some of the great horses now racing. Maybe it will have a spavin or something similar that the great horse did not have and then you tell the owner about a horse that you trained several years before, that would not race without a spavin. Advise him to have the horse trained and then suggest that you could do wonders with him and endeavor in this way to break yourself into a sucker hunter.

If he consents to your training the horse, insist that the local track is either too soft or too hard and that such and such a track one hundred miles away is much better. This is the first move in training the owner, as you can do a lot of loafing while away from him, but if at the local track the owner is liable to drop out every day to see the horse worked. After arrangements have been completed, say to him, "Let me have $50, please, as I must run up to the city and get my family." This "almost" always works, as the "bull" you have thrown in is still percolating through the owner's massive brain. Go up to town, buy a cheap suit, also overalls, whip, spur and pair of pants protectors, then get soused on the balance.

These are about all you require, unless you have a driving suit left over from the last owner. This completes your outfit. Make out your list for track use, of course; this must include carts, sulkies, boots, coolers, blankets, etc., the owner may already have a good stock, but you must condemn them so that you will be able to make some extra change in buying others. Don't deal with any turf goods house unless they will stand for a rake-off, even if you must add this rake-off to the cost of the goods. Have these new goods shipped to the track, then gradually sell off the old stuff, forgetting to credit the owner with them, when you send in your bill. This is considered legitimate spoils and is nobody's business.

You will also have another splendid source of graft from the blacksmith who shoes the horse. Make an agreement with him to add about fifty cents to every bill, even in moving shoes, and be sure to collect your own piece of money at once, as it buys the "makings." At the end of each month add a number of extra trips to the blacksmith on your bill, because you know that it takes more shoeing to balance a horse than any owner has any idea of. We might state that it would not be a bad idea to get several such owners on your staff, and for this reason we advised you to locate away from the horse's home town.

Always be careful not to pay your feed bills too promptly, endeavor to have several good big ones left at the end of the season for the owner to pay. Of course, you must collect your training and other bills monthly; if not successful in this, seize the horse for bill of keep and make the owner come across, but note here, be careful that the horse will bring the amount of your two months' training bill under the hammer. Some trainers have been known to overestimate the value of the animal.

As an example of what these migratory trainers, who like to live in different parts of the country, can do to accumulate wealth, we will state the case of one in the east who never got far from the Quaker City. This one did ride in front once in awhile. He had a remarkable good gift of gab and could hand it out to everybody, including owners and judges in the stand. This brilliant star in the firmament of easy money getters claimed to have invented a liquid, the contents of which were kept secret, that worked wonders with owners for awhile, but its efficiency sometimes did not last an entire season. He would take a large barrel of water, put in two ounces of his secret liquid, which concoction he would keep standing in one of his boxstalls. When an owner put up a kick about the expense bills, manner of driving a race, or any other thing that did not cater towards perfect harmony, this trainer would pick the owner up (or have his swipes do it) and immerse him in the barrel of liquid and the effect would be magical, as smiles would take the place of frowns, and when removed from the liquid the owner would shake hands with everybody in sight and then hand the trainer his bankroll and if that was not large enough, a bunch of signed checks. This man saved enough money to buy an estate in his old country, Poland, but since the war has wiped out his possessions, it is said he is selling horse goods on commission. Don't blame anything but the war for his fall in the world, as his active brain may find some way to put him on his feet without divulging the formula of his famous (?) liquid.

Now that we have shown what one man can do, we will go on with our instructions to you as to how to make money from those vermin in some trainers' eyes, the owner. You had better have a swipe or two hanging around your stable, in case the owner appears, as they give you an excuse for collecting money. Of course, you must not pay these men anything. Allow them a suite of rooms in one of your box stalls and give them the price of a growler once in awhile, with the understanding that when the owner appears, they must stall on the swiping job; all they need to know is how to roll a bandage. If you cannot get them this cheap, promise them any old wages and stall them until you are ready for your getaway and then let the owner settle.

We are now supposing that you have done some little training to your horse and have promised to have him ready for some meeting where the owner wants to shine. You now do a little work, get the horse ready to show a fast quarter or even an eighth before shipping away. When you are ready to ship, borrow some money (of course, it is understood that you have been touching right along), in addition to shipping expenses. When you arrive at the starting town, pre-empt about four more stalls than you need, load several of them with hay and feed, while your credit is good in this new town. If the feed man wants his money, stall him off with the excuse that you expect the owner any day now, and you will get it for him. Never let him see the owner. You collect the money and keep it. Ship out suddenly on the last day, or maybe the night before. Take this feed with you, and at the next town sell it back to the boss. You thus make money going and coming.

On the day of your race, collect the entrance money from the boss and pay it to the secretary yourself; in fact, you must always remember to keep the owner in the background, unless men you owe become noisy and dangerous. Then trot out the owner, but before doing this, take him to one side and tell him about a sick family or any other heart-rending tale, at the same time asking him to pay the bill and you will settle with him. In the excitement of the moment, the boss will not go into details.

Your most trying moment will come during your first race, and if the field is a large one, you had better kick the horse in the shin, or else tie a hair from his tail, tight around his ankle, under the fetlock. This will make him lame and you will have a good excuse for not making a good showing. If there is a very small field in the race, ask to have the flag waived, or if you cannot get this done, claim foul; most judges cannot see as far as the backstretch, and you may save your bacon by being allowed to continue, even if the flagman was naughty to you.

If the owner is good natured and has had little experience, he may stand for a lot of this at each start, but our advice to you is to always be ready to change your base of operations and always keep carfare around your clothes. While traveling from town to town with your horse always stay at the best hotel in town, as it allows you to associate with trainers that do win money and at the same time, this high living gives you strength to campaign on the stove circuit during the coming winter, when you must keep up your front for another fishing trip after a sucker-owner. Never allow anyone to quote the Year Book to you as an authority. Always say it is mistaken.

Now that we have steered you from start to finish in an occupation that is honorable, we trust that you will profit by our advice and not allow prosperity to induce you to spend some of this easy money that many trainers are making each year. These sucker-hunting trainers can be found east, west, north and south and so you will not be alone, if you adopt our ideas. Remember, many of the most prominent trainers have been expert hack drivers or have graduated from the ranks of drivers of trucks, grocery or businesses that require expert manipulating of the reins.

—W. H. SHIELDS.

Drink Jackson's Napa Soda.

MAY KING'S LAST HOME.

Thinking that perhaps Review readers might be interested in a brief history of events relating to the closing years of the career of the horse that sired the mighty Bingen, I visited, on March 29, the farm where he spent his last days, with the view to securing material for this sketch.

May King was consigned to the Old Glory sale, held in New York City during November, 1905, by Wolverdeen & Brown, of Massachusetts, and although he was foaled in 1886, and was therefore well along in his twentieth year at the time, Mr. Albert T. Hoyt, the proprietor of Maplewood Farm, three miles south of Ft. Fairfield, Maine, decided that he would purchase him, providing that he could be bought for $300.

Mr. Hoyt was unable to attend the sale in person, so he commissioned his friend, Mr. N. B. Parsons, to bid on the horse for him. Mr. Parsons was then a resident of Ft. Fairfield and had made arrangements to attend the sale. The horse was sold to Mr. Parsons, on November 20, for $235. He was shipped to Ft. Fairfield and taken to Mr. Hoyt's farm on November 27.

He made his first season at Maplewood Farm in 1906, covering 32 mares, 28 of which produced foals. This remarkable showing as a foal getter was a very agreeable surprise to Mr. Hoyt, in view of the fact that he had written his former owners, Messrs. Wolverdeen & Brown, a few weeks after his purchase, inquiring as to his sureness as a foal getter, and they made the discouraging report that out of 18 mares covered during the season of 1905, only three appeared to be in foal.

May King's subsequent seasons were as follows: 1907, 60 mares; 1908, 45 mares; 1909, 10 mares. While Mr. Hoyt is positive as to the results of the services of 1906, he is not able to state accurately just how many foals were the fruits of the three succeeding seasons; but is of the opinion that May King sired at least 100 foals after coming to Maine.

May King was put to death sometime during April, 1910. During the season of 1909, nearly a year before his death, an accident occurred to the horse, producing an injury which appeared to be incurable; and Mr. Hoyt finally concluded that it would be an act of mercy to destroy him. A mare wearing breeding hobbles, while being served, suddenly sat down upon her haunches, and in some way threw May King over backwards. This happened in a field, and as the ground was comparatively soft, it was not thought that any great harm had been done. It was soon apparent, however, that the horse had sustained an injury to his left hock. Although the injury was serious, the horse was able to cover several mares after the accident. He was able to bear weight upon the injured leg until sometime during the winter of 1909-10. The enclosed picture of May King, taken before his death, shows that he was then able to bear weight upon the injured limb. During the winter the condition became gradually worse and the horse spent much of the time in a recumbent position. He did not lose much flesh, however, and was in very good condition when destroyed. Mr. Hoyt informed me that, after the horse's death, he carefully dissected the injured hock and found "a peculiar spougy substance in its center"—no doubt some form of osseous degeneration.

As I began this article by promising that it should be a "brief history of events relating to the closing years" of May King's career, I shall pass over the history of his life, prior to his final ownership.

He was bred and foaled at Palo Alto, sired by Electioneer, dam May Queen 2:20, by Alexander's Norman; grandam Jenny (dam of King Almont 2:21½), by Crickett's Arabian, and took a time record of 2:21¼, as a six-year-old, October 22, 1892, at Nashville, Tenn. He stood fifteen hands, and some time in June, 1907, weighed 1,035 pounds. He was a dark bay, with black points, and had no white markings. He was remarkably well preserved, and it is said would have passed for a ten-year-old at the time of his death. His back showed none of the sagging, peculiar to breeding stallions of his advanced age. This point is especially well illustrated in the accompanying photo, which was taken a few months before his death, while in his twenty-fourth year.

May King had heavy bone for a horse of his size, and his legs, with the exception of his injured hock, were clean, flat and unblemished to the end. Whatever criticism has been made with regard to the lack of quality below the knees and hocks, in the limbs of some of his descendants, cannot reasonably be charged to his account.

May King started out on an "amble," but soon squared away on a pure trot. His action was inclined to be of the "trappy" order. He was clean gaited and wore no boots, or other paraphernalia. He was a remarkably pleasant road horse, and possessed a very amiable disposition. Mr. Hoyt's wife and children hitched and drove him to the buggy, on trips to town and among the neighbors, as fearlessly as they did the "old family mare."

The only standard performer that was sired by May King while owned by Mr. Hoyt is Baron King, p. 2:21¼, although there are several others with marks just outside the list. May King's service fee was "$25 to warrant a foal," during the four seasons that he stood at Mr. Hoyt's farm.—Dr. J. P. Foster, in the Horse Review.

Next Saturday, June 12th, with the free-for-all pace, the 2:10 trot and the 2:30 driving club trot will be the "one best bet" of the week.

THE FARM

CARE OF A COLT'S FEET.

The care of a horse's feet should commence when he is a colt, that is, before he is weaned. Untrimmed hoofs usually grow long and uneven, and a crooked foot, or worse, a crooked leg, is the result. Failure to regulate the length and bearing of the foot may make a straight leg crooked or a crooked leg worse, while intelligent care during the growing period can gradually improve a leg that is crooked at birth. When picking up a colt's foot teach him to stand on three legs and not depend on the one holding up his foot for the fourth point of support. The handling of a colt's feet begins with the near front foot. Tie a rope around the pastern, grasp the rope close to the foot, push gently againlst the shoulder, and quickly lift the foot. The lifting of the foot must be simultaneous with the weight shifting to the other feet. Gentle the foot and leg and let it down. Repeat several times and then trim and level the hoof.

To raise a hind foot, put on a rope as on the front foot and draw the foot upward. To put a rope on the hind foot of a wild horse, tie up a front foot, have the assistant hold his hand over the eye on the same side as the foot to be lifted, or take the headstall in one hand, the tail in the other, and whirl the horse until he becomes dizzy. While in this condition he may be handled with safety. Lift the foot forward two or three times and gentle it. As soon as the horse gives in, carry the foot backward into a shoeing position and trim the hoof.

To handle the feet of a horse that will not stand still, or that kicks, a halter twitch is a great aid. This twitch is easily applied and needs only the ordinary halter and tie rope. Pass the rope over the horse's head just behind the ears; raise the upper lip and put the rope across the gums above the teeth; run the rope through the loop made by passing the rope over the horse's head. The rope should be tight from the halter ring, over the head, under the loop, and through the loop. A few good pulls on this rope should make the horse stand quietly.

The first steps in breaking and gentling a colt, breaking him to lead and to understand the commands of driving, etc., are also dealt with in this Farmers' Bulletin No. 667, which may be had by application to the U. S. Department of Agriculture.

BEGIN SELECTION OF BREEDING SHEEP AT LAMBING TIME.

There are some matters in connection with breeding sheep which are continuous ones, such as selecting for stud purposes, drafting the flock, and mating, to mention three only. Each of these commences in the lambing pen, for here, with each individual ewe under direct observation, one can start to determine whether or not that ewe should be continued in the flock for another season. Whether or not the mating of that ewe during the past season has been successful can be decided by the result produced in the shape of a lamb.

In respect to the first of the three points mentioned, it has often been said: "You cannot begin this in the lambing pen." This is wrong. There is no better place in the world to commence the selection for stud purposes than the lambing pen. It may be argued, and it may be supported by any amount of facts, that selections made in the lambing pen are often wrong. They may be in respect to the best sheep, but they are never wrong in respect to the drafting out of the flock for stud purposes. All miscolored lambs, ill-formed lambs and badwooled lambs can always be picked out at once; and no careful flockmaster, who has any care for his future reputation, can afford to allow such to leave the lambing pen without the draft mark being pinned to their ear.

OLD HORSES AND PONIES.

For a horse to reach the age of 38 years is something phenomenal, although there are on record instances where horses surpassed that record. The average age of the horse is about 22 years. For a horse to advance 16 years beyond that, as did "Nig," owned by Christian L. Volz, of 42 William street, Newark, is remarkable. It can be matched, however, by a mare owned by a livery stable keeper in Birmingham, Alabama. This mare was 38 years old and the animal was at work up to the last. In 1896 a pony, belonging to Mrs. Pratt, of York, Pa., died aged 45. The Louisville Courier Journal mentions a horse that was still working at the age of 34. The veteran had done 26 years' work in a coach team.

Horses of a still older age are imported from England. A horse named Paramanta lived to be 53 and did an occasional day's work to within a few weeks of his death. The age of this horse is well authenticated, as, when he arrived at his 51st year, pains were taken to ascertain when he was foaled. Remarkable as this may seem there comes another case of still greater longevity. A Mr. Dampier, of Silwarthy, had a pony which died within a few weeks of his sixtieth year. Edmund F. Dease, of Gallstown, West Ireland, had a pony which had been ridden by four generations of his owner's family. More cases of ponies than of horses reaching great length of years are recorded, and greater ages seem to be attained by ponies. These are isolated cases, and more horses die before reaching 25 years than otherwise.—Newark Call.

INTERPRETING FARM RECORDS IN THE RIGHT WAY.

Advice to keep records is being constantly reiterated but little is written or spoken as to the vital question of their interpretation. Farm records must be correctly interpreted to be of value. Moreover they may prove a positive detriment to the farmer who interprets them wrongly and acts on his interpretation. One danger of misinterpretation arises from the fact that often the accounts with the individual farm enterprises, and with the farm as a whole, are not studied from the same point of view, or, are studied from a point of view that does not measure their true relation as agents of gain.

There are three modes of measuring the relative profitableness of farm business, involving respectively the finding of, (1) the farm income, (2) the farmer's labor income, and (3) the farm profit. The farm income is the amount left from the farm receipts after paying all the farm expenses; the labor income what is left after interest on the farm capital is deducted from the farm income; and the farm profit the balance remaining after a fair allowance for the labor of the farmer is deducted from the labor income. In other words, farm income is balance over farm expenditures, labor income is balance over expenditures and interest, and farm profit is balance over expenditures and interest on the farmer's own time.

Of these three, the labor income has been found to give the best index as to the net result of theyear's work. It stands for what the farmer has produced by farming or putting capital to work in agriculture. Capital alone can earn interest, and all that the farmer can claim to have produced by his efforts is what he has made over and above what his capital would have earned if safely invested. It therefore seems plain that the most accurate point of view from which to study and interpret the farm records is their contribution to the labor income.

After study of the records, if any changes in the farm make-up are planned, all sides of the effect of such changes should be carefully worked out, and it must be borne in mind that sometimes those enterprises that yield small labor income may be very necessary to the farm economy They may be the only methods by which the waste products, coarse roughage, etc., can be made to yield any income or help to maintain the fertility of the soil. Shese small yielding enterprises again may give employment to labor and capital during otherwise idle seasons. Radical changes may have far-reaching effects on the entire farm economy, through disturbing the relation the various enterprises bear to each other and to the farm as a whole.

It is therefore prudent to weigh carefully, and view the farm records from every side, before making radical changes in the farming system. Any desired change should be made gradually, for jumping at conclusions is poor business policy in farming.—Rural World.

LIVESTOCK TUBERCULOSIS LAW.

At the last session of the Washington legislature a law was enacted regarding tuberculosis and other diseases which might attack domestic animals. It provides for the examination and testing only on the written application of the owner of any bovine animal to the state commissioner of agriculture. Under this law the test is not compulsory. Veterinarians desiring to make such tests must give bonds in the sum of $2,000 each.

When an animal is believed to be infected the owner has the option of indemnity or quarantine. In case of slaughter the animal is first appraised and in no case can the owner recover more than $75.

The commissioner of agriculture has the power of quarantine at the state line when deemed necessary and to prevent any diseased animal being shipped from without to remain in this state.

Cattle which are shipped into the state for immediate slaughter are not allowed to be sold for dairy or breeding purposes.—Pacific Homestead.

PUTTING COWS ON PASTURE.

Don't stop feeding your cows when you first turn them to pasture. The new grass as well as the young wheat and rye is composed of about nine-tenths water and one-tenth solid material. It is impossible for a cow that is giving a fair flow of milk to consume enough to keep the flow up. If the cows are once allowed to fall off in milk flow it is impossible to get them back to their former yield. In the long run it is economical to feed some grain while the grass is young.—W. M. Regan, Missouri College of Agriculture.

Buzzards, crows and other birds are active agents in the spread of hog cholera. They visit any place where there is carrion or offal of any sort and they have thus been known to transport hog cholera germs for long distances. All hogs therefore, that die should be burned or deeply buried. This will do much to check the spread of infectious swine diseases.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¾, etc. As great a youngster as the country affords today.

KATALINA 2:11¼

(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING

by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

Horse Lame? Send Us The Coupon

IF you have a lame horse, a valuable animal that seems destined to be relegated to the cripple class—let us cure him for you with the distinct understanding that if we fail, you don't owe us a cent. If we succeed, all it will cost you is the price of a bottle or two of

Mack's SPAVIN #1000 REMEDY

That's fair enough for any man, and it shows the complete confidence we have in our product. As further proof of this confidence, we have made a deposit of $1,000 with the First National Bank, of Binghamton, N. Y., which must be forfeited if we fail to do as we claim. Mack's $1,000 Spavin Remedy is absolutely guaranteed to cure Spavin, Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc., regardless of how long standing or from what cause. And it will do it quickly, giving the animal instant relief, for Mack's $1,000 Spavin Remedy is so penetrating that it goes immediately to the seat of the trouble.

FREE DIAGNOSIS COUPON

On picture of horse mark with an X just where swelling or lameness occurs, then clip out coupon and mail to us with a letter, telling what caused the lameness, how long horse has been lame, how it affects the animal's gait, age of horse, etc. We will tell you just what the lameness is and how to relieve it quickly. **Absolutely no charge. Write today.**

Free Book—"Horse Sense No. 3"

Send us the Free Diagnosis Coupon, get absolutely free a copy of our book "Horse Sense." Describes and illustrates diseases of horse's limbs, shows correct name for every part of horse and tells valuable facts every horse owner ought to know.

Your Druggist Will Obtain Mack's $1,000 Spavin Remedy for You

If he refuses, remit $5.00 to us and we will see that your order is filled immediately.

Our Expert Graduate Veterinarian

is maintained by us for your benefit. He is a limb specialist, and will diagnose any limb trouble your horse may have and will tell you how to cure it if you will mail the FREE Diagnosis Coupon.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Care and Training of Trotters and Pacers....

Price $1.00 — Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

At the Pinehurst Mid-Winter Handicap Shoot the four contestants making the highest scores in the preliminary event all shot Parker Guns.

RATHER STARTLING, ISN'T IT?

In the main event, the PINEHURST HANDICAP, Mr. S. A. Huntley, although placed further back than any other contestant, scored

95 out of 100 Targets at 23 Yards

and landed the Trophy. Furthermore Mr. Huntley was high over all for the entire tournament, and as usual shot his 34-inch barrel PARKER GUN.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

DU PONT

1915-1916

Long Run Trophy Plan

ENDORSED BY

TRAPSHOOTERS

AT MILTON, Penn., May 18-21, twenty-five shooters, participating in the Pennsylvania State Tournament made straight runs of 50 or over. This performance won for them the beautiful ***Du Pont Gold Watch Fob*** or an engraved bar to attach to the fob already won.

Incidental to winning ***Trophy Bars, Chas. H. Newcomb*** of Philadelphia

WON THE INTERSTATE AND STATE CHAMPIONSHIPS

The popularity of the ***Du Pont Long Run Trophy*** at Milton was further demonstrated by the continued interest displayed during the tournament. The 25 long run shooters made 43 runs of 50 or over.

Go after a ***Du Pont Long Run Trophy.*** ***They are easy to win, if you shoot*** DU PONT, BALLISTITE, SCHULTZE or EMPIRE POWDERS,—the Trophy—winners' powders.

WINCHESTER

.22 CALIBER
AUTOMATIC RIFLE

Name over all the good points of other makes of .22 caliber recoil-operated rifles, and you mention only a few of the many that can be claimed for the Winchester .22 Automatic. Others are: real beauty of outline; a handsome and clean receiver (having no pins, screws or unsightly protruding parts); a reliable, strong and sure Winchester action; and the accurate Winchester shooting qualities. The Winchester .22 Automatic was the first and is the best rifle of this type and caliber on the market—proven so by use in the hands of thousands of shooters, who have given it every possible test. It holds ten shots, which are fired by simply pressing the trigger for each shot, thus enabling great rapidity of shooting with *accuracy*. It weighs only 5¾ pounds, takes down, and is easy to clean and keep in good order. A rifle like this is a great sport maker, while at the same time it has no equal for shooting the smaller kinds of game. It lists at $25.00 and is sold by dealers everywhere for less.

A COMPARISON WILL CONVINCE YOU OF THE MERITS OF THIS WINCHESTER

..AN ASIDE..

The Keystone State, with 402 gun clubs, according to the last census, is a leader in trapshooting activities in the United States. It is a significant fact that this important body of shooters shows a continued preference for

Remington-UMC

both in State Tournaments and in the general run of club shoots.

* * *

LAST YEAR 24 STATE CAAMPIONSHIPS (including Pennsylvania's) out of 39, were won by shooters of *Remington-UMC*.

IF YOU ANSWER 3 QUESTIONS.

All you have to do to receive this Beautiful Horse Picture is to Answer the following THREE QUESTIONS **PROVIDING You Are a Farmer or Stock Owner or Horseman-Over 21 Years of Age and Write at Once.**

FIRST - In what Paper did you read this offer?
SECOND - How Many Horses, Cattle, Sheep or Hogs do you own?
THIRD - Have You EVER used International Stock Food Tonic?

Write At Once to,—M. W. SAVAGE, Minneapolis, Minn.

DID INTERNATIONAL STOCK FOOD TONIC, HELP MAKE DAN PATCH 1:55,—WORLD FAMOUS OR DID DAN PATCH 1:55, HELP MAKE INTERNATIONAL STOCK FOOD TONIC,—WORLD FAMOUS?

INDISPUTABLE FACTS FROM THE PRACTICAL SCHOOL OF 3,000,000 FARMERS.

The Mere Fact that International Stock Food Tonic has Successfully stood the Practical, Every-Day Test of Farmers and Stockmen **All Over the World** for Over a Quarter of a **Century**, is Absolute, Indisputable Proof to any Fair-Minded, Intelligent Man that it Must possess **Very Superior Merits.** An Increasing Sale for over 26 Years can be explained on no other basis. The Largest Seller in the World can be built up **only** on merit. Any other claim would be childish nonsense or proof of a vindictive, prejudiced mind. During the past 26 **Years**, Hundreds of Preparations have been offered for sale—had a limited sale, but have entirely disappeared—but **International Stock Food Tonic** has **constantly increased** (during these 26 Years) until it is sold and used All Over the World. What does this prove to your own, practical, fair mind? It is Guaranteed to save 70 bushels of Oats per year, for Every Work Team, at a using expense of Only $7.50 per year and also—to keep Horses Healthful and Stronger. It makes Colts grow and develop very rapidly. **International Stock Food Tonic** was **Originated** by one of the Largest Harness Horse Breeders of the World (M. W. Savage) owning the 700 acre **International 1:55 Horse Breeding Farm** with its 250 Stallions, Brood Mares and Colts. He carefully experimented on both his Horses and Other Stock for many years before placing it on the market. It is Guaranteed to make Your Cows give from One to Three **MORE** Quarts of Milk, **Every Day**, and to make Calves quick growers, **even** on skim milk. It is a common-sense, every-day Tonic, Blood Purifier, general System Strengthener and a Great Aid to Better Digestion and Assimilation, so that Horses, Cattle, Sheep and Hogs will gain **More** Pounds for **Every Bushel** of grain eaten. It has also **Always** had the Largest Sale in the World for Preventing Disease in Hogs and for helping make Pigs, Shoats or Hogs **Grow Amazingly.** It is not to take the place of grain, but is to mix **With** grain for **Better Health, Larger Profit**, by improving Digestion and Assimilation of All Animals. **International Stock Food Tonic** helps keep Every Animal up to **Full Normal Strength and Health**, and it is a **REMARKABLE PREVENTIVE** of Disease. You eat several kinds of medicinal ingredients With Your **Own** Food Every Day. Don't you think it is Just as Sensible to think Your Animals should have certain Vegetable Medicinal Ingredients, which they eat freely when running wild? 150,000 Dealers in the United States, Canada, England, Scotland, Ireland, South America, Mexico, Australia, New Zealand, Honolulu, South Africa, Philippines, Cuba, China, Japan, etc., — Sell it on a **Spot Cash Guarantee** to Refund Your Money **in full** if it ever Fails to keep Your Stock in Better Health and to **Make You a Big Extra Profit**, over its low using cost. All Wide-Awake, Fair Minded Farmers admit this is a Square Deal. Ask the International DEALER in YOUR City. Over THREE MILLION **FARMERS Use It Regularly** because it **Makes them EXTRA Money in Growing, Fattening** or for **Preventing Disease.**

ALSO PUT UP IN 25 LB. WATER TIGHT WOOD EN PAILS

THE GREATEST 4 HORSE RACE IN THE WORLD

was at Indiana State Fair, Sept. 12, 1910, when M. W. Savage started Minor Heir 1:58¼, Lady Maud C 2:00½, Hedgewood Boy 2:01 and George Gano 2:02. Minor Heir won in 1:55, out in front ALL the way and All Four Horses finished in 2:00 or better and this Wonderful 4 Horse Event will be UNEQUALLED for Many Years. They were all Regular Users of, International Stock Food Tonic and had been for a long time. It Gave Them More Speed.

LEATA J. 2:03.

In the days of 1907 there was a lawyer in the town of Stockton, one Jacobs, who had had a fine-looking young trotter, Royal McKinney by name. He was of regal blood, by old McKinney, his dam Hattie Hero, whose grandsire was Director. The young lawyer was proud of the colt he had raised and broke him upon the streets of the town.

One day he drove to the ranch of Farmer Acker, a good farmer and a lover of horses. He admired the young trotter but cash was short. "Oh, well," said Lawyer Jacobs, "I'm not in the service business, but you are a good fellow, and if you will give me a couple of those young turkeys I will give you the colt." The deal was on, the farmer's mare delivered a foal in safety, and it grew to be a large bay pacer—Blanche A., the farmer named her. He broke and trained her. She could speed a 2:10 gait, but unfortunately having a trick of bearing heavily towards the pole when going fast, she was taken from the track with a record of only 2:13½.

A near neighbor of Farmer Acker was Farmer Jones. He also was a lover of fine horses and trained and drove several good ones at the district fairs. One of his best was Geraldine 2:16½ by Mt. Vernon 2:15½ by Nutwood, dam Daisy by Chieftain.

One morning in early spring, the year, oh yes, 1908, Lawyer Jacobs drove to the ranch of Farmer Jones. Around the house were playing some fine collie pups. The farmer was well pleased with the Jacobs trotter, but crops were not showing up good and money was scarce. "Say, Jones, I'll tell you what I'll do. I've got a friend in San Francisco who wants a good collie pup. If you will give me one of those pups, it's a go." "All right," says Farmer Jones.

The farmer is not much of a talker and he keeps his thoughts and plans to himself, but that foal he believed was a world beater. He entered with spirit into the town matinees, and drove good ones such as Lady Irene 2:15½ by Diablo 2:09, dam Geraldine; Little Branch 2:16 by Nutwood Wilkes, and others, and he generally won out.

One year passed. There was upon the track one Parker, raised among the Blackhawks of Vermont. He was a driver at Palo Alto and rode Stanford's $10,000 trotter, Abe Edgerton, when those famous pictures were taken which developed into the "movies." Parker knew a good horse on sight, and he was driving in the "mats" one Guy McKinney pacer in 2:23, 2:15½, 2:10½ and finally in 2:05. The next year he passed into the hands of R. J. MacKenzie, and as Vernon McKinney took a record on the Grand Circuit of 2:01½.

Farmer Jones said nothing to others but smilingly said to himself, "I have a colt that will duplicate that." The same year he started in the matinee races a three-year-old pacer which he named Leata J. Of this filly he was very proud and never would he start her unless she was just right. Like Vernon McKinney, she proved to be a fast one and came right along. In that year, 1911, on August 13, Farmer Jones paced her in 2:21¾ and 2:16½, Bonnie W. taking the second heat in 2:20. The following week Leata J. paced the heats in 2:13½ and 2:18, Blanche A. taking the first heat in 2:16½. In November, with a runner, Leata J. paced the mile in 2:07½. In 1912 the mare paced miles in 2:07½, 2:06¼ and 2:05¼.

Farmer Jones now believed that "friendship" colt good enough to follow in the footsteps of Vernon McKinney, and under the direction of S. S. Bailey, and driven by Frank Childs, she started in the Grand Circuit races. She was entered in the major stakes, and contending aganist such old timers as Frank Bogash Jr., The Assessor, Del Rey, Stetbrino Lad and other speedy ones she proved herself the most wonderful mare ever on the eastern circuit. Frank Bogash Jr. was her only competitor, and at Kalamazoo she drove him out in 2:03½, 2:05¾ and 2:02¾. With a record of 2:03, she took nine first, four second and one fourth monies, winning $17,500.

Last year she was started three times only, at Woodland, Sacramento and a matinee. At Woodland she was second to Jim Logan in 2:04½ and 2:05½, Jim taking the first heat from Don Pronto in 2:01¾. She took the first two heats from Don Pronto and Jim Logan in 2:06, 2:03¾ at Sacramento and was beaten in the third heat by Logan in 2:07. In this heat Logan paced a half in 1:00 flat, Leata gaining on him at every stride.

This year the mare was worked out on June 1 in 2:07, 2:06 and 2:05¼ and the following Tuesday she paced in 2:12, 2:07 and 2:06½. She is entered in the free-for-all Saturday, June 12, and will there again meet Jim Logan and a great array of famous pacers from east and west, and here at Stockton we are thinking that she will be perilously near the top of the summary—perhaps right there.—[SAN JOAQUIN.]

THE NEW 2:10 LIST.

Generally, along about the middle of July the 2:10 list for the season gets its start at some of the central western tracks, but this year the scene of early activity in racing circles has been shifted to the Pacific coast and the 2:10 list for 1915 had its inception in the Golden State that has furnished so many of the fastest performers of all gaits and ages for many decades. At Woodland, on May 22, the ball was set to rolling, and the exposition meeting, as was confidently expected, has furnished a fair quota of additions to the roll of honor. Here is the list as it stands at present:

Trotters—New.

Moko Hall, br h foaled 1907, by Walnut Hall 2:08¼—Daisy Wilkes by Moko, grandam Daisy Simmons by Simmons 2:28; bred by Walnut Hall Farm, Lexington, Ky.; owned by F. J. Ruhstaller, Sacramento, Cal.; driven by Wm. Ivey, Woodland, Cal., May 22.....2:10

Pacers—Reduced.

Hal Boy, b g foaled 1907, by Hal B. 2:04½—Altalena by Altamont 2:26¾, grandam Laska by Rockwood 1467; bred by August Erickson, Portland, Ore.; owned by Edward Peterson, Omaha, Neb.; driven by Marvin Childs, San Francisco, June 5.....2:05¼

The Beaver, br h foaled 1909, by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook 25505, grandam by Cooper Medium 11731; bred by Graham Taylor, Lexington, Ky.; owned by E. J. Rochon, Winnipeg, Manitoba; driven by W. W. Fleming, San Francisco, June 5.....2:05¾

Pacers—New.

Lock Logan, b g foaled 1910, by Zolock 2:05¼—Effie Logan by Durfee 11256, grandam Ripple by Prompter 2305; bred and owned by J. E. Montgomery, Davis, Cal.; driven by J. E. Montgomery, Woodland, Cal., May 22..2:07¼

O. U. C., b g foaled 1909, by C. the Limit 2:03¼—Rosie Woodburn 2:16 by Easter Wilkes, grandam Lady Beth by Gold Nut 2:11½; bred by C. L. Crellin, Pleasanton, Cal.; owned by S. S. Bailey, Pleasanton; driven by Frank Childs, San Francisco, June 8 ..... 2:08½

ESTABLISHMENT OF TROTTING IN AUSTRALIA.

That trotting, which for many years was despised by a number of patrons of horse sports, has at last come into its own is exemplified in an article covering a page of the last issue of the Referee, the well-known Sydney sporting journal. The following are extracts:

Trotting as a sport in this country is popular, and is increasing in public favor as the seasons roll by. It was not popular in the early nineties; indeed, it was in such disfavor that bookmakers could not be got to transact business on trotting events, or even to visit a course where they were being held. In the last twelve years there has been a marked change in the public view of trotting as a sport.

There are two clubs in Sydney, many in the country districts of New South Wales, over 100 of which give prizes in Victoria, and several in West Australia and Tasmania. In 1914 133 clubs and show societies were registered in New South Wales; throughout the country districts the standard of racing, as at Sydney, Melbourne, and Perth, is attaining a higher plane each year.

The official who has done most to control the sport in this state is Mr. R. C. Hungerford, who has been designated "The Father of Trotting" in New South Wales. He is associated with a body of committeemen who give their services to the controlling institution, the New South Wales Trotting Club, without any fee. As a result of the formation of that club in 1902, trotting entered upon a new era in this State.

Mr. Hungerford, in looking back for 13 years, says that there was practically no trotting in this state when his club was formed. Previously that gentleman had been secretary of the Greymouth (N. Z.) Trotting Club, and shortly after settling in Sydney he was appointed secretary of the New South Wales Trotting Club, and has held the position ever since.

It was with the greatest difficulty that the club was able to get people to attend, and its members had a harder task when they sought to procure the attendance of bookmakers, for a race meeting without the ring-men would be regarded as a tame affair by those interested in racing. After all, ten bookmakers did go to the meeting; half a dozen cried the odds in the paddock, and four did business on the flat. Nowadays over 70 metallicians ply their calling at each race meeting, and the investments aggregate a large total; often commissions for good round sums are placed. At the race meeting mentioned, Fritz, driven by his owner, the veteran breeder Mr. J. A. Buckland, of Leadville, gave an exhibition, and covered a mile in 2:16½. Later on Fritz met Ribbonwood in a match in New Zealand, and subsequently Mr. A. D. Playfair purchased the latter.

The New South Wales Trotting Club, which is non-proprietary in the purest sense of the word, was registered under the Companies Act.

One clause of the memorandum of association provides that the income is to be applied solely towards the promotion of the objects of the club, and no portion of it, by way of dividend, bonus, or otherwise, is to go to the members.

The third meeting, held at the Kensington racecourse, was a financial success. The sport had caught on. In the club's first racing season it gave £909 in prizes at a dozen meetings. The club continued to race at Kensington until June 28, 1904.

On July 19 racing again was held at Epping, and continued there until December 11, 1906, when, on account of the circumference of the track being insufficient, under the provisions of the Gaming and Betting Act which then came into operation, the club was compelled to make another change of venue, and held its next meeting at Ascot on February 2, 1907. It remained there till November 3, 1907. The club then went back to Epping, and has continued to race there since November 26, 1907.

During that year the committee of the club had talks with the powers that be regarding the new statutes and their course, with the result that part of the Gaming Measure was altered, and the size of track stipulated for was made to apply to horse and pony races. The club, having entered upon a run of prosperity, was able to purchase Epping Racecourse in December, 1911, and since then has spent over £5000 in alterations and improvements. Further work of this character is to be carried on at once.

In the first season (eight months) the New South Wales Trotting Club's revenue was £2,177; in the 1910-11 season the club gave in prizes £3,445, and its income was £7,000; in the following year the prizes were worth £3,385, and the revenue (16 meetings) was £8,559; last season the prizes totaled £3,146 (for 12 meetings), and the receipts amounted to £11,202, the club's best return.

In the first year the fees paid by bookmakers came to £143, and in the year ended July 31, 1914, the ringmen paid £1,398 for the right to bet at Epping.

The Australian Trotting Club, in the few years of its existence, has played a prominent part in the trotting world. The existence of two clubs in the metropolis has been beneficial to owners, for stakes having been raised, the racing fixtures have been increased, and now it is customary for horses not only from the Richmond and Penrith districts to take part in Sydney meetings, but ofttimes horses from the Southern Bathurst and Dubbo districts compete. Victorian owned, and even some Queensland bred, horses also find their way here.

The A. T. C. has provided two thousand pounds handicaps, which have been well supported by owners, and are attractive to the public.

The New South Wales T. C. has decided to discontinue the Sires' Produce Stake for two-year-olds, which have been in existence for seven years, and the management has in contemplation the substitution of an event for three-year-olds. For 11 years the latter club has published the "Register," giving results of registered meetings in New South Wales.

In the past 12 years trottind studs in Australia have increased considerably, and each year stock are imported from America. The descendants of Childe Harold, Van Cleve, Tuxedo, Huon, Dixie Alto, Abbey Bells, and Wildwood in Australasia are legion. Some owners have kept their own stock pure, but in districts where sires were used indiscriminately it is hard to find horses of direct breeding strains.—Australian Trotting Record.

The ranks of the prospective three-year-old trotting stars for 1915 were sadly depleted on May 27 by the death of the great filly Sparkle Watts (2) 2:10½, who dropped dead in harness on the track at Memphis, where she was a member of the Geers stable. As a yearling she was purchased from her breeder, General C. C. Watts, by Frank G. Jones of Memphis, Mr. Jones presenting her to his daughter, Miss Lula, at that time. As a two-year-old she won the junior divisions of the Horseman and Kentucky futurities and was beaten by Native Spirit in the Horse Review's classic after a hot contest in which the daughter of Native King was forced to hang up the season's record for trotters of that age, 2:09¾. She was a daughter of General Watts (3) 2:06¾ and Twinkle 2:05¼, dam also of the pacer Twinkling Dan 2:06¼, now a member of the stable of Charles A. Durfee at the exposition track.

The Ceremonies of Opening Day

After two years of hard work, careful planning, and the successful facing and overcoming of many discouraging obstacles, the first harness horse race meeting given by the Panama-Pacific International Exposition under the auspices of the Pacific Coast Trotting Horse Breeders' Association, opened promptly on schedule time on Saturday, June fifth. Despite the banks of fog that hung low over the Golden Gate and the encircling hills about the bay country throughout the afternoon, a large crowd was comfortably established in the grandstand when D. O. Lively, Chief of the Department of Live Stock, introduced President C. C. Moore of the exposition.

President Moore recounted briefly the major points concerning the inception and consummation of the idea to hold a great race meeting in connection with this greatest of expositions, taking advantage of the occasion to pay his compliments to the sport which has established itself so firmly in the esteem of the American people, as well as to the gentlemen who have been responsible for its rise from obscurity. In conclusion, he presented to the breeders' association, through its vice-president, I. L. Borden, the customary commemmorative plaque. Mr. Borden, who was suspected of having a more heartfelt interest in the warming up of Albaloma and various other candidates for the afternoon's honors than in fulfilling his portion of the formalities of the occasion, made a brief and popular speech of acceptance, and again Mr. Lively arose.

It had been the committee's intention, so said the Chief, to have a talk made by Budd Doble, the veteran reinsman who since the sixties has stood for all that is best in the sport and has achievements to his credit unsurpassed by any horseman, but Mr. Doble, though his name met with a hearty welcome, modestly failed to materialize. By request, Tom Gahagan had prepared a most interesting paper concerning the development of the trotter and the spread of harness racing throughout the country, Mr. Lively proceeding to read the same and the crowd to accord it both respect and hearty applause, its text being as follows:

Keeping pace with the progress of this country, the distinctively American sport of harness racing has grown to proportions which are not realized by any but those most closely in touch with the statistics of the sport. From the impromptu brushes on the roadway of the colonial days, it has grown and extended to every state of the Union as a highly organized sport, under the government heads of two parent trotting associations; millions of dollars are annually raced for on more than one thousand tracks. Practically every city, village and hamlet of the country, from the pine forests of Maine to the palm groves of California, boasts of its race track, either mile or half-mile.

The authorities in control of harness racing in this country long ago established the rule fixing the standard mark of the harness horse at 2:30; that is a horse which could negotiate a mile in harness in two minutes and thirty seconds or faster should be given a place in the annual year book as a horse with standard speed, his best time duly accredited in the list of animals which had performed in what came to be known as stndard time; a list which, by the way, has grown to such proportions that the turf officials, previous to the issuance of the last volume of the year book, found it necessary to include only the names of such animals as had taken their records during the past five seasons in order that the volume could be kept at anywhere near normal size.

It is just seventy years ago that the old gray trotter Lady Suffolk, driven by David Bryan, turned the Beacon Course at Hoboken, New Jersey, in 2:29½; the first trotter to beat the 2:30 mark, and at that time it was considered a marvelous feat. Perhaps it was when the handicaps in the matter of equipment, shoeing and vehicle are taken into consideration, for the outfit which gained the plaudits of the crowd at that time would excite only derision in the sight of a 1915 harness meeting audience. It is an age of progress and it is only by keeping abreast of the times that any business or sport, or a combination of both, a term which I believe is applicable to harness racing, can survive.

Four years after Lady Suffolk obtained the championship crown came Pelham, who trotted in 2:28 in 1849, a momentous year in the history of California. In 1853 Highland Maid reduced the record to 2:27 which was equaled by Tacony the same season. Flora Temple was the next champion and she accomplished what was at that time thought the impossible by trotting a mile in 2:19¾, the first trotter to beat the 2:20 mark. For eight years the famous little Flora remained the undisputed champion of trotters, then in the east appeared a trotter and a youthful driver, the former to become a world's champion, the latter to contribute more than one important chapter to the history of harness racing in America. The horse was Dexter, the driver Budd Doble, and from that August day at Buffalo in 1867, when he drove Dexter to the world's record of 2:17½, up to the present time, Doble has been the most notable figure connected with the sport of light harness racing. He later brought out the famous Goldsmith Maid and in 1874 drove her to the world's record of 2:14 at Mystic Park, Boston. Still actively in the harness, he has horses named to race at this meeting commencing today, and during the next two weeks this trainer of champions will be seen on this track matching his skill against the other star reinsmen.

Rarus, in 1878, dethroned Goldsmith Maid by trotting in 2:13¾, a record which stood but little more than a year, St. Julien, driven by Orrin Hickok, trotting the Oakland track, across the bay, in 2:12¾, which he later reduced to 2:11¼. Next came Commodore Vanderbilt's chestnut trotter, Maud S., who set the record at 2:10¼ in 1881. Jay Eye See trotted in 2:10 in 1884 but he was "a king for a day" for the day following his performance Maud S. turned the Glenville track at Cleveland in 2:09¾ and later set the mark at 2:08¾.

For six years Maud S. reigned the undisputed queen of harness horsedom, then a California star appeared in Sunol, from the Palo Alto stable of Senator Leland Stanford. Driven by Charles Marvin she turned the kite track at Stockton in 2:08¼. She was destined to be the last of the champions of the high wheel era, for it was but a year later that the sport of harness racing was revolutionized by the appearance of the bicycle sulky which did more to increase the speed rate than any other single factor in its history.

It was in 1892 that the bicycle sulky made its first appearance and it was Budd Doble who drove the first champion to that hitch. Driven by Doble, Nancy Hanks trotted the Terre Haute track in 2:04. Two years later Alix became champion by a mile in 2:03¾. In 1900 Ed Geers drove The Abbott in 2:03¼ and the following year Cresceus, driven by his owner, George Ketcham, trotted in 2:02¼. The Toledo trotter held the crown for two years but in 1903 it passed to the California product, Lou Dillon, which Millard Sanders drove to a record of 1:58½, the first trotter to beat the two-minute mark. Three years ago the black whirlwind Uhlan set the mark at 1:58 at the Lexington track and this record still stands as the best.

That the sport of harness racing has kept abreast of the times is proven by the increase in the speed rate. From the 2:29½ of Lady Suffolk to the 1:58 of Uhlan shows an increase in the speed rate for a mile of 31½ seconds. Trotting at their respective gaits Lady Suffolk would have hardly passed the three-quarter pole when Uhlan reached the finish, which gives an idea of the improvement which seventy years have brought about; nearly three-quarters of a century of improvement in the breeding of the harness horse as well as in the training and equipment.

In 1845 but one trotter and three pacers had beaten 2:30; at the close of the season of 1914 harness horse statistics showed that a total of 30,974 trotters and 22,878 pacers have records in standard time; more horses have beaten the two-minute mark in the past few years than had beaten 2:30 at that time. In 1914 there were in the neighborhood of 1,300 harness race meetings held at the various tracks in the United States and Canada, the horses racing for a total of more than $4,000,000 stakes and purses. Peter Scott, a trotter which will be raced here at the October meeting, sold for $30,000 last summer; another, Directum I 1:58, the king of racing pacers, which is also scheduled to race here in the fall, sold for $35,000 only a few months ago; there are two score of trotters and pacers here now ready to race, any one of which could be sold for a small fortune.

Many people who have never taken the trouble to investigate the subject of harness racing carry the idea that the gambling factor enters largely into its affairs. This is a mistaken idea. At least seventy per cent of the harness meetings of this country are conducted as the meetings will be upon this exposition track, without bookmaking or pool selling; in fact, there is far less money wagered upon the results of the harness races than upon the baseball games, and baseball is admittedly the most popular sport of this nation and the only one that, taken as a whole, exceeds harness racing in popularity.

It is fitting that the meeting which opens here today, with a program which from a financial standpoint is more valuable than any ever offered for the harness horses, should be held in connection with the greatest exposition of the age. It has served to attract valuable horses from all parts of the United States and Canada, many of them having been shipped here months ago in order that they might have the advantage of the early training season which is denied them in the east.

The love of a contest of speed between members of the equine family is a heritage which has been handed down to us from the earliest ages. According to the most reliable historians countless throngs were thrilled to frenzy by the sight of the chariot races in the stadium at Antioch, Athens and Rome, centuries before the Christian era. In the days of the Caesars the winning charioteers were accorded honors almost equal to those claimed by the Roman emperors. We are living in a different age now but the love of the horse, man's noblest friend, is still strong in the hearts of people in all walks of life. During the coming two weeks many of the greatest harness horses of the day, driven by drivers whose names are household words in the world of the harness horse, will contest on this track for racing honors as well as rich financial rewards. It is safe to prophesy that the record of the coming meeting will constitute one of the brightest pages in the history of the sport of light harness racing.

With this conclusion to the day's formal opening, the race meeting became an accomplished fact and President Moore entered the judges' stand to give the word for the starters in the first heat of the 2:30 trot.

Do not forget that $2150 will be hung up for harness horses on July 5 at Pleasanton. Particulars on a business page.

JACOB RUPPERT.

Jacob Ruppert, who died at his residence, 1116 Fifth Avenue, New York City, on the night of Tuesday, May 24, at the age of seventy-four, as the climax of a physical breakdown that had set in several years ago, will be deeply and sincerely regretted by every man devoted to the interests of the light harness horse, whether from the breeding or the racing standpoint.

Throughout the trotting world Mr. Ruppert had been known for thirty years past as an ardent lover of the standard-bred horse and one unwearied in his efforts to promote the advancement of the breed. He was the proprietor of one of the most important breeding establishments ever maintained in the Empire State; in connection therewith, of a racing plant which, always splendidly maintained, had been the scene of numerous Grand Circuit meetings, of which he was the sponsor; he was a generous patron of the leading futurity events, and the owner of a large training and racing stable—as well as being constantly and intelligently interested in all cognate affairs and subjects. Having amassed a fortune running high into the millions in commercial life, he was without financial handicaps in the conduct of his equine operations, and as a consequence his liberality and free-handedness in all that he did were unfailing. His methods were never of the "spread-eagle" or notoriety-seeking nature; he sought no personal "reclame"; and in every way he was not only a strong pillar, but an admirable one, of the great trotting industry.

His Hudson River Stock Farm and Driving Park, at Poughkeepsie, N. Y., were established in the 'eighties. These properties had previously been the property of the late Edwin Thorne, one of the foremost of New York's trotting devotees, both as breeder and owner, in former decades, when the late Alden Goldsmith had also been identified with them. After the purchase of the plant by Mr. Ruppert, the track was rebuilt by the late Seth Griffin, America's most famous track builder, and the entire estate was remodeled and highly improved, in which condition it was permanently maintained. Many meetings were given at Poughkeepsie under Mr. Ruppert's auspices, but their discontinuance was finally forced owing to the drastic legislation enacted in the state because of the abuses which the "running game" in and about New York City had given rise to. So great was Mr. Ruppert's desire to continue racing at Hudson River Driving Park that he sponsored a number of "betless" meetings, but was reluctantly obliged to abandon them owing to the losses which they entailed. But successful combined fairs and meetings still were given annually in the fall.

One of the first stallions owned by Mr. Ruppert was Virgo Hambletonian 3300, son of Hambletonian 10, chiefly noted as the sire of Charley Hogan 2:18¾, a gelding that Budd Doble campaigned with conspicuous success in the middle 'eighties. Later on Favorite Wilkes 2:24½, son of George Wilkes 2:22, and own brother of Bourbon Wilkes, being out of the noted matron Favorite, by Abdallah 15, became and long remained the premier at Hudson River Farm, where he sired many good performers. Baron Rose 2:20¼, a son of Stamboul 2:07½ and Minnehaha, was a subsequent purchase, and his son Flower 2:21¾, bred at the farm, was also used as a sire, as was also Ruprecht 2:17¼, a home-bred son of Favorite Wilkes. In February, 1902, Mr. Ruppert paid $15,700, at auction, for the celebrated race horse and sire Oakland Baron 2:09¼, still the titular premier at Hudson River, although now not in public service. Within the past few seasons Mr. Ruppert had acquired and installed as his principal stallions Guy Axworthy (4) 2:08¾, whose brilliant successes as a speed-getter caused him great satisfaction, and Sir Marque 47462, a young horse whose promise as a sire was most reassuring, as from his first few foals trained had already been developed several very fast performers. The brood mare band, gradually built up, by means of selection, weeding-out and liberal expenditure, ranked among the most select.

Mr. Ruppert leaves a widow, two sons and two daughters. Whether any directions regarding the disposal of his trotting interests are contained in his will is so far unknown. It is earnestly to be hoped that the splendid establishment in which he took so much pride and pleasure will be maintained by some one of the heirs, but it is said to be the prevalent impression that this is unlikely. If such be the case, the opportunity presented for some eastern horseman to acquire a first-class breeding and racing establishment, of historic note, is most exceptional and should not be allowed to pass unheeded. As is well known, the Hudson River Driving Park is considered second to no place in America as a training ground, and there for a number of seasons past America's premier winning reinsman, Thomas W. Murphy, has wintered and prepared his stable of champions and record-breakers.

Personally Mr. Ruppert was one of the most genial of men. His circle of acquaintances was very large and his friends were literally legion. He had a warm heart, easily touched by the misfortunes of others, and his charities and benevolences, his unfailing kindliness of spirit and desire to favor and assist his fellow-men, endeared him to all with whom he came in contact. We record his death with the deepest and most genuine regret. The Review had counted Mr. Ruppert among its true and consistent friends for a quarter of a century and his "passing" is a loss of the kind which cannot be repaired. Review.

Pacers Buzz at Exposition Track

Under weather conditions that were not conducive to extreme speed, the long awaited exposition trots opened Saturday afternoon with an enthusiastic crowd of followers of the sport on hand to cheer the winners. The way to the track is a long one and lowering skies had an adverse effect on the attendance as well, but the spectators came in a steady stream from an early hour, and before the first event was called several sections of the monster grandstand were packed from the boxes to the topmost tiers of seats, something over five thousand admissions being checked by the turnstiles. The ceremonies attendant upon the opening of an enterprise of such unprecedented scope (described at length in another department of this publication) were given pleasing attention on the part of the big crowd which was in "hearing distance" of the central box, and interest in the coming events had reached a high point when President C. C. Moore of the exposition called the horses for the first race, acting as starter for the initial heat.

Evidently suffering from palpitation of the gizzard or some similar ailment, owing to the previous history and recent fast workouts of a number of the entries in the 2:30 trot, over half of the original nominators to this event scratched their horses Friday evening, leaving only Virginia Barnette, McCloskey, Spriggan, The Proof and Bon Cres to stage the opening performance of the big meeting. All of them had gone the route in ten or better in their training, and while some of the greenest of the bunch had shown the fastest work, the experience of McCloskey recommended him to the crowd's respect. Virginia Barnette, for whom the event was the second race of her career, was unsteady in scoring, and though Durfee nodded for the word a bit back the first time down, President Moore gave her "the benefit of the doubt" that exists concerning new ones and gave the field a couple more trials. They took the word with McCloskey on the pole, The Proof breaking on the first turn. Spriggan and McCloskey hotfooted to the half together, with Virginia close up, and while Spriggan hung on gamely the white faced gelding showed him the way to the wire in 2:09¾, Virginia having lost her chance for the heat through a break at the head of the stretch. Bon Cres broke in the stretch and was just outside the flag, which was at the short distance.

In the second heat Spriggan took the overland route going away and before the quarter was passed had assumed the lead, retaining that position until rounding into the stretch, when Durfee came around for a win with the Moko filly in a drive that promised to be a great contest until McCloskey broke, The Proof also losing his feet in the stretch but settling quicker than McCloskey and beating him home. Again Spriggan led to the quarter, the half and into the stretch, with the field all close up, McCloskey winning the heat and race after a nice contest in the stretch with Virginia, who had to cover quite a bit of extra ground to get out to a position where Durfee could get an open view of the wire. Of the four, Spriggan trotted the most consistent race, marred by no break or misbehavior of any kind. The Proof's friends were well satisfied with him and the whole quartette of youngsters can be depended upon to show marked improvement with age and experience. McCloskey annexed a winrace record at last and is no longer a 2:30 trotter.

The 2:07 pace gave the crowd a run for their money that they will long remember, incidentally bringing about the accomplishment of that graceful "del sarte" performance alluded to last week as an imminent probability—the upsetting of the dope all over the beach. Hal Boy, White Sox, Walnut Grove, Homer Mac, College Gent and Teddy Bear were all given more consideration both on the part of public and horsemen than The Beaver, on past performance, but it is the unexpected happenings that add real spice to life in general—politics, religion, horse racing in particular—and there was an ample sufficiency of this kind of spice in evidence. As entries for this class did not close until June first there was only one scratch, Dan Logan, and the field numbered ten high class sidewheelers, a number of them entered also in the free-for-all pace, and almost all of them candidates for the big end of the $20,000 stake on getaway day.

For the size of the field and considering the fact that for a pair of them it was their first start of the season, they were not an unruly bunch to get away, getting the word for the first heat with all of them on the pace. Hal Boy, who had drawn the pole, set sail from the start and led the field in a mass formation to the quarter in :30, the half in 1:01¾, the three-quarters in 1:34½. Heading into the stretch the teamsters who were within striking distance began "asking it of 'em," Teddy Bear collaring Hal Boy as his particular opponent and the balance of the bunch scrapping behind them for positions in the money. Down in front of the long grandstand sped the leaders, the stand rising to them to a man. Inch for inch they fought it out, and when they flashed head-on past the judges the cries were loud and long for Teddy Bear, who has more friends in San Francisco than there are fiddlers in the lower regions. The judges saw Hal Boy first, however, and the time hung out, 2:05¼, was a full second faster than any of his previous performances. Behind the leaders the Canadian entries had slipped into third and fourth position, and Booze had gotten the flag. White Sox, much to the disappointment of a strong contingent of Durfeeites, insisted on breaking early in the game and failed to figure in the contest.

Undaunted by the close call he had in the first heat, Hal Boy again raced to the front in the second, going to the quarter in :30¾; down the back stretch Homer Mac raced to the front with Hal Boy at his wheel and The Beaver in the trail, rounding into the stretch a bit wide on account of the short turn. This was Fleming's opportunity and he came through on the pole with The Beaver for a straight shoot to the wire, passing both Homer Mac and Hal Boy in a great burst of speed that brought applause from the stand, Hal Boy standing the drive gamely though unsuccessfully. White Sox and Little Bernice, the Los Angeles girls, both had trouble keeping their feet, the latter finishing behind the flag.

It hardly seemed possible that there could be another heat below 2:06 after the sizzling time of the first two heats, but this bunch of pacers are of the real kind and came out fresh as daisies for the final trip. The Beaver went to the half and the three-quarters in the same old 1:03 and 1:36 notch, with the field well bunched behind him, and again came home in 2:05¾ in a most impressive manner, winning from the game little Hal B. gelding by a length, Barney Barnes shoving College Gent just ahead of Jim Stewart and Homer Mac for third place, Walnut Grove improving his previous positions by one notch. White Sox again disappointed her friends and finished far back, Durfee not asking her to beat the flag after early breaks. Fleming's driving and The Beaver's win were well received by the spectators, and the jubilant Canadians were heartily congratulated on all sides.

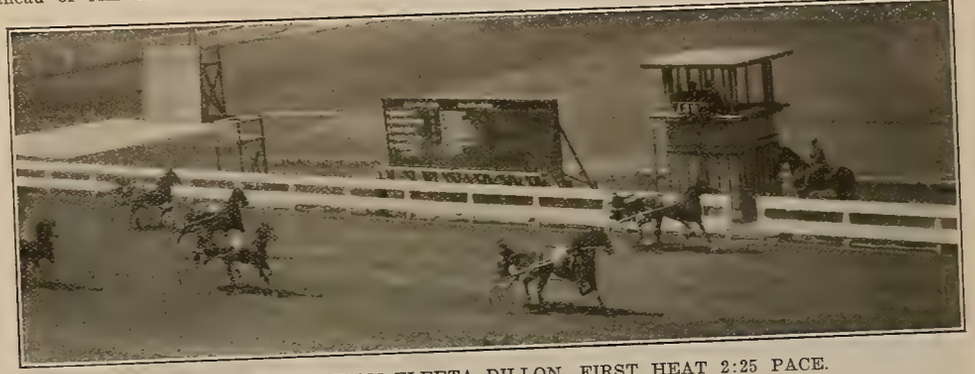
Three M. and M. candidates showed up in the field of five horses that came out for the 2:08 trot—The Duchess, Albaloma and Peter McCormick, the latter lad being one of the heaviest staked trotters of the year, as he is entered from San Francisco to Hartford and return in all the major events to which a 2:10 trotter is eligible. The Duchess was highly regarded by the local contingent who had watched her work since coming here, but a bit of injury through picking up a nail in one foot a few days ago had led to a slight change in her shoeing and she was unsteady, for the first time this season. Esperanza, on the other hand, has been making a good many breaks in her training and made only a couple in the race, though she seemed to lack her customary whizz. Saturday's results and the condition of the track lead to the view that it is "pacers' footing," and that the sidewheelers will make comparatively better time over it than the trotters, as hard going is more apt to slow up the latter, and Saturday's going was nothing if not hard, the cushion over firm footing that best suits the average trotter being conspicuous by its absence, at least on that portion of the track to be viewed competently from the stand.

Kid Cupid went away on the pole, which he surrendered to the roan mare before the quarter was reached, and before the three-eighths was passed the field was cut to three horses. Kid Cupid, in the trail behind Albaloma, started to take out just as Quinn also decided on a shift of position for his mount, the result being that the chestnut gelding ran one front foot through the wheel of Albaloma's sulky, putting both of them out of the heat without serious injury to horse or man. The Duchess and Esperanza broke in the stretch and Peter McCormick won in slow time, the judges placing Albaloma and Kid Cupid fourth and fifth respectively. In the second heat the five got the word in a faultless start, but The Duchess, Albaloma and Esperanza all broke in the first five-eighths, Peter McCormick leading the way. Albaloma moved up to even terms at the half, Peter going rough owing to an endeavor to jump the trail left by the water wagon and failing to get squared away in time to catch the California gelding in the stretch, although he finished at Quinn's shoulder.

Peter had the edge on the others in the start of the final heat, taking the pole in the first eighth. The Duchess made a move for the lead at the half but failed to get through and Albaloma led into the stretch. The roan mare left her feet again, and the big Peter the Great trotter let out another link and lengthened his stride for a clean win, The Duchess outfooting Albaloma for place.

During the afternoon Millard Sanders sent Barney Oldfield, his guideless pacer, an exhibition mile in :33½, 1:08½, 1:45, 2:19, the crowd receiving the performance well and giving Barney a good hand.

The day's officials were O. P. Updegraff of Topeka, starter; Magnus Flaws of Chicago, presiding judge, and J. A. Burnett of Denver and Robert S. Brown of Petaluma, associate judges; J. S. Bransford of Salt Lake and S. Christenson and John A. McKerron, timers; Geo. B. Kelley, clerk; I. B. Dalziel, marshal, and Sandy Smith, flagman. Here are the details:



San Francisco, Saturday, June 5, 1915.

2:30 trot, $2,000:

McCloskey, br g by Theodosius 2:18½—Maggie C. by Odd Socks 2:20½ ..... (McDonald) 1 4 1
Virginia Barnette, b m by Moko—Zephyr 2:07¼ by Zombro 2:11 ..... (Will Durfee) 3 1 2
Spriggan, b g by Baron McKinney 2:10¼—Helen Simmons 2:11½ by Simmons 2:28 (Will DeRyder) 2 2 3
The Proof, b h by The Exponent 2:11¾—Chord 2:27 by Wilkes Boy 2:24½ ..... (Spencer) 4 3 4
Bon Cres, bl h by Bon Voyage 2:08—Kate Kopje by Cresceus 2:02¼ ..... (Chadbourne) ds

Time—:33 , 1:05 , 1:39½, 2:09¾
:32½, 1:06¼, 1:40 , 2:10¼
:32½, 1:08¾, 1:41¾, 2:12¼

Distribution of purse—McCloskey $800, Virginia Barnette $575, Spriggan $400, The Proof $225.

O. U. C. WINNING FROM FLEETA DILLON, FIRST HEAT 2:25 PACE.

2:07 pace, $2,500:

The Beaver, br h by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook ..... (Fleming) 3 1 1
Hal Boy, b g by Hal B. 2:04½—Altalena by Altamont 2:26¾ ..... (Marvin Childs) 1 2 2
Teddy Bear, br h by Del Coronado 2:09½—Queen S. by Sable Wilkes 2:18 ..... (Daniels) 2 4 6
Homer Mac, b h by Petigru 2:10¼—Eagletta 2:11½ by Ketchum 2:16¼ ..... (Stewart) 7 3 4
College Gent, bl h by Kentucky Patterson—Belle H. by Senator Crisp ..... (Barnes) 4 8 3
Walnut Grove, bl h by Constantine 2:12½—Lindis by Jackdaw 2:28¾ ..... (Ruthven) 6 6 5
Zulu Belle, bl m by Petigru 2:10¼—Johanna Treat 2:24¾ by Thomas Rysdyk ..... (Schwartz) 8 7 7
White Sox, b m by Del Coronado 2:09½—Subito by Steinway 2:25¾ ..... (Will Durfee) 9 5 ds
Little Bernice, b m by Del Coronado 2:09½—Pearl Pointer by Sky Pointer ..... (Whitney) 5 ds
Booze, b g by Dupe—Daughter of Bay Bird ..... (Montgomery) ds

Time—:30 , 1:01¾, 1:34½, 2:05¼
:30¾, 1:03 , 1:36 , 2:05¾
:31 , 1:03 , 1:36 , 2:05¾

Distribution of purse—The Beaver $1,031.25, Hal Boy $781.25, Teddy Bear $312.50, Homer Mac $218.75, College Gent $156.25.

2:08 trot, $5,000:

Peter McCormick, br h by Peter the Great 2:07¼—Pearl Cecil by Cecil W. 2:28½ ..... (Shuler) 1 2 1
Albaloma, b g by Almaden D. 2:16¼—Loma B. by Stam B. 2:11¼ ..... (Quinn) * 1 3
The Duchess, ro m by Allerteen—Cecilian Kate by Cecilian Prince 2:30 ..... (McDonald) 2 4 2
Esperanza, b m by Carlokin 2:07½—My Irene S. 2:28¾ by Petigru 2:10½ ..... (Will Durfee) 3 3 4
Kid Cupid, ch g by Cupid 2:18—Zarina 2:13¾ by Dexter Prince ..... (Daniels) * 5 5

*Did not finish; placed Albaloma 4, Kid Cupid 5, owing to unavoidable accident.

Time—:32 , 1:06 , 1:40 , 2:11
:32 , 1:06¾, 1:41 , 2:11½
:32¼, 1:04½, 1:38½, 2:09½

Distribution of purse—Peter McCormick $2187.50, Albaloma $1250, The Duchess $937.50, Esperanza $625.

Second Day.

Tuesday, June 8.—Under a clear sky but with the wind more pronounced than on opening day, racing was resumed at the exposition track this afternoon before a fair crowd, the properly conceived idea that it was a "short card" cutting the attendance noticeably. The 2:13 trot scheduled for today having failed to fill, the management announced a match race between White Sox 2:06¼ and Twinkling Dan 2:06¼, members of the stables of W. G. and C. A. Durfee, respectively, but the arrangement "went wrong," leaving only two races for the day.

Anvilite, the much heralded youngster in the MacKenzie stable, made good by winning the two-year-old trot in fine fashion, behaving like a veteran at all parts of the mile. Natalday, with Lon McDonald up, drew the pole for the first heat and Starter Updegraff sent the babies away on an almost perfect start. The Expense broke early in the game and Will Durfee set sail with Miss Rico and opened up

a good lead, followed by Natalday, Anvilite and Carleta. The Christenson and MacKenzie trotters began closing up near the half, Anvilite going into second place before reaching the five-eighths. The Expense made up quite a bit of ground, but Carleta broke on the turn and did not settle in time to beat the flag, Miss Rico never being headed and winning in highly creditable time.

Again the field went away in excellent shape, Miss Rico in the lead, with Natalday forging into second place before reaching the quarter but losing that position through a break. Down the back stretch Anvilite let out a bit of speed that put him in the lead at the half, with The Expense laying in good position, the three leaders rounding into the lane well bunched. Anvilite won by himself, The Expense going off her feet after starting a nice drive that promised results for a time. In the final heat, the Spencer filly again showed unsteadiness in the stretch, Miss Rico setting the early pace, as before; Anvilite supplanted her at the three-eighths and the trio were well matched at the half, Natalday losing a little ground around the short turn. Durfee began a drive that threatened DeRyder's position in the summary for a few seconds, but under the urging Miss Rico shifted to a pace and Anvilite led the way to the wire practically unchallenged.

Seldom do five nicer youngsters face a starter, as they behaved perfectly in scoring and all showed they could trot. June is a most unusual time for racing two-year-olds, and in the face of the time of the year and the wind they bucked on the back stretch the time made by the youngsters is remarkable. Anvilite, the winner, is the first performer to the credit of that grand trotting machine, The Anvil 2:02¾, and is also the first trotter to be produced by a daughter of The Spy, a son of Chimes that never achieved a record, while Miss Rico's performance brings new laurels to the futurity winner Manrico (3) 2:07¹₄, gaining him a position in the great table of sires. All of these youngsters are staked in the usual California classics to be raced in November, and with the exception of Anvilite are California bred. Some weeks ago DeRyder let up on the MacKenzie colt for the time, as he is engaged in $140,000 worth of stakes later on, but the manner in which he performed today gave no indication of anything radically wrong, and he should be a good contender in the eastern classics if he comes on as he promises to.

The 2:25 pace, with nine starters, brought out a real horse race that gave the crowd some recompense for the shortness of the program, "winner picking" proving a precarious occupation. With Fleeta Dillon in the field the railbird contingent anticipated some delay in scoring, as the fast daughter of Sidney Dillon has never been noted for the excellency of her behavior, but in Laurence Shuler's hands she acted like a real Indiana lady, though for a genuine Hoosier lass she was hardly rigged properly, Shuler bringing her before the public half naked and minus the drawers that she had been sporting of late. Dicto had the pole with Fleeta on the outside and on the word the bay mare rushed to the front for a goodly lead, with Donald and A. B. C. leading the balance of the field and O. U. C. next to last at the half. O. U. C. carried a lot of "hopes" for many members of the crowd and they were resigned to the acceptance of a place back in the ruck, but they were not estimating properly the amount of speed the lad had on tap. Coming wide into the long stretch, Childs opened him up for a regular Garrison finish, passing all the field save Fleeta Dillon well down from the wire, and collaring her in turn in the last several yards. His rush gave some idea of the speed that caused his sale at a good price last spring, as he must have paced the last quarter very close to twenty-nine seconds and went a long mile in the bargain. Directline finished well, outfooting the balance of the field for third position.

After the showing made by O. U. C. in the first heat the crowd settled themselves to watch him win a race in straight heats, but the man who ladles out the racing luck had other ideas. Fleeta in second position behaved as well as when she was out in the clear, and again took the lead. At the eighth the shout "he's broke" went up from the big delegation whose eyes were closely following Frank Childs' green jacket, and O. U. C. was seen to be in difficulties of a dire nature, his jimtown being of the standstill variety that put him hopelessly out of the race. McGuire, Chadbourne and Ivey in the order named followed Shuler to the half, where DeRyder moved up to third, and in the stretch another battle royal ensued, A. B. C., Directline and Zomblack standing good drives and finishing in the order named. O. U. C. came in with a broken hobble, explaining the reason for his defeat.

Fleeta came down on a canter the first time out in the third heat and the remark that the show had started was current in short order, but she fooled 'em again and on the next score the field was sent away in excellent shape, Fleeta in front to the quarter as usual, with A. B. C. second and Zomblack third. At the three-eighths Chadbourne took the lead, surrendering it in turn to DeRyder at the half, the pair leading the bunch into the stretch and flattening out for home, Zomblack, A. B. C. and Directline all responding well to a stiff drive and finishing in that order. Directline broke nearing the wire through no fault of his own, having picked up a nail, a relic of the auto races. Fleeta Dillon went the best race of her career and the winners of the different heats, as well as Directline, all showed up to good advantage. So far, Starter Updegraff has set an enviable pattern for his fellow starters to follow, almost all of his starts being heartily commended by the spectators. The details:

San Francisco, Tuesday, June 8, 1915.
Two-year-old trot, purse $2000, 2 in 3:

Anvilite, b c by The Anvil 2:02¾—Martha Spy by The Spy .....(C. L. DeRyder)	2	1	1
Miss Rico, br f by Manrico (3) 2:07¼—Subito by Steinway (3) 2:25¾.....(W. G. Durfee)	1	2	2
Natalday, b c by Wilbur Lou (3) 2:10¼—Ella J. by Bob Mason 2:27½.....(McDonald)	3	4	3
The Expense, br f by The Proof (2) 2:29¾—Nusta 2:23½ by Nushagak .....(Spencer)	4	3	4
Carleta, b f by Carlokin 2:07½—Alexandria by Bon Voyage 2:08 .....(C. A. Durfee)	ds		

Time—:34 , 1:10½, 1:46¼, 2:21¼
:34 , 1:10 , 1:47 , 2:22¼
:35 , 1:14 , 1:50½, 2:24¾

Distribution of purse—Anvilite $1000, Miss Rico $500, Natalday $300, The Expense $200.

2:25 pace, purse $2000:

A. B. C., bl g by Young Monterey 2:24¼—Rosalie by Dudley 2:14 .....(Chadbourne)	4	1	2
Zomblack, bl h by Zombro 2:11—Madeline Marshall by Demonio 2:11¼.....(C. L. DeRyder)	5	3	1
Directline, br h by Baron Direct—Woodland Echo by Woodline 2:19 .....(Joe McGuire)	3	2	3
Fleeta Dillon, b m by Sidney Dillon—Lady Hilda Hills by Wilkes Boy 2:24½...(Lawrence Shuler)	2	4	4
Dicto, b g by Dictatus Medium—Letter B. Jr. by Benton Boy 2:17½ .....(Will DeRyder)	6	5	5
Donald, b g by Golden Baron—Kitty by Knight 2:22½ .....(Ivey)	7	6	6
O. U. C., b g by C. the Limit 2:03¼—Rosie Woodburn 2:16 by Easter Wilkes.....(Frank Childs)	1	ds	
Frank Perry, b g by Toddington 2:20—Lilworthy by Axworthy (3) 2:15½.....(Webster)	ds		
Mountain Dee, b h by Charley D. 2:06¼—Mountain Maid by Cresco.....(Walker)	ds		

Time—:30¾, 1:03½, 1:38 , 2:08½
:30¾, 1:04½, 1:39 , 2:10¼
:31½, 1:06¼, 1:39½, 2:10¼

Distribution of purse—A. B. C. $675, Zomblack $450, Directline $350, Fleeta Dillon $275, O. U. C. $250.

START OF THE FIRST HEAT OF THE TWO-YEAR-OLD TROT

Third Day.

Wednesday, June 9.—The weather man geared up his machine a bit today and turned out about the best brand of weather that has fallen to the lot of the meeting to date, the crowd also assuming much better proportions than on yesterday and being rewarded by witnessing some sharp contests and fairly good time.

It was the general expectation that today there would be an opportunity to get a line on Frank Childs' stake trotter, Loe Blossom, who has the distinction of holding the workout record for trotters over the local track, 2:06½, but she failed to materialize. Prior to the time for declaring starters, Frank had sought the advice of one Alonzo McDonald (for whose opinions, for reasons readily perceived by folks who are keeping cases on certain affairs, he professes a most profound respect) and the wily Bostonian, with visions of a "soft spot" for Laramie Lad with the chestnut mare out of the way, advised gentle work in the morning and no start in the race, owing to the facts that Loe has a hard race ahead of her in the big trot Saturday, that the track was hard to take chances with such a high class mare, et cetera and so on. It worked like a charm, for one heat, and then, of course, the beans had to be spilled in a most aggravating manner.

With many of the spectators, it was a case of thumbs down for Virginia Barnette on account of her disappointing performance of Saturday afternoon, but the this time she was on her good behavior and Colonel Updegraff sent the field away the first time down, Laramie Lad going to the front with Princess Louise and Seneca Boy camping with him as named, and Virginia last down the stretch, the half finding them all close together. Durfee swung wide on the turn and steamed up a few pounds, but while Virginia responded nicely, Laramie Lad also stood the drive in good shape and beat the Moko mare by a neck, or better, in time just outside the ten list. In the second heat Virginia went to the front at the eighth, giving way to Laramie Lad past the quarter. At the half the Lad was leading a closely spaced procession, but Virginia came to him in the stretch and won by half a length, with Princess Louise and Seneca Boy right in the immediate vicinity. McDonald's trotter proved his handiness in the third heat by breaking in the first eighth and settling without losing any ground, passing Durfee's filly at the quarter. Jockeying the "purgatory bend" Durfee had the best of the argument and led the way home from well back on the short turns, with McDonald's gelding finishing lapped up but safely beaten. Virginia's behavior was a great improvement over the form she displayed Saturday, and she may yet cut considerable figure in the big stake.

Maymack was inclined to resent strange hands in scoring for the amateur event for free-for-all trotters, but Sweet Marie Bob Smith has a soothing sort of way with him and the pair hung up a new record for the meeting by winning a race in straight heats, all others having brought forth two and three heat winners. After the first three-eighths of the initial mile the bay mare was never headed and won without difficulty, Kid Cupid's best efforts in the first finish failing to set Smith to driving. Jean Arion went a nice steady race for Harold Savage and responded well to his drives, but lacked the steam to make May extend herself.

Chief of the afternoon's events was the 2:11 pace, as the half-dozen sidewheelers who extended it their patronage included the "duellists" of opening day, Hal Boy and The Beaver, whose performance of three heats below 2:06 in the first week in June will in all probability hang as a record for that season of the year for some time to come. Both had plenty of friends in the crowd and both had backing in some moderate wagers, the turning of the tables serving also to stimulate interest in their final meeting on getaway day. Fleming drew the pole in the position lottery, and Frank N. and Imbro proceeded to delay the game by spoiling a few starts, the latter going away in a good position when the word was eventually given and racing to the front with the field not far behind. At the half four of the six—The Beaver, Imbro, Hal Boy and Red Rock—were on pretty even terms in 1:02¼, The Beaver leading around the turn, with Hal Boy coming strong for a win by two lengths. Imbro was again unsteady in the score but the delay was not for long, The Beaver dropping into Hal Boy's trail immediately after leaving the wire and McGuire eventually dropping into The Beaver's wake. In just such fashion they came into the stretch, coming the last quarter in :29¼ with the leaders lapped, though Hal Boy was a safe winner.

Once more Fleming took in behind Childs for the greater portion of the route, the field being all close up at the half. Princess Patch broke on the turn and the leaders drew away from her, though she settled and paced fast in the final spure. The cries of "Hal Boy!" were about evenly divided with those of "The Beaver!" as the leaders came head on for the finish, the Childs horse pulling a new one for him by breaking some yards from the wire and completing the mile on the run, the quarter again being in :29¼ and Red Rock, Imbro and the Princess finishing close up. Hal Boy was penalized by being placed last, but managed to grab the major portion of the purse at that. The summaries follow:

San Francisco, Wednesday, June 9, 1915.
2:16 trot, purse $2000:

Virginia Barnette, b m by Moko—Zephyr 2:07¼ by Zombro 2:11.....(W. G. Durfee)	2	1	1
Laramie Lad, b g by Master Bo—Daughter of Oronteo 2:16½ .....(McDonald)	1	2	2
Princess Louise, b m by Del Coronado 2:09½—Louise by Woolsey .....(Nugent)	3	3	3
Seneca Boy, ch g by King Entertainer 2:10¼—Seneca Maid 2:30 by John Adams....(Fleming)	4	4	4

Time—:31½, 1:05½, 1:39 , 2:10¼
:31¾, 1:05¾, 1:40 , 2:11¼
:31½, 1:07 , 1:41 , 2:12

Distribution of purse—Virginia Barnette $875, Laramie Lad $625, Princess Louise $300, Seneca Boy $200.

Free-for-all trot, amateur, purse $1000:

Maymack, b m by Arthur Wilkes 2:28½—Lady Whips by Whips 2:27½.....(Bob Smith)	1	1	1
Jean Arion, b m by Arion 2:07¾—Sarah Shelton 2:28¼ by Bedford 2:30.....(Harold Savage)	3	2	2
Kid Cupid, ch g by Cupid 2:18—Zarina 2:13¾ by Dexter Prince .....(Charles Silva)	2	3	3
Monica McKinney, ch m by Ed McKinney—Judy McKinney by McKinney 2:11¼.(Dan'l Hoffman)	ds		

Time—:32¾, 1:07 , 1:40½, 2:12
:32¼, 1:06½, 1:40½, 2:11½
:32½, 1:07¼, 1:41½, 2:13¼

Distribution of purse—Maymack $500, Jean Arion $225, Kid Cupid $175, association $100.

2:11 pace, purse $2000:

Hal Boy, b g by Hal B. 2:04½—Altalena by Altamont 2:26¾ .....(Marvin Childs)	1	1	5
The Beaver, br h by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook .....(Fleming)	2	2	1
Red Rock, ch g by Louis Wilkes 2:15½—Red Bird by E. S. 2:11¼.....(Joe McGuire)	3	3	2
Imbro, bl h by Zombro 2:11—Athlene 2:19¼ by Coeur d'Alene 2:19½.....(Frank Childs)	4	4	3
Princess Patch, b m by Dan Patch 1:55¼—International Queen 2:13½ by Tom Exum 2:14½ ..... (Macey)	5	5	4
Frank N., b g by William Harold 2:13¼—Daphne McKinney by McKinney 2:11¼.....(Munson)	ds		

Time—:30 , 1:02¼, 1:35 , 2:06¼
:31¼, 1:04½, 1:37½, 2:06¾
:31¾, 1:05 , 1:38¼, 2:07½

Distribution of purse—Hal Boy $750, The Beaver $625, Red Rock $350, Imbro $225, Princess Patch $50.

Thursday, June 10.

While the air currents that have ruled throughout the week at the exposition track may be of the kind that arouse enthusiasm and awaken the muse in poetically inclined souls, or bring joy to the heart of the deep-sea sailor or the bay yachtsman, the horseman is inclined to look upon them as hurricanes, and instead of feeling rising within his bosom an unrestrainable impulse to slop over in impassioned verse or to lay her a little closer to the wind and bury her gun'le in a smother of white foam, the "dominant note" is an inclination to seek a cyclone cellar where one may indulge in a little profanity in comfort and seclusion, without fear of interruption or of shocking the young ladies who are in the next aisle in the barn, looking at Bill Simmons' Blue Buck filly, feeding the filly sugar and Bill taffy while mentally trying to figure up whether Bill is strong enough financially to stand a tap for dinner at the Black Cat or the Portola-Louvre or some other down town joy palace that evening. No one has been tipped over backwards as yet in the back stretch, but on a day like today the timers could stop their watches at the three-eighths, snap back and catch 'em again from the five-sixteenths in about correct time.

Four three-year-olds showed up for the pacing stake that closed September 1, 1913, and while all of them had worked down close to 2:15 and should have raced in that notch or faster, the best they could do was to go to the half in 1:11, and the full route barely better than the two-year-old trotters made it on Tuesday. Sheldon B. broke early in the first heat, Oro Lou also getting in like trouble at the three-eighths, but both settled and made up their ground fairly well against the wind. Agnes Patch took the lead from the quarter but was challenged for that position at the half by Rodney Patchen, who showed the way around the lower turn. Coming into the stretch the boys were all driving and for a time it looked like anybody's race, Agnes Patch eventually drawing away for a win from Oro Lou, lapped up, with Rodney Patchen and Sheldon B. breaking in the stretch. In the second heat it was Agnes all the way, with Oro Lou pacing a steady race and the other lads losing ground from leaving the pace, though both showed a good turn of speed when they were tending to business. Agnes Patch, the winner, is the first three-year-old performer of the season for Dan Patch 1:55¼, the old hero who stands at the head of the 1:55 establishment, but is not a "new one" for her sire's list of representatives, as she had a two-year-old mark of 2:24 made late last year. Mr. Savage has been a good supporter of the exposition meeting and the stable's victory in the colt stake was welcomed by the crowd, even though the other entrants were all native sons.

The club trot brought out a field of ten, and though they bothered Colonel Updegraff a bit in scoring for the first heat, they were in good order when he sent them away, the start of the second and third heats being exceptionally fine. Matawan had on his performing clothes and pulled a few stunts at first, breaking also shortly after leaving the wire the first time down. Ateka opened up a lead with Birdeye and Columbia T. second and third at the quarter, the roan fellow breaking at the three-eighths. They finished in two sections of five horses each, Howard's Comet making a strong bid for first position and Future Tramp trying gamely for a horse that has been laid up with a curb. Agnes Carter, in Charley Becker's hands, lived up to some of the good things that have been said for her in the past and the wise bunch credited her with being dangerous for the next heat.

The start was excellent, and after Ateka broke at the eighth Matawan went to the front, with Agnes Carter second down through hell's bend. Silva moved up with Columbia T. toward the half and Agnes copped the pole about the five-eighths and was never headed, though the Sacramento mare stood a good drive and tried hard to land. By this time the enclosure was not large enough to hold one Adolph Ottinger, who had stayed by his bay mare in the face of a lot of knocking and some strenuous personal experiences with her, and when she won the third heat he was right there with the big smile. Beckers handled her well and her race was the best one of the day.

Bon Cres, distanced in the first heat on opening day, redeemed himself this afternoon by winning a main, albeit, a tame one. Dione II spoiled her chance by extreme nervousness and repeated breaks, while Robert Bingen, injured early in May while doing stud duty, was in no shape for a race, even a slow one like this. Baron Todd's sickness after arrival here put him short of work, and after the first heat, in which he lost an elbow boot, the black Bon Voyage horse had the legs of the party, passing the Todd fellow at the seven-eighths in each instance, the final heat being the fastest of the three by some seconds. The day's results:

San Francisco, Thursday, June 10, 1915.

Three-year-old pace, purse $3000, two in three:

Agnes Patch, b f by Dan Patch 1:55¼—Louise Hersey by Arion 2:07¾ (Macey)	1	1
Oro Lou, ch c by Kinney Lou 2:07¾—Zeta W. by Nutwood Wilkes 2:16½ (Blackwell)	2	2
Rodney Patchen, b g by Joe Patchen II 2:03¼—Miss Harris by Sidney Dillon (Webster)	3	3
Sheldon B., b g by Barney Barnato 2:19½—Ramona by Prince Robert (Quinn)	4	4

Time—:34¼, 1:11¼, 1:48¼, 2:21¼
:34½, 1:11 , 1:47¼, 2:20½

Distribution of purse—Agnes Patch $1500, Oro Lou $750, Rodney Patchen $450, Sheldon B. $300.

2:20 trot, driving club, purse $1000:

Agnes Carter, b m by Nutwood Wilkes 2:16½—Excella by Monbells 2:23¾ (Chas. Beckers)	3	1 1
Columbia T., b m by Bon Guy (3) 2:11¾—May T. 2:15 by Monterey 2:09¼ (Chas. Silva)	1	3 2
Graham Bellini, b h by Bellini 2:13¼—Gracie Onward 2:12 by Onward 2:25¼ (G. P. Machado)	7	6 3
Matawan, br g by Athadon 2:27—Cora Wickersham by Junio 2:22 (H. C. Ahlers)	9	2 ds
Future Tramp, b g by Trampfast (2) 2:12¼— Future Princess Ideal by Chimes (T. D. Sexton)	5	4 ds
Muggins, ch g by Jack Hawkins Jr. (H. Cohen)	8	5 ds
Horseshoe Boy, br g by Del Cronado 2:09½— Daughter of Wilkie Knox 2:10¼ (A. S. Hanks)	6	7 ds
Howard's Comet, b g by Teddy Ray—Campain Mare by Campain (P. J. Howard)	2	ds
Birdeye, ro g by Birdman—Birdie by Jay Bird (A. Combatalade)	4	ds
Ateka, b m by Athasham 2:09¼—Bessie by Botsford (H. A. Boyle)	10	ds

Time—:33½, 1:09 , 1:44½, 2:17½
:33¾, 1:07½, 1:42¾, 2:15¾
:31¾, 1:07¾, 1:43¼, 2:16½

Distribution of purse—Agnes Carter $412.50, Columbia T. $287.50, Graham Bellini $75, Matawan $62.50, Howard's Comet $62.50, Future Tramp $25, Birdeye $25, Association $50.

2:25 trot, purse $2000:

Bon Cres, bl h by Bon Voyage 2:08—Kate Kopje by Cresceus 2:02¼ (Chadbourne)	2	1	1
Baron Todd, br h by Todd—Baroness Rosalind by Baron Wilkes 2:18 (McDonald)	1	2	2
Robert Bingen, b h by Bingen 2:06¼—Episode 2:18 by Ambassador 2:21¼ (Dowling)	3	3	ds
Dione II by Cupid 2:18—Dione 2:07¼ by Eros (Walker)	ds		

Time—:35¼, 1:11¾, 1:48 , 2:21
:36¼, 1:13½, 1:50 , 2:23½
:33¾, 1:08¼, 2:43½, 2:16¾

Distribution of purse—Bon Cres $875, Baron Todd $625, Robert Bingen $150, Association $350.

William Higginbottom of this city has made application for the starting job throughout the northwest, and the secretaries of the various meetings will have to send a long way to find a man better qualified to render satisfaction to all parties concerned.

◈ ◈ ◈

C. A. Harrison has resigned from the management of the New Richmond Hotel in Seattle, which he made pay dividends, and is now associated with the Sullivan & Considine interests, making his headquarters at their Seattle office.

◈ ◈ ◈

Mr. Richard Morrison, well known as Bonesetter Dick, died at his home in London, Ont., May 27, He had been identified with runners and trotters for over forty years. He had a large circle of friends and was liked by everybody who knew him.

◈ ◈ ◈

Philip Kell, who for so many years conducted the Spirit of the West, is now an "experimental Californian," as distinguished from professional Californians and native sons, and has been a constant attendant at the races, where he is renewing many old and forming many new acquaintances.

◈ ◈ ◈

Doubtless Agnes Patch's victory Thursday stimulated your interest in that family a bit, and if you would like a fine picture of the "old hoss," who has yet to be dethroned as the pacing king, the same will be forthcoming if you will only make your wants known to the Savage headquarters in Minneapolis.

◈ ◈ ◈

M. L. Woy of Fresno, who has been one of the regulars at the present meeting, has had the misfortune to lose by death a three-month-old filly foal by Stanford McKinney out of Loma B., the dam of Albaloma 2:08¼, etc. It was, of course, heavily staked and the loss is a jolt to Mr. Woy's plans for the future.

◈ ◈ ◈

Ed Lavin of Stockton has been taking in the trots this week, keeping a weather eye out for the two-year-olds in particular. The kids of that age in evidence Tuesday were good ones, but Ed feels that "he should worry—not" with Lilly of the West in his stable, as the lass has trotted the Stockton track for Farmer Bunch in 2:22, with quarters in :32½.

◈ ◈ ◈

There are now two McGuires in evidence at the exposition track, Joe of Denver and Jim of Riverside, the latter having recently arrived with the Geo. W. McKinney pacer San Jacinto 2:05½, who will be a starter in the big stake today. Jim has wintered the fellow well and he has a lot of lick, enough to make him dangerous if he gets away in any sort of shape in the first heat.

◈ ◈ ◈

Mr. John Sheppard of Boston, dean of the old school of horsemen and one of the most skillful of amateur drivers, is present daily at the trots, occupying a seat in a box after lunch and a position either among the railbirds or up behind some trotter prior to that hour. He is well past the four score mark, but has had rides that give him personal knowledge as to the fastness of that final quarter.

◈ ◈ ◈

Sometime ago we heralded the bay mare Nellie Mac, in the stable of Charley Clark at Fresno, as a coming 2:10 trotter for Expressive Mac 2:25½, and Harry Nelson advises us that on Saturday, June 5th, she worked an evenly rated mile in 2:09¾. This is the first mile trotted below 2:10 by a member of that particular branch of the family of Expressive (3) 2:12½, and is also the fastest mile done this year on the Fresno track.

◈ ◈ ◈

Messrs. Magnus Flaws of Chicago and O. P. Updegraff of Topeka, Kansas, hit town "at once and simultaneously" the latter part of last week and are quartered at the Washington. The pedigree shark is living up to specifications as a presiding judge and the Colonel has had the very best kind of success getting his fields away in good shape, having the crowd with him right along so far. Even the amateurs Thursday got away well, with a few notorious bad actors present.

Frank Malcolm is allowing "the boys" to look after Calwa operations at Fresno while he attends the trots and works out various members of the DeRyder stable.

* * *

When the last delegation left Pleasanton, Will Duncan loaded out with them and came to the exposition with his Clarence Wilkes pacer William G., entered in one of the late closers that failed to fill. The big fellow has come like a real horse recently, working the Pleasanton track in 2:09, with the last half in 1:02½ and the final quarter in :30½. Early this week he worked the local course in 2:15 with a half in 1:04, and before leaving Duncan probably will let him step along a little.

◈ ◈ ◈

L. C. Kinney, proprietor of the Onward Standard Stock Farm at Bushnell, Nebraska, is among the late arrivals at the fair, bringing out the one time three-year-old champion Impetuous Palmer (3) 2:05¼, the fastest of the many good ones bred by Mr. Kinney. His prep has been a bit short, but he has a turn of speed of the genuine championship kind and Mr. Kinney feels he has a chance for a piece of money at that, and will have him ready for the race of his life in the fall.

◈ ◈ ◈

Owing to the fact that many of our old patrons did not receive a copy of the Stake Book of the North Pacific Fair Circuit until too late to make their entries, the Vancouver Exhibition Association has decided to extend the time of the early closing events until August 1, the date of the late closing events, to enable those who were unable to make their entries through not receiving the Stake Book to do so. These events, the 2:15 Pace and 2:25 Trot, will be "three in five" instead of "every heat a race" as previously announced.

◈ ◈ ◈

Joe Ryan of Sonoma who came down for the fun out at the beach track "struck a snag" Thursday when a protest was lodged against his trotting mare Kate Dillon on the grounds that an unreported race at her home town last season gave her a bar of 2:14. The judges on Joe's own evidence sustained the protest, though Joe was not aware of the rule that gave his mare a bar and made his entry in good faith. Katie is an uncertain behaver but a fast mare when on her feet and would no doubt have been a good contender in the 2:20 trot.

◈ ◈ ◈

Entries to the program for the Pleasanton Butchers' Day Celebration on July 5 do not close until Tuesday, July 15, with Chairman O. G. Newhall, 2863 Broadway, Oakland, or Secretary-Treasurer C. A. Bright, 603 Castro street, Oakland, records made since June first not operating as a bar to eligibility to the open classes which are for 2:20 pacers, $500, 2:20 trotters, $500, and 2:12 trot, $650. The program is well worth the support of local horsemen and we recommend it to your consideration, a full announcement appearing on a business page.

◈ ◈ ◈

Tom Pollock of Flagstaff, Arizona, capitalist, cattle king, horseman and one of the mainstays of the Arizona State Fair, is in town to remain until the races are all over. Ted Bunch has been educating a number of prospects for him during the winter but leaves soon to campaign Waynetta 2:06¾ for J. A. Burnett of Denver, who, by the way, is officiating as an associate judge at the present race meeting here. Waynetta was a show winner between seasons and is in excellent shape for another trip down the line in the central west.

◈ ◈ ◈

One of the most remarkable instances of sureness in a sire is that of Nutwood Wilkes 2:16½, as of the twenty mares bred to him in 1914, every one got in foal. This grand sire is now in excellent form at Spruce Lawn Farm, Springfield, Ohio, as are all the rest of the farm horses at Mr. Wilson's farm. This stallion possesses about as many "onlys" as any progenitor ever before the public. He is the only stallion, living or dead, to sire a 2:05 pacer and a 2:05 trotter; only stallion living to sire three 2:05 performers and have both sons and daughters to produce 2:05 performers; only stallion living whose daughters have produced nine or more 2:10 performers. Besides this he is the sire of the fastest record trotter and the fastest record pacer ever sired by an Ohio stallion. He is now as sound and vigorous as ever and ready to complete a good season.—Western Horseman.

◈ ◈ ◈

Mr. M. E. Pye, presiding judge of the West Australian Trotting Association, Perth, West Australia, arrived in the city Tuesday evening and has been one of the most observing of the daily visitors at the exposition races, deriving much interest from mental comparisons of the system of racing harness horses as they exist here and in his section of the world. He has been in America since early in April, when he paid a visit to Pleasanton and had the pleasure of seeing a horse cover a mile in 2:10 for the first time. Wednesday's pace, with its three heats from 2:06¼ to 2:07½, gave him another new sensation, and before the meeting closes he will be enabled to see that mark eclipsed by pacers, and very probably closely approached by trotters. During his stay, Mr. Pye has visited the principal cities of the east and central west and returns home with a most excellent idea of the United States, gained from personal contact.

SPLIT HEATS RULE AT SUNDAY'S MATINEE.

Owing to the fact that many of the horses owned by members of the San Francisco-California Driving Club have engagements in various events on the program of the regular exposition meeting throughout the week, a number of the old favorites failed to be in evidence at Sunday's matinee, but split heats and closely contested finishes were the order of the day and the crowd was kept well entertained.

Hugh Boyle put one over in the first event with Edith Light, winning all the way in the second and third heat after having "rested up" in the first one. Edith is a pretty little thing and her win suited the crowd. Frank Goularte and Aerolite were moved up to the 2:18 class pace following their performance last Sunday but made it two straight heats over a field of seven, Marie Fitzsimmons and King Pointer furnishing the major portion of the competition in the stretch.

Tim Sexton piloted Bradmont to another victory in the 2:12 pace after a hot battle with Adolph Ottinger and Dick W., the latter pair winning the first heat decisively and being beaten in the subsequent rounds by inches only. "Ot" evidently had on his "eyelash finish" driving suit, as two of Dick W.'s heats and the first of Copper the Ore's were "as close as close." Muggins made a great finish in the first heat of the free-for-all trot, the stand popularly crediting him with a win until the judge's announcement set them right. Muggins evidently used up all his good behavior tickets in the first heat, as he refused to trot the next time out and the heat went to I. J. Cornett and Salinas Star, with Ottinger and the black mare second. St. Patrick declared himself in by annexing the third heat, but Copper the Ore headed the summary.

Martin Ford and Minnequa formed a new combination, for this season, at least, in the slow trot, and had no real difficulties in winning, after dropping the first heat to Valeen M., who trotted a nice race throughout. Ella Wilkes "threatened" in the last heat, but spoiled her chance by a break in the fifth eighth. Vera Hal, having no class open for her, was given her customary weekly workout, topping the same with a mile in 2:07 that pleased her many admirers in the stand. The summary:

First Race—2:25 pace:

Edith Light ..... (H. A. Boyle)	4	1	1
Marin ..... (P. F. Kane)	1	2	2
Golden Buck ..... (W. G. Walkup)	2	3	3
J. V. ..... (Joe Vermet)	3	4	4

Time—2:20¾, 2:17½, 2:18.

Second Race—2:18 pace:

Aerolite Jr. ..... (F. Goularte)	1	1	
King Pointer ..... (H. Campodonico)	5	2	
Marie Fitzsimmons ..... (J. W. Swank)	2	6	
Emma M. ..... (Wm. Malough)	3	4	
Little Dick ..... (Gus Erebout)	4	3	
William Tell ..... (R. Roberts)	6	5	
Jerry D. ..... (L. A. Bangs)	ds		

Time—2:16, 2:20.

Third Race—2:12 pace:

Bradmont ..... (G. J. Giannini)	2	1	1
Dick W. ..... (A. Ottinger)	1	2	2
Zorankin ..... (H. Boyle)	3	3	5
Delilah ..... (J. C. Welsh)	4	5	3
Hamburg Belle ..... (A. Ginocchio)	5	4	4

Time—2:12, 2:13, 2:13½.

Fourth Race—Free-for-all trot:

Copper The Ore ..... (A. Ottinger)	1	2	3
Salinas Star ..... (I. J. Cornett)	4	1	2
Ateka ..... (H. A. Boyle)	5	4	4
Eloise Dell ..... (C. F. Silva)	3	5	dr
Muggins ..... (H. Cohen)	2	ds	

Time—2:15¾, 2:17¼, 2:19½.

Fifth Race—2:30 trot:

Minnequa ..... (M. Ford)	2	1	1
Valeen M. ..... (Ernest M. Doyle)	1	2	2
St. Thomas ..... (R. Roberts)	3	3	3
Ella Wilkes ..... (C. Borromeo)	5	4	4
Darby Mac ..... (J. McTigue)	4	5	dr

DEATH OF S. H. KNOX.

As owner of the Ideal Stock Farm at East Aurora, N. Y., S. H. Knox, whose death occurred May 16, was closely attached to the trotting industry. His connection with the trotters dates from the dispersal of the famous Village Farm of C. J. Hamlin & Son, in 1905, as a number of the animals sent to the New York sale from the formerly well known East Aurora institution were brought back to form the new one of Mr. Knox. Products of the Village Farm developed while owned by Mr. Knox were the chief claimants to the fame that came to Ideal Farm colors, Ess H. Kay p. 2:00¾ and The Abbe p. 2:04, which prior to his conversion to the pace had taken a trotting record of 2:10½ at the trot, being the stars of the first flight which were owned by him. The stable which the farm had out last year was successful, under the skillful handling of Ben White, who has been in charge of training operations there for years. Of these the pacing mare, Queen Abbess 2:10¼, was the fastest record performer, while Prince Ingomar 2:12¼, and Lettie Lee 2:13¼, both trotters, were good winners through the Central states, where their campaign was set.

The business interests which Mr. Knox engaged in were perhaps as familiar to the common people of the entire country as any enterprise of the day. The corporation of the F. W. Woolworth Company, of which he was vice-president, controlled an extensive chain of stores that catered to buyers of the innumerable low priced articles which were carried in stock. His estate is estimated at $30,000,000.

It is important enough to be mentioned as a coincidence that the death of Mr. Knox followed so closely the tragic end of his friend and neighbor at East Aurora, Elbert Hubbard, the famous writer, philosopher and lecturer of Roycroft fame, who went down to a watery grave when the Lusitania met her doom.—Western Horseman.

ZULU BELLE 2:06¼ GOES EAST.

Late last week was consummated the purchase of Zulu Belle from Adolph Ottinger of this city by Andrew Albright, Jr., of Newark, N. J., Mr. Albright being at present engaged in the assembling of a small band of fast record mares to mate with young stallions of royal breeding now owned by him.

The attention of Mr. Albright, who spends some time each year in California, was first drawn to Zulu Belle through the showing made as a producer of speed by her full sister, My Irene S. (2) 2:28¾, who at eleven years of age is the dam of Zorene 2:10¼, Carlos (2) 2:29¼, Esperanza (3) 2:09 and Carl (2) 2:19¾, most of these figures being due for reduction this season, as with one exception the four performers mentioned have all worked faster than their records and are at present in active training.

Zulu Belle is now in her ninth year, and since 1912 has been among the best known of coast campaigners, racing both at the trot and at the pace, setting a rather remarkable record in this respect. It is not unusual for trotters to be put to pacing, but for a pacer to be raced as a trotter, especially in the same season, is less common. On November 3, 1913, she won two heats at Phoenix in 2:06¼, and ten days later at Los Angeles won a straight heat race, trotting, in 2:12½, 2:13½ and 2:13½; on November 15, over the same track, she made Maymack and Albaloma trot three heats better than 2:10 to beat her, which stamped her as belonging to a class of her own as a double gaited mare.

Zulu Belle was bred at Nestor, Cal., by F. W. Wadham, and is a daughter of Petigru 2:10½ and Johanna Treat 2:24¾ (dam also of Del Coronado 2:09½, etc.) by Thomas Rysdyk, grandam Kate Treat by Venture 320, sire of the dam of Directum 2:05¼. After her purchase she was shipped to Los Angeles to be bred to Carlokin 2:07½, Wm. G. Durfee's good son of McKinney to whose cover My Irene S. has produced so successfully, and will be returned to this city in time to go east with the Grand Circuit stables at the close of the present race meeting. The 2:07 pace last Saturday was in all probability her last appearance in racing company, as Mr. Albright purchased her for breeding purposes only.

PHOENIX TO FOLLOW SAN FRANCISCO.

It is with a great deal of pleasure that we are able to announce that by a recent action of the Arizona State Fair Commission, Phoenix will not only make a bid for the best horses of the year by putting on a complete program of generous size purses for both trotters and pacers, but the dates for the big show have been changed to November 15 to 20 inclusive, in order to avoid conflict with the fall meeting at the P.-P. I. E., thus affording horsemen further earning facilities for their campaigners and giving Arizona folks opportunity to witness what should prove to be the greatest racing ever held in their metropolis, where great horses are the order of the day throughout their annual celebration.

Knowing the "Phoenix Pholks" as we do, we have had a feeling in our bones all along that matters would be rearranged so that they would take advantage of the opportunity to put on a big meeting, and are not surprised by the course decided upon. Not content with doing things halfway, Secretary Shaughnessy makes further announcement that the commission's present plan is to run a special train for the exposition horsemen who wish to race at Phoenix, picking up all horses entered from this point immediately after the close of the races here and landing them in Phoenix gratis. This will be a generous lift for easterners homeward bound, and will allow local horsemen to participate in the festivities at Phoenix at the expense of a one way ship.

Attendants at the present exposition meeting with whom the plan has been talked over during the week are warm in praising it and promise to give Secretary Shaughnessy and his associates their heartiest support, so that it is a safe prophecy that the Arizona State Fair of 1915 will set a new mark in every way, and in the horse racing in particular. No man has ever raced at Phoenix who did not become a booster for the people there, and the course taken will meet with the warmest approval from all quarters. The program is in course of preparation and will be announced in these columns at no far distant date.

CANADIAN CIRCUIT OPENS AT EDMONTON.

The racing season of 1915 of the Western Canada Fair and Racing Circuit opened auspiciously on May 22 at Edmonton, the second day drawing one of the greatest crowds that ever turned out at that point, though rain caused the program for the third day to be declared off.

Molly, the Hanford mare that showed nicely last fall at the King's County Fair, made a nice start for the season by winning her first race on opening day, getting a record of 2:19¼, and was evidently "in good" in her next start until misfortune overtook her and her trainer, Moody Leggett of Hanford. Passing the grandstand and squaring away for the second half of the second heat of the 2:25 pace or 2:20 trot, the lass was leading handily, with Lady Halford and Grey Ghost close up. In an effort to pass her, Vance took out with Lady Halford, but failed to judge his attempt properly and crashed into Leggett's sulky, stripping off one wheel and throwing Lady Halford in a heap, Grey Ghost driving headlong into the wreckage. In an effort to throw himself in the clear, Leggett fell heavily and suffered a broken leg, though Molly went on with the dragging sulky, kept her feet and gave a good battle to Lon McDonald. Molly acted throughout like a high class race mare, and Leggett's many friends will learn with regret of the accident that will keep him out of the sulky for some weeks.

Soumise, in Leggett's stable, was third in her event and second in its fastest heat, 2:14¼, while Dean Swift, sampaigned successfully last season by Loren Daniels, could do no better than rank second to Hal Chief for Owner Harvey Skaggs. The summary:

Edmonton, Alta.—Half-mile track, American rules, every-heat-a-race.

May 22 (track good).—2:18 pace, 2:13 trot, $250:

Hammamato, br h by Searchlight ..... (Hudson)	1	1	1
Sil Wilford, b h by Leland Onward ..... (McIntosh)	4	2	2
Prince Joe, b g by Matthew Hume ..... (Gormley)	2	4	1
The Monk, b g by Artist ..... (McIntosh)	3	3	2

Time—2:21¼, 2:19¼, 2:21½.

2:30 pace, 2:30 trot, $250:

Molly, b m by Knox ..... (Leggett)	1	1	3
Garabaldi, b h by Sliney Amett ..... (Cardiff)	2	2	1
Billy Sunday, b h by Hal B. ..... (Bowman)	3	5	2
Alta Mac, b m by Redlac ..... (Carter)	4	3	4

Time—2:19¼, 2:19½, 2:24½. Mildred Direct, 5-4-5.

May 24 (track good).—2:25 pace, 2:20 trot, $250:

Grey Ghost, g h by Hal B. ..... (Crang)	1	*	1

Molly, b m by Knox ..... (Leggett)	2	2	2

Time—2:19¼, 2:41½, 2:22¼.

*Wrecked by accident.

2:09 pace, 2:04 trot, $250:

Hal Chief, b h by Hal B. ..... (Coulombe)	1	1	1
Dean Swift, br g by Almaden D. ..... (Skagg)	4	2	2
Soumise, b m by Billy Dunlap ..... (Leggett)	2	3	4
Nelly G., blk m by Simored ..... (L. Coulombe)	3	4	3

Time—2:14¼, 2:14½, 2:15½.

May 25.—Rain, declared off.

CEDAR VALLEY CIRCUIT.

West Liberty, Iowa, June 1.—Racing on the old reliable Cedar Valley Circuit began here today, with good crowds in attendance, big fields of horses and well contested events, only one race going in straight heats. California horses were in evidence in two of the three affairs staged on opening day and figured well up in their fields, H. E. Armstrong taking third money with The Empress in the 2:30 trot, and F. E. Ward with Great Northern having like rank in the 2:18 trot, the Wayland W. gelding being a consistent contender throughout the race. The results:

2:30 trot, purse $400:

Grand Chimes, b s by Kentucky Chimes (Edmon)	1	1	1
Delte, bl m by Director General ..... (Milliman)	3	2	2
The Empress, b m by Stillwell ..... (Armstrong)	2	4	5
Byron W., b s by Royal Reaper ..... (Conners)	4	3	3
Ben Nutwood, s s by Dick Nutwood ..... (Gowell)	6	5	4
Grey Rex, g g by Galileo Rex ..... (Thompson)	5	6	6
Major Direct, s s by Duke Direct ..... (Moores)	7	8	7
Fred Rhodes, b g by Cecil Rhodes ..... (Kelly)	9	7	dr
Sylvia Maurine, bl m by Egotist ..... (Russell)	8	9	dr

Time—2:21¾, 2:19¾, 2:21½.

2:18 trot, purse $400:

Jim O'Shea, bl g by June McKeever ..... (Garen)	1	1	4
Sure Mike, b s by Peter W. ..... (Kelly)	5	3	1
Great Northern, br g by Wayland ..... (Ward)	2	2	3

Menneguah Princess, bl m by Prince McKinney ..... (Thomas)	4	13	12
Billie the Kid, b g by Bermuda Boy ..... (Conners)	5	8	dr

Time—2:17¼, 2:18½, 2:19¾.

In the columns of the Buffalo daily papers a few days ago was noted the sale of Kenilworth track, where, until the passage of the Hughes anti-racing legislation, the local Grand Circuit meetings were hold. The model racing plant was purchased by a local real estate operator, who will cut it up into building lots. With this disposition of Kenilworth goes the only opportunity Buffalo will ever have to see a big fair combined with Grand Circuit races established in such close proximity to the business center of the city as was that track. The business men of Buffalo could well have afforded to purchase Kenilworth as an investment, and it could have been made to pay all carrying charges by using it for fair purposes until such time as its increased valuation would have made it seem wise to sell it. Not only this, but such a fair as the one held at Cleveland's suburban racing plant at North Randall would have repaid the investment required from the business interests handsomely, indirectly. A fair conducted on big lines at Kenilworth with the attendant racing features would have drawn, in the course of a week, one hundred thousand or more outsiders to this city. What such a crowd of visitors means to a city is best known by the business men of cities where a big fair is an annual feature. How fierce a fight the business men of Syracuse would put up if a proposal should come up to take the State fair away from that city and locate it at some other point in the state, for they know the great extent to which they profit from the immense crowds which come there during fair week each year. Similar benefits would accrue to the business interests of Buffalo if a big fair and race meeting was an annual event here. Kenilworth is gone however, so far as that is concerned, and an opportunity that should have been taken advantage of is no more.—Horse World.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

WHY DUCKS ARE DECREASING.

A comparison as to the number of different species of ducks this year and last would be of no value, unless the conditions which may have caused either the increase or decrease were given consideration.

"Should I report," states Deputy Fish and Game Commissioner George Neale, "that ducks were scarce this season without telling you of these conditions it would not establish the fact that ducks were becoming exterminated. A variety of conditions make for many changes in habits of waterfowl, especially migratory ducks and geese. I mean to say, climatic, feed, an abundance of water, early or late rainfalls or storms.

"To illustrate my meaning: Should there be no early rainfall in California, and an early cold snap with freezing in the north in October, November, or December, ducks would pass by California and we would see but few of them, but, should the season be open in the north and with early rains here which would make feed plentiful, these ducks would appear more numerous than ever. Again, should there be a heavy rainfall, as in the case of the present season, enough to insure the growth of the duck feed for next season, then it would insure a large crop of California hatched ducks and an increased number of migratory ducks when the freeze closes the extreme northern feeding grounds.

We must be guided in estimating the number of ducks seen by the conditions existing. If I can know the weather conditions in Oregon, Washington, and British Columbia, knowing the existing conditions here in California, I can surely predict to a certainty the extend of the next crop of ducks, when they will arrive, and the particular species that will take advantage of those conditions.

Another instance: There were 20,000 acres of rice in the Butte creek country this year and scarcely any water anywhere except that used to irrigate the rice and the waste water running off. Now, the scarcity of water in that portion of the valley forced all the early local ducks into that body of water and they were, apparently, more plentiful in that particular locality than in many years. But had there been early heavy rains these ducks would have scattered over a larger scope of country and then some persons would have said that ducks were becoming scarce.

The choice varieties—mallard, sprig, canvasback—from the Sacramento Valley are nearly all shipped to San Francisco, where there is a good demand and they bring the highest prices; consequently we have most of the common varieties here on sale—widgeon, spoonbill, etc. Occasionally a few other varieties are sold by what we call "pot hunters" who carry their game to town and peddle it. The proportion of home ducks the past season (1914-15) were apparently more plentiful than the migratory ones, for the reason that the migratory ducks, canvasbock, bluebill, redhead, etc., require more or deeper water than we have, for our duck grounds are not permanent lakes but mostly shallow overflowed grounds. If we had had an early rainfall in California, canvasback, redhead, blackjack, and bluebill would have been much more in evidence. However, we did not get the rain until too late. Consequently the big flight went south down the coast and we did not see them.

As to what species have decreased in the last ten years, and what are the causes, can be answered only after analyzing all the conditions mentioned. Should the island districts in the Sacramento-San Joaquin delta, comprising all the overflowed and unreclaimed lands from Colusa to the mouth of the Sacramento river, return to the conditions existing before reclamation and remain so for a few years, it would change the whole aspect of duck conditions in California, as it did during the floods of March, 1907, when all the islands in this district were flooded and apparently all the ducks in the world were in this area. In other words, it appears that ducks have decreased for the reason stated—lack of good feeding grounds."

WHY PROTECT THE SEA GULL?

Fishermen continually censure the sea gull for destroying many fish and food which would otherwise be eaten by fish. The commuter, also, as he watches the never ceasing line of gulls follow the ferries back and forth, wonders of what use these soaring birds can be. Their value as scavengers is certainly evident to everyone, but these birds of the sea have also a value to the agriculturist. We recently received a report from a well known ornithologist, to the effect that near Elmhurst, Alameda county, hundreds of gulls were feeding in a recently ploughed field and following the farmer as he ploughed. The particular species so benefiting the agriculturist is usually either the California gull or the ring-billed gull. The former was noticeably abundant on San Francisco bay during the month of January, 1915, when the above observation was made.

BREEDING DEER FOR THEIR HORNS.

The following extract from a letter by Frank N. Meyer, Agricultural Explorer, Office of Foreign Seed and Plant Introduction, U. S. Department of Agriculture, to his chief, dated Omsk, Siberia, July 17, 1911, which appeared in the Journal of Heredity for February, 1915, describes a remarkable industry now thriving in Siberia:

"In Birel we stopped with a farmer who had become a wealthy man through the sale of stag antlers, and saw how the women folks were boiling several magnificent pairs. They were all coated yet with the down, which is an absolute necessity to sell them, as the Chinese take only those which are young. This stag-keeping business has its headquarters in and around Birel, and by pure accident we had stumbled upon one of the most interesting industries in this world.

It seems that about forty years ago somebody in Birel made an experiment of keeping some stags in captivity and by sawing the antlers off and bandaging the wounds, showed that a stag can be deantlered and survive the process and be operated upon every year. Up to that time the animals had been hunted until they were well night extinct, and the collecting of antlers was a very unsteady sort of business—one never knew whether one would get much or not. Well, the animals multiplied and high-fenced enclosures were established all over the mountains, for these stags need much ground to pasture upon, otherwise they don't remain healthy. And today there are several thousand stags in and around Birel, and the income derived from the sale of antlers has made some people very wealthy, for every male animal produces about 70 roubles (a rouble is worth about 51 cents U. S. currency) worth of antlers every year, and some men have as many as many as 400 males. The average price paid for the antlers is between eight and twelve roubles per pound, according to the market.

The antlers are sawed off with a fine saw and weigh, fresh, twice as much as later on. They have to be boiled in salted water and very great care has to be taken that the felt-like covering doesn't come off; therefore, they are boiled several times, and each time allowed to dry out again. When sufficiently cooked, they are hung in the wind and allowed to dry thoroughly, and in that state they are bought up by dealers and said to be exported to China via Mongolia. The Chinese, as you may know, believe thoroughly in the rejuvenating and stimulating power of young deer horns, and the stuff, scraped and powdered, forms a valuable ingredient in certain of their medicines. I was also told that a firm in St. Petersburg has taken up this matter and is manufacturing a special medicine from them, under the name of 'Spermine.'"

STRIPED BASS LAW CHANGES.

Certain changes in the striped bass law that affect rod and line fishermen will be accepted with satisfaction by the salt water fishermen. The bill provides that hook and line fishermen may retain a limit of five undersized bass caught in one day. There is no limit on fish over three pounds—as many as can be landed. There will be a closed season for the net men, from September 25 to November 14. The daily limit catch for the rodster during that period will be five bass only, irrespective of size. Bass under three pounds in weight can not be bought or sold—as the law now stands. The shipment of striped bass out of the State provision has not been changed.

DUCKS EAT OYSTERS IN WASHINGTON.

The United States Biological Survey has just completed an investigation into the depredations of ducks in the oyster beds of Washington and Oregon. Mr. W. L. McAtee, of the economic division of the survey, was in charge of this work. He reports that greater scaup ducks (bluebills) and white-winged scoters were actually causing damage by eating oysters on Oyster bay, Washington. In other places damage was reported as negligible. The amount of damage, however, so the investigation showed, is to be reckoned as a few thousand dollars annually, rather than hundreds of thousands of dollars as reported by the oyster men.

Stomach examination showed that scaups took oysters an inch and a quarter in diameter and scoters some slightly over two inches. The only immediate remedy being used is to hire a man to shoot the ducks and frighten them away from the oyster beds.

This investigation, like many another one, has shown that the men concerned always exaggerate depredations by birds. Depredations such as these are more likely to decrease rather than increase. Geese have now become so scarce in the Sacramento and San Joaquin valleys that practically no complaint is heard from their depredations in grain fields.

SEA OTTERS NEAR POINT SUR.

A letter from John W. Astrom, keeper of the Point Sur Light Station, dated February 2, 1915, gives the following information regarding the number of southern sea otters (Latux lutris nercis) found in that locality: "During my service at this station for the past six years I have seen a good many sea otters. Especially during February and March of each year there seems to be more than at any other time of the year. At the present time, if walking on the beach between Light Station and Bug Sur river one can nearly always see two or three sea otters playing on the kelp some distance off shore. A year ago in February, after a heavy blow, I counted fourteen sea otters on one patch of kelp. It appears to me that sea otters are increasing at least around Point Sur the last two years."

Mr. A. Novella of New Monterey writes as follows: "While on a trip down the coast about three months ago, I saw thirty-two sea otters on the way down and twenty-six on the way back. I think there are more sea otters on this coast now than for a number of years."

Here we have more evidence as to the value of total protection as a means of bringing back a species which has been greatly reduced in numbers. Reduced nearly to extermination about three years ago, the sea otter is now beginning to show a slight increase. The conservation of no other animal in the State could bring so large an increased income to our treasury, for the sea otter is the most valuable fur-bearing mammal in the world. Prime skins sold two years ago for over fifteen hundred dollars apiece. Since 1913 the killing of sea otter has been a high misdemeanor, punishable by a fine not exceeding $1000. The enforcement of this law appears to be greatly benefiting the species.

PACIFIC COAST GUIDE BOOK.

The Pacific Coast Committee of the American Association for the Advancement of Science is preparing a guide book for the use of visiting members to the San Francisco meeting, August 2 to 7, 1915. The book will be about the size of a Baedecker and will be published by Paul Elder & Company. The exact title will be "A Scientific Traveler's Guide Book to the Pacific Coast," and it will bear the sub-title "Nature and Science on the Pacific Coast." This book will contain chapters upon the distinctive features of the region, including geology, palæontology, geography, distribution of land animals, fisheries, marine biology, flora and forests, marine botany, ethnology and archæology, agriculture, influence of early Spanish settlers, landmarks of history and literature, and the evident effects of an out-of-door life upon the development of the fine arts. These chapters will be critical descriptions written by men who are authorities in the several fields. General maps of the region and maps of the vicinities of the larger cities, directions for reaching the principal points of scenic and scientific interest on the Pacific Coast, and directories of educational and research institutions will also be included. This book can be procured from the general office of the American Association or from leading book stores on the Pacific Coast. The price will be $1.50.

PHEASANT FARMING.

There has recently been published under the direction of Wm. L. Finley, Oregon Fish and Game Commission, a beautifully illustrated bulletin on "Pheasant Farming," written by 'Gene M. Simpson, Superintendent of the State Game Farm at Corvallis, Oregon. In the introduction Mr. Finley states that the bulletin, which is a revision of a former one, is designed to furnish reliable information as to how pheasants may be successfully propagated. He also pays a tribute to Mr. Simpson, who has been particularly successful in rearing pheasants on the State game farm.

The first chapter discusses the propagation of game birds and defends the rearing and sale of such birds. Chapter 2 describes the different varieties of pheasants. The chapter devoted to "The Chinese Pheasant in Oregon" furnishes information as to the history of the introduction of this bird into Oregon and the success which has been obtained in establishing it. The succeeding chapters discuss the equipment for a pheasant farm, the ideal mother for pheasants, the food of young pheasants, enemies of the game breeder, and advice to the beginner.

This bulletin sums up the very information which the man who is starting a pheasantry desires. As it is the result of long experience, it can be successfully used as a handbook by the pheasant breeder. It is to be hoped that there will soon be enough demand in California for such a publication. As yet the breeding of pheasants in captivity in this State is in its infancy.

MARIN DEER SEASON.

The open season for deer in Marin county this year will be from Auguust 1 to September 15. An ordinance limiting the season to six weeks was passed by the Supervisors this week at the request of the Marin Game Protective Association. Deer are reported rather scarce this season, due to the late storms, which are said to have killed many fawns.

Drink Jackson's Napa Soda.

TENTH PACIFIC COAST HANDICAP.

Programs for the Interstate Association's tenth Pacific Coast Handicap are out and can be secured by mailing request to Manager Elmer E. Shaner, 219 Coltart Avenue, Pittsburg, Pa.; A. J. Mallison, secretary Pastime Gun Club, 730 E street, San Diego, or to the Field Editor, Breeder and Sportsman.

The big Coast shoot will come off under the auspices of the Pastime Gun Club, and that means something strong as an indication of a successful tourney, at San Diego, July 8, 9, and 10.

The first day's program for Thursday, July 8, calls for ten 15 bird events and a special race at doubles, 25 pairs. Five 20 bird events precede the Preliminary Handicap on the second day. The handicap calls for 100 singles, unknown angles, 16 to 23 yards, high guns, $100 added, three Interstate Association trophies. Number of moneys determined by total of entries. Five 20 target races precede the feature event, the Pacific Coast Handicap, the closing day. Two hundred dollars will be added to the purse—winner of first money guaranteed $100 or more, second $75 or more, third $50 or more, besides three handsome trophies presented by the Interstate Association; handicaps 16 to 23 yards, 100 singles, unknown angles, high guns.

Practice day, Wednesday, July 7, offers a card of five 20 bird events, entrance $2.00, Rose system 5-4-3-2, sweepstakes optional.

The Squier money back system will apply to all of the regular events—350 targets.

Amateurs may shoot for birds only and be eligible for any of the Association trophies. Trade representatives, "targets only."

Daily Entrance Fees—First day: Entrance in regular events, $16.00; special event at double targets, $4.00; optional sweeps on regular events, ,$10.00; optional sweep on the 150 targets, $5.00; optional sweep on the three days' regular program (350 targets), $5.00; total, $40.00.

Second day: Entrance in regular events, $11.00; Preliminary Handicap, $8.00; optional sweeps on regular events, $500; optional sweep on the 100 targets, $5.00; total, $29.00.

Third day: Entrance in regular events, $11.00; Pacific Coast Handicap, $1.00; optional sweeps on regular events, $5.00; optional sweep on the 100 targets, $5.00; total, $32.00.

The "Little Joker" will be doing business between times, but so arranged that there will be no interference with a shooter's turn at the regular traps.

The Los Angeles Gun Club three-day shoot beginning July 12 will follow the San Diego smokeless powder fest.

A LEVELER OF SINFUL PRIDE.

[By F. W. Wilson.]

There is a cantankerous contrivance being sold by hardware and sporting goods dealers nowadays called a handtrap.

It has a handle similar to a revolver handle, a wire trigger, a coil spring that looks like the one on Ma's kitchen screen door, a long swinging arm which is attached to a trigger trip and which is released by pulling the trigger, causing the "blue rock" or "white flyer" to project herself into the atmosphere.

I don't know why they call the thing a trap. It doesn't catch anything, but it is some pitcher.

Those who have tried it say a trapshooter doesn't know what hard shooting is until he has gone up against some handtrap chucks, operated by a chap that knows how to make it perform at its best—or worst, to be more exact.

One prominent devotee of trapshooting says the handtrap is a leveler of sinful pride. That's another way of saying that a shooter who can average ninety and upwards over a stationary automatic trap can wear a smaller hat after an argument with a handtrap.

Of course, a handtrap will feed you nice, easy ones if you want that kind. In fact, you can make it be even more polite and gentlemanly than an automatic, but if you want something to really test your skill and enable you to show your friends and your best girl what a really great shooter you are, just have a chap with a mean disposition operate the trap for you. He will have to practice with it a while to get the hang of the body and arm swing to make it do its worst, but pretty soon he'll learn how to stand you on your head.

First, he will hand you one straight up. If you miss it, duck, because it may hit you even if you are considerate of its feelings. Then he'll chuck you a ground hugger—one that will not rise over three feet and will strike terra firma about twenty-five feet out. That one will take quick sighting and shooting. Maybe you'll get it; more likely you won't. Next will come a curver that would make "Matty" or Walter Johnson envious. You can stick out your chest if you land this sample. Extreme rights, extreme lefts and maybe some nice straight-a-ways, will follow. You are just as likely to miss the straight one right down the center of the groove as any of the others, because you won't be expecting any pie—not if the server ruffles up your nerves with a few of the nasty ones first.

Still you don't really know what trapshooting life is until you have sampled a handtrap's best.

It will not only test your skill, but it will vastly improve your shooting. It will make you quicker, more alert; yes, even more steady.

Another thing, it will enable you to shoot when there is no stationary shooting equipment available. In the woods, in camp, on the lake or river, even out on the ocean blue. If you have a gun, some shells and the little handtrap with you, you can shoot anywhere, anytime.

Tell your troubles to the hardware man and let him order you one, just to prove you're a good sport.

A FORECAST IN RHYME.

[By Mrs. "Pop" Merrill.]

Bluest skies with silvery sheen,
Encircling hills of gold and green,
That's what you'll see, on June Thirteen,
Out to Moraga.

"Pop" Merrill's Shoot is on that day;
The grass is now sweet scented hay;
"The background's perfect," so they say—
Out to Moraga.

Otto Feudner will be there—
Without a worry or a care;
At smashing bluerocks, he's a bear—
He'll be at Moraga.

Dick Reed will smile to see 'em break,
And Knight will many honors take,
And Burnham will a record make,
Out to Moraga.

Clarence Haight won't lag behind—
His gun will oft the targets find,
And Barney Worthen won't be blind,
Out to Moraga.

Mrs. Schilling, she is small,
But she can make the blue rocks fall,
She'll be our Mascot Baby Doll,
Out to Moraga.

They'll all be there, with guns and shells.
All good men will be there with bells—
Come out and see, all for yoursel's—
Come to Moraga.

At the Traps

Northwestern Sportsmen's Association Shoot.—The thirty-first annual Northwest shoot, under the auspices of the Portland Gun Club, started last Monday. A. C. Flickinger of Vallejo, Cal., registered the highest score of the opening day with 149 hits out of a possible 150. L. H. Reid of Seattle was the best among the "pros," having missed but three bluerocks out of 150.

In the match for the Du Pont Anaconda trophy, eighteen shooters, including four professionals, tied for first place; in the shoot-off Dr. E. R. Seeley of Medford, Ore., broke 20 straight, thereby winning the cup for the coming year. P. H. O'Brien, 20 yards, and E. H. Keller, 20 yards, both of Portland, tied for the Dayton meal, and when the extra twenty was called O'Brien broke 18, one more than Keller. F. M. Troeh of Vancouver, J. A. Dague of Tacoma and O. N. Ford of San Jose, Cal., shot off the tie in the Walla Walla Brownlee medal in the doubles. The Vancouver man made 16 and Dague but 14.

Comparatively good shooting continued the second day. Pete O'Brien and Frank M. Troeh tied for the highest honors among the amateurs with a mark of 148 out of a possible 150 in the regular events of the day. O'Brien completed his unfinished run of 113 made previously by scoring 13 more before missing. This 126 run was the longest of the meeting so far. Immediately after he missed the 127th bird he went out and ran 103 more.

J. F. Dodds of San Diego, Cal., won the Multnomah medal by winning a shoot-off with P. P. Nelson of Yacolt, Wash., in the 20 bird handicap, while in the Northwest individual championship Nelson won this honor for the second consecutive time. Eighteen tied for first place in this event, but the Yacolt man won out in the shoot-off. Dennis Holohan of Burley, Idaho, took away the Smalls cup without any extra opposition. He broke 25 straight. The thirty-second annual Northwest tournament for 1916 will be held at the Portland Gun Club grounds.

James W. Seavy of Portland, Ore., was elected president of the Sportsmen's Association of the Northwest at the annual meeting of the directors. Pete H. O'Brien was elected first vice-president; A. W. Strowger of Portland, second vice-president, ,and W. E. (Dick) Carlton, secretary. Directors chosen were: L. H. Reid of Seattle, O. N. Ford of San Jose, C. E. McKelvey of Seattle, I. M. Fisher of Seattle, Frank C. Riehl of Tacoma, Charles W. McKean of Portland, E. E. Morris of Portland, Fred A. Dryden of Spokane and P. J. Holohan of Portland.

By breaking 99 blue rocks out of a possible 100, W. J. Houser of Pomeroy, Wash., won the main event, known as "The Rose Festival." Second place among the amateurs was tied between O. N. Ford of San Jose, Cal., and A. G. Flickinger of Vallejo, Cal., shooting a 1912 model Winchester pump, each being but two points behind the winner.

Frank C. Riehl of Tacoma and H. E. Poston of San Francisco led the professionals, with the mark of one miss out of 100 shots. E. J. Chingren of Spokane won the Northwest handicap contest by breaking 48 out of 50 from the 20 yard line, and P. H. O'Brien was awarded the Becker trophy, formerly the Globe cup, made by smashing 27 singles and running twenty straight in the doubles for a total of 47. Despite a hard rainstorm, the shooters managed to turn in remarkable scores. Frank M. Troeh of Vancouver, Wash., was high amateur for the three-day tourney with 392 out of 400, and Pete H. O'Brien of Portland was second, just one point behind the Washingtonian.

* * *

Washington State Tournament.—Under the auspices of the Seattle Trap Shooters' Association, the most successful two-day State shoot yet held took place. E. J. Chingren won the State championship after shooting off a tie with Frank Troeh, of Vancouver, 99 out of 100. Chingren broke 40 straight, in two 20 bird frames; Troeh dropped one bird. Over 70 shooters were on the firing line. A summary of scores follows—150 birds each day, a total of 300:

F. Troeh	142	148	290
P. H. O'Brien	146	144	290
Lou Rayburn	146	142	288
F. Dryden	144	142	286

W. B. Knoble	75	90	E. E. Young	2	93
L. S. Mellinger	8	88			

Fish Lines

Black bass fishing is now open throughout this State, as it began with Tuesday, June 1. Since the season opened in other districts, May 1, good sport has been enjoyed catching these game fishes, but the fish could not be brought into district No. 2 by local fishermen, particunlarly the sportsmen who fished in Middle river, a branch of the San Joaquin, below Stockton. Bob Murdoch, L. Gotthelf, Ed L. Schultz and J. F. Bemis had lucky days at that resort Sunday and Saturday. Murdoch's four-pounder was the largest fish taken, and that with a red spinner fly. There were also a number of Stockton and other fishermen on the river Sunday. Black bass are rather notional it seems, for while some of the rodsters used flies successfully the bait fishermen were entirely ignored. Later on the fish paid no attention to flies, but went after minnow baited hooks.

* * *

Much to the intense satisfaction of the angling fraternity were the favorable tidings recently to the effect that trout fishing conditions are improving daily. A Monday report from Truckee stated that the river was low and clear, and that fishing was better than at any time last year. Later advices stated that the Truckee river had raised consider-

ably, but that the stream was clear. Possibly the higher level was caused by the gates at Lake Tahoe being opened. At all events, the news prompted a delegation of the San Francisco Fly-Casting Club—Frank J. Cooper, Charles H. Kewell, Carter T. Pomeroy, T. C. Kierulff, Horace Orrear, John F. Seibe, Walter D. Mansfield, Mr. and Mrs. I. Green, Frank Noyes and Mr. and Mrs. W. F. Bogart—to leave town Saturday bound for the club's lodge near Union Mills with the intention of enjoying fly-casting on the river.

From Boca the word was that the fishing is good, either with fly patterns or baited hooks. J. B. Coleman and other local rodsters were at that point at the time.

The river between Truckee and Lake Tahoe was extremely low two weeks ago, due to all the gates at its source at the lake being closed. The only water then running into the river came from Squaw creek and the many smaller streams carrying the melted snows from the upper regions. When the gates were suddenly closed those fishing the river witnessed the amusing sight of large rainbow, Loch Leven and Mackinaw trout hurrying to reach the deep holes, where they could be seen in great numbers waiting until the gates were again opened. The deep pool at the outlet of the lake seems to have been the popular refuge of the larger fish. The Eastern tourists at the resort have been enjoying the sport immensely. The more expert anglers prefer the smaller pools about a mile or two away from the dam and have had some excellent sport. Some good catches have been made between Squaw creek and the tavern, it being no uncommon thing to land a five-pounder. The Loch Leven species seem to be more plentiful this season than ever. C. O. Valentine of Los Angeles landed a six and a half pounder on a six-ounce rod about two miles down the river. The catch was on exhibition at the Ellery Arms Company.

Truckee river bait fishermen find salmon eggs, worms and white grubs efficient in catching the wily trout. For spoon fishing the hooks are baited with white wood grubs and the case worms found on rocks in the stream. Later on the spoon hooks can be baited with minnows for good results.

The fly fishermen use the following patterns: Ginger quill, red quill, blue upright, red spinner and oak flies, tied number 12, 14 or 16 size hooks. Other patterns are also used, but the above list will do the work very well.

The California Anglers' Association has this week received word from G. Yaeger, railroad agent at Truckee, who says: "Fishing on the Truckee river near Truckee during the past week has been very good. Some good catches are reported with flies. The river is rather high. The large fish this season weighed eight and one-half pounds. It was caught near the dam at Polaris by Dave Gabona. Another trout, weighing three and one-half pounds, was caught by Mrs. E. J. Campbell near the mill pond west of Truckee. Both anglers used bait.

"Fishing is reported very good on Lake Tahoe and about 1000 pounds of trout are being shipped daily. Lake Independence is one of the few resorts free from market fishermen, and it has never before produced such good fishing as at present."

A composite report states that fishing in Lassen (some non-volcanic parts of it only), Trinity, Shasta, Siskiyou and Tehama counties was never better. Westwood, Lassen county, has the fishing bug badly. "The entire town has gone crazy; 317 licenses have been sold since the season opened and merchants selling fishing tackle are getting rich." L. W. Herman and son and N. A. Hawkins landed sixty-six trout from Butte creek, fishing with fly hooks. The trout weighed twenty-four pounds, a good average size they were.

Creeks in the vicinity of Skaggs Springs, according to George S. McCullom, who recently returned from there, were good for five limits in one week—trout that ran from seven to eleven inches in size.

Shasta river fishing points are also reported to be in the fly-fishing class now. The killing patterns are said to be black flies, with peacock bodies. N. A. Hawkins, Solon Williams, and J. W. Churchill's combined catch Wednesday was ninety trout.

Feather river trout possibilities are much improved. At Belden it is reported to be O. K. both for bait and fly-fishing.

Albert Grunewaldt, who put in a fortnight on the Feather, near Big Bar, states that the fishing should be good now. The river is getting low and clear, ten feet lower than two weeks ago. Salmon eggs and spoon were the killing lures for catches of trout averaging a pound each. From Camp Rodgers word comes that weather conditions are pleasant and fishing fine. Mrs. B. Broadwater of Oakland and others landed limit baskets a few days ago at that point. There is also good fishing in the nearby creeks, so it is given out.

David and Harold Hearfield are still located at Klamath Hot Springs. The sport has been steadily improving. Salmon flies have appeared about the river, which should aid matters perceptibly.

The Arroya Mocho, a creek up in the Alameda hills, beyond Livermore, and tributary to Alameda creek, furnished Sam Wells, Al Hoffman and L. Maxson with baskets of nice-sized trout that fell to fly-hook tempting one day recently. Ed McGarry and other Oakland rodsters all picked up good baskets of fish the same day. The Arroya Honda, a brushy stream and rather hard to get to, was found to be in limit shape Sunday for K. C. Mobley and a friend.

Throckmorton lagoon, on the Marin ocean shore, was fished by Clarence Kolb recently, with satisfactory results.

Milton Frankenburg's trouting venture in Sonoma creek, not long ago, above Schellville, was fraught with a spice of danger. He became stalled in quicksand and was rescued, after some trouble, by his partner, John Cattermole. A catch of eight-inch trout was part compensation for the unpleasant adventure.

From Bass Lake, in Madera county, the fishing dope is that nearby stream fishing is about due. The creeks are high but clear. The snow water has all run off. In the lake itself the trout fishing is said to be fine. Black bass are now taking imitation insect lures.

Trout fishermen who have prospected the peninsula creeks report varying success. San Gregorio creek and lagoon yielded seventy-five proper sized trout to Harold Ladd and a friend. E. H. Humphrey fished Tunitas creek. Trout were plentiful and readily rose to fly hooks, but they were nearly all too small to brag about. The roads down the coast had dried out thoroughly, but the adobe mud humps, hard as stone, need leveling.

The visitors at Point Reyes last Sunday were rather few, and found fishing conditions only fair. Will Eaton's basket made about the best showing. Lagunitas lake, early last week, did not offer overly pleasant weather conditions, for wind and rain jarred the sport of Charlie Briedenstein, Baldo Ivancovich, Sam A. Wells, Leon Greenebaum, Al Langerman and others.

* * *

Striped bass fishermen should have a better innings tomorrow than for the past fortnight. A few catches have been reported for the past fortnight. Corte Madera creek and other sloughs near Greenbrae seem to be worth a trial. Sunday George Gregory landed an eight and a ten pounder and Charles Farrell caught a smaller bass. Two other fishermen are reported to have caught twenty bass, nearly all under weight. Fishing with a K. & S. silver and copper spoon, the South Vallejo lighthouse keeper landed seven striped bass Saturday. Another account states that a few bass have been taken in Napa creek, some distance below the drawbridge. Up Rio Vista way there is evidently a run of bass in the creeks and sloughs, for about all of the bass shipped to local markets came from the net fishermen near Rio Vista.

HOOKWORM IN DOGS.

We are indebted to Mr. C. M. Felder, of Blackville, S. C., states the Southern Kennel Reporter, for the following very interesting review, as indicated by the above heading—"Hookworm in Dogs"—which was published in the February 25, 1915, issue of "The National Field," and reads as follows:

"In our issue of February 4th, we promised to give certain information that was being furnished us by Dr. Bishop, of Holder, Fla., in our following number, but owing to delay in securing a full report, we were compelled to wait this opportunity and now present in full, the treatment used by them successfully in combating this dreaded scourge of the kennel. It has been very prevalent and fatal in the South, more particularly in Florida, and we are to be congratulated in having the co-operation of these two worthy members of the medical profession, both ardent doglovers, in finding a reliable treatment for it. We append herewith a full report as furnished by Dr. Bishop."

"That the hookworm, Uncinaria Canina, is a common inhabitant of intestines in dogs and cats is a well-known fact. According to Dr. Stiles, Uncinariasis is a very common disease in dogs in Washington, D. C., and the same author states that from 25 to 40 per cent. of the pups born in some parts of the United States die from hookworm disease. The parasite causes a disease known as typhoid in cats.

"Examination of the excrement of dogs in Jacksonville, Fla., and elsephere, showed an infestation with the eggs and larvæ of hookworms. The dogs which furnished the samples were, in most cases, healthy and running at large, while in two cases they were patients in a hospital and being treated for other troubles, presumably.

"Recently, a dog owned by one of us died of Black Tongue, and was examined, in part, in the bacteriological laboratory, Dr. Hanson bacteriologist, assisting in the examination. The bowel showed a heavy infestation of hookworms. The lesions produced by the worms in the bowel were the only noticeable departure from a normal condition of the body.

"As this observation was considered of great importance in throwing some light upon this mysterious disease, the treatment of several affected dogs was at once instituted, upon the theory that the disease, black tongue, is an acute form of uncinariasis. The dogs were given the thymol-salts treatment, with the result that they all recovered, showing the marked improvement noticeable in successfully treated cases in the human being. Both from a pathological and from the sportsman's standpoint, this observation is of great interest because the disease known as black tongue has prevailed here for many years, and no theory as to its cause that was worthy of credence has ever before been advanced.

"The sportsman and the dog owner have realized that this disease is the bane of canine life in Florida. It is hoped that dog owners will take up the question and have their dogs affected with black tongue treated for hookworms, according to the plan suggested in this article, and report the results to the State Board of Health. It may be well to give the symptoms we have found present in what we recognize as black tongue.

"Symptoms.—The most certain method of diagnosis is the examination of the excrement for eggs and larvæ, by the microscope. Those who are not equipped to make this examination may forward a small sample of freshl y-voided excrement to the Veterinarian of the State Board of Health, Jacksonville, Fla., with notice of shipment. Send the excrement as passed, and not in a liquid. Repeated shipments during treatments will be necessary for determining when the dog is free of the worm.

"The most prominent symptom first noticed is the paleness of the tongue and other mouth parts; abnormal desire for articles that dogs do not usually eat, such as dirt, clay, manure and other filth. A cough develops. Vomiting is present. Dribbling of saliva occurs throughout the disease. It is thick and ropy, and when mixed with dirt, causes a very unclean appearance of the mouth. Champing of the jaws is present, and this causes abrasions of the tongue, which becomes infected, as do the other tissues, and then we note, 'sore mouth,' with loss of appetite and inability to swallow. The breath becomes offensive, as do also the vomits and excrements, which in many cases consist almost solely of blood, mucus, and bile. The skin is in the condition known as 'hidebound,' in several cases. There is general weakness of the body, which manifests itself more particularly in the limbs, and this increases, along with other symptoms up to the point of death, which is usually an easy one.

"The existence of skin lesions, 'ground itch,' is not a constant lesion in dogs or in cattle infested with hookworms. This is readily understood when one considers the comparative sensitiveness of the animal hide and of the animal foot.

"Treatment.—This should be begun early, before the urgent symptoms have developed, if the best results are to be obtained. Hence, when the dog passes blood and mucus, the excrement should be examined for the eggs and larvæ. It may, as in man, require several treatments before the worm is totally eradicated from the animal.

(Concluded next week.)

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Rem-UMC Notes.

It is an interesting fact that at the San Jose, Cal., tournament held May 29-31, with an average attendance of 50 shooters, at the final reckoning it was found the first seven amateur averages were won by shooters, pinning their faith to the Remington-UMC combination.

J. F. Couts, Jr. won high amateur average with his Remington-UMC pump gun with a splendid score of 476x500.

Second, third, fourth and fifth averages were won by Messrs. Ford, Flickinger, Ogilvie, Haliburton and Barstow, all using Remington-UMC Arrow Speed shells.

In the professional class H. E. Poston was high with 481x500. H. C. Reed was second with 468x500, both using Remington-UMC Arrow Speed Shells, and R. C. Reed a Remington-UMC pump gun.

The long run of the tournament was made by R. H. Bungay with 110 straight, using Remington-UMC pump gun and Arrow Speed shells.

THE FARM

MONTH FOR GOPHER WARFARE.

April and May are the months in which farmers should get after the pestiferous gopher. Seed corn can be protected from their attacks by various methods. Corn soaked in the following solution is a good poison bait for the gopher:

One ounce of sulphate of strychnine dissolved in a pint of boiling water, with an equal quantity of sugar syrup added and mixed thoroughly.

After the corn has been soaked in this solution, let it dry and then distribute it over the infested areas..

If gophers have not disappeared at corn-planting time, seed corn itself may be soaked in the same solution twenty-four hours without injury.—Rural World.

WHY PLANT TREES.

They add value to the property.

They protect the pavement from the hot sun.

They add beauty and comfort to the streets and the country home.

They cool the air in summer and radiate warmth in winter.

They furnish homes for thousands of birds that help man in his fight against injurious insects.

They furnish homes for many animals that are useful to man for food and clothing.

They help man in his fight for better sanitation.

They furnish lumber for man's home and fuel for his fire.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body — It is penetrating, soothing and healing, and for all Old Sores, Bruises or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints

REMOVES THE SORENESS—STRENGTHENS MUSCLES

Classified Advertising

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼ (dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

SAVE-THE-HORSE

(Trade Mark Registered.)

Used by America's Most Famous Reinsmen

Cures the Horse and Himself Too

R. S. Steth, Holliday, Mo., Jan. 4, 1915, writes:

Holliday, Mo., Jan. 4, 1915.

Troy Chemical Co., Binghamton, N. Y.

Dear Sirs:—I want to thank you for what Save-The-Horse did for me. I cured my mare of a bog spavin. I thought that if it would cure a bog it ought to cure a bog on a man, so I gave it a trial. I had a very bad case of Varicose veins. Doctors told me the only help was to wear an elastic stocking; and one said that an operation was the only resort because it would break soon, and there would be a running sore. The veins were as large as a broom handle. I began using it on myself, and after six months, I could not tell which leg was affected. It was a permanent cure, and it has not come back in 9 months. I recommend it to anyone suffering from same.

Respt., R. S. STETH.

HALF BOTTLE CURES THREE YEAR OLD SPAVIN

Oak Ridge, Mo., 2-8-1915.

Troy Chemical Co., Binghamton, N. Y.

Gentlemen:—About six years ago I bought a bottle of Save-The-Horse spavin cure for a spavin about three years old. I had used several kinds of spavin cure, but he continued to get worse until he was practically worthless. I cured that horse with a half bottle of your remedy so he has not been lame since. I have used him for all kinds of work and driving. I was the first in this part of the Co. to use your remedy for spavin. Since then neighbors who have used it with satisfactory results in every case are: Robt. Crites, Oak Ridge, Mo.; Brown Clippard, Oak Ridge, Mo.; Albert Liddy, Oak Ridge, Mo.; Ory Kenison, Oak Ridge, Mo.; P. C. Fulbright, Jackson, Mo.

Yours truly

S. A. SMITH, R. F. D. No. 2.

TWO PERMANENT CURES—IT PAYS

Weston, Texas, 1-27-1915.

Troy Chemical Co., Binghamton, N. Y.

Sirs: I have neglected to write you. Better once than never. I want to praise Save-The-Horse above any liniment I have ever used. I cured my horse of bog spavin; sound and well. It is nearing two years and he has never lamed any yet. Last spring, I bought another bottle for my driving horse which had a bad ringbone; today he is sound and well.

I am, yours truly, E. A. CANDLE.

NOTHING EQUALS IT FOR HOOFS

Clark's Hill, Ind., 2-14-15.

Troy Chemical Co.,
Binghamton, N. Y.

I used Save-The-Horse on a case of Navicular disease; it did the work up right. I had tried everything I could think of, but your remedy did the work.

Yours, LLOYD STINGLEY.

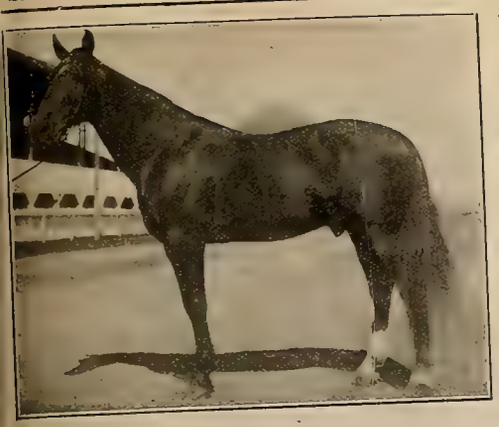
McAllister, Wis., April 28, 1914.
Troy Chemical Co.,
Binghamton, N. Y.

Gentlemen: The mare that was bothered with coffin joint lameness is cured and we thank you for it, because it is Save-The-Horse that cured her. She works every day, and I will recommend it to anybody that has a lame horse.

Very much obliged to you.

Respectfully, ED. PETERSON.

Our 19 years' experience is in the directions with every bottle of Save-The-Horse—tells just HOW to treat every kind of lameness and complication. With this unrivalled remedy the way to accomplish results is made plain and clear for you—NOW—ready to cure your horse—AND THE CURE IS GUARANTEED!



WE ARE THE ORIGINATORS of the Plan of—Treating Horses Under Signed Contract to Return Money if Remedy Fails.

$5 with a binding contract to refund money or cure any case of BONE AND BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WIND PUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDONS AND ALL OTHER LAMENESS. No scar or loss of hair. Horse works as usual.

SAVE-THE-HORSE is sold by Druggists and Dealers Everywhere or sent prepaid by

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

2019 So. Figueroa St., Los Angeles.

Minor Heir Jr. Racing Harness

A HARNESS with two styles of hitches—the two minute attachment for racing, and the breast collar and traces for jogging and training.—Another famous Sell Brand product.

Made from genuine old-fashioned, slow-tanned Hollinger Oak Leather, without exception the finest harness leather produced in this country, reinforced with Indian tanned rawhide. Hand cut, hand finished. No other racing harness at anywhere near its price can equal this in quality. It is indeed a masterpiece of harness-making. If it wasn't the BEST of its kind, I wouldn't be backing it with my name and reputation.

Care and Training of Trotters and Pacers....

Price $1.00

Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Victorious Parker Guns 1915

Look, Read, Remember!!!

At the Los Angeles Gun Club on May 23rd and 31st, Mr. Henry Pfirrmann, by scoring 192 targets out of 200, won the F. A. Johnson loving cup, shooting his

34-INCH BARREL PARKER GUN

Furthermore, being in a playful and receptive mood, he strolled out to the Venice Pier and scored 98 out of 100 targets with a

TWENTY-GAUGE PARKER

which so far is the world's record with so small a gun.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

Standard, registered mares with colts and again in foal, and likely young prospects well engaged, for sale at prices to suit the times.

J. W. PENDLETON, Owner,
1601 Seminary Ave., OAKLAND, CAL.

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

Simply "press up" the carrier

The Easiest Repeater To Unload Is The

W WINCHESTER

MODEL 1912

Hammerless Repeating Shotgun

We copy the instructions covering the unloading of the magazine from our catalog:

To remove the loaded shells from the magazine without working them through the action, press up the carrier. They will then be forced out by the magazine spring.

That's all there is to it. In fact, the instructions may be compressed into these four words, "Press up the carrier." No gun that we know of can be unloaded so simply or so readily. This is one of the many features that commend this gun so highly to shooters. Others are set forth in our illustrated circular. Send for it. It's full of information and free. Dealers everywhere sell Winchester guns.

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE FUTURITY No. 2.

FOR FOALS OF 1915. **OPEN TO THE WORLD**

ENTRIES TO CLOSE JULY 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by July 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On Aug. 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JULY 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the California State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10 00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10.00
Yearlings, 1916	500.00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.

The right is reserved to declare the stake off prior to August 10, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead colt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional.
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

JOHN M. PERRY, President. **CHAS. W. PAINE, Secretary, Sacramento, Cal.**

CLIMATE AGAIN.

According to the best of our recollections, it was Shakespeare who said, "Beware of jealousy, the green-eyed monster!" We hesitate to quote the Immortal Bard in these remarks because we did so a week or two ago, in others anent the same subject, whereupon the assertion was made that Bath House John was the author of our quotation. The writer who made this assertion, manifestly, was unfamiliar with the works of the Swan of Avon, but had heard "The Bath's" effusion, "Dear Midnight of Love," warbled from the voddyveel stage.

It was the editor of our San Francisco contemparary, the "Breeder and Sportsman," who committed this grotesque faux-pas; but, nevertheless, we shall not sacrifice Shakespeare to the Barbary Coast, especially when the use of one of his most classic sentiments comes in so pat. What he said about jealousy, therefore, goes, for its bearing, in the present instance, cannot be ignored. For some months past the editor referred to has been experiencing pangs of envy of the peerless Italian climate of Chicago and the Lake Region generally—not only experiencing them, but recording them publicly; vocalizing them, as it were, with variations, as did Little Buttercup her pangs of remorse in the dear departed days when "Pinafore" was on earth and the Movies still unmoved.

As for us, it never occurred to us to be envious of the "B. and S." editor's climate. It's a long, long way to Californy, to the crankiest clime we know. As we have previously explained, we have "been there"—and how glad we were to get back to civilization and thaw out on the sunny shores of Lake Michigan! To be in any way enamored of the weather we left there never entered our head. Living, as we do, in the sublime state of Illinois, where the climate is Elysian—one long dream of changeless bliss—why should we sigh for something not only far, far distant, but, like the crock of gold at the end of the rainbow, not there when you get there?

Our innocence, therefore, is and will remain incontestable. It positively cannot be impugned—particularly as, when we chose to pen a few appreciative words of our own superlative locality, back in the winter of the "B. and S.'s" discontent (this is more Shakespeare, but being over the head of its editor, it won't touch him), we made positively no invidious comparisons. We spoke, in a perfectly ordinary tone of voice, of the halcyon days that came to Chicago as regularly as the leaves we tore off our calendar-pad each morning; paying tribute to their delightful quality for themselves alone—simply that and nothing more. There was no mention of California and no thought of it. Does the owner of Uhlan sigh for Billy Dog Tracks?—or the Kentucky Breeders' Association covet the reputation of the Hooppole County Fair? We wot not.

No—we spurn the thought of jealousy upon our part. But the editor of the "B. and S.," catching sight of our remarks, became at once positively emerald-eyed! How can such things be explained? Again we must revert to Shakespeare who said—did he not?—"Let the galled jade wince! Our withers are unwrung!" It was his own unenviable condition that led him to indulge in the unseemly animadversions regarding Chicago weather which have disfigured his publication—utterances which we long ignored until at last, becoming particularly flagrant, we considered that we might, without descending to their level, expose the animus which inspired them and put the public wise. We accordingly did so, in a few dignified paragraphs, feeling that while truth was mighty and would prevail, an occasional boost always helps.

To our remarks, restrained and temperate as they were, the emerald-eyed press-agent of the Barbaryous clime would, we felt sure, take exceptions. If our original innocuous observations would so excite him as was the case, anything really pointed could hardly fail to arouse him to fury. Still, in the face of an imperative public duty, we did not attempt to evade the issue. The said issue is that of the "B. and S." of May 29, wherein the climatic conditions prevalent in and about San Francisco have precipitated a brain-storm of the most violent description. Observing this meteorological disturbance from afar, it presents to us many extraordinary features. But it fails utterly to affect our own calmness. Neither does it arouse our resentment. Having disclosed the futility of any claim for the climate of Barbary as compared with that of Illinois, our duty in the premises is fulfilled and we pass on to other things. In the words of the Bard (really, it is astonishing how many quotations from that deathless weaver of words are always applicable):

Come stroll with us along Chicago's shore,
Where every day is an Elysium—
The thought of California is a bore,
Because its climate is so very bum.

Ain't it awful, fellers, the things we are sometimes called upon to do in the pursuit of our daily livelihood? Here, all unexpectedly, we have done gone and got embroiled in a squabble that promises to last longer than the battle of the Indiana State Fair or the siege of Nelson's sulky—and us with our time fully took up with the delicate intricacies attendant upon the courting of a comely widder woman with no kids, oodles of cash in the bank, a kind and loving disposition and a four hundred acre farm, well fenced, largely in cultivation, good house and barn and running water in every pasture! (Full particulars on application to interested parties, for as soon as the widder says yes, this here farm is on the market.) Anybody experienced with widders will bear out our contention that this ain't no time for setting up nights thinking of things to say to anybody but the widder herself, but knowing that a large following of local friends would expect us to continue what we had unintentionally gotten into, we had lied to the widder about having a sick friend and stayed up most of one night this week, studying a handy little volume of wit and sarcasm and pertinent and impertinent paragraphs culled from the works of the world's greatest argufyers and satirists. We found out how the Review does it, and believe us, it is a cinch when you get the combination. Even with our limited education we were succeeding famously in getting together a screed that had all the highbrow tone that marks the meaningless mouthings of the Review's phonographic fulminations, albeit the latter sound at times as though the point needed changing! Aided by the useful volume we were rapidly getting into shape an impassioned excoriation that should leave the Review's editor with neither hide nor hair. It was a lulu! It had Cicero lashed to the mast and T. Roosevelt left at the post. But—it was all in vain; we had just as well spent the evening camped right at the widder's warm side; we had thrown away four hours of perfectly good time that could not be recalled. Resting for a moment from our arduous labors we picked up the Review for a bit of the mental relaxation to be gained from a perusal of its pages. Then did we become aware of the true error of our way, then did it dawn upon us that our efforts to "keep even" with the Review in our current controversy were indeed the height of futility.

Gentle reader, we would ask you this: What is the use of becoming further entangled in a long distance argument with a contemporary whose powers of observation and comprehension are so limited, whose knowledge of actually existing facts and circumstances is so deficient, whose opinions are so warped and biased and with whom the habit of making deliberate mis-statements in preference to telling the simple truth is so far developed, and whose absolute aversion to truth is so pronounced that, in his own pet publication, after properly heralding Lock Logan's performance of 2:07¼ on May 22 at Woodland, he jumps a few inches and in the same column makes the bald, positive statement: "THE BEAVER 2:04¼ AT SAN FRANCISCO LAST SATURDAY, IS THE FIRST NEW 2:10 PACER OF 1915"?

Echo answers: "What?"

GOOD YOUNGSTERS AT AUCTION.

Californians who have a "weakness" for the trotter and pacer will have a most excellent opportunity presented to them to get some good youngsters of the family at their own prices next Saturday, June 26, at Suisun, the occasion being the annual offering of yearling two-year-old fillies and geldings, from the establishment of Rush & Haile. From Suisun Stock Farm in bygone years have come some of the best campaigners of the west, and its premier stallion, Demonio 2:11¼, takes rank as the best of the families of either Charles Derby 2:20 or Bertha as a sire of speed. Every year sees ample additions to Demonio's 2:10 list, which now totals eight, or nearly fifty per cent of his entire representation of standard performers, a distinction enjoyed by but few sires whose performers number as large a total. In the sale, too, are youngsters by Vernon McKinney 2:01½, Montbaine, and Gen. John B. Frisbie, stallions of quality in every respect and recognized as sires of speed.

The sale commences at two o'clock and there is no reserve set upon any of its offerings. The boys and girls are all well grown, good colored, sound, and free from artificial faults, as they have never been broken save to halter. The catalog is ready for distribution and may be had upon application.

AN OVERSIGHT ON OUR PART.

Having published a collection of wireless dispatches which we failed to receive, we are now confronted with the duty of giving publicity to a communication found lying on our desk—we use the word "lying" advisedly—on our return from the races one evening this week. The document bears marks of authenticity and is presented herewith:

Radiogram via Fisher's Switch, Medicine Hat, Skookumhouse Butte and Lassen Peak.

Indianapolis, Ind., June 11.

Chicago dispatch in B. and S. of June 5 is remiss in one important particular, as it failed to state that prior to Mr. Flaws' departure for San Francisco, with his commission as presiding judge and special correspondent for the Horse Refuse safely tucked away in his B.V.D.'s, he received by absent treatment the blessing and Godspeed of his ex-employer, Mr. Campau, whose heart is torn with sorrow over the vast distance that lies between him and his wandering boy, but still prays for his safe return. If Mr. Flaws has not yet informed you of this important omission from your Chicago correspondent's dispatch, you will kindly present this for his complete verification and approval. Along with the blessing, it may be said, in passing, was an ample check which was intended to provide for the highest state of comfort, food and refreshment of Mr. Flaws in San Francisco. Fac simile of check is herewith attached.

GAMEY.

Lest there be those among you who doubt the genuineness of this startling expose, we have preserved carefully the original, as well as the fac-simile of the check, and as Exhibits A. and B. they may be inspected by those who have the price of admission to our curio department.

OLD WAR HORSES.

From Edward III's reign to that of Henry VIII little is known of the development of the English horse. Henry VIII imported horses from Turkey, Spain and Naples, and he enacted laws for the improvement of the native horse. Each park-owner had to keep from two to four brood mares not less than 13 hands high, and no stallions under 14 hands high were allowed for breeding in the commons, chases, and forests; no stallions under 15 hands were allowed to run free. The gelding was introduced about this time.

In Elizabeth's reign there was still a scarcity of horses, and in 1588, the year of the Spanish Armada, only 3,000 horses could be mustered, and these were said to have been strong, bulky animals, slow in action and only fit for agriculture or draught, and very indifferent chargers. It was a penal offense at this time to make over a "horse to the use of any Scottish man." Coaches were also introduced, an invention which marks out a new stage in the history of the English horse.

Blundeville, writing in 1850 of what he considers the best breeds, includes the Turk and the Barbarian in his list, and says that the horses that "do commonly call Barbarians do come out of the King of Tunnisland, out of Massilie Numidia, which for the most part be but little horses, but themselves very swift and able to make a long cariere, which is the cause why we esteem them so much."

These eastern horses soon produced their effect in improving the native horses, and in the middle of Charles I's reign there were considerable numbers of horses of the hunter type in England; it was on such horses that Cromwell managed to mount his Ironsides, at a cost of some $90 for each horse. The great Protector knew his business well. There is a letter from him, dated November 11, 1642, which must remain a model for the needs of the horse-soldier. It runs:

"Dear Friend.—Let the saddler see to the horse gear. I learn from one many are ill-served. If a man has not good weapons, horse and harness, he is as naught.—From your friend, Oliver Cromwell.'

Charles II was the true founder of the system of breeding which produced the thoroughbred horse of today. He sent his Master of the Horse to the Levant to buy mares, principally Turks and Barbs. The influence of the Libyan horse must still be noticed. The result of these purchases were the celebrated relay mares, from which our racehorses are for the most part descended.

The great war-horse served his part, and gradually disappeared. His descendants still survive in the cart horse, in the State coach horse, and in the black chargers of the Household Cavalry. As the need of swifter horses for war and for pleasure arose, so the modern types gradually developed, the racehorse and the hunter deriving their size and strength from the old native strains, and their beauty, their courage, and their endurance from the Eastern sires.—Live Stock Journal, London.

Clinton A. Harrison of Seattle, as full of enthusiasm for the trotter as ever, and rejoicing in his emancipation from the confinement of the hotel business, was among the visitors at the exposition races this week. C. A. was kept pretty busy shaking hands with numerous friends and telling of his horses in the stable of J. B. Stetson at Salem, but managed at that to find time for the indulgence of his most famous specialty, doing favors for a few folks who have had hard luck to battle with. May he live long, and prosper!

WHITE SOX WINNING SECOND HEAT OF FREE-FOR-ALL PACE

LIZZIE DILLON LEADING THE 2:17 PACERS AROUND FIRST TURN

Sport Continues at the Exposition

Fifth Day.

Friday, June 11.—The wind was less in evidence today than earlier in the week, and the growing interest in the meeting on the part of the general public caused a better attendance, good racing being the reward of those who made the long trip out to the race track.

Laramie Lad, second on Wednesday to Virginia Barnette in the class for 2:16 trotters, took his turn at heading the summary in time about the same as his previous race. Matawan made it his second start in two days. The Proof came out for his final appearance over the exposition track, and the balance of the field were new ones for the local race goers to view—Kinney de Lopez 2:23 from the Hemet Stock Farm, Dr. D. C. 2:14¼ from Phoenix, Tropic Dawn 2:18¾ from across the line in Canada, and the chestnut mare Bessie Custer from Chicago. The Proof drew the pole for the first heat, Dr. D. C. on the outside getting the word on a break and cutting over into the pole behind the leaders, settling quickly to a trot. Kinney de Lopez, a stranger to company and finding the hard footing none too comfortable, broke on the turn, the order at the quarter being Matawan, Laramie Lad and The Proof. Before leaving the back stretch Spencer had moved to second position but could not out-trot McDonald's gelding in the stretch.

Laramie Lad, who in spite of his speed is far from being a nice gaited horse, went away in the second heat on a hop, skip and jump that apparently cost him neither ground nor effort, Dr. D. C. making an ascension on the turn and McDonald and Frellson leading to the quarter. The Proof made a bid for the heat but quit trotting in the stretch, Tropic Dawn coming through to second on the pole and Bessie Custer resting her feet by finishing on the pace. After the Canadian mare's good showing she was given considerable regard for place in the final time out, but The Proof was warming to his task and had ideas of his own about this "place" business. Matawan buzzed to the front in the first eighth but gave way to Laramie Lad before reaching the quarter, The Proof letting out a few links down through Moccasin Bend and going into the lower turn in second place. Gradually the two leaders opened up considerable daylight between them and the Canadian entry, who in turn was well ahead of Matawan, who was beginning to feel the effect of his two strenuous days. Spencer set sail for the finishing post when the pair straightened out into the lane and collared McDonald some yards from the wire, getting almost in the clear for a lead when his horse left his feet. So close were the pair to the wire that the judges placed them as they finished, Matawan failing to finish inside the flag. Laramie is beginning to amass the sum required to square up his board bills, and The Proof begins to look like a really useful horse. The kind of racing that would best suit him, from present indications, is the good old three in five system, as he acts like a stayer and can carry his speed well.

Locally owned horses made up the major portion of the field for the club pace, though visitors were in evidence from Stockton, San Jose and Sacramento. Fortune seems to have favored the invaders in the professional events at the meeting, but this time the home guards held the trenches manfully and allowed but a small portion of the spoils of war to be wrested from them. Will Kenney's old reliable war horse, W. J. K., carried his driver to the front when the word was given, Casey Jones and Bradmont lying second and third at the half. Casey executed some fancy steps heading into the stretch and put himself out of the running, Bradmont coming through on the pole quite a bit behind the leader. With Tim putting up a drive exactly to his liking, Bradmont began overhauling W. J. K. and finished safely in front, Smith going to the bat just a bit too late to stave off the bay gelding's rush. Mabel Dillon a comfortable third and Trix McAdrian going an excellent heat and finishing fourth after having been sent away absolutely last.

Next time out, Mabel Dillon broke early, followed by an ascension on the part of Jack at the three-eighths. Frank Wright with Jim Donnelly having cut out the pace and leading the field into the stretch in a manner that set the Sacramentans to pulling for him with might and main. For a time it looked like anybody's race—confining the "anybody" to Donnelly, W. J. K. and Bradmont—but the Lijero pacer flew up some distance from the wire and again Bradmont slipped through on the pole, Jack and Trix McAdrian standing a hot drive for fourth place in which the little black fellow was a bit the best. The Stockton mare developed into the front runner for a goodly portion of the last heat, and with the exception of Jim Donnelly, who broke early in the mile, the entire field was within striking distance at the three-quarters. Until well up the stretch Trix seemed to have the legs of the party, but once more Bradmont got a sniff of the big end of the purse and set sail for it like a cat after a mouse, quietly and unostentatiously but with his mind absolutely on his business, Trix outstepping W. J. K. in the drive for place. Bradmont, for a horse of his speed capacity, is about perfect as a matinee horse, as he has yet to make a mistake this season with Tim Sexton holding the reins.

The 2:17 pace looked for all the world just like a jinx race as it appeared on the program originally—thirteen starters for a Friday feature—but the scratching of Baby Gommet broke the jonah and left an even dozen, with Charley DeRyder and his big Zombro pacer, Zomblack, carrying the hoodoo number. Bearing in mind the ease with which O. U. C. handled his field in his first race until hard luck with a weak hobble cut him down, the crowd settled themselves to watch him perform. "Watch him perform" was right, but not the way they figured, however, as the big fellow simply refused to behave on the score and spoiled a number of starts. Hedgewood Patchen, who was receiving his "baptism" as a race horse, behaved very nicely on the pole, and Starter Updegraff finally put O. U. C. on his own responsibility and sent 'em away with him doing a "thé dansant" special far behind the bunch, settling into a pace after his case was hopeless. Lizzie Dillon led a good delegation into the stretch but faded before going the length of the long lane, Directline winning, closely convoyed by Potrero Boy, Zomblack and Zoetrix, in the very nice time of 2:08¼. Sandy Smith, the unmannerly flagman, flock shot into the bunch and at one fell swoop eliminated four good pacers from the contest—Buzz Patch, Dicto, Pointer Belle and O. U. C., the latter lad showing that he had the legs of the bunch by pacing his mile in :30¾, 1:01¼, 1:33¼ and 2:06¼, pulling up from the distance home. Patience and perseverance, with experience, will enable him to redeem himself in the future and his owner and trainer are in no way disheartened over his early mishaps.

With the field cut thirty-three and a third per cent it was less unruly on the score, and the bunch went away in nice shape, with Fleeta Dillon next to last. Directline, Potrero Boy, Zomblack and Lizzie Dillon buzzed to the quarter in the order named, Fleeta Dillon closing up considerable ground before going into the lower turn. In the lane the clip was a merry one, Zomblack and Potrero Boy indulging in a rousing duel for first place, Fleeta Dillon surprising the doubting Thomases by finishing strongly and dropping into third place ahead of Hedgewood Patchen, the whole field giving the rude Mr. Smith the merry ha ha by getting past him before he had a chance to shoot the other barrel of the howitzer that had worked such havoc with the bunch in their first heat.

"Goodby Fleeta" was the prevailing expression in the final round, as she was nervous as one William the Quitter was during the preparation of certain recent diplomatic correspondence and spoiled a few scores. When at last the eight wigglers got the signal that started them on their last round she was lengths to the bad and on a break, but settled and started after the leaders with a right good will. Potrero Boy broke on the turn and Zoetriz and Donald went to the front to the half, Fleeta going down the inside passage for a good gain and a number of the leaders hitting into the turn well bunched Zoetrix led them into the straight and when the drive started Potrero Boy looked like a winner. The big bay gelding broke in the stretch, however, and the honors went to the long-priced Fleeta, Hedgewood Patchen finishing well and outstepping Zoetrix. Zomblack made a game drive but had gone a fairly lengthy mile and the travelers of the short route had it on him in the brush. Fleeta Dillon has gone two races better than anyone expected her to do and Shuler, junior, gets along with her very nicely. The day's results:

San Francisco, Friday, June 11, 1915.

2:18 trot, purse $2,000:

Sixth Day.

Saturday, June 12.—If the "dope" or the "beans" that are spilled so frequently around harness horse racing courses were only of an edible variety, what a feast the seagulls that frequent the beach upon which the P.-P. I. E. track fronts would have had today. They could have gorged themselves to repletion, and there would still have been left a mountain of grub that would have brought joy to the hearts of the Belgian relief commission, for Saturday, kind friends, was one of those days when the best laid plans o' mice and men gang aft agley. "Spilled beans" on a race track, however, engender entirely different emotions in the bosoms of the spectators from those aroused by "spilled milk" in the heart of the humble housewife, and today's upsets gave the crowd a run for its money that made the afternoon seem all too short.

Spriggan, $700 Horse, Grabs Rich Trot

For two years the talk of the coast country has been the four great stakes scheduled for the exposition meetings, one of which, the 2:10 trot, was carded for today, interest being heightened by the contesting of the free-for-all pace as well. From every California town where the trotter has a following came a representation numbering from one lone lover of the sport to scores of enthusiastic boosters, and early after lunch time the turnstiles began clicking away, registering the largest crowd that has ever attended a straight-out trotting meeting in this section of the world. East met west and north met south, both on the track and in the grandstand, and no matter how high the loyalty to the horses from one's home locality ran, the hearty welcome accorded each winner was of the "unanimous" order, for all the world loves a lover, or a good game horse. Time after time as the leaders raced down the stretch the crowd rose as one person to urge their favorites to greater effort.

Spriggan, culled from the MacKenzie stable last December and sold at auction for a measly seven hundred bucks, vanquished in straight heats a field of an even dozen high class trotters whose praises have been sung from coast to coast. Not by a lucky scratch was victory brought to crown the efforts of the youngster in this, the second race of his career, but by superior behavior, true race horse qualities of speed and gameness, and clever handling on the part of his trainer and driver, Will DeRyder. Virginia Barnette, Peter McCormick, McCloskey and Loe Blossom were the most highly regarded quartette in the race, and had there been pool selling or pari-mutuel machines in operation, the profits paid on Spriggan tickets would have been of the regular Standard Oil variety.

McCloskey, the "scapegoat" of last year's M. & M., drew the pole for the initial heat, with Virginia Barnette on the outside and Loe Blossom third or fourth in the first tier. For the first time during the meeting, Starter Updegraff showed a bit of anxiety to get his field away, and gave the word on a rather early score, with a number of horses none too advantageously placed. Loe Blossom, for whom an offer of "way up in the pictures" was refused a few days ago after she had worked the exposition track in 2:06½, broke on the word but settled quickly, Spriggan going to the front in the first quarter, closely followed by Virginia Barnette, with Peter McCormick back in the ruck. Down through the canyon the field shifted a bit, Peter breaking upon throwing a shoe, and Loe Blossom closing up some of her lost ground. It was a case of Spriggan all the way by a length and a half, with Virginia Barnette passing Loe Blossom for place after the latter made a jimtown not far from the wire, McCloskey finishing fourth with San Felipe making a good effort for a piece of the five thousand dollars that went to the heat. In the stretch the Shuler trotter again left his feet and finished ninth.

Now while all the horsemen present and very many of the general public as well knew that Spriggan was not trotting outside of his capacity, as previously evidenced in his work, and also were aware from his race of the preceding Saturday, that he had the best of manners and general racing demeanor for a youngster, few if any rated him as a really serious menace to that several thousand which was to go to the winner, even after he had made such a runaway affair of the first heat. So much more had been expected of various other entrants that people simply could not make up their minds that they would all fall short of the form that they should properly display.

The personal ideas of the spectators had no effect upon the course pursued by DeRyder and Spriggan. Loe Blossom was a bit unruly in the score and the field made several trips up and down the stretch before Starter Updegraff was satisfied that everybody was getting a pretty even break, and on the word Spriggan set sail for the front, Peter McCormick dropping into the trail behind him, Loe Blossom breaking before getting out of the first eighth and losing ground that she was never entirely to recover. On the turn McCloskey moved into second position, and at the quarter Peter had dropped back to fourth, Virginia Barnette supplanting him at third. Down the snakentine stretch Peter extended himself a trifle and essayed to improve his position by taking the inside passage but was a little too short in his rush and fell back going into the turn. The quartette in the lead swung into the lane in pretty good order and the drive was on. Gamely Spriggan held his own, and right well did McCloskey and Virginia Barnette respond to the demands made upon them, finishing lapped on the winner at the wire, Peter spoiling his chance by making a break in the stretch, to finish fourth, with Electric Patch leading the balance of the field and Loe Blossom taking the dust that falls to the lot of the eighth horse.

Though the time was slower than in the opening heat, McCloskey and Virginia had crowded the Baron McKinney gelding much closer than they had previously and the spectators confidently expected a new heat winner the next time out. Loe Blossom's followers had for the most part given up her case as a hopeless one for this particular event, but Virginia and McCloskey didn't seem much worried by their performances; Peter McCormick was apparently on the improve, and there were others in evidence that were by no means bad trotters, as nothing had been distanced after the first heat. It seemed an odds-on proposition that Spriggan would "have his troubles" when it came to getting away with the third heat, and it was by the narrowest of margins that their expectations fell short of fulfillment.

Again the scoring was repeated, Durfee taking Virginia Barnette out in front to the quarter, closely followed by Spriggan, Baby Doll and Peter McCormick, the Borden mare being one that had so far failed to figure in the money. Going into Hungry Hollow Spriggan again assumed the brunt of the battle and led around the turn and into the lane with Peter McCormick second. Nearing the three-quarters DeRyder drew away a bit from Shuler, but once flattened away for home the big son of Peter the Great began closing up like a winner. On they came, McCormick's giant strides "eating up the ground" in a wonderful fashion that promised to land him winner by a safe margin, but what seemed a bit of over-anxiety on Shuler's part sent the big fellow off his feet at the distance, causing him to lose nearly a length. At that, he settled and made another rush that carried him once more to nearly even terms, Spriggan's win being by a matter of inches only. So fast was Peter coming that three feet past the wire he was in the lead, but at the wire is where they pay off, and the greatest trotting race of the season, at least until the scene of battle shifts again to the exposition track in November, had passed into history. Virginia, next to the winner, trotted the most consistent race of the money winners and finished third in the last heat, Baby Doll out-trotting the balance of the field and standing for a share in the heat money. In the cutting of the five thousand that went according to the rank in the summary, Peter and McCloskey, each credited with a second, a fourth and a ninth, divided third and fourth money. Of the twelve starters, ten finished the race, the flagman's activities being confined to the first heat and some very acceptable performances were credited to various horses that failed to land in the money, some of them short of work and others a bit off their best form from various ungovernable causes. Many a day will pass before the scenes of Spriggan's victory fade from the memories of those who witnessed the event, and when many of the same horses meet again in the fall interest will run to a still higher pitch.

Second in importance to the rich trotting stake on the day's card was the five thousand dollar free-for-all pace which brought together a field of nine classy wigglers, a number of them scheduled for another meeting in the 2:06 stake on Saturday. Jim Logan 2:01¾, the coast champion who was expected to be among the first two or three horses at the wire in the finish of each heat, was drawn owing to lameness and The Beaver took his afternoon in the barn, having already made two appearances in hot company in the preceding seven days. Leata J., with Frankie Childs occupying the old familiar place on the hurricane deck, had the largest following in the grandstand, and conjecture concerning the condition of Dr. Burns Jr. was on every tongue. Given all around normal circumstances, the Doctor was the real old wolf for the pack, but he had been more or less ouchy ever since coming to the local track—and before—and his was an uncertain case.

Joe Patchen II, piloted by his old teamster, Will Fleming, had the little ball fall to his lot when Judge Flaws juggled the pool jug, the Doctor drawing a good place and White Sox falling heir to the position occupied in the big trot by Virginia Barnette—outside in the first tier. Little Bernice, with Ben Walker up, disfigured a couple of scores, while some of the boys displayed an eagerness to head the pole horse that elicited a bit of caution from the starter. Once away, Joe forged to the front with Homer Mac and Dr. Burns Jr. his closest competitors at the quarter, which was reached in thirty seconds, White Sox repeating her performance of opening day by breaking early in the mile. Through the back stretch the leaders raced as though the wind were with them rather than square against them, Homer Mac having a slight lead at the half in 1:00¾, with Joe, the Doctor and the pride of Stockton following fast in his wake as named. On the turn the Patchen horse began to fade away and Leata came fast on the outside. At the seven-eighths the Doctor passed Homer Mac but could not stave off Leata's rush, the heat going to her in 2:05¼, with Burns second and College Gent driving Homer hard for third, Clara Mac being just outside the money. Walnut Grove had the hard luck to jerk off a shoe and finished behind the flag.

While the Doctor hadn't the steam to beat Leata J. in the first heat and showed a trifle of an inclination to favor his sore finger, he finished pretty stanchly at that and the crowd thought he might yet live up to the bear cat reputation that has been accorded him, but when the horses came out for the second heat, minus Joe Patchen, who had been drawn, the Chicago marvel was noticed to have a much more pronounced nod in his gait. Going away Whitney dropped him in the lee of Homer Mac, White Sox, pacing like a clock, hanging to third position and Leata J. to fourth. Over in the chute the chutes Barney Barnes, designated by Robber Red McDonald as "th' Rid Phisint av th' Narth," began camping on College Gent's hocks and that lad responded with a rush that carried him in front to the head of the stretch, with Sox, Leata and Homer scrapping for the money like the pure strain gamesters they are. Again the Gent and Homer raced for the show position, while in front of them, driven for all there was in them, Leata J. and White Sox raced head-on to the wire, the judges seeing the Berry mare's nose in the lead. Midway of the lower turn the Doctor was seen to falter, and though he came home inside the flag, for him a darker curtain had fallen. Fast as he ever was, strong in heart as only a great horse may be, trying to the end, the overtaxed ligaments had given way when he seemed due for the greatest winnings of his career and he was taken to his stable, not to reappear during the day. He has a very bad leg, and if he ever starts again in anything like his old time form it will be a modern miracle.

Now after Leata J. upset all the winter dope by beating Dr. Burns in the first heat, and White Sox had proceeded to smear the spilled mess all over the course in the second heat, Clara Mac went 'em one better in the third and final time out. The fence that the fighting leaders had built in front of him in the first heats had kept Dowling from getting through to a position from which he could do any better than finish barely outside the money, but in the last heat the opening came and the sensation of 1914 proved that she still had the sizz and spunk that made her so formidable in her first campaign. White Sox, evidently benefitted by having a few fast miles in company thrown under her belt, again went away on a steady pace and showed the way to the quarter with Leata and Homer Mac at her heels. At the three-eighths Homer took the lead and the inside channel was unoccupied, giving Dowling the chance he had been awaiting. Down past the leaders the black mare whizzed at a merry clip, College Gent answering to Barney's call and making a substantial gain. Around the turn Clara led a well bunched cluster of the wigglers, and in the stretch was waged a

SPRIGGAN WINNING FROM McCLOSKEY AND VIRGINIA BARNETTE

battle royal. Clara on the pole, the Gent in the center and Leata in her customary place on the outside. The outside pair came with a tremendous rush, but Dowling was not to be denied and shoved Clara across the line a winner, with the Canadian entry nosing out Leata for place, White Sox outlasting Homer Mac. It was a great finish and one the crowd heartily approved.

Brutus, S. Christenson's big gelding by Strathway, won the 2:30 club trot handily after dropping the second heat to Eloise Dell, trotting a very nice race throughout. Sandy Smith went gunning with the distance artillery right from the start of this race, scoring a double in each of the first two heats and leaving but three horses to contest the final awards. The day's details:

San Francisco, Saturday, June 12, 1915.
2:30 trot, driving club, $1,000:

Brutus, b g by Strathway 2:19—Minnie C. by Mendocino 2:19½ .....(Christenson) 1 2 1

:31 , 1:03½, 1:36½, 2:06¾

Distribution of purse—Leata J. $1750, White Sox $1062.50, Clara Mac $812.50, College Gent $687.50, Homer Mac $375, Dr. Burns Jr. $312.50.

Seventh Day.

Tuesday, June 15—The last week of the exposition trots was ushered in today with a card of three events, two of them for amateurs, that furnished a good deal of entertainment for the moderate crowd that was on hand.

The 2:14 trot for amateurs brought out a fair field of the matinee "standbys" with a pair of Sacramento valley trotters, Bonnie Ansel and Eloise Dell, to whom fell the long end of the money. Matawan had his usual difficulties in getting away and was lengths behind his field when the start was finally made. Eloise Dell broke before reaching the eighth and Bodaker forged to the front, with Bonnie Ansel second and Copper the Ore, who was laboring considerably with a lame leg, third at the quarter, Ottinger moving her up to second position before reaching the half. Around the short turn Bonnie Ansel trotted wide, but had the legs of the party by some seconds, apparently, and won by a comfortable margin, Bodaker passing Copper the Ore several lengths from the wire. Matawan beat the flag by trotting a good heat after he once settled, but a second dose of bad acting in the next heat put him out of the contest. After the first time around, the big Prince Ansel mare won as she pleased, never being in danger and not making a mistake. Bodaker had hard luck in the second, owing to his harness slipping back shortly after passing the half and causing Chris to have to pull him up to avoid a serious accident, and in the final heat Graham Bellini added to the variety of the program by an unsensational but determined runaway in scoring, going clear around.

Frank Perry, with Bob Smith in the sulky, was the hot tip for the amateur pace, but the yearling champion failed to deliver. Perry drew the pole but W. J. K. assumed the lead before reaching the quarter and was never headed, leading into the stretch with Trix McAdrian second and Perry third, the latter outfooting the Stockton mare before the finish was reached. Silva with Bondalean, the three-year-old son of The Bondsman and Katalina 2:11¼ that was the contending colt in the two-year-old pacing division of the Breeders futurity in 1914, came around on the outside at the head of the stretch and was coming fast when a break spoiled his chance to finish better than fourth.

Cohen took Trix McAdrian in front past the quarter in the second heat, surrendering it down the stretch to W. J. K., the leaders being well bunched at the half. This time Silva had the speed and the behavior as well, and won by a pronounced margin with the fast three-year-old, W. J. K. beating Perry for place in a drive that brought applause from the stand. Mabel Dillon spoiled a score or two in the final heat and when the word was given the pole horse was hardly on even terms with his field, both Trix McAdrian and Frank Perry beating him to the quarter. Past the three-eighths the Sidney Dillon mare took to the front and led into the stretch, Bondalean and Perry being her nearest competitors. Again Bondalean finished well and annexed first position by a nice drive. He is in the fall stakes and shows much more class than the three-year-old pacers that were in evidence here last week.

O. U. C., distanced twice during the present meeting, redeemed himself today by pacing three faultless miles, the speed formerly displayed and his behavior this afternoon going far toward re-establishing him in the estimation of the local race goers. A. B. C. drew the pole, but before reaching the eighth the C. the Limit gelding took to the front and stayed there, with his alphabetical rival and Potrero Boy second and third at the quarter. On the first turn Madam Mac, for whom it was the first appearance this year in company, made a break that cost her a good deal of ground, though she made up sufficient to save her distance by pacing a merry three quarters. In the stretch Potrero Boy made a game attempt for the lead and was beaten by only a head, the pair coming the final quarter at a two-minute clip.

After this performance the big Demonio gelding was figured as a dangerous proposition, and Daniels went after the heat from the start, crowding O. U. C. to the half in time two seconds faster than formerly, closely followed by Hedgewood Patchen, with A. B. C. some lengths back and Madam Mac out of the running owing to another break on the turn. At the three-quarters the trio of leaders was well bunched and some lengths from the wire Potrero Boy was almost on even terms with O. U. C. when he left his feet, the Bailey gelding winning in 2:07½, a new record for him by a full second. Owing to a break by the Boy at the quarter in the final heat, Childs had things his own way in slower time, Hedgewood Patchen being the nearest contender. The summary:

San Francisco, Tuesday, June 15, 1915.
2:14 trot, amateur, purse $1000:

Bonnie Ansel, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20 .....(Brown) 1 1 1
Eloise Dell, br m by Alconda Jay—Princess Dell by Prince Lovelace.....(Silva) 4 2 2
Muggins, ch g by Jack Hawkins Jr.....(Cohen) 5 3 3

:31½, 1:05½, 1:38½, 2:10¼

Distribution of purse—O. U. C. $1000, Potrero Boy $425, Hedgewood Patchen $325, A. B. C. $250.

Eighth Day.

Wednesday, June 16—Today's card was one of the "weak sisters" of the meeting, owing to the failure of the 2:13 pace to fill and a dearth of starters for the two-year-old pace, only two appearing for this event, for which there were originally eleven nominations. May May, the Fresno filly owned by F. B. Stockdale and trained and driven by Abe Reynolds, drew down the major portion of the purse, Judith Patch having the misfortune to pick up a nail in the first heat. Nevertheless, the little lassie from the 1:55 establishment won the second heat in standard time, though her injury caused her to weaken in the third, May May not being forced to go either of her winning heats in time that would put her in the list. Judith's performance gives the parent association's compilers a few minutes of extra work, as she is the first performer for her sire, the phenomenally fast Dazzle Patch 2:09¾, trial 2:02¼, as well as for her dam, the good race mare Hal Raven 2:03¾ by Hal B. 2:04½. This is not the first instance of damage to high priced horseflesh through the presence of nails on the track, left as unwelcome souvenirs of the auto races, as two or three such unfortunate accidents have occurred.

The ladies' race, carded as the day's special event, created much interest for the spectators and the fair teamsters did highly creditable service in piloting their candidates over the course, going the three heats right around the 2:20 mark. Mrs. Hugh Boyle, with Princess Louise, won the first heat after Jerry D. had left his feet under Mrs. Becker's urging, but the latter retaliated the next time out by carrying

Mrs. Boyle's mare to a break, winning the third as well. Ida M. and Silkworthy, driven by Mrs. Payne and Miss Frellson, respectively, went nice races and qualified as real "ladies' horses" by their behavior.

In the only professional event for aged horses, Lon McDonald put Adbell M. over the line a winner in straight heats, trotting the second in time barely outside the charmed circle, and but a half second removed from the youngster's three-year-old time record of 2:09¾ made last year at North Randall. Lon has a world of regard for this lad, as ten years ago this fall he drove his dam, Miss Adbell (3) 2:09¾, to victory in the rich Kentucky futurity, defeating a field of eight good juvenile trotters. Today the Moko horse looked capable of trotting considerably faster had it been necessary, and was never in serious difficulties. Tom Smith was the nearest contender, but Thomas was handicapped by an old lameness and could not do the occasion real justice. Will Ivey drove Moko Hall to third money over John Gwynne, the flag catching the other starters the second heat. The day's results:

San Francisco, Wednesday, June 16, 1915.
Two-year-old pace, purse $2,000:

May May, br f by Athasham 2:09¼—Guide Alee-tice by California Guide.....(Reynolds)	1	2	1
Judith Patch, b f by Dazzle Patch 2:09¼—Hal Raven 2:03¾ by Hal B. 2:04½.....(Macey)	2	1	2

Time—:37 , 1:19 , 1:58 , 2:31
:36 , 1:13 , 1:50 , 2:25
:38¼, 1:18 , 1:52 , 2:29

2:12 trot, purse $2,000:

Adbell M., b h by Moko—Miss Adbell (3) 2:09¾ by Adbell (1) 2:23.....(McDonald)	1	1	1
Tom Smith, br g by Greenroi—Specks by Conrad .....(Marvin Childs)	2	2	2
Moko Hall, br h by Walnut Hall 2:08¼—Daisy Wilkes by Moko .....(Ivey)	3	3	3
John Gwynne, b g by McMyrtle—Daughter of Secretary .....(Lawrence Shuler)	4	4	4
Monica McKinney, ch m by Ed McKinney—Judy McKinney by McKinney 2:11¼.....(Hoffman)	5	ds	
John Mack, b g by Geo. A. Fuller 2:08¼—Ida Purple 2:14½ by Cutting 2:10½.....(McQuitty)	6	ds	

Time—:33 , 1:07 , 1:40¼, 2:13¼
:32 , 1:05¼, 1:38¾, 2:10¼
:32½, 1:06 , 1:40½, 2:12¼

Distribution of purse—Adbell M. $1000, Tom Smith $500, Moko Hall $300, John Gwynne $200.
Novelty trot, lady drivers:

Jerry D., b g.....(Mrs. Becker)	3	1	1
Princess Louise, b m.....(Mrs. Boyle)	1	2	2
Ida M., b m.....(Mrs. Payne)	2	3	3
Silkworthy, b g.....(Miss Frellson)	4	4	4

Time—2:22½, 2:20, 2:20.

Ninth Day.

Thursday, June 17—Today was another "quiet one" at the exposition track, the threatening weather and an unattractive card on yesterday coupling to keep the attendance at a very modest figure. The vacancy in the original program caused by the failure of the 2:17 trot to fill was bridged over by putting on a special trot for club members, a sulky being offered to the winner, the event being most noteworthy as witnessing the return to activity of ex-president J. J. (Jimmy) Ryan of the old San Francisco Driving Club, who yet carries a stiff leg as a result of a mishap last summer at the stadium. St. Patrick, Jimmy's Irish trotter, had a lot of support from his friends and won the first heat by a narrow margin from Brutus, each horse having at different moments the best of the stretch duel and the result being in doubt right up to the last few yards. In the following heats the big Strathway gelding driven by Christenson won as he pleased, St. Patrick having the hard luck to cast a shoe in each case.

Leata J. had it over her field in every way in the free-for-all pace for amateur drivers, the junior teamster of the Jones family driving her to an easy victory in straight heats, with Dick W. and W. J. K. second and third respectively. John Malcolm, who made his first appearance since his two-year-old form, when he hung up the then world's record for pacing geldings, showed he could pace very fast but was unsteady, standstill breaks causing him to be shut out in the last heat, after he had barely "saved his bacon" in the second.

Spriggan added to his bank balance today in his last engagement at the present meeting by winning the 2:20 trot, though like Rip Van Winkle, he was a lucky man to get away with it. As usual, DeRyder's luck held in the position allotment and the pole fell to him, giving him the opportunity he looked for—to go away winner from the start. Just under the wire, with the word "go" barely past the starter's lips, Loe Blossom left her feet, Agnes Carter following suit a few seconds later, and Spriggan shot out like a scared rabbit before a pack of hounds, opening up a lead of several lengths before passing the quarter. Without waiting for company DeRyder took his gelding on for a still better lead, and came under the wire lengths to the good, distancing Baron Todd and Agnes Carter. Whether Will thought he was riding himself of Loe Blossom's company or whether he was "in" with the association for a cut on the two hundred bucks his drive saved them is not known, but he certainly made a runaway procession of that first heat. Loe finished strong and trotted a much better race the next time out and nearly nipped the decision in the stretch brush, so that she had support for the final contest. Going away Childs dropped her into the trail of Spriggan, with Tropic Dawn lapped outside around the turn, the trio going to the quarter at a 2:08 clip. Down through Poverty Flat Childs began driving up on the inside and the mare broke but settled much more handily than usual. In the stretch it looked like Spriggan to past the seven-eighths, when Childs took out and easily outbrushed the bay fellow, who stood a rousing drive but could not stave off the rush of the chestnut lass.

The afternoon in detail follows:

San Francisco, June 17, 1915.
Free-for-all pace, amateur, purse $1,000:

Leata J., b m by Royal McKinney 2:29¾—Geraldine 2:16¾ by Mount Vernon 2:15½...(Jones)	1	1	1
Dick W., b g by Athadon 2:27.....(Ottinger and Becker)	4	2	2
W. J. K., b g by Dexter Prince—Psyche (Smith)	2	3	3
John Malcolm, br g by Dan Logan 2:07¼—Susie Miller by Prince Ansel (2) 2:20½.....(Silva)	3	4	ds

Time—:31¾, 1:04½, 1:38 , 2:11
:33¼, 1:05¾, 1:42¼, 2:13½
:32¾, 1:05½, 1:40½, 2:11¾

Distribution of purse—Leata J. $500, Dick W. $213.50, W. J. K. $175, John Malcolm $62.50, Association $50.
2:20 trot, purse $2,000:

Spriggan, b g by Baron McKinney 2:10¼—Helen Simmons 2:11¾ by Simmons 2:28.....(Will DeRyder)	1	1	2
Loe Blossom, ch m by Lepide—Lillian W. by Harry Hontas 2:24¼.....(Frank Childs)	3	2	1

:34¾, 1:10¼, 1:46 , 2:20¼

A TRAINER'S RISE TO FORTUNE.

Ever hear of a harness horse trainer making over $100,000 in two months? No.? Well—it's true, nevertheless!—no Arabian Knights tale, no dream, but pure, unadulterated fact, writes Joe Markey in the Horse Review.

Tilman Anderson, formerly of Sikeston, Mo., but whose address is now Memphis, Tenn., is the hero of this extraordinary financial coup.

That great American attribute termed "nerve" was his only asset on November 1, last, and here's the story of what came of it—and, as stated, it's a true one, requiring no garnish or embellishment to make it a most thrilling adventure in high finance.

Last fall after the racing season closed, Anderson shipped some cotton field mules from Missouri down to Memphis, but there was no sale there for them. The south, because of the European war and the fact that her great staple was without a market, was in sore financial straits. "Buy a bale of cotton!" was the suppliant word sent to the north; a plea for aid to tide over the almost insupportable misfortunes that the war had brought about.

Anderson, it developed, was worse off than "broke," for the hybrids were not only unsalable but were eating their heads off, so to speak, into the bargain. Just at that moment, it happened, a Canadian friend of the trainer's wrote him that he had learned from reliable sources that a number of French army officers were about to arrive in New York to purchase horses for their government. And now I will tell the facts as Anderson gave them to me last week when he visited the Review office, en route from Memphis with a stable of horses which he will race on the Cedar Valley Circuit.

"I got to thinking about the contents of the letter and, after reading it over several times, I made up my mind to go to New York and confer with the French consul. As you may imagine, he is a busy man and a difficult one to get an interview with. But I took my nerve with me, sent in my card, and after a long wait was admitted. After introductions he asked me if I could furnish 2,000 horses within the next ten days, and I unhesitatingly replied that I certainly could.

" 'The horses must be delivered in New Orleans,' the consul added, 'freight paid, and we will there settle when they are turned over to us.'

Anderson laughed heartily in recalling the incident.

"With 2,000 horses at ten cents apiece," he said, "I could have bought them only on the installment plan.

"After we had reached an agreement as to my commission, etc., the consul turned to me, saying, 'Mr. Anderson, everything seems to be satisfactory, but we are not acquainted with you and you have brought no recommendations.'

"For an instant I was stumped, but I happened to remember that I had in my pocket a letter from a congressman friend of mine—it referred to politics and was not of a business nature. As a last resort I sprang it on the official and told him that I would have the congressman meet the French ambassador in Washington. This I arranged by wire and to the entire satisfaction of the consul. Next day I boarded the train, accompanied by three inspectors, in my pocket an order for 2,000 horses and in my mind many doubts as to how I was going to procure them, broke as I was. I was buoyed up, however, by the thought that since I had nothing I couldn't possibly lose anything.

"I got busy when I reached Memphis; went to all the local dealers and wired others for horses. In a few days they began to come in and within a week I had about 800 collected and passed by the inspectors. I had hired a large section of the stock yards on credit, mind you, and about this time my troubles began. The dealers hadn't received a cent and were clamoring for their pay. I took my nerve with me and called upon a banker, showing him my contract with the French government and putting up a stiff talk. After a great deal of quibbling I finally got him to stake me to the extent of nearly $100,000. And, by the way, if you imagine that it's a soft proposition to pull a deal like that with a banker, just try it!

"I had stretched my credit to the limit and the man of finance was beginning to have cold feet. It was getting on his nerves, and I couldn't blame him either. But I wasn't to the half-mile post yet.

"The next thing I did, therefore, was to get the Illinois Central R. R. to ship the 800 horses to New Orleans and turn them over to the consul there without a penny being paid on the $1,750 freight bill—but I talked them into it, just the same.

"The horses were immediately loaded and the vessel put to sea. I assumed that the government would honor the draft at once, but I had not counted on red tape and other contingencies that came up. It was eight mortal days before I could even hear from anyone in authority! Meantime, the banker was sweating blood and I was walking the floor. But this was not all. I had 1,150 more horses in my pens and the dealers and owners were screaming for their pay. You see, the banker very naturally refused to give me any more credit and so I had this second herd of horses in my possession, and hadn't paid a nickel on them. To sweeten things up, the papers got onto how matters stood with me at that critical moment, and they took a hand. They expressed admiration for my nerve, but implied that I was about to place myself at the head of the world's great horse thieves.

"I knew that my intentions were good; but what could I do? Towards the end of the eight-day period those dealers were simply thirsting for my blood! They hounded the life out of me and even at night the telephone in my room was sizzling with angry messages and warnings about every half hour. I wasn't more than half alive, but I made up my mind to fight it out and pull it through.

"I had stood for hours on the morning on that eighth day at the corner of Main and Madison streets, watching every telegraph boy that passed, hoping that they would turn into my bank bearing glad tidings. I didn't dare enter that bank, for reasons that you may imagine. Finally I saw a boy turn into the bank and I followed him. Sure enough, it was instructions from New York that my draft had been honored. It seems that the delay was due to the consuls at New York and New Orleans quibbling as to which should O. K. the draft.

"Was the banker pleased?

"Was I pleased?

"Rather! He almost embraced me in his enthusiasm. Taking me into his private office he remarked, 'Anderson, I have heard of financiers, have known desperate adventurers in money matters, but you are the king pin of them all, and I want to take my hat off to you.'

"With this turn of events, the very dealers that were fiercest against me wanted to take me to their bosoms. Several of them were Jews and they were especially strong in spreading on the salve.

"Right in the midst of my troubles I had ordered a seven-passenger auto—just called up the dealer and told him to send one down and that I would drop in and settle. Strange enough, he took the order, and after I got my money I went in and handed him a cheque. He smiled and remarked: 'I heard all about your troubles, but I thought you would come out all right in the end, so I didn't bother you.' I call him a game man!

"To the end of the story, I shipped 10,000 horses in two months, and it was said that they were the best lot purchased for the Allies. After paying freight, feed, etc., I averaged about $12 per head profit. So, you see, I cleaned up quite a sum, considering that I had nothing to invest but my nerve. I want to say, though, that this, my sole asset, came very near going back on me more than once."

Tim Sexton has sold to Will Durfee the two-year-old filly Lucretia Bond by The Bondsman—Lucretia 2:13¼, bred by the late Colonel Kirkpatrick. She is a nice gaited, good headed lass and is entered in the customary coast classics, of which the Colonel was a constant patron.

◈◈◈

John W. Considine arrived in the city early in the week from an eastern trip that included a visit at Lexington, where his youngsters in the Hunter Moody stable are working famously and causing a deal of favorable comment from railbirds and turf scribes. Mr. Burnett having been compelled to return to Denver, Mr. Considine has served in his stead in the judge's stand at the P.-P. I. E. races.

◈◈◈

Among the visitors at the exposition trots of late is a gentleman from New Zealand who is not unknown to Californians, Mr. Freeman Holmes. Some five years ago Mr. Holmes paid us a visit and in company with the late Wm. G. Layng inspected many of the nearby training and breeding plants, purchasing from C. L. Griffiths of Pleasanton the mare Bonnie Jennie by Bonnie Direct 2:05¼, dam Jennie McK. 2:09 by McKinney 2:11¼, and her foal by Star Pointer 1:59¼. Mr. Holmes had good luck with this venture, as both mares have proven good winners in fair time in New Zealand.

SUNDAY'S MATINEE.

Six events, in all but one of which two or more heat winners developed, furnished a full afternoon for the matinee goers Sunday at the exposition track, competition throughout the various races being of the keenest kind. St. Thomas, Dick Roberts' rugged trotter, won the first race after dropping one heat to the daintier Valeen M., while Greatness, Eugene Cerciat's good three-year-old pacer, won the last two heats of her event in excellent style. Bill Jones, Leata J.'s stable mate, captured the free-for-all trot for Dan Hoffman after a good tussle with Salinas Star and St. Patrick, and Vera Hal found Dick W. "pretty fair pickings," though losing one heat to him through a break. Zorankin, Hamburg Belle and Tom Murphy each won a heat in the 2:12 pace, but Zorankin was the most consistent of the trio and headed the summary. Hello Girl, making her first start for the season, defeated Golden Buck in straight heats. The summary:

First Race—2:24 trot.

St. Thomas	(R. Roberts)	1	2	1
Valeen M.	(E. M. Doyle)	2	1	4
Laddie G.	(Jack Holland)	3	3	3
Minnequa	(M. Ford)	6	6	2
Ella Wilkes	(C. Borromeo)	5	4	5
Silkworthy	(Dr. Anderson)	7	5	d
General Villa	(J. D. Johnstone)	4	4	d

Time—2:22, 2:25, 2:23¼.

Second Race—2:15 pace:

Greatness	(E. Cerciat)	2	1	1
King Pointer	(H. Campodonico)	1	2	3
J. C. Simpson	(F. Goularte)	8	3	2
Marie Fitzsimmons	(J. W. Swank)	3	4	4
Emma M.	(William Malough)	6	5	5
Little Dick	(G. Erebout)	5	6	7
Jerry D.	(L. A. Bangs)	4	7	6
William Tell	(R. Roberts)	7	8	8

Time—2:14¾, 2:15¼, 2:17.

Third Race—Free-for-all trot:

Bill Jones	(D. E. Hoffman)	3	1	1
Salinas Star	(J. J. Cornett)	1	3	2
St. Patrick	(J. J. Ryan)	2	2	3
Ida M.	(H. Boyle)	4	4	4

Time—2:19, 2:20, 2:17.

Fourth Race—Free-for-all pace:

Vera Hal	(H. Cohen)	1	2	1
Dick W.	(A. Ottinger)	2	1	2

Time—2:12, 2:11, 2:12.

Fifth Race—2:12 pace:

Zorankin	(H. Boyle)	1	3	3
Hamburg Belle	(J. Ginocchio)	3	1	5
Tom Murphy	(E. Ayres)	5	5	1
Decoto Boy	(F. Goularte)	4	2	2
Delilah	(J. C. Welsh)	2	4	4

Time—2:16, 2:15¾.

Sixth Race—2:20 pace:

Hello Girl	(R. Kehoe)	1	1	1
Golden Buck	(W. G. Walkup)	2	2	2
J. V.	(J. Vermet)	3	3	3
Pride of Elmhurst	(J. D. Johnstone)	4	4	4

Time—2:22, 2:22½.

NETTIE KING, LEADING LIVING BROOD MARE.

A two-year-old by Atlantic Express 2:08¼, out of Nettie King 2:20¼, entered the list at Lexington last week and she is now the dam of 11 performers, 9 trotters and 2 pacers. Only four mares excel her as a producer of speed, viz.: Bertha, dam of 13; Brown Silk 2:19¼, dam of 13; Chestnut Belle, dam of 13, and Nell, dam of 12. These four mares are all dead so Nettie King is the leading living brood mare. In this connection we might mention that for several years the Year Book figures on Nettie King, in the table of dams, have been incorrect. Volume 30 figures her as the dam of 10 trotters and 2 pacers to the close of 1914. This should read, 8 trotters and 2 pacers, states the Horseman in its current number.

Nettie King still roams the pastures at Hillanddale Farm, Mamaroneck, N. Y., at the age of 28. She did not produce in 1914. We do not know whether she is in foal this year, but in the nature of events her career is almost over. But what a remarkable one it has been! She is the dam of performers whose records range from 2:03¼, 2:04, 2:06½, 2:07¾, 2:10½, 2:12¼, 2:13¼, 2:15½, 2:19½, 2:23½ to 224¼—an average of 2:12¾!

Nettie King is a chestnut mare by Mambrino King 1279 out of Nettie Murphy by Hamlin Patchen. She took her record to high wheels as a four-year-old, driven by Ed Geers. Later she showed a mile in 2:13½ but went wrong and was retired to the Village Farm brood mare ranks. At the Village Farm dispersal in January, 1905, and although 18 years old, she brought $3,000, and was purchased by her present owner. Since then she has produced Bonington 2:06½; King Bellini 2:12¼; Necia (2) 2:13¼; Stella Maris (2) 2:23½ and Natoka 2:24½; so the investment paid dividends. King Bellini, Natoka and Stellar Maris, if they live, may be added to their dam's 2:10 list. Necia was considered one of the fastest of the tribe but died a few weeks after winning the two-year-old trotting division of The Horseman Futurity in world's record time.

The following is a list of the produce of Nettie King:

Bred at Village Farm, East Aurora, N. Y.

	Record
1893—The Abbot, 7, b. g. by Chimes	2:03¼
1896—The Abbess, b. f. by Chimes (died young).	
1897—The Beau Ideal, 7, ch. h. by Dare Devil 2:09, (sire)	2:15½
1898—The Prioress, blk. f. by Lord of the Manor.	
1899—B. c., by Dare Devil 2:09 (died young).	
1900—The Primate, b. c. by Chimes.	
1901—Colt by Chimes (died young).	
1903—The Abbe, 3, blk. c. by Chimes (sire)	2:10½
—The Abbe, 7, also took a record (p)	2:04
1904—Mitre Bearer, 5, b. h. by Chimes (p)	2:19½
1905—The Huguenot, 6, b. g. by Chimes	2:07¾

Bred at Hillanddale Farm, Mamaroneck, N. Y.

1907—King Bellini, 6, b. h. by Bellini 2:13¾	2:12¼
1908—Necia, 2, blk. f., by Bellini 2:13¾	2:13¼
1909—Natoka, 4, b. m. by Baron McKinney 2:10¼	2:24¼
1910—Bonington, 4, ch. c. by Bellini 2:13¼	2:06½
1911—Brown colt by Baron McKinney 2:10¼.	
1913—Stella Maris, 2, br. f. by Atlantic Express 2:08¼	2:23½

(Missed in 1894, 1895, 1906, 1912 and 1914.)

DEATH CLAIMS COLONEL HENSHAW.

Thousands of people throughout California were grieved to learn of the death of Colonel Park Henshaw of Chico, the end coming about half past nine o'clock Saturday evening, June 12. Two years ago in March, while arguing a case in the Superior court at Oroville, the well known attorney suffered a stroke of paralysis of the brain, and while he had recovered to the extent that he was enabled to continue his legal practice, he knew that the end might come at any time, and for a week preceding his death had been in a precarious condition.

Colonel Henshaw, who was nearing his seventieth year, was one of the best known and best loved men of northern California, where he had resided since the middle sixties. As a boy he saw service in the army of the Confederacy, and as a man was one of the great number who attested the unity of former factions by serving as a Colonel of Volunteers in the Spanish-American war, being in command of the post at Benicia at the time of his discharge.

Always an ardent lover of horses and of the sport of racing trotters and pacers, Colonel Henshaw became a member of the Pacific Coast Trotting Horse Breeders' Association, and in the years when racing flourished in California campaigned a number of horses with success, his stable being in evidence pretty regularly in the money division at the northern tracks. He stood high in Masonic and other fraternal circles, and few men have held a surer position in the hearts of their neighbors. The remains were interred Monday afternoon at Chico with military honors.

BLUE BULL.

Billy Moore, the Grand Circuit photographer, is a great lover of Blue Bull 75. In a recent conversation he gave us some information which was new to us and which may prove of interest to our readers. Mr. Moore knew Blue Bull very well and used to own a son of that horse.

Queen, the dam of Blue Bull, was bred to Old Sam, the sire of Blue Bull, on a Sunday afternoon in 1854 after she had been ridden across country almost 100 miles. The result was Blue Bull 75.

Blue Bull was a pacer and came to his speed early. In 1863, at eight years, he paced a mile at Cincinnati in 2:30. This was considered fast in those days. The world's pacing record was 2:17½ by Pocahontas, but there were not many pacers then who had ever beaten 2:20. Blue Bull is said to have once paced a half mile under saddle in 1:05.

Blue Bull was a smooth finished horse, with a rather short back, and an exceptionally clean set of legs. He got very few, if any, unsound colts.

Mr. Moore once visited Daniel Dorrell and secured considerable information about Blue Bull and his sire. It was Mr. Dorrell's brother-in-law who bred Blue Bull and sold him to Mr. Dorrell as a three-year-old.

Blue Bull's sire was called Old Sam. He was owned by Mr. Dorrell when Blue Bull was gotten. Mr. Dorrell explained to Mr. Moore how he came to purchase Old Sam. One day in about 1853 Mr. Dorrell was driving or riding to town. His horse was a running mare. He met a neighbor driving the pacer Old Sam. The neighbor proposed that they trade horses. Mr. Dorrell replied that he already had six thoroughbred stallions and did not think he needed another stud. The neighbor proposed that they match their two horses on a nearby straight piece of road. If the running mare won the trade was to be even, but if the pacing horse won Mr. Dorrell was to give $100 to boot.

"It was a standing start," explained Mr. Dorrell. "Sam got off before I did and I never saw a horse pace so fast before. He beat me to the turn in the road and I traded with him, giving $90 to boot—which was all I had."

Mr. Moore asked Mr. Dorrell if the report was true that Old Sam was a claybank (yellow) colored horse with a black stripe down his back and with curly hair. Mr. Dorrell replied that Old Sam was a golden chestnut, with straight hair, but had a stripe down the back. He said he had owned many thoroughbred stallions but Old Sam was the best stallion he ever possessed. "When I rode him a fast quarter," Mr. Dorrell explained, "it made my long hair crackle just the same as though I were riding a runner."

At one time Blue Bull 75 was the leading trotting sire of the world, excelling even Hambletonian 10, but his family did not breed on and is now extinct in the direct male line. The circumstance is one of the shining examples of the uncertainty of breeding.—Horseman.

ABOUT McCLOSKEY 2:06¼.

McCloskey 2:06¼, the peculiarly marked trotting gelding in Lon McDonald's string, has at last graduated from the maiden class and now joins the ranks of race winners in consequence of his victory last Saturday at the exposition, when he annexed first money in the $2,000 event for 2:30 class performers. Three consecutive years, 1912-13-14, the gelded son of Theodosius 2:18½ has been more or less prominently before the public, during which time he took part in twenty-six events without ever once topping the summary, but his hoodoo is now broken and it is to be hoped that he will redeem himself and repay at least in part the great quantity of money which he has separated his owner and supporters from. McCloskey 2:06¼ has indeed been, up to June 5, 1915, a monumental disappointment and financial failure, one of the most disastrous pieces of horseflesh in recent years. Last July when the McDonald string reached Cleveland, word went out that Lon had the greatest collection of speed he ever trained and that his material was real good, particularly Star Winter and McCloskey. Those close in whispered that the latter horse could do everything the Ed Winter 2:12¾ gelding could and then some, consequently when Lon won the 2:15 trot with Duchess 2:07¼; the $3,000 2:10 trot, with Star Winter going the third heat in 2:05, and the 2:09 trot with Oakdale 2:07¼, it looked like he sure did have one mighty classy outfit, and the followers of his stable had more money than pockets to hold it, as they also loaded up heavily on William (4) 2:00 tickets at $500 a throw. Remembering that Star Winter had won his 2:05 heat by a wider margin than the first and second trip, and "feed-box" information was to the effect that the big gelding could trot away and hide from the fast little bay, the demand for cards bearing his name become so strong that the price jumped to $1,000 per. The Pittsburgh crowd, always "lousy" with money, backed Lassie McGregor 2:06¼ at the same price and the coin went in as if the race was over. The result is history, McCloskey couldn't and Lassie wouldn't. The Indianapolis gelding trotted about all the time but did not have within four seconds the speed claimed, while the mare clearly had speed to burn, but when demanded, took to aeroplaning and all the money went to the field players, the ultimate winner, King Clansman 2:06¾, not being supported by his owner or stable followers. Ten more times did McCloskey race in 1914 and ten times did he again prove a failure. Various parties assigned various reasons, some claimed he lacked speed, others that he had speed, but did not like the excitement of a battle; still others said that he did not take kindly to the shipping around and had a poor appetite in consequence of the continual change of scenes; while several close observers imagined that his stroke was too high and choppy, in other words to much of the straight up and down variety and lacking extension, which necessarily made his exertions in going a mile around seven or eight, extremely exhaustive. With even a five or six inch longer stride and the same rapid recovery, several seconds could easily have been added to his speed and likewise a considerable saving of energy. McCloskey 2:06¼, now a race winner, may show marked improvement during his coming campaign and we trust that if he really had any constitutional weakness in the past, that a winter's activity in the warm atmosphere of Phoenix and Los Angeles has benefited him.—American Sportsman.

DUBUQUE ENTRIES.

2:11 trot—Evelyn D., Isaac R. T., The Spartan Queen, Billy Mead, Captain Cacada, Miss Densmore, Princess Welcome, Lucy Patchen, Forty-Eight, Lord Kitchener, Tom Smith, Bertha Carey, Homestake, Nata Prime, The Comet—(15).

2:14 trot—Rose D., Isaac R. T., The Spartan Queen, Billy Mead, Henrietta, Mignola, Lord Kitchener, Silverstone, Homestake, Sure Mike, Review Tell—(11).

2:17 trot—Santolida, Boro Jolly, Jessie Pierce, Empress Yula, Monona Girl, Aunt Molly, Peter Dallas,, Johnston Bahur, W. J. S., Lena Leyburn, Judge Spencer, Lad McKinney, Gwen, Aldino, Royal Hall, Wakitza, Black Enamel, Miss Perfection, Rapello, The Proof, Baron Bates, Baroness Parmelia, Calumet, Mignola, Star Tramp, Slip Past, Ben Bingen, Aunt Barb, Baffin, Blanche, Linwood Mack, May Advice, Hamline Jay, Mistress Annorean—(34).

2:20 trot—John D., Nell Fellows, Timothy Hall, Olive Pack, Hazel Princeton, Bab Bingen, Louis S., Baffin, Red Silk, Helen Edwards, Early Alma, May Advice, Dette, Linwood Mack, Rapello, Main Lac—(16).

2:24 trot—Doctor Luster, Gray Rex, Beda, Grand Chimes, Brisac, Erda, Anzonetta, Binworthy, Zombro Chimes, Zoe Dillon, Roan Boy, Loretta Todd, Miss Perfection, Rapello, Spriggan, Celia Dillon, Caroline, Grattanice, Para Strong, Little Daisy, Socius, Red Silk, Helen Edwards, Rala Hall, Doris Watts, Dette, Baron Deen, Miss Parkwood—(23).

Three-year-old trot—The Substance, Sidney Forbes, Native King II, Brisac, Lowell Axworthy, Lord Aubrey, Lieutenant Aubrey, Last Sheet, Allie Watts, George N. Patterson, Azoff Pasha, Champ Custer, Miss Parkwood, Jauntfast, Baron Holt, Isworthy McKinney, Ann Cecil, Jessie B., The Index—(19).

2:07 pace—Tommy D., Joe Murphy, Grattan Royal, Little Prince, Bessie Bee, May Davis, Direct Gentry, Our Colonel, Baron Hal, Ovieda, Auto Zombro, Hal Mapes, College Gent—(13).

2:10 pace—Joe Murphy, Dan Mac, Hal Mapes, May Davis, Charley Tranby, Jim Hill, Blue Line, Major Hardie, Jal Ell Mack, Denny Boy, Society Leader—(11).

2:13 pace—Dexter M., Keelerville Kid, Kewanee, Annona, Sister Pearl, Oakland Girl, Belle Rex, Gypsey Margrave, Lee Dale, Grattaline, The Sheriff, Elsie Janis, Billy Law, Grace Ongale, Black Ball, Star Brook, Gamma May, Don B., Don Conamore, Imbro, Willis Woodland, Zomblack, Madam Mac, Hal Actor, Blue Line, Flaxy B., General Cooper, Frank J., Dad Mix, The Counterpart, Tom King, Ingolsbee, Major Hardie, The Co-Ed, Eva Direct, Don W., Bessie R., Symbol King, Enoch, Wanda, Strathtell—(42).

2:16 pace—Kewanee, The Landship, Nelly Worth, Mertie Johnson, Tony B., Little George, Lee Dale, Baron Wizard, Rena Locanda, Fanny Shirley, The Sheriff, W. S. Weber, George Edward, Don B., Don Conomore, Lizzie Dillon, Zomblack, Madam Mac, Pearl James, Moonstone Direct, Ed Dillon, The Co-Ed, Jenny Fitzsimmons, Eva Direct, Don W., Bessie R.—(26).

2:20 pace—Julia K., Chestnut Ash, Billy Staley, Gratta, Sister Pearl, Oakland Girl, Rexie, Hedgewood Lad, Cora Blackford, Fulton Leader, Oro Blanco, Peter Marque, Peter Nash, Princess Carlotta, Walter Richmond, Baron Watts, Billy Law, Grace Ongale, Bob White, Sir Shelby, Good News, Sadie Densmore, Lillian Green, Dicto, Mary Hal, Hal Actor, Flora Heir, Lucy Guy Dillon, Brown Obe, Pure Fast, Josie Knight, Leo Tell, Canute, Brook Axworthy, Kimberly Patchen, Justice B., King Shirley, Eva Direct, Don W.—(39).

Three-year-old pace—Eva Smoot, Veannee, Ebenezer, Princess Louise, Sheriff S., Gypwood, Ruth Muscovite, Zombro Final, Michael A. Powers, Wanda, Directum J., Queen B., Oregon Hal, Tiowa, Alix Merriman—(15).

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ELK TUSK HUNTING.

Every elk has two tusks of ivory about the size f the end of a person's finger and three-quarters of n inch long. Of what use they are to the elk seems o be unknown. They grow upon the upper jaw in he same place as a horse's bridle tooth. They ap- ear in the calf's mouth at about six months of age nd grow quite rapidly. They are nearly full size hen the elk is eighteen months old, but are hollow hen. They gradually fill up and become solid ivory hen the elk is the age of three or four years. In eating, the elk wears them off more or less. They row in layers from the outside in. The centers often seem to take color more readily than other portions from the vegetation eaten by the elk. This causes them to be a beautiful variegated brown color upon the outer end and makes them much sought for as charms and emblems. It is only when the elk are in their prime that these tusks are at their best. With too little wear they lack the beautiful color and shape. Those from the female are only about half as large as tusks from the male. So it is the teeth from the latter animal that are sought for and command the big prices. I have known one pair to sell for $85 and others at $50, but these prices are exceptions. The ordinary price of female teeth is from $10 to $20 per pair.

True, many imitations are on the market, selling as low as 50 cents each, that can hardly be told from the genuine, but, although an imitation diamond that it takes an expert to tell from the genuine can be got very cheap, the buyer wishes for and pur- chases the genuine. So in buying an elk's tooth— they wish the genuine.

How to stop the killing of the elk here in Wy- oming to supply the demand for their teeth has been a great problem to the game wardens. One of the first men to be convicted, who was fined $100 and costs, made the remark to the Court that he could soon make that back, and later all efforts were made to get evidence to convict this man, who, with three others, were known to be killing elk regularly. The Wyoming State Game Warden had wardens specially detailed to watch and arrest them if sufficient evi- dence could be secured to convict. They finally ac- knowledged frankly that they could not get the evi- dence necessary for conviction. So it was up to the people of the Jackson Valley. These men were killing hundreds of elk simply for their teeth, and this was casting reflections upon all residents of the valley. A meeting was called to discuss the situa- tion, but no action was taken except to choose a committee to wait upon these men and give them forty-eight hours to get themselves and belongings out of the valley. Before the time limit had expired they had gone. Later two of them were arrested in Los Angeles, Cal., trying to dispose of some of their spoils. They were brought up for trial at Pocatello, Ida., where they pleaded guilty and were fined. One of them paid his fine and was immediately re- arrested for killing elk in the Yellowstone Park. The other served his time and was then arrested on the Park charge. They were tried at Mammoth Hot Springs, Y. N. P., and convicted. One of them escaped from his guard and is now a fugitive from justice. The cases of the other two of the four poachers were tried before a grand jury at Chey- enne, Wyo. Though not present, true bills were were found against them and warrants issued for their arrest. They are now fugitives from justice.

But still the killing for teeth goes on.

A settler in snowshoeing over an unfrequented part of the valley found eighteen bull elk killed for their teeth and saw in the snow the spot where the poacher had stood and shot them down. He picked up some of the .40-60 rifle shells that had been fired. In nearly all portions of the valley where the male elk range in winter and throughout all portions of the mountains in summer the carcasses are found. Unlike fur-bearing animals, the tusks are prime the year around, and can be sent in any numbers by mail to dealers, under protection of the Post Office De- partment.

One evening at dusk in early spring I was return- ing home from Jackson upon the public road, when a shot was fired on the mountain-side above. Look- ing up, I saw outlined against the twilight sky an elk, who staggered and then fell. A man walked up to it and it tried to rise and then lay still. The next day I climbed to the place and found the elk—with only its teeth taken. The next evening a shot was heard from another point, but it was at dusk, when too late to climb to the place before darkness came, and the poacher had gone. It takes them but a mo- ment to extract the teeth and put them in their pock- ets, leaving the body for the coyotes. Should a warden arrest a man within half an hour and find the teeth upon him, it is insufficient evidence to convict, for a person can come by them legitimately, as he is allowed to kill two elk by law. The high price offered for tusks has tempted many settlers in killing their two allowed by law for meat, to choose two mature males, to get their teeth.

The game wardens have proved their inability to cope with the situation, for, in the face of the un- natural demand and high prices offered for tusks, they are helpless, and though the Wyoming Legis- lature unanimously passed a bill making it a felony to kill elk for their teeth, the chances of detection are so slight, and the reward so great, that a poor if dishonest man is willing to take the chances.

The damage does not stop in killing the elk from which the teeth were taken, for this has made a scarcity of mature males. Nature's plan of having none but the noblest of the race predominate during the mating season is upset, and weak, immature, and overworked males mingle with the females. Thus the offspring is below normal, and many are born late. They lack the spirit and undaunted courage a wild animal must possess to carry him through the long winter, and they become an easy prey to the elements. To obviate this scarcity of mature male elk, made so by the abnormal demand for elks' tusks, it was necessary, and the Wyoming Legisla- ture of 1913 did pass a law, limiting the residents of the State to one female elk on a license, and for an additional license, costing $15, the resident may kill one additional elk, male or female. The law allow- ing non-residents two elk, male or female, for a $50 license, remains as it was, but the number killed in this way is negligible, and the license money goes far toward maintaining the elk, and for warden serv- ice, so every person who buys elks' teeth is guilty of helping to destroy, not only the noble animal from which the tusks they purchase and display were pro- cured, but of encompassing the degeneration and decay of the future generations of elk.

You ask me what harm there is in buying the teeth of a winter-killed elk. I answer you, none, except the demand thus created and maintained, and unless this demand ceases the slaughter of these grand ani- mals for their tusks will go on.—S. N. Leek, in "Out- door Life."

THE PARKER TRY GUN.

Parker Bros.' try gun permits of being so adjusted that most accurate measurements may be secured for a perfectly fitting gun. In order to secure these measurements the makers have designed a try gun with a grip which moves in relation with the stock, thus giving a perfect fitting grip, no matter whether the stock may be made with a very little drop or with the maximum drop. This is accomplished by means of a universal joint which is located between the tang and the trigger plate and is adjustable, both up and down or to right or left. This permits any variation of heel drop, from one extreme to the other, and also gives any desired cast off, either to right or left. These adjustments are secured by means of socket headed adjusting screws, which are located in the tang and trigger plate and also on either side of the frame and are adjusted by means of the small wrench shown in the illustration. Adjustments of the comb are made by means of knurled nuts which are let into the body of the stock, and are held from turning by spring pressure. The rear end of the comb may be raised or lowered so that a Monte Carlo effect may be secured. The length of stock is also adjustable by means of similar knurled nuts, and the angle or pitch of butt plate may also be changed at will, so that any pitch desired may be secured. A still further refinement may be had by swinging the toe of the butt plate either to right or left in relation to the stock. This latter adjustment is made by means of a screw operated by the small wrench. After proper adjustments are secured, the gun may be used, as all parts are amply strong so to permit the use of the gun in demonsetrating. In order to secure the dimensions after the proper adjustments have been made, a special measuring device has been designed. It is firmly fastened to the top rib of the gun by means of locating pins and a thumb screw, and a vertical slide, which may be moved from one end of the horizontal bar to the other, gives the cor- rect drop measurements at any point of the stock. The pitch is also read by sliding the vertical slide to the end of the stock, and pushing it down across the butt plate, swinging it in its bearing so that the slide touches the butt at heel and toe. The gradua- tions on the vertical slide holder are in inches and will show the desired pitch of the gun. The cast off may also be read by measuring the distance of cen- ter lines, which are on the heel and toe of the butt plate, frim the end of the vertical slide, which is exactly central with the barrels. For determining the length of stock, the measuring device is removed from the barrels and is used as a pair of beam cal- ipers, a small finger attached to the bar being held against the trigger and the vertical slide held against the center of the butt plate. The horizontal bar is graduated, and the length easily and quickly read.

MANY RIFLE CLUBS ORGANIZED.

While the leading military authorities of the coun- try are all of one accord in urging Congress to pro- vide for a reserve to our established military forces, the National Rifle Association of America is going ahead, without the flare of trumpets or financial as- sistance from Congress, in the building up of a reserve in this country that will be most efficient in that it will be trained in 80 per cent of the requisites of an efficient soldier; that is, the ability to handle the rifle and shoot straight. The National Rifle As- sociation is doing this through its organization of rifle clubs throughout the country, especially among civilians. A great impetus to the movement was given through the enactment of legislation at the last session of Congress authorizing the free issue of "Krag" rifles and ammunition to rifle clubs under rules and regulations approved by the Secretary of War. The Secretary of War placed the organization of the clubs and distribution of the rifles in the hands of the N. R. A., which had an efficient organ- ization with secretaries in every State and was in close touch with the class of citizens whom it was desired to reach. The splendid military feature of this movement and one that will add considerably to the national defenses is that not only are citizens being organized into clubs and trained in rifle shoot- ing but the statistics show that about 60 per cent of the members of these clubs are ex-army and National guardsmen so that they are not only keeping up their training in rifle shooting but are already trained in other necessary attributes of a soldier. All that is necessary for Congress to do to secure an efficient reserve for the regular services, and one that would be along the lines that have proved so efficient in Switzerland, is to make the rifle club movement really broad and national in its scope by proper appropriations for the building of rifle ranges throughout the country and the purchase of target supplies and other paraphernalia for the carrying on of rifle training among citizens. When this has been accomplished, then will President Wilson really see the consummation of his desire to have a "citizenry trained in the use of arms."

Since the free issue of rifles and ammunition was authorized the National Rifle Association has organ- ized 438 clubs. These clubs are not confined to any particular locality but reach from Maine to Californ- nia. It is a fact, however, that the most successful ones are organized in the West where there are better facilities for the acquiring of ranges and where the class of young men who compose the membership of the western clubs are not the class to whom golf and tennis appeal. A great aid also to success in these western clubs is their being allowed to do their training on Sunday. A great many of these clubs have been organized and affiliated with the N. R. A. 438 clubs with a membership of 16,628.

One feature of this movement has been the organ- ization of numerous clubs by the employes of large industrial corporations. In some cases the employ- ers themselves have donated the land and assisted in the construction of the ranges, believing undoubtedly that it was better to have their men engaged in the healthy open air sport of rifle shooting than decreas- ing their efficiency by loafing around corner saloons. Recently rifle clubs have been organized in the Unit- ed Shoe Machinery Co., the Springfield Telephone Co., the Goodyear Rubber Co., the Packard Automo- bile Co., the Willys-Overland Automobile Co., the General Electric Co., and several others.

The Military Committees of the Senate and House, as well as the General Staff of the Army, might well take into consideration the work that is being done along these lines when drawing up their plans for a reserve for our army. The work done by these clubs is thoroughly systematized and would need little reorganization to bring them in line for practical utilization as a reserve.

New York and Pennsylvania lead for first place in the number of clubs, each having 39, but New York outranks Pennsylvania in club membership, 1,867 to 1,547. There are one or more clubs in all the States with the exception of Maryland and Delaware. The number of clubs and their membership by States follows:

Alabama, 2 clubs and 37 members; Alaska, 1 club, 31 members; Arizona, 12 clubs, 557 members; Ar- kansas, 2 clubs, 50 members; California 24 clubs, 795 members; Canal Bone 2 clubs, 37 members;; Colo- rado 9 and 282; Connecticut 7 and 384; District of Columbia 3 and 135; Florida 3 and 127; Porto Rico 1 and 27; Georgia 3 and 54; Hawaii 2 and 53; Idaho 11 and 354; Illinois 9 and 270; Indiana 11 and 811; Iowa 8 and 329; Kansas 10 and 247; Kentucky 4 and 244; Louisiana 2 and 87; Maine 4 and 85; Massachu- setts 22 and 881; Michigan 18 and 794; Minnesota 8 and 211; Missouri 8 and 241; Montana 22 and 814; Nebraska 9 and 266; Nevada 4 and 136 New Hamp- shire 4 and 222; New Jersey 7 and 177; New Mexico 9 and 280; New York 39 and 1,867; North Carolina 2 and 86; North Dakota 4 and 138; Ohio 32 and 916; Oklahoma 3 and 51; Oregon 9 and 404; Pennsylvania 39 and 1,547; Rhode Island 4 and 167; South Caro- lina 1 and 26; South Dakota 5 and 163; Tennessee 3 and 69; Texas 11 andd 410; Utah 8 and 325; Ver- mont 3 and 373; Virginia 3 and 112; Washington 12 and 421; West Virginia 3 and 49; Wisconsin 10 and 294; and Wyoming 6 clubs and 195 members.

Drink Jackson's Napa Soda.

THE GRAND AMERICAN HANDICAP.

The program of the coming Grand American Trapshooting Tournament is now in the hands of the printer, and will be ready for mailing about July 15. The program is not materially different from that of its predecessor, issued for last year's tournament. That program was so happily devised that it won the approval and support of the trapshooting fraternity to a marked degree. The schedule of events, in the main, follows the policy adopted by The Interstate Association in respect to its Grand American Trapshooting Tournaments, and which have proven in practice to be popular, equitable and successful.

As was the case last year, The Interstate Association will donate numerous trophies to be competed for. These trophies will be well worth winning, and the winners will have the satisfaction of having something besides cash to take home with them as proof that they have defeated "the best in the land at the greatest trapshooting tournament in the world."

Ten automatic traps, an extra trap for professionals and two "Joker Traps" will be installed. The "Section System," slightly modified, will be used. By using ten traps it is confidently believed that, barring inclement weather, it will be possible to finish each event on the day it is scheduled to be shot with a total of 700 entrants.

The Interstate Association and the Chicago Association of Trapshooters will spare no trouble or expense to make this, the sixteenth Grand American Trapshooting Tournament, come fully up to the high standard set by its predecessors.

A HISTORIC CUP SHOOT.

Monday morning, June 14, at the Missouri Athletic Club shooting grounds, St. Louis, Mo., was an open contest for the Hazard Double Target Championship Trophy which created much interest among a great many experts, both amateur and professional. This match was a curtain raiser for the Western Handicap trapshooting tournament which officially opened on the grounds of the Missouri Athletic Club, Tuesday, June 15. The contest for the Hazard Cup is on open to amateurs and professionals, and calls for 50 pairs, or 100 targets.

Sam Huntley was the holder of the Hazard Cup, but it was called in and placed in open competition on the above date, as Huntley had received no challenge for it. This trophy has been before the shooting public as a prize ever since it was offered as a live bird shooting trophy in 1901. After the shooting of live pigeons became generally under the ban, the Hazard Trophy was called in by its owners, the Du Pont Company, and became the acknowledged double target championship emblem, and many notable contests have been held for it. Sam Huntley turned in a card of 191x200 in a match for this trophy on one occasion last year, and it is believed that this is a world's record. At any rate, it won't be approached for some time to come.

The conditions governing contests for the Hazard "Double-Target" Challenge Trophy are as follows:

(1) All challenge contests to be at 100 pairs (200 targets) per man, 16 yards rise, the targets to be thrown from either three expert traps or from a magazine trap. In either case the targets shall be thrown in manner prescribed by the Interstate Association's Trapshooting Rules. (Revision 1904.)

(2) The challenger shall post a forfeit of $25.00 and mail same, together with notice of challenge, to T. E. Doremus, Manager Sporting Powder Division, E. I. duPont deNemours Powder Company, Wilmington, Delaware, who shall in turn notify holder of the trophy and the sporting press of receipt of such challenge and forfeit.

(3) The holder shall name date, hour and place for the contest within two weeks from the date of the letter mailed him notifying him of the receipt of the challenge and posting of the forfeit; but the date for the contest must be such as will allow the challenger at least ten full days notice of the acceptance of his challenge and the naming of the date, etc.

(4) The contestants shall mutually agree as to the referee, scorer, puller and trapper (or trappers), but if unable to do so, such officials shall be appointed by the Du Pont Company, or by such representatives of that company as may be present at the contest.

(5) Open Competitions.—Open competitions for the trophy may be held with the consent of the DuPont Company by any regularly organized gun club, such club sending to the Du Pont Company $25.00 to be handed to the holder of the trophy for the purpose of calling it in. All such open competitions shall be at 50 pairs (100 targets) per man, and the targets shall be thrown, and the officials for such competitions shall be appointed, in the manner prescribed for challenge contests.

(6) Any holder of the trophy desiring to have same in his possession shall be permitted to do so, providing he deposit with the Du Pont Company a bond in the sum of $750.00, the actual value of the trophy.

(7) The above conditions can be changed at any time the Du Pont Company may see fit to do so, upon said company paying to the then holder of the trophy the sum of $25.00 for the redemption of said trophy.

At the Traps

Powder Puffs.—The Golden Gate Gun Club regular monthly shoot is the card at West Alameda trap grounds tomorrow.

* * *

New Grounds Needed.—A decided advantage and impetus to the sport of blue rock trap shooting would be a properly fitted up local grounds. Which project may materialize here before long.

* * *

On the Watch Fob Route.—Andy Flickinger made a wholesale sweep on Du Pont watch fobs at the Portland tournament. Six runs of 50 or over is going some—and likewise secures six fob bars.

* * *

Capitol City Powder Puffs.—Over 100 members of the Big Time Gun Club attended the regular bimonthly shoot June 13 at the Schenck ranch on the Fruit Ridge road. This shoot, although one of the regular prize shoots, was more of a practice for the competition shoot with the Alhambra Gun Club of Martinez at that place June 27. That shoot will be a ten-man team affair and will be at 1000 birds. A barbecue will follow the shoot. The Alhambra Club will shoot against the same team on the Sacramento grounds two weeks later.

Among the local club members competition is keen as to who will make the club team. In the five classes there are a number of very good shots, and many of the clay bird smashers belonging to the Big Time Club are desirous of making the trip to Martinez with the team.

* * *

Idaho Trap Shooting.—E. C. Grice of Boise won the State championship June 15 after defeating E. M. Sweeley of Twin Falls in shooting off a tie. John Gray of Boise was high amateur for the tournament, with a score of 385 out of 400. E. J. Morgan was high professional with 391. The feature of the last day was Grice's run of 134 straight. Twin Falls was selected for the 1916 State shoot.

* * *

Western Handicap.—One hundred and twenty professional and amateur trapshooters from almost every State in the Middle West and from many Eastern States participated at St. Louis Wednesday last in the preliminary to the Western Handicap event of the tenth annual Western Trapshooting Tournament.

* * *

Live Bird Shoot.—Capt. A. W. Du Bray was high gun in the shoot held by the California Wing Shooting Club for June. In the medal and purse events at twelve birds each he came through without a miss, as he did in the six-bird pool. To go that one better in a shoot for back scores, he ran 12 in a row, as against 11 for Tony Prior. One the day this gave him 42 out of a possible 42, with Prior a close second at 41. The scores follow:

	Medal Shoot.	12-bird Purse.	6-bird Pool.
Du Bray	12	12	6
Haight	9	11	6
Hoag	12	11	..
Holohan	12	12	5
Nauman	10	11	6
Prior	12	12	6
Riley	12	11	5
Ruhstaller	11	12	4
R. H. Smith	10	11	..
B. Smith	10	10	4
Walsh	10	12	6
Worthen	10	11	..
Cuthbert	10	12	..
Sweeney	..	12	4

* * *

Alameda Shoot.—P. R. Fox was high gun at the Bay View Gun Club's regular monthly shoot, June 6. In the medal contest he broke 19 out of 20; in the Du Pont contest at 15 birds, he broke straight, while he tallied 12 in the other event. The scores for the three events:

L. Middleton	17	11	12
I. Foster	15	11	11
J. Millett	15	15	12
P. R. Fox	19	15	12
Mrs. Haughawout	15	13	15
G. White	14	12	13
W. Samuels	16	10	11
J. Stack	17	11	12
F. Blum	18	12	13

* * *

Moraga Valley Shoot.—Thirty shooters lined up at the Moraga Gun Club blue rock trap shoot June 13, at Moraga valley, Contra Costa county. The cup winners were: N. A. Howard, who broke 94 out of 100 birds for high score and first trophy; Al Cook, with 93 out of 100, won second trophy, and H. R. Phinney and H. D. Swales, who tied for the third cup, with 92 birds each. Phinney won the prize on the shoot-off. Dick Reed won the cup hung up for professional shooters with the good score of 93 out of 100.

Other scores shot were: M. O. Feudner 89, Art Williams 89, W. J. Wheeler 91, Harold Habens 89, J. G. Heath 89, Fred K. Burnham 86, C. H. Knight 91, C. A. Haight 87, B. H. Worthen 90, E. Hoelle 86, F. Webster 91, J. J. Hauser 88, R. S. Avery 90, Tom Wilkes 92, E. Wilkes 89, Dr. Merithew 91, J. J. Anderson 89, H. Overbaugh 92, D. E. Brockbank 82, H. Dutton 82, E. H. Forestier 80, Captain Du Bray 44 out of 50.

Interstate Association Tournaments—

June 15, 16, 17—The Interstate Association's Tenth Western Handicap Tournament, St. Louis, Mo., under the auspices of the Missouri Athletic Association Gun Club; $1,000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments — Pacific States and Territories:

July 1, 2—Vancouver Gun Club, C. A. Porter, Secretary, Vancouver, Can.

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Weick, Secretary, Laramie, Wyo.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

HOOKWORM IN DOGS.

[Continued from last week.]

"Our treatment has been directed to killing the worms by the use of thymol, and then expelling their dead bodies and the ova by the use of salts.

"The dog is starved from seven in the morning until seven at night, at which time the first dose of thymol is given in capsule. Two hours later, this dose is repeated, the dog being kept quiet and fasted till next morning, when a dose of salts is given. After the dose of salts has acted, the dog may be fed anything it will eat, preferably milk, beef tea, etc. Sherry wine may be given as a stimulant, in dessert spoonful doses. The dose of thymol should not be less than 10 grains for puppies and very small dogs, nor more than 30 or 40 grains for older dogs and larger. The dose of salts will range from 1 to 4 drachms, according to size of animal. If the symptoms do not abate in a few days, four or five, repeat the above doses. Repeat anyway in ten days.

"Should the European war continue much longer, it is probable the supply of thymol will be discontinued, as it is 'made in Germany.' To provide a substitute for thymol is a problem already being considered. This substitute is a time-honored oil of chenopodium, otherwise known as worm seed oil. It is even superior to thymol in several ways. It is less poisonous, and stands highest in the scale of anthelmintics. The coefficients of several worm destroyers are as follows, according to a Government report: Eucalyptus oil, 38; naphthol, 68; thymol, 83; oil of chenopodium surpasses them all, with a coefficient of 91.

"The plant from which this oil is obtained grows in great profusion in Florida, and is known under the popular name of Jerusalem Oak. The expressed juice from the green leaves of the plant is in high favor amongst the colored 'mammies' as a worm medicine.

"The dose of the oil of chenopodium ranges from 8 to 16 drops, according to age, for people. The same dosage would apply for dogs. The dose repeated every two hours for three doses. Two hours thereafter, tablespoonful of castor oil with a teaspoonful of chloroform is given. The oil is best administered on sugar. If unusual depression occurs from the use of the oil, stop it, and stimulate with strong, hot coffee, given by the mouth, or injected into the rectum.

"Another method of administering the remedy is to prepare a decoction by boiling one ounce of the fresh plant in a pint of milk and water, and administering this tea in wineglassful doses.

"After Treatment.—As the resulting anaemia is pronounced, this deserves notice, and a general tonic should be given. The following tonic pill is recommended. Each pill should contain the following amounts of the ingredients, according to age and size of the dog: Ferri reduct., grains 1 to 5; Strych. sulph., grains 1-100 to 1-60; Quin. sulph., 1 to 2; Acid. arsenosi, grains 1-30 to 1-10."

Hookworm infection of dogs and puppies in Pacific Coast kennels has not, at any time, been of a very pronounced nature. At the same time, instances are not unknown of this particular ailment.

Fish Lines

For the enthusiast who enjoys the weight of a angling trout creel on his shoulder there is a wide phere of opportunity available. Many of the fisher- nen are posted on particular localities, some well ersed on the fishing prospects of a far reaching rea, others, again, are always on the still hunt for ew places. Advices to hand last week from various oints may go somewhat towards keeping tab on uture or near fishing trips.

The recent dark nights favored the angler on many rout streams or fishing in a mountain lake. As for he Sierra streams, most of the main rivers have been somewhat high and roilly, the result of melting snow on the ranges. Recent reports from Truckee river points intimate that the water is a bit too high for good fly-fishing results. Bait results have been good. Conditions, however, are favorably changing from day to day and better fishing is anticipated, particularly for the rodster who is making a stay of a week or more.

James Thomson, who knows the Truckee, in the vicinity of Boca, better than many of the annual reg- ulars, left for that point last week for a two weeks' stay, a tip that will be taken and digested by a num- ber of wise Truckee rodsters. As for the Sierra lakes fishing, reports have been daily more favorable. Lake Tahoe is well in line for fine trolling and Inde- pendence lake has been given the hall mark of the anglers' approval. This water has the added charm of not being frequented by the market fisherman. William C. Murdoch, Dr. E. W. Westphal and F. W. Moody are now at Webber lake, where the trout are hungry for the fly lures.

The mountain lakes in the vicinity of Blairsden, Plumas county, are reported to be now free of ice and fine trout fishing can be enjoyed—bait and spoon fishing, however. For the dressed fly-book enthusi- ast the sport will come later on when the warm weather begins.

At Salmon lake the trout have been, for the past fortnight, running up the tributary creeks and spawn- ing. It is estimated that the fly-fishing season will begin about the 20th inst. The Salmon lake trout are solid, in good condition and full of fight. June is the month for the big fish. William Hughes has ad- vised city friends that the lake fishing near Mohawk is good now. A. P. Lathrop writes from Blairsden that he made one catch of thirty trout—a one and a half pounder being the largest—during a recent morning's lake fishing in Gold lake. The trout aver- aged from nine to ten inches.

Near Belden, although the Feather river is not quite clear and somewhat high, good bait and spoon fishing may be had. This same condition may be said to rule at present at other points along the river. Yellow, Indian and Chips creeks are clear and pretty near right for the rod and reel man. The trout are not averse to the royal coachman, professor or the hackle fly patterns.

At Big Bar, F. W. Bowman, among others, was daily landing acceptable baskets of fish. Near Quincy there can be found about a dozen good fishing creeks —just about getting ripe for the angler. George Durenberger, F. Foley, F. Horn and W Meadows propose to investigate fishing possibilities of that section for a fortnight. Dr. E. Moore found good enough fishing spots near Shady Rest to enable daily limit boxes for ten days to go to city friends. Camp Rodgers reports are favorable enough to induce several pronounced fly-fishermen to try that section of the Feather river for a week or more.

Marin county remains on the trout fishers' map in a pleasing way. Quite a few nice baskets have re- cently been picked up in the Paper Mill, near Point Reyes. Farther up stream, Harry Thomson's Satur- day trip was well paid with thirty-eight good-sized trout, caught between the "old paper mill" and Jew- ells. Hugh Copeland whipped the creek near Taylor- ville and also landed a good catch. That stretch of the creek contains a number of fine fishing pools and holes and is a good producer until late in the season.

A little creek, over near Bolinas bay, Pine Ridge, it is called, furnished Fred Gantner and Moe Uri with good baskets of trout Sunday.

Lake Lagunitas, it is reported, will be closed to angling sportsmen—an iron rule enforced by the water company is that fires must not, under any cir- cumstances, be lighted by anyone fishing at the lake or permitted in the vicinity. Some careless visitor started a fire. The result was that the company's rangers, the county foresters, members of the Lagu- nitas Rod and Gun Club and others, had a strenuous time in putting out what at one time threatened to be a widespread and sweeping conflagration.

Trolling for trout in the Big Meadows reservoir has been well rewarded with catches of huge trout by J. H. Vail and Dr. G. Gates recently. Near the im- mense dam many dead and dying trout can be seen. The water in that part of the reservoir is stagnant and kills the fish.

In the vicinity of Cloverdale the tip is that "trout fishing is now very good." Every rodster who has recently fished the Sulphur, Squaw, Racheria, Pilta and headwaters of the Garcia, has landed limit bas- kets of trout from 9 to 10 inches long. The queen of waters, royal coachman and light gray hackle flies seem to be the killers. S. A. Wells and Al Hoffman fished the Big Sulphur and Squaw creek a week ago very successfully. An amusing incident of this trip was the fact that hard-mouths, "Japanese trout," rose to the fly hooks and put up a pretty good fight at that. P. C. Katz and party put in two weeks near Ornbaun Springs, where the trout fishing was found enjoyable.

Near Laytonville two good streams can be found. No trouble to catch a limit. It is claimed that a lazy fisherman can fish from the bedroom windows of a resort near Laytonville and pick up fine messes of trout.

From Klamath Falls, in Oregon, Charley Keweli has advices that the fishing with both fly and trolling tackle is of the best. Williamson river and Spring creek, both famed trout fishing waters, is but a short distance away. J. H. Lindsey and Joe Harlan are getting a cut-in at the sport now. A. E. Davis left Friday and J. Brownell, J. B. Coleman, New Bosquin and other local trout tamers left for the Williamson this week.

Napa creek, near the mouth, attracted Joe Wheeler last Sunday for a try at striped bass fishing. He caught baby bass just about as fast as he could cast his tackle, the undersized striped fish being remark- ably plentiful. But his great surprise was that every now and then he would hook an 8 or 10 inch steel- head trout and land it.

A sample of what Soquel creek, a Santa Cruz stream, can offer, is illustrated by limit baskets taken by W. W. Richards and Walter Welch, three days running. Trout are most plentiful and small, bright flies will do the trick.

Isabella creek, a branch of Smith's creek, on the Mt. Hamilton slope, is evidently in good fishing trim, judging from the good luck of George McCullom and friends. Mr. and Mrs. Forbes gave the creek a two weeks' whipping and with fine results every day. E. W. Mobley vouches for the presence of trout in Smith's creek, for he returned Sunday with a basket containing a nice lot of trout. The Arroya Mocha, a branch of Smith's creek, reached via Livermore, was fished by Clarence Kolb and Frank Marcus Sun- day. Baskets of good-sized trout were landed.

The upper waters of Waddell and Boulder creeks have long been held in good repute by fishermen who have sampled those creeks and tributaries up in the remote ranges of the Big Basin. Heretofore the drawback has been a difficulty in reaching the good fishing ground. Particularly so for a short trip. It is different and easy now, since the new road into that Big Basin section has been in operation. This new route is from Saratoga to Congress Springs and thence into the Big Basin regions.

* * *

The sportsman who enjoys angling for the gamey black bass can find plenty of opportunity for his tackle in the Middle river branch of the San Joaquin river, near where the Santa Fe tracks cross the stream. A few miles away, near Holt, Trapper's creek and Whiskey slough are well stocked with both black and striped bass. That the Middle river black bass are of a size to be reckoned with is proven by a 9¾ pound fish caught near Orland, in the vicinity of the big irrigation pump. This huge bass was landed with a minnow-baited hook. An excellent catch of black bass, the largest being 4-pounders, was made two weeks ago by E. L. Schultz, Louis Gotthelf, W. J. Street, Bob Murdoch, Ed Smith and Charlie Breidenstein. Last Sunday Murdoch, L. E. Bemis, Tom Padden and George Klarmann tried their luck. A few catches resulted; the largest, a six and a half pounder, was taken by Murdoch.

Near Lodi big catches of shad have been taken recently, generally with dip nets. Shad, however, can be taken with a spinning spoon and also with a fly hook, and this method offers more sport than is generally supposed.

Local striped bass fishermen have had a lockout recently, but few bass are reported to have been taken at any of the usual resorts. The prevailing heavy winds can be regarded as one reason why the striped fish keep well hidden around bay resorts. Another reason given is that the fish are up-river spawning. Conditions seem more favorable for Sun- day.

A few days ago a catch of nine fine striped bass, weighing from 7½ to 17¼ pounds, was taken at the mouth of the Salinas river, in Monterey county.

Salmon are running in Monterey bay, on the Santa Cruz side, fish ranging from 4 to 6 pounds, the big salmon having not yet put in an appearance.

Halibut fishing in Tomales bay is just beginning and will be better in July and August. Heavy tackle is required to land these fish; simetimes the fisher- man connects with a 60-pounder. E. Brown landed a huge shark near Hamlet one day last week. The man-eater was 12½ feet long and tipped the beam at 600 pounds. Brown afterwards captured a 200- pound shark. These sharks are the deep-sea variety and come in from the ocean. They like a diet of stingrays and halibut.

There is a big run of smelt and tomcod now on in the bay. Large catches have been made from the city front piers, in Tiburon lagoon and at Sausalito.

Low tide, Sunday morning, exposing the abalone reefs along the San Mateo shore, will tempt many shell fish hunters. Moss Beach is a favorite abalone fishing ground with many.

* * *

Lost tackle is quite an engaging topic with rod and reel devotees and the rodster is inexperienced to a degree who cannot recall some interesting incident in this respect. Bill Street related a rather singular incident the other day.

"Perhaps the most remarkable incident in that line," he stated, "that ever came within my personal experience, happened one day while I was fishing the White House pool.

"I had on my leader the usual cast of three flies —when a big steelhead trout, at least seven pounds in weight, grabbed the top fly. I struck and hooked him fairly and squarely in the jaw. Then, of course, the circus began, and for five minutes the fun was exciting. At the critical time my leader broke—like a tailor's promise—just where it was knotted to the line. Away went the big fish, trailing my leader and two flies after.

"Did I recover the flies and leader- Not much, nor the trout either. The loss of the tackle, however, furnished me with a proof of the intelligence and ingenuity of trout that you couldn't get over with a step ladder. For later in the day, over near 'grassy point,' looking into the water, I'll swallow my rod if I didn't see that cunning old cuss of a cannibal hiding slyly, with the top fly still fixed in his jaw, and the leader, with the other two flies streaming out in the slow current, and, fishing for his dinner with the patience of Frank Dolliver, I watched him hook and swallow half a dozen fair sized trout, until Moe Uri came along and frightened him away. Fact, I assure you."

THE NEVADA FISH AND GAME LAWS, 1915.

Fish—Open season May 1 to October 15, inclusive. Individual daily limit, ten trout or bass, or ten pounds. No limit on catfish, carp or minnows. It is unlawful to take lake or river trout shorter than seven inches and brook trout shorter than six inches. Mere casting of line or other such act constitutes an offense. Unlawful to fish within 100 feet of any dam containing a fishway or ladder. Unlawful to fish two hours after sundown or one hour before sunrise. Unlawful to ship more than ten pounds of fish. (Ten trout allowed, regardless of weight.) Unlawful to have in possession greater number of fish than amount allowed by law. Unlawful to buy or sell any lake trout, river trout, or any brook trout which are less than fifteen inches in length. Penalty—Fine of not less than $25 nor more than $500; or prison term of not more than six months, or both.

Deer and Antelope—September 15 to October 15. Bucks only. Limit, one during season. No open season for females and fawn. Use of hounds pro- hibited. Unlawful to have in possession during closed season.

Mountain Sheep and Goat—Season closed until January 1, 1920.

Pheasants—Protected until September 1, 1920.

Bobwhite, Partridge, Other Imported Birds—No open season.

Sagecock and Sagehen—July 15 to February 15, inclusive. Limit, ten per day.

Grouse and Mountain Quail—September 15 to Jan- uary 1, inclusive. Limit per day, grouse, six; quail, fifteen.

Duck, Sandhill Crane, Plover, Valley Quail, Prai- rie Chickens, Curlew, Woodcock, Snipe—September 15 to March 15, inclusive. Limit per day: Valley quail, fifteen; duck, twenty; plover, five; snipe, fifteen.

Geese—September 15 to March 15, inclusive. Limit, ten per day.

Unlawful to destroy nest or eggs of any protected bird; to use a shotgun of larger than ten gauge; to buy, sell, barter, or trade any kind of game or game birds or to ship same out of the State; to kill or destroy or attempt to kill or destroy any blue bird, bluejay, thrush, mocking bird, oriole, humming bird, robin, meadow lark. swan, or any other plume, song or insectivorous bird.

License—It is unlawful for any male person over the age of 14 years to hunt or fish without having first procured a license so to do from the county clerk or from the game warden.

Fees—Residents, $1; non-residents, only for a period of thirty days will be issued to any person upon the payment of $2. Any person who may lose or have his license destroyed must make affidavit to that effect and procure another license in order to entitle him to hunt and fish.

Penalties—Violation of the laws regulating fish and game is a misdemeanor and punishable by a fine of not less than $10 nor more than $500, or by im- prisonment in the county jail for not more than six months, or by both fine and imprisonment.

Indians—the State game laws apply to Indians just the same as to white persons.

Fish and game acts provide that it shall be no de- fense for violation of any of their provisions that the game or birds were killed out of the State, or taken or killed by any other than the one in whose possession they are found; nor shall ignorance of the law be any defense.

All peace officers are required to enforce the game laws. Aid of citizens may be invoked when it is deemed necessary, or when resistance is offered.

Rem-UMC Notes.

High honors for practice day of the thirty-first an- nual tournament of the Sportsmen's Association of the Northwest, held at Portland, Ore., June 6, were carried off by F. Van Atta, shooting a Remington pump gun and Nitro Club shells and scoring 98x100. A. G. Flickinger and F. M. Troeh tied for second place, being but one target behind the winner. Flick- inger, shooting Arrow shells, made the long run of the day, breaking 73 birds straight.

THE FARM

DOING IT LARGE WITH STOCK.

We were mighty fortunate in getting in our exhortation two weeks ago to those having large lands and large money to throw them both largely into purebred live stock. If we had dallied over it it would haveen historic instead of prophetic, which is not half as smart. Anyone can write history, of a kind, but when it comes to prophecy—well, did it not take a priest and a whole procession of planets to tell when Mt. Lassen was going to do it again? And so we also claim to be in on the prophetic line, because within a week after we had goaded the millionaires to buy stock, what is described as "one of the largest sales of pure-bred stock ever recorded on the Pacific coast" took place. The news about it will doubtless be given by our live stock writers, but the upshot of the matter is that the Carnation Herd of Holstein cattle, whose achievements at the Exposition have been previously described in this journal, will henceforth find a home geographically in the heart of the San Joaquin Valley, and sentimentally, no doubt, in the heart of California. California had world-beating Holsteins before the capture of this collection, and so this great transaction becomes a new instance of the Dutch taking Holland. These cattle are pinks of perfection, as Carnations really ought to be, and will go forward with their predecessors of the same breed into the history of California's live stock achievements. Now, we are wondering what millionaire-outfit will make the next move. It does not need to be all Holsteins, of course. Even in dairy lines there are others, strong rivals in beauty, in performance and the power to uplift common stock. What millionaire or bunch of them is going to do it large with Jerseys, Ayrshires, Guernseys, or with some of the best continental breeds? When we chased the cows through Europe we did not see a herd of cows most famous in this country until we came near to the birthplace of each of the breeds. Many of our popular breeds have a hundred times the geographical sweep in this country that they have on the other hemisphere. This is not because these breeds are not counted good over there, but because there are others. When the Italians have their blue cattle, the Swiss their brown cattle, the French their grey cattle, etc., etc., why should they worship the black-and-whites of Holland and North Germany, or the red-and-whites or yellow-and-whites of Great Britain? They don,t and they won't, and that is all there is to say about it. They have breeds of their own, developed for their own topography and other natural conditions, and all of them watched and vouched for by their registry associations, experiment stations and government breeding farms. Here is a program for a millionaire: Study your land and its climatic and foragic conditions; then go abroad, after peace is declared, and pick out the place which closely resembles yours. California combines practically all European conditions, from Holland to the top of the Alps. When you find your place on the European landscape, study the stock and what the people do with it and buy a bunch of selections of the best they have, and ship them straight through via Panama, as you now fortunately can, and save much cost and worry. Bring home all the charming history and present doings you get of the breed, and you will find plenty, which you can load up with until you can talk down all other breeders, judges and the general public at every fair in the circuit.

But some reader may say: "Why are you giving this crazy advice; has not America all the breeds that are needed for various purposes and has not California good representatives of them already?" We are inclined to say, for practical purposes, yes; but there are two reasons why we should be sure that we have others. First, if we realize our chances as the breeding base for Pacific countries, we must have stock to suit the trade, and we should be able to give purchasers selection from all that is good in the world's achievements; second, we are talking to millionaires and not to common people, and the millionaire is not usually satisfied with the "old masters" which other people already have. He is often not content unless he can get one freshly dug up for him. We have merely indicated a way in which a millionaire can spend some money in an interesting way and extend the live stock resources of the State. And he can do it with cattle or horses, or whatever else is purebred and valuable.—Pacific Rural Press.

HOW TO COOK THE "OLD MAN."

At a meeting of the Ohio Farm Woman's Club, the following essay was read by Mrs. James C. Lampman:

"I have a receipt which I would like to give the ladies of this club. I have used it for years, aside from an excess of vinegar and pepper used recklessly at times, I have had excellent results. This receipt is entitled 'How to Cook a Husband.' If it seems lacking in any helpful suggestion from our friends.

"A good many husbands are spoiled in cooking. Some women go about it as if their husbands were toy balloons and proceed to blow them up occasionally. Others keep them constantly in hot water, while careless cooks freeze them by their carelessness and neglect. Some keep them in a stew by irritating words and ways. Not a few keep them in a pickle all their days. You can not hope to keep a husband tender and sweet in such a way. But they are really delicious when properly prepared.

"In selecting a husband do not be misled by such a silvery appearance, such as we look for in selecting mackerel; or by a golden tint, as if selecting salmon. Be sure to select him yourself, as tastes differ. Do not go to the market for him, as the best varieties are brought to your door.

"It is far better to have none at all if you will not patiently learn to cook him. A preserving kettle of the finest porcelain is none too good, but an earthenware pipkin will do if care is used in the handling. See that the linen you wrap him in is nicely washed and mended, and that the buttons are well sewed on. Tie him in the kettle with a card of love, as that cord called duty is apt to be weak. Otherwise they are apt to fly out of the kettle and become burned, for, like lobsters and crabs, they must be cooked alive.

"Make a clean, steady fire of love and cheerfulness. Do not be alarmed if he sputters and frizzles a good deal at first; some husbands do this until well done. Add a little sugar, but the vinegar and pepper with discretion. A very little spice used with good judgment improves him. Never try to turn him over with the kitchen fork or rolling pin, but gide him about the kettle so skilfully that he never discovers it. If he becomes puffed up, do not worry; most husbands do. Never allow him to think he is being cooked. Thus treated he will be very digestible and will agree very nicely with you, and will keep as long as you wish, unless you become careless and place him in too hot a place."—Exchange.

HOLDER OF THE BUTTERFAT RECORD.

Finderne Holinger Fayne, the Holstein cow that in a 365-day test, beginning when she was three years, four months and fourteen days old, produced 24,612.8 pounds of milk and 1,116.05 pounds of butterfat, thereby breaking the world's record for butterfat production, is truly a remarkable cow.

The sire of this cow is King Hengerveld Maggie Fayne and her dam is Mutual Holingen Fayne. She was bred by Bernard Meyer, but is now owned by the Somerset Holstein Breeders' Company of New Jersey.

To guard against suspicion of fraud the New Jersey Agricultural College, which supervised the test, employed eight different inspectors at different times during the progress of the test. The former holder of the world's record for butterfat was the Guernsey cow Murne Cowan, her production being 1,098.68 pounds of butterfat in 365 days. The new champion therefore holds the record by over seventeen pounds of fat and almost six hundred pounds of milk. While the quantity of milk this Holstein heifer produced has been beaten, her butterfat test was remarkably high, being 4.53 per cent. for the whole period.

Throughout the test Finderne Holinger Fayne was given every care. She had a caretaker who looked after her at all times. She is a large, rugged cow, a great feeder, and is none the worse for her great performance. She was housed in a box stall the greater part of the time while under test, but during summer was turned out in a paddock with other test cows for exercise and sunshine. She was milked four times each day by her attendant for the whole year.

The amount of grain she consumed for the first half of the test was about seventeen pounds per day, the amount being reduced during the last six months, till at theend of the year she was getting only thirteen pounds daily. This feed was made up of various dairy feeds and the proportions were changed at different times. In a hundred pounds of the mixture about twenty pounds each of two well-known dairy feeds, the remaining 60 pounds being hominy, bran, oil-meal, gluten meal and distillers' grains. In addition to the grains she had twenty pounds of mangels and all the natural meadow hay she would eat. This cow weighs at present 1,450 pounds, having gained more than 200 pounds since the beginning of the test.—Farm and Ranch Review.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

WOODLAND STOCK FARM

INCORPORATED

Offers for Service for the Season of 1915

PRINCE ANSEL

CERT. 1062

2, 2:20½ A. T. R. 29220

Sire of
Prince Lot 2:07¾
Joseph Ansel (3) 2:12¾
Lottie Ansel (2) 2:14¼
Laura Rogers 2:11¾
Adansel (3) 2:14½
Arista Ansel (2) 2:18¼, etc.

And the dams of
John Malcolm (2) 2:11½, etc.

PRINCE ANSEL is not only doing more than any other individual to perpetuate the fame of the great family of Dexter Prince, but he has few rivals in the land as a progenitor of futurity winning youngsters, as attested by the summaries of coast classics year by year. None more highly esteemed by horsemen in general. Fee, $50 with usual return privilege.

ROBERT BINGEN

CERT. 1061

2:11¼ A. T. R. 45033

Best Bred Son of

BINGEN 2:06 1-4

Sire of Uhlan 1:58; 14 in 2:10
First dam Episode 2:18 half sister to Peter the Great 2:07¾
Second dam Santos, dam of Peter the Great 2:07¾, J. Malcolm Forbes 2:08, etc.

ROBERT BINGEN, in every way one of the most desirable horses ever offered for service in California, represents the families whose blood is most eagerly sought by successful breeders today—Bingen and Peter the Great. He is the only son of Bingen standing for service in California and his book is rapidly filling. Fee, $75 by the season.

True Kinney 2:12¼

The best young McKinney stallion in California—a colt trotter and a coming sire. His first foals are among the best on the farm and show for themselves. Terms on application—season limited.

ALL STALLIONS LICENSED PURE BRED

Mares sent to these stallions will be cared for at $5.00 per month on pasture; $10.00 per month in box stalls. Colts entered in all the Futurities, Brood Mares, Racing Prospects and Saddle Horses for sale at all times. Correspondence solicited. visitors cordially welcomed. Address HARRY DOWLING, Supt., Woodland, Cal.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¼, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.

TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.

LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

Price: Paper $1.00. Cloth $1.50.
Sent Postpaid

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

Care and Training of Trotters and Pacers....

Price $1.00 — Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Victorious Parker Guns 1915

Look, Read, Remember!!!

At the Los Angeles Gun Club on May 23rd and 31st, Mr. Henry Pfirrmann, by scoring 192 targets out of 200, won the F. A. Johnson loving cup, shooting his

34-INCH BARREL PARKER GUN

Furthermore, being in a playful and receptive mood, he strolled out to the Venice Pier and scored 98 out of 100 targets with a

TWENTY-GAUGE PARKER

which so far is the world's record with so small a gun.

In 1914 Parker Guns won **The Grand American Handicap, The National Championship** at single and double targets, the

FIRST and SECOND YEARLY AVERAGES

and made the best scores on the Pacific Coast.

Follow the pace set by the champions of America and for either single or double target shooting use

Long Tom Parker Guns

For game shooting afield, enhance the pleasure of the day's sport and improve your skill by shooting a small gauge PARKER GUN, pioneer makers of small bores in America. Instructive booklet on small bore guns sent free on request.

For further particulars regarding guns from 8 to 28 gauge, address,

PARKER BROS., Meriden, Conn. New York Salesroom, 32 Warren Street;
or A. W. duBray, Resident Agent, San Francisco, P. O. Box 102

Makes Them Sound SMITH'S WONDER WORKER Keeps Them Sound

Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

Simply "press up" the carrier

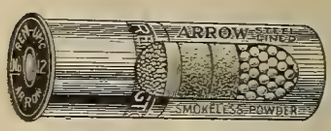
The Easiest Repeater To Unload Is The

W *WINCHESTER*

MODEL 1912

Hammerless Repeating Shotgun

We copy the instructions covering the unloading of the magazine from our catalog:



To remove the loaded shells from the magazine without working them through the action, press up the carrier. They will then be forced out by the magazine spring.

That's all there is to it. In fact, the instructions may be compressed into these four words, "Press up the carrier." No gun that we know of can be unloaded so simply or so readily. This is one of the many features that commend this gun so highly to shooters. Others are set forth in our illustrated circular. Send for it. It's full of information and free. Dealers everywhere sell Winchester guns.

THE CALIFORNIA STATE FAIR GAITED SADDLE HORSE

FOR FOALS OF 1915. FUTURITY No. 2. OPEN TO THE WORLD

ENTRIES TO CLOSE JULY 1st, 1915

The produce of any mare bred in 1914 to a stallion registered in either the American or Pacific Coast Gaited Saddle Horse Association.
To be given under the direction of the California State Agricultural Society and to be shown as weanlings, yearlings, two-year-olds and three-year-olds.

ENTRANCE and PAYMENTS:

MARES.—Mares to be nominated by July 1, 1915, when a payment of $2 must be made. Each mare's name, color and the name of the horse to which she was bred in 1914 must accompany the entry fee.
On Aug. 1, 1915, the color and sex of the foal to be given and an additional payment of $3 must be made.
On February 1, 1916, a payment of $10 will be due on yearlings.
On February 1, 1917, a payment of $15 will be due on two-year-olds.
On February 1, 1918, a payment of $25 will be due on three-year-olds.

CONDITIONS:

ENTRIES TO CLOSE JULY 1st, 1915.

Every foal of 1915 produced by a mare nominated herein is eligible to compete in all four classes of this stake by its owner making payments as herein provided in the division in which it is entered. Winners will not be barred.

All nominations and payments must be made to the Secretary of the California State Agricultural Society, at his office in Sacramento.

Nominators must designate when making starting or show payments whether the horse is five or three gaited.

STARTING AND SHOW PAYMENTS

On the first day of August each year the following payments will be due:

	Five-gaited	Three-gaited
On weanlings, to be shown in 1915	$10.00	$ 5.00
On yearlings, to be shown in 1916	15.00	10.00
On two-year-olds, to be shown in 1917	25.00	10 00
On three-year-olds, to be shown in 1918	40.00	15.00

CLASSIFICATION and DIVISION of MONEY AS FOLLOWS:

Stallion, mare or gelding	Five-gaited	Three-gaited	To sire of first money winner in each division	To dam of first money winner in each division
Weanlings, 1915	$ 300.00	$200.00	$10.00	$10.00
Yearlings, 1916	500.00	300.00	15.00	15.00
Two-year-olds, 1917	800.00	500.00	25.00	25.00
Three-year-olds, 1918	1200.00	800.00	50.00	50.00

The amount contested for shall be divided into six moneys as follows:

To the winner	35 per cent
To the second colt	20 per cent
To the third colt	15 per cent
To the fourth colt	12½ per cent
To the fifth colt	10 per cent
To the sixth colt	7½ per cent

MANNER OF SHOWING:—Weanlings, yearlings and two-year-olds shall be shown to halter and three-year-olds under saddle.
The right is reserved to declare the stake off prior to August 10, 1915, if same does not fill satisfactorily upon the refunding of all entries received.
In case a mare fails to produce a colt, produces a dead colt or foals twins, or her colt dies, the right to substitute by the owner another colt from a mare bred to a registered stallion is reserved on or before January 1st, 1916.
In case a nominated colt is dropped out, and later his owner desires to re-enter same, this may be done upon a payment of all sums which should have been paid had the entry been kept good and $25 additional
The Board of Directors of the California State Agricultural Society reserves the right to interpret and determine all questions affecting this stake.

JOHN M. PERRY, President. **CHAS. W. PAINE, Secretary, Sacramento, Cal.**

MR. AND MRS. TAYLOR.

When a beautifully engraved bit of stationery appeared in "ye editor's" mail early this week announcing the marriage on Sunday, June 20, at Newhall, of Miss Mabel Claire Gifford and Mr. Louis Benjamin Taylor, we made several false scores toward identifying the parties most intimately concerned—especially that "Mr. Louis Benjamin Taylor." Every time we came down we were feeling for the hobbles so strongly that the starter refused us the word, but finally we flattened away and ran down the identity of the gentleman in question. It hardly seems possible, but it is no other than our old friend "Lou" of San Jose, who has played us false by deserting the ranks of the bachelors of the trotting fraternity. He has not gotten "out of the family" by his recent performance, however, as "Mabel Claire" has a familiar ring that recalls that so far back as 1912, Mr. Taylor drove a nice three-year-old filly of this name to a record of 2:27 at San Jose, so the affair is not only one of some standing but Mrs. Taylor is of the right kind for a horseman's wife. Here's heartiest congratulations to them from a whole host of friends, with best wishes for a long campaign, sunshiny days and fast tracks, and a clear shoot for the wire in the last eighth of every start.

SUNDAY'S MATINEE.

One of the attractive features of Sunday afternoon's card at the matinee of the San Francisco-California Driving Club was the race in which lady drivers "had the call," Mrs. C. S. Payne, an eastern visitor, winning in straight heats and very nice time from her competitors. This is Mrs. Payne's second appearance at the exposition track as a driver, and the opportunity afforded her to indulge her pet hobby has added much to the pleasure of her visit at the big fair. Charles Becker with Jerry D. got away with the 2:18 pace, with J. C. Simpson and Emma M. furnishing most of the competition, while Bodaker, S. Christenson's game old warrior, decisively disposed of Harold Cohn's new trotter, Matawan, in the free-for-all. Decoto Boy earned the brackets for Frank Goularte by making it two straight in his event and St. Thomas took the slow trot after dropping one heat to Ateka. The summaries:—

First Race—2:25 trot:

St. Thomas	(R. Roberts)	2	1 1
Ateka	(B. Cohen)	1	3 2
Ida M.	(H. A. Boyle)	3	2 3

Time—2:26½, 2:23, 2:23½.

Second Race—2:15 pace:

Decoto Boy	(F. Goularte)	1	1
Hamburg Bell	(J. Ginocchio)	2	2
Tom Murphy	(E. T. Ayres)	3	3
Zoe Rankin	(H. Boyle)	4	4

Time—2:16½, 2:16½.

Third Race—Free-for-all trot:

Bodaker	(S. Christenson)	1	1
Matawan	(H. Cohen)	2	2

Time—2:15, 2:16½.

Fourth Race—2:18 pace:

Jerry D.	(C. Becker)	1	1
J. C. Simpson	(F. Goularte)	2	2
Emma M.	(W. Malough)	3	3
William Tell	(R. Roberts)	5	4
Marin	(P. F. Kane)	4	5

?Time—2:17, 2:16.

Fifth Race—Driven by women:

J. V.	(Mrs. C. S. Payne)	1	1
Ella Wilkes	(Mrs. Charles Becker)	2	2
Silkworthy	(Mrs. A. Ganjosp)	3	3

Time—2:28½, 2:30½.

Sunday's matinee left a bad taste in the mouths of a good many people owing to alleged crooked driving in the first race of the day, in which the drivers were R. Roberts with St. Thomas, B. Cohen with Ateka and Hugh A. Boyle with Ida M. The editor of this publication was not present and knows nothing of the case from personal observation, his information concerning the same being derived solely from subsequent conversation with various parties. The judges deemed that the conduct of the drivers was improper, and after the second heat applied the derrick to Mr. Boyle and put up Mr. Sexton. Tuesday evening at the club's regular meeting the matter was taken up by the board of directors, and after examination of numerous witnesses Messrs. Boyle and B. Cohen were suspended for sixty days, Mr. Roberts being requested to appear at the next meeting for an investigation of his alleged complicity in the case. During the week Mr. Boyle came into this office and asked that his statement of the matter be presented to the public, and the same follows:

San Francisco, June 24, 1914.

Breeder and Sportsman:—

I wish to make the following statement concerning the 2:25 trot at the matinee of the San Francisco-California Driving Club on Sunday, June 20, for the driving of Ida M. in which race I have come in for considerable abuse on the part of the daily papers and the public.

I made the entry for this race on Tuesday evening, June 15, and on the following day allowed her to be driven in a lady's race at the P.-P. I. E. meeting, in which she got all tangled up in her gait. On Saturday I had to work with her a long time to get her straightened out to go a mile in 2:35, and started her Sunday merely to fill in and keep from spoiling the race. I trailed with her carefully and she made no mistake and in the second heat I started to try to win with her, as I thought she would stand the drive. I pushed her as hard as I could without taking too much chance of making her break and was beaten only about a foot and a half in 2:23. The judges called me to the stand, set me down and put up Mr. Sexton. When he urged the mare she made the mistake I had feared in the second heat and was nearly distanced. I have offered to let any man try to beat 2:23 with her, including the man who claims I pulled her, and have had no takers.

One judge claims he saw me pull the mare, others charge me with crooked gambling. I bet $3 on Ateka the first heat because I thought she was the best. In the second I made no bets, and in the third I bet $15 on my mare because I thought she could win.

This is a plain statement of the circumstances as they actually happened.

Respectfully,

HUGH A. BOYLE.

In this connection the writer wishes to state that he prepared the above for Mr. Boyle's signature after Mr. Boyle had made known his wants and set forth verbally his version of the circumstances surrounding Sunday's affair. As payment for his "labor" the writer was tendered five bucks by Mr. Boyle, but unless the money has been spent in other channels Mr. Boyle still has it—and it looks like a long dry summer in the writer's line at that. Personally, the writer has no pronounced convictions in the case for or against the drivers suspended, but he does not agree with the action of the board of directors as taken Tuesday night. The San Francisco-California Driving Club is a gentleman's organization, and among gentlemen suspicious action in driving has absolutely no place. To the writer's notion, Messrs. Boyle, Cohen and Roberts should have been fully exonerated or expelled, once and forever. There should be no middle path in such a matter.—[The Editor.]

FOR FAST MILES—THE McMURRAY.

Next to having a good horse to go to the races with, the most important thing to consider is your bike. Race after race has proved the big part the sulky plays in winning performances, and the McMurray sets the pace with the champions and the big money winners. You not only feel the smooth, easy "go" of the McMurray, but you know that you have under you a stanch, reliable rig that will stand the hard knocks that sometimes come in a mixup. Your horse will not be handicapped through fault of the hitch, if it's a McMurray. Send to the factory at Marion, Ohio, for their new booklet entitled "A Clear Track to Big Winnings."

BUTCHERS' DAY AT PLEASANTON.

The Alameda Butchers' Exchange members and their friends look forward to having two great days on July fourth and fifth at Pleasanton Driving Park, that being the time and the place of their annual outing and celebration for 1915. On Sunday the time will be passed with motorcycle races, butchers' specials, vacquero contests, dancing and all picnic sports, while on Monday, with the general good times continuing in full sway, the main drawing card will be the trotting and pacing races in the afternoon, with the following fields: Oakland Stadium club special, Lena Lee, Sleepy Dick, Grand W., Hallie's Star and Allegro; 2:20 trot, Eloise Dell, Bon Cres, Brutus, Bonnie Ansel and Dione II; 2:20 pace, Bondalean, Asa Pointer, Zoetrix, A. B. C., William G., W. J. K. and Mountain Dee; 2:12 trot, Columbia T., Bodaker, Bonnie Ansel, Harold C. and Redeem.

This will make an attractive afternoon's sport, and the meat cutters invite everybody to come and help them have a good time. They have done well by the horsemen in giving such a card, and the public should show their appreciation by attending in goodly numbers.

OREGON STATE FAIR ENTRIES.

2:25 Pace—$500.

E. Batell, Moose Jaw, Sask.

Closing Days on P.-P.I.E. Tracl

Tenth Day.

Friday, June 18, 1915.—With less wind than "graced" the proceedings earlier in the week and an improvement in the afternoon's card from a racing standpoint, a fair crowd turned out to witness the best sport that has been staged since last Saturday.

The three-year-old trot brought out three nice youngsters, all of which were seen on Pacific coast tracks last season in the junior divisions of various classics—Nicola B. (2) 2:23½, driven by Will Durfee, Carl (2) 2:19¾ piloted by Charley Durfee, and Hemet Stock Farm's Allie Lou (2) 2:25, behind whom was perched the doughty Alonzo McDonald. The Hemet entry has been well thought of for a long time and had shown a nice turn of speed, but the colt stakes of the last two seasons have been so painstakingly and thoroughly "Durfeeized" that the majority of those present rather expected the event to go to Nicola B., who had also done some good work during the season. Carl, the brother to Esperanza, also was known to be a good young trotter, but a sore finger had put him short of work and he was not figured as a serious contender. "Nic" drew the pole and with the black horse opened up a nice little lead in the first quarter, Allie Lou losing quite a bit of ground owing to a break before leaving the stretch. After settling, however, the brown filly responded to McDonald's call by trotting gamely around the turn and down the stretch, going into the turn past the half in second position and forcing Nicola B. to trot in 2:18½ to beat her. "Nic" showed the way to the three-eighths in the second heat, with Carl and Allie Lou on nearly even terms with him, the latter taking the lead past the half and never being headed, trotting her mile a quarter second faster than the first heat. The last heat looked like a real race between the winning pair, Nicola B. taking the lead to the quarter with the Hemet filly almost abreast of him, Carl going the long route. Down through Wind River Canyon Allie pushed her nose ahead of the Carlokin colts and went into the turn in the lead. In the stretch both youngsters were coming strong to the seven-eighths, with Carl apparently hopelessly out of it, when "Nic" went to a break that settled his chances, McDonald earning the crowd's approval by pulling his entry down almost to a walk to avoid shutting out the black colt driven by the elder Durfee. A winning of $2500 is a tidy start for a three-year-old filly, and Mr. Doble and A. L. Blackwell, who got her ready for her race here, promise that she will be still better in the fall.

After McDonald and McCloskey had given the other starters for the 2:14 trot the once over they decided to round up all the first moneys, and set about that task in a very businesslike and methodical manner—also a highly successful one. In the allotment of positions McDonald's luck held as usual, McCloskey getting the pole and going away in the lead, with Loe Blossom trailing, Bonnie Ansel third, and Dr. D. C., who was unsteady, last. Going around the turn Loe Blossom took out for the drive but spoiled her chances by breaking in the stretch, Bonnie Ansel trotting a fast last quarter and coming stoutly through the stretch to finish lapped up on McCloskey, the official time of the last quarter being 30 seconds and the big mare doing it a bit better. Bonnie led from the first turn until the final eighth the second time out, McCloskey having the legs of the party in the last brush and the time being nearly four seconds faster, Loe Blossom again breaking. The third heat, though not fast, was the nicest race of the three, the leaders being close together all the way. Dr. D. C. broke just as the word was given and McCloskey went away with Bonnie Ansel second and Loe Blossom third, close up. Down the stretch Childs tried for the lead by way of the inside passage but fell a bit short in his drive. In the stretch each driver called for what his mount had left and they buzzed the quarter in thirty flat, Loe on the pole being lapped up a bit farther on McCloskey's flanks than was Bonnie Ansel on the outside.

"Good, better, best" is the way Fleeta Dillon raced at the exposition meeting, and today was her best day—a straight heat win from a number of pretty good wigglers. The first time she started the crowd put it down as a lucky day for Lawrence Shuler when she saved her entrance; next time out they developed a little more regard for her, and tonight she has all the respect that is due a perfect lady with the brackets after her name in the Year Book. Directline was well favored by most of the spectators, and in the first score Fleeta evidenced just a wee bit of the old inclination to "trip the light fantastic," but came down good the next time and had copped the lead before well out of the stretch, never to be headed. Buzz Patch showed a good flight of speed at various parts of the mile that should make her useful with age and experience, and Directline finished strongly.

Having had a good heat thrown under her belt Fleeta was on her good behavior the next time and went to the front never to be headed, Directline and Miss Harris M. making most of the racing behind her. For the third heat Madam Mac decided to rehearse a little of the lines of a "leading lady," putting Fleeta behind her after passing the three-eighths, Fleeta being second and Directline third going into the turn. On the turn McDonald set sail with Miss Harris M., who is one of the nicest three-year-old pacers seen here in a long time, and in the stretch Fleeta, Miss Harris M. and Directline all passed the Madam who appeared to regard the long lane as a bit too long. Fleeta finished gamely and stood off the Peter the Great filly with Shuler sitting still and never lifting a hand. The lad gets along well with the nervous Sidney Dillon dame, and if she improves as much later in the season as she has here in three weeks she will be one "pacing fool" by fall. The summaries:

San Francisco, Friday, June 18, 1915.
Three-year-old trot, purse $5,000:

Allie Lou, br f by Kinney Lou 2:07¾—Lady Zombro 2:24¼ by Zombro 2:11.....(McDonald)	2	1	1
Nicola B., b c by Carlokin 2:07½—Atherine 2:16¾ by Patron 2:14¼.....(W. G. Durfee)	1	2	3
Carl, bl c by Carlokin 2:07½—My Irene S. 2:28¾ by Petigru 2:10½.....(C. A. Durfee)	3	3	2

Time—:34 , 1:10 , 1:45½, 2:18½
:34 , 1:10½, 1:45¾, 2:18¼
:34 , 1:09¾, 1:45 , 2:21

Distribution of purse—Allie Lou $2500, Nicola B. $1250, Carl $750, Association $500.

2:14 trot, purse $2,000:

McCloskey, br g by Theodosius 2:18½—Maggie C. by Odd Socks 2:20½.....(McDonald)	1	1	1
Bonnie Ansel, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20.....(Spencer)	2	2	3
Loe Blossom, ch m by Lepide—Lillian W. by Harry Hontas 2:24¼.....(Frank Childs)	3	3	2
Doctor D. C., b g by Del Coronado 2:09½ (Nugent)	4	4	4

Time—:33½, 1:10 , 1:44½, 2:14½
:32 , 1:06¼, 1:40 , 2:10¾
:33¾, 1:09½, 1:45 , 2:15

Distribution of purse—McCloskey $1000, Bonnie Ansel $450, Loe Blossom $350, Doctor D. C. $200.

2:19 pace, purse $2000:

Fleeta Dillon, b m by Sidney Dillon—Lady Hilda Hills by Wilkes Boy 2:24½ (Lawrence Shuler)	1	1	1
Directline, br h by Baron Direct—Woodland Echo by Woodline 2:19.....(Joe McGuire)	2	2	3
Miss Harris M., b f by Peter the Great 2:07¼—Mary Allen Stout by Ondale 2:23½ (McDonald)	4	3	2
Madam Mac, br m by Expressive Mac 2:25½—Daughter of Hawthorne.....(C. L. DeRyder)	3	4	4
Zoetrix, ch m by Zolock 2:05¼—Trix Marshall by Nutwood Wilkes 2:16½.....(Chadbourne)	5	5	5

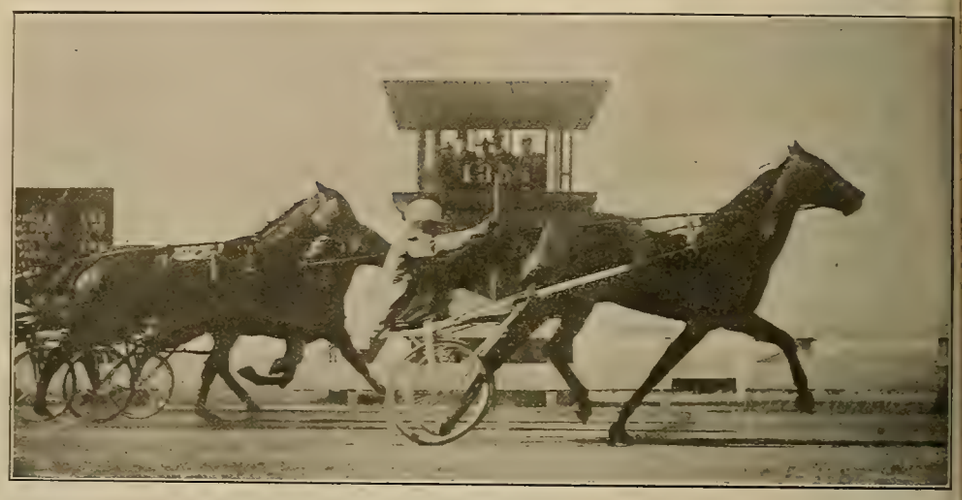
:32 , 1:06 , 1:39½, 2:10¾
:32 , 1:05¼, 1:40 , 2:11¼

Distribution of purse—Fleeta Dillon $1000, Directline $450, Miss Harris M. $325, Madam Mac $225.



Last Day.

Saturday, June 19, 1915—White Sox, mainstay of the Berry-Durfee stable and darling of the California contingent in attendance at the exposition races, was declared queen of the coast this afternoon in one of the greatest demonstrations ever seen on a race track after she had wrested a hard won victory in the 2:06 pace from a field of seventeen of the crack pacers of the land. Through five gruelling heats the game bay lass carried the hopes of thousands of Californians who have cheered her and her driver to victory in former seasons, and when the contending horses jogged back to the wire from that last heat in which she snatched victory from what seemed impending defeat her admirers swarmed to the track in tens and scores and hundreds, each bent on paying her his homage and extending congratulations to her driver.

It was a great race. Description of it, however vivid, accurate, or detailed, cannot begin to do it justice. Only superlatives among adjectives are of use in telling of it, and they are too few to use without endless repetition. When the 2:07 pace was staged on opening day there were plenty who would admit that it was a wonderful affair, and that it might be a long time before a better one was seen. They were right, it might have been a long time, but it wasn't—only a short two weeks was to pass before they were to witness a greater one.

With Doctor Burns Jr. eliminated from the contest, it was a foregone conclusion that the pace would not follow the fashion set in the big trot on the preceding Saturday and be won in straight hea Plenty of horses had a good following present, w Hal Boy and White Sox the popular choices, thou others carried a world of deserved respect. With many starters and so much money involved, it w a cinch that it would be a race for blood, and t horses drawing good positions in the first heat wo have a whole lot the best chance for some big mon There were seventeen drivers in the race and sev teen drivers had identical ideas as to what th would do in that first heat if they failed to go aw with the leaders—drive one heat for a position another. Someone was bound to get the worst of and seventeen horses were in for an awful drive.

With Starter Updegraff, Clerk Kelley and Associa Judges Brown and Considine on hand to watch ca fully that he did not spring any Clark Street tricks demonstrating the truth of the shell game ada that the hand is quicker than the eye, Presidi Judge Mawnus Flaws rattled the little box and beg dealing out positions "without fear or favor," b with a heartfelt though unspoken prayer from t Kansas Kernel that the pole might not fall to a ba actor—and here the fates were kind both to t starter and to Willie Durfee. Hal Boy was numb one on the card, and as Flaws rolled the ball in h fingers the judges craned their necks to see th there were no "dupes" palmed in his lily white mit but Magnus is an honorable judge and the turning the flat side of the pea-ball revealed the fact th the northwestern king pin had been handed a platt containing a "dozen raw," or twelfth position. He are the balance as they came from the leather bottle Booze 6, Teddy Bear 3, Margot Hal 8, White Sox

FOURTH HEAT, 2:06 PACE
Hal Boy slips one over—The Beaver and College Gent battle for place.

Homer Mac 14, The Beaver 16, Red Rock 5, O. U. C 3, College Gent 4, Hemet 13, Impetuous Palmer 15 Little Bernice 10, Twinkling Dan 7, Walnut Grove 9 San Jacinto 11, Princess Patch 17.

With O. U. C. in the front tier there was many a Pleasanton fan present "honing" for him to be or his good behavior, but for a few scores he was very rank indeed—and when O. U. C. performs he per forms, not in any half-hearted way but spectacularly and with great zeal and enthusiasm. College Gent ordinarily a gentleman in any company, was another bad bird today, and Impetuous Palmer, who has a preference for plenty of room and not too much company, was finally placed on his own responsi bility. Eight scores had rather set Starter Updegraff to feeling for the hobbles, too, and when they came down the ninth time he gave them the word, with the Gent on a break and Margot Hal, entitled to a front tier position, clear in the drag on the outside; McDonald, not knowing that Kinney was on his own protection and forgetful of the right reserved by the association to start any heat after the fourth score, was not expecting the word on account of the fact that Impetuous Palmer was doing a solitary jig far behind the field.

Once away, O. U. C. forged to the front, closely followed to the quarter by the pack, among whom White Sox and Homer Mac were the nearest. Down through the Streets of Cairo, Homer wiggled his way to the front for a time, with Teddy Bear also getting into reaching distance, but going into the turn Sox and O. U. C. were once more up in the lead and finished that way, inches apart, in 2:05¼, with The Beaver and Hal Boy, who had wormed their way through from their starting point in the jungles, romping in third and fourth. Twinkling Dan, going a mile as good as the winner, or very nearly so, just missed the money, while Sandy Smith waved the red flag on half a dozen pacers who got away bad. Time—:30½, 1:01¾, 1:34¾, 2:05¼.

With the field cut to less than a dozen they were not so hard to handle and were sent away without much trouble, Hal Boy and White Sox going out into the lead for a quarter in thirty flat, Twinkling Dan

O. U. C. both getting in bad on the turn and ng several lengths. When Hal Boy hit the half r a minute and two and a half seconds had sed, and another fast mile was guaranteed, as ite Sox was right with him and Red Rock, Teddy ır, Homer Mac and The Beaver were all close up. ound the turn they raced in similar style, going to three-quarters in 1:35¼, and in the stretch Sox ssed the Boy for a half-length win, The Beaver and mer Mac indulging in a rousing drive for third ney and College Gent passing Teddy Bear and d Rock. The time of the last quarter was thirty t and Sox must have stepped it at least half a cond better. O. U. C. and Twinkling Dan did well save themselves from the evil machinations of e anarchistic Mr. Smith.

Now two heats in 2:05¼ in June are enough to ke the starch out of even a celluloid collar, and the lure of White Sox to head the summary in straight ats after such a performance was no surprise—e surprise would have come from such a winning. evertheless she set sail merrily the next trip and ok the bunch to the quarter in :30¼, Hal Boy and llege Gent outfooting her through the Moorish laze and rounding the turn into the home stretch length in the clear. The pace told on Hal Boy d Barney set out with College Gent and passed e little fellow, seeming for a few seconds to be od for a win. The Gent, however, had had to go few fair heats himself to save his bacon in the ce, and he, too, began showing signs of a desire to t in Barney's lap. This was "pickings" for O. U. C., d Frank passed Brother Marvin in a very unfra- rnal fashion and then collared the tiring Gent for win in 2:07¼, Sox, Homer and The Beaver also assing Hal Boy and leaving him unplaced for the nly time during the race.

The other race of the day had ere this been con- luded and the crowd was in for a twenty-five minute ait, but the arrival of the exposition's "beauty unch" guests about this time not only served to ass away the time for the crowd very pleasingly, ut also broke up the "zits" game in the press box, 's the famed delegation was allotted space just be- ind the pencil pushers. The spectators gave no igns of uneasiness over the delay, and when the ight pacers reappeared everybody was in the old amiliar place, looking forward eagerly to another ood contest—nor were they disappointed.

Now last year Hal Boy figured in but one race here the speed was of the sensational variety—the ne at North Yakima where he, College Gent and Dvieda rounded up their season's records—and there was considerable spectaculation during the winter as o his real staying qualities. Brother Marvin, how- ever, who has something under his hat beside a nice shock of hair and a sunny smile, had no doubts in his own mind as to what the Boy could do, and while the bunch were parading past him in the final quar- ter of the third heat he was laying his plans for the fourth and fifth. White Sox had already grabbed a big portion of the stake but there were five thousand large useful dollars to be distributed on the rank in the summary—and in the bushes one may ship many a weary mile and not race for five thousand plunks in a campaign of weeks. Also (whisper gently, Gen- evieve) there was a persistent rumor that the Omaha contingent had some nice bets on their horse to win the race, which was yet possible. Mr. Durfee, Jr. also had ideas of his own concerning this fourth heat, and Brother Frank's designs upon it were not wholly above suspicion.

Brother Frank, however, had none too much luck in the start and was shut off on the pole in a very few rods, White Sox, Homer Mac, The Beaver and College Gent all showing O. U. C. the way to the quarter. In the shuffle for positions in Hungry Hol- low Homer Mac and The Beaver both led at various times, and around the turn College Gent began a drive that landed him first at the three-quarters, which is exactly four hundred and forty yards, on reputable tracks, from the post where they pay off. Now comes Brother Marvin from back in the drag where he had had no wind to buck, and with not even an "excuse me, folks," he proceeded to improve his chances for that summary standing by passing the entire bunch of leaders for a safe win in 2:07¼. The Beaver and College Gent, the Canadian invad- ers, scrapping it out for place. The question as to Hal Boy's gameness was no longer a question. Dur- fee, endeavoring to get White Sox in the clear for the drive, got into a bit of wavy track that threw the mare off her stride and caused her to finish unplaced.

Only the four horses standing for the summary money were to come out for the fifth and final heat, and when Starter Updegraff announced that one more heat would be necessary for a decision, some enthusiast voiced the sentiments of the crowd by shouting "We'll be here"—and they were here. Most of the spectators you couldn't have forced off the grounds, as the race was just getting good. If Hal Boy won the heat and Sox was worse than second, the Omaha crowd would cash, though Hal Boy's actual winnings from the stake would be less than those of the Berry mare, but if Sox was as good as second, no matter who won the heat, the race was hers. Some fix, Agnes, some fix!

Considering the game they had been bucking, it was a pretty fresh looking quartette that answered the paddock call, and they took the word at a two- minute clip. White Sox on the outside came with an awful rush and Durfee began pointing for the pole, a cry of dismay going up from the steen hundred throats when the lass broke in the first eighth and the others passed her, The Beaver breaking soon afterwards and leaving Hal Boy and O. U. C. out in front by several lengths. The Omaha bets certainly looked good, but jubilation was premature, as Durfee soon had the mare settled and set grimly about put- ting her at the wire one-two. Down the stretch both Sox and The Beaver closed up a lot of distance and on the turn Sox was safe in the coveted second posi- tion, Hal Boy merely clinching second money by his win in 2:09¼. Down on the track swarmed the cheering multitude to grab Durfee's hand and con- gratulate the other winners as well; around the mare's neck dainty Miss Irene Whorff placed the floral wreath that was her insignia of rank as the pacing queen; ten thousand lusty lungs gave ap- proval of the trio, Miss Whorff, White Sox and Wilyum Gee; a dozen camera shutters clicked—and the exposition race meeting was over!

The other race of the day, the 2:15 pace, was also a contest that brought out a fair field and good time, though the big Demonio gelding, Potrero Boy, rather outclassed the balance of the entrants. Daniels drew the pole with the husky lad and went away in the lead, surrendering it to Lizzie Dillon owing to a break on the turn. He recovered quickly, however, and set about making up his lost ground in a very convincing manner. In the stretch Daniels tried to come through on the pole but the hole wasn't large enough when he got there and he had to be content to finish lapped up on Lizzie, whose win in 2:09¼ gives Sidney Dillon another one for the ten list. In the other heats Daniels won much as he pleased in slower time, though the Boy left his feet some yards from the wire the last trip, the judges deciding he had enough "edge" over the nearest horse to win anyway and placing him accordingly. The day in detail:

San Francisco, Saturday, June 19, 1915.

2:15 pace, purse $2,000:

Potrero Boy, b g by Demonio 2:11¼—Potrero Girl by Prince Airlie .....(Daniels) 2 1 1

In the hope that saddle horse breeders would rally to its support, the State Agricultural Society has extended the date of closing for the gaited saddle horse futurity to July first. Do not overlook this opportunity for your gaited foals this season.

White Sox—An Equine Fairy Tale

Being a Harmless Narrative of Charley Durfee's Dogy Filly and Some of Her Descendant

"Years and years ago, before your time and my time and before lots of other people's time" — which, if memory serves us not false, is the proper introduction to a genuine, old-fashioned, honest and truly fairy tale — there lived down in a little town called Los Angeles, a colt named Bob Mason. He was the talk of the town in the early eighties, and the man who helped develop him and watched him pick up speed like a real race horse decided that he could use another of the same kind very handily in his business, so he picked on a filly located not far from where he lived, owned by a man named Workman. This horse scout's name, lest you get a little uneasy in your mind as to what this fairy tale is about, was Charles A. Durfee (the A., as we have previously remarked, being the abbreviation of Mr. Durfee's middle name, which is McKinney), and the filly he bought was a bay lass named Geraldine, by Echo and out of a daughter of the thoroughbred stallion Rifleman, a true pioneer among stallions of the Golden Slope.

In possession of his new prize, C. A. set about training her at Los Angeles to be a world beater, but while she had a good turn of speed and apparently wanted to trot all right, she had some physical deficiency that hurt her when asked to go beyond a certain limit, and Charley worked long and hard without making much headway.

Now to turn back another page or two, Durfee had in his stable at this time, the year of grace one thousand eight hundred and eighty-three, a son of Legal Tender and the Graves Mare by Volunteer 55, rejoicing in the appellation of Dashwood. Evidently the breeder had great hopes of this lad when he named him, and endeavored to give him something to live up to in the way of a name, but these fond hopes were defeated. Dashwood never lived up to the name, but the name exactly fitted Dashwood, as he would dash—and that was all. He would, could and did step quarters right at thirty seconds, but a quarter was about as far as he cared to go, thank you, and he never achieved a record. He was bred to a few mares that spring and was a very slow server.

The stage is now properly set for the next scene, which reveals a stable boy walking a bay mare up and down the cooling out trail before the Durfee stables. At one side you will observe a stall door, the upper portion open, revealing a prancing stallion. In another portion of the foreground we call your attention to a rather irate gentleman, one C. A. D.,—flustered because Geraldine, in spite of all his efforts, was failing to live up to his hopes of her. Suddenly he observed that the mare, still hot from her work, was in season, and on the impulse of the moment he strode to the door of the stud's stall, threw it open, and nature did the rest.

Now "Pa" Durfee's opinion of Dashwood was not mountain high, and after he had cooled down a bit he hoped the mare had failed to catch, so that he might breed her to another and more worthy sire, but of course her case was settled—she was safe with foal, and in the spring of 1884 gave birth to a filly. Some time later, not over three or four months, Charles A. decided that it was possible that a year's let up had helped Geraldine, and he put her in training again—incidentally with no great success. His opinion of Dashwood had not increased in leaps and bounds in the meantime, and as he figured that the filly foal would never be worth a counterfeit nickel anyway, he left the little lady on good grass to rustle for herself. She was named in a few little "home affairs" of colt stakes, but would never do, of course, so why worry about her?

Now let a few months pass and the year of 1886 roll around. Young stake trotters were not numerous in sunny Southern California, it looked like a case of very small fields in the stakes, and Charles A. bethought himself of a certain filly down on the salt grass pasture that had stake engagements. He hadn't seen her for a long time, but he went down and got up one that answered to the description, a nice big filly, and brought her to the track, marveling at the growth that she had made under such unfavorable circumstances. He didn't marvel long, however, for a neighboring horseman came along and after asking C. A. whatinell he meant by taking up that filly, proceeded to prove his ownership of her. Charles A. had simply and unintentionally taken up the wrong filly, and with his pasture boss to help him pick out the right one he made another trip to the salt grass.

Deponent further sayeth that C. A. "alibied himself" by admitting that he saw his own filly at a distance on his original trip, but had mistaken her for a coyote. She was a little bit of a scamp, wild as any doe, with a mane and tail full of burrs—but she was a stake colt, and stake colts were scarce. A good cow horse and a lass-rope were needed to round her up and deliver her, still scrapping, at the Durfee stables, but delivered she was, and broken she was, and a stake trotter she became. In 1887 she was second to Soudan in the first colt race at Los Angeles, won a three-minute trot a few days later, and in October beat Tom Rice and Cadmus in the Southern California stake for three-year-olds.

By this time she had a nice name to go along with her record as a campaigner—Leonor. In after years she obtained a record of 2:24, trotted a lot of honest races for the elder Durfee, and became a brood mare of quality. For her original owner she raised Jenny Mac 2:09 (dam of Silver Coin 2:10), Dr. Book 2:10, Miss Jessie 2:13¼ (dam of Cuate 2:13¼) and Leonora McKinney (dam of Hope So 2:27¼). For another another Californian (C. A. had a habit of selling her and buying her back) she raised the pacer Judd 2:13¼, and when Henry B. Gentry purchased McKinney 2:11¼ she also passed to that gentleman's ownership and took a long journey to the east, since which time she has given birth to Ideal McKinney 2:21¼, Zealous 2:26¼, and Wallace McKinney 2:26¼, a speed sire. All in all, the ragged little runt of the salt grass pasture, the result of a "mistake" in breeding and an eloquent exemplification of the old belief in the survival of the fittest, must have added some ten thousand dollars to the Durfee exchequer.

CLOSING SCENE AT THE EXPOSITION MEETING

Dainty Miss Irene Whorff, winner of The Chronicle's beauty contest, decorating White Sox with the insignia of Racing Queen of the Pacific Coast—The substantial gentleman with the smile-cracked physiognomy is Willie Durfee.

Now the names of most of the horses mentioned in the preceding paragraph fall familiarly on Californian ears, and have a tang reminiscent of the name of Durfee, either the father or one of the boys, more especially son William, having driven them to victory in more than one hard fought battle. Son William in the days with which we are at this moment occupied was growing into a husky young horseman with ideas of his own as to how to breed, train and race trotters and pacers. The one of them with which we are most concerned, however, is Jenny Mac who late in the fall of 1899, piloted by Will Durfee, became the first of the daughters of McKinney to appear in the 2:10 list, and the second of the family of any sex to grace that select company, into which Coney had preceded her by but a matter of weeks with a record of 2:07¾. Previous to this time, in 1897, her owner, Dr. W. P. Book, had sent her to the Cook farm to be bred to their premier stallion, Steinway, and the year before she took her fastest record she had raised a male foal, afterwards to be raced to fame by Will Durfee as Silver Coin 2:10. To the cover of Steinway she also produced a filly, which became the property of the younger Durfee, and which, though possessed of a smooth natural gait at the pace, received practically no training, as she left the Durfee ownership and was put to breeding.

Perhaps it may seem to you, gentle reader, that we are a darned long time getting to White Sox, but we should worry—yes? no? We have have a slight advantage over you in the respect that we draw salary for doing this whether you read it or not, so we will take our time and you can do as you darned please. At this juncture, however, we get just a little closer to our real subject by introducing into the picture the portly form of one Mr. Clarence Berry, made up to represent a sturdy Alaska min wresting riches from the bosom of old Mother Eart via the placer mining plan. Observe the flume i the rear center and at the left a dutch oven loade to the guards with sourdough biscuit, while on th "meat hook" formed by sharpening a lower limb o a jack pine in the shade of the big rock you ma note a generous quarter of raw elk meat. The pi ture really is allegorical, or reminiscent to say th least, as at this time Mr. Berry had, to a very larg extent, abandoned the joyous pursuit of wealth i the wilds and had entered upon the much more pr carious and hazardous occupation of keeping it whil living in civilzation.

Always an ardent lover of horses, one of Mr Berry's chief pleasures after his years of roughing i in the gold fields was derived from owning, drivin and racing a small stable of trotters and pacers Things ran on with varying success until some few years ago when he got Will Durfee to take home from the Pleasanton meeting a horse that, in another trainer's hands, had failed to make good. One day some weeks later at the track at Los Angeles, Durfee, knowing Mr. Berry's qualities as a sportsman and his ability to buy what he pleased, asked him why he didn't try to get hold of something really good. Some slight conversation will now be shown on the screen by a cut-in.

"Lead me to it," says C. J.

"Look 'em over," says Wilyum Gee, casual like, waving his hand toward the stables and corrals.

"That's her," remarks C. J. some moments later, indicating a bay mare of pleasing type.

"Wow!" says Wilyum Gee, for he had sort of a fondness for that lass himself, and the dicker was on. Once he had picked his critter Clarence was not to be shaken off easily, and negotiations were concluded by the mining magnate becoming the owner of the bay mare, a full sister to Silver Coin 2:10—by Steinway 2:25¾, a world's champion and a sire of champions; dam Jenny Mac 2:09, the first daughter of McKinney to become a 2:10 performer or a producing matron; grandam Leonor 2:24, "Pa" Durfee's old bread-winner that he offered for sale right off the salt grass for a measly fifty bucks; great-grandam Geraldine, a double producer that could breed even if she couldn't race, by Echo; great-great-grandam a daughter of that hardy pioneer that "come by de plains across" in the days now long gone by, the thoroughbred Rifleman.

The mare (need we say it?) was Subito—"subito," in pure Castilian, being something infinitely sooner than "manana," something vastly quicker than "pronto." In our crude way, personally, if one should ask us for a free translation of "subito" we would

lean to the expression of opinion that it is the superlative of "poco damn prontito," as we say on the border.

Mr. Berry's ambition was not merely to own a good race horse but to breed one, so Subito, bred to be a fast mare and endowed to all appearances with the qualities necessary to greatness in a campaigner, was not put in training but was set to service as a brood mare, being stinted in the season of 1904 to Petigru 2:10½, not yet sold for export. The resultant foal was a high strung filly that cut herself up in wire fences in a wild runaway, was broken while too sore to fight, and later trialed trotting in 2:21, though she never attained a mark. Will has her at Los Angeles, and as Pavlowa B. she is beginning to acquire fame as the dam of Rico, the two-year-old pacer by Manrico 2:07¼ that is showing so well in the Durfee stable at present.

Before another year rolled around Mr. Berry had become the owner of a stallion registered as Menlow 51476, a son of Mendocino that obtained a record of 2:29½ under the name of McCormick, and for two years Subito was mated to him, the first foal being a filly, the second a colt. The filly made Mr. Berry a "2:10 breeder," as she grew to maturity and raced to a record of 2:06¾ as Blanche. W. G. raced her first and she then passed to H. H. Boomer and was marked at Phoenix by Frank Childs, Mr. Tom Pollock then becoming her owner. Mr. Pollock still has her and she may race again in the future. The stud colt by Menlow was called Aviator, and could fly both high and fast. He was a variety artist, judging from reliable sources of information, who suffered no shame in comparison with Alarich, the diving elk, or even O. U. C., and as a three-year-old paced in 2:08¼ in July. As a four-year-old he had negotiated halves below :59 before the old man with the sickle rounded him up for the long trail to horse heaven.

After giving birth to Aviator in the spring of 1907, Subito was bred on the advice of Will Durfee to the McKinney stallion Del Coronado, who stood very high in the young reinsman's estimation on account of his previous performances, his best record to that date being 2:09¾, made the previous summer at Woodland, which mark was to be bettered in 1908 when he met the Grand Circuit trotters at Syracuse. The foal of 1908 was a bay filly with two white hind pasterns. You guessed it—

White Sox!

It has been a long time coming, but here we are.

It was Mr. Berry's ambition to breed a fast trotter, and with that desire in mind Durfee gave her all her early education at that gait. She was entered in a number of stakes and as a three-year-old progressed to a mile in 2:16 but was not deemed ready to race and was carried over. In the spring of 1912 she was bred to Manrico before the Durfee stable went east with two world's champs in the car, Don Pronto and Manrico, but failed to get with foal. She ran out that summer and in the winter was again put in training and made speed very nicely. She made six starts and acquired a win race record of 2:13¼ at Pleasanton at her second engagement there, having been distanced in the second heat of the event in which she first appeared on that classic course. While the Durfee stable was at Santa Rosa, where Sox had no start, she worked that track for Mr. Berry in 2:09¾, Will remembering that the mile was some seconds faster than he himself could get out of her. This chap Berry, by the way, is a real skinner himself, and Will threatens to save him a driver's fee in the next big stake by putting him up to do the scouting behind his favorite mare. If we are not overlooking a bet somewhere, Mr. Berry's mile behind Blanche in 2:10½ at Pasadena probably stands as the record for amateur drivers on two-lap tracks in this state. Now don't all speak at once if it doesn't. Just break it to us gently, even if we are accustomed to being called a liar and then having it proved on us.

Back at home in winter quarters, the strategy board, of which Captain Barnette was one of the leading figures, decided that White Sox' best opportunities for the future were as a pacer, and without recourse to the use of the Indiana drawers she was converted to that gait. Before the season was well under way the word was on the wireless that Willie Durfee had a real pacer to succeed Guy Borden in his stable, and on July 15, over the home track, the lass took a record of 2:08. At Salinas in her first start in company she was 2-5-5 to Airlie Demonio, Oro Mo and A. B. C., and at Santa Rosa she hit 'em up for a straight-heater in 2:07¼, 2:08, 2:10¼. At Woodland she administered a similar pill to a field of six wigglers in 2:07¼, 2:09, 2:07. On September 12 at Sacramento she won in easy fashion from Pegasus, Star Tilden and McVerde, and then came her two battles with Clara Mac, Clara winning the first in 2:07½, 2:05¾ and 2:06¾, and the second in 2:05¾, 2:04½, White Sox taking the second heat of the last engagement in 2:06¼. This race put Clara out of the running for the 2:06 pace here this spring, which failed to hurt Durfee's feelings, no doubt. At Salem the girl won nicely from a field of eight in her first start, but was drawn after two heats in the mud in her second contest, winning the first one in excellent time. The balance of her history has been written elsewhere in the past fortnight and is too familiar to stand repetition.

While White Sox did not turn out to be the fullest fruit of Mr. Berry's desire in the trotting line, "there are others" that may yet bring to him the realization of his dreams. In 1909 Subito foaled a filly to Del Coronado's embrace, but it was injured as a yearling and is being bred at the Durfee establishment to Carlokin. In 1910 she proved barren and was stinted to Carlokin, Del Coronado's successor in Will Durfee's esteem, and safely foaled a bay filly, The Lark (3) 2:18¼, now a promising four-year-old. She is both trotter and show mare, and over the exposition track, which has proved none too pleasing for the trotters, she has worked in 2:12½ with a half in 1:03¾, so that she looks good for the 2:10 list at no far distant date.

The foal of 1912, also a Carlokin, died as a two-year-old after showing eighths in seventeen seconds, but the foal of 1913, by Manrico, is alive and trotting and as chipper a baby as one could wish to see, Miss Rico (2) 2:21¼, winner of the fastest heat of the two-year-old trot at the exposition meeting. Se has worked in 2:19 and as evidence of a truly great flight of speed has covered an eighth in :14½. This is whizz with a vengeance, and if old Mr. Jinx will keep in the clear one or the other of these fillies ought to be the real goods in coming years. In 1914 Subito foaled a filly by Copa de Oro 2:01 and is again bred to the great pacer, having lost her foal to his cover of last season.

If ever a victory in a race on this coast was a popular one, that of White Sox, Will Durfee and Clarence Berry was "it." Not even the invaders could begrudge it, and as for the way it suited Californians—weren't you there? Well, if you were not on deck there is no use trying to tell you about it, anyway. It was an occasion that demanded seeing, but you can all join us in a hearty expression of good will that will not only reach Durfee and the mare in Los Angeles, but eventually get through to Mr. Berry at Circle City, as he sailed for Alaska last Monday—almost before his nerves were normal after the tension of Saturday. Wherever they are—here's luck and lots of it!

IN THE BLUE GRASS.

Lexington, Kentucky, June 13.—During the past week there was some lively stepping by the trotters and pacers in training at the Breeders' track. The fastest of the work was done before the rain Friday afternoon, when John W. Davis drove Lizzie Brown in 2:13, 2:12½ and 2:12, the last quarter of the third mile in :31¼. This represents the best repeat work done by any trotter here this season. A subscription to the Transylvania has been taken for Lizzie Brown, and it is further intended to campaign her on the Grand Circuit.

James Snell drove Sweetie F. p. 2:08½ in 2:11, the last eighth a fraction slower than :14. Roy Miller had started a mile just before Snell with Roya McKinney 2:09¾, and they traveled the last eighth together. The work watchers said that Roya McKinney had trotted her mile in 2:14½. This filly is the property of Empire City Farms, and is one of the best four-year-olds in this section. Thorne Worthy 2:11¼ trotted in 2:16½, and Worthetta McKinney (2) 2:14¾, Empire City Farms' reliance for the Kentucky futurity, trotted in 2:18½. The two-year-olds, Rowena Worthy and Ashland Worthy, in the same stable, trotted in 2:24½ and 2:24¾, respectively. Miller also drove J. L. Tarlton's Lady Anne (2) 2:29¼, three-year-old half-sister of Airdale 2:09 and Lord Allen 2:11, a mile in 2:17, and his two-year-old Signola in 2:27. He likewise drove Dr. B. F. Batten's Kentucky futurity candidate, Tregantle's Pride, in 2:21½.

James D. Arspiger drove Mowitza in 2:11½, first half in 1:04¾. He said he felt she was going more freely than he intended, and he took her back the last half. This mare surely can beat 2:10.

Jim Laughlin showed a mile in 2:12½ with J. L. Dodge's Hollyrood, a candidate for the Kentucky futurity. Laughlin is a new comer to the ranks of the candidates for honors as a reinsman, though he has long been in service as an attendant in the stable.

H. C. Moody drove U. Forbes 2:12¼, Kentucky futurity candidate, in 2:20, last quarter in :32½. He also drove Suldine (1) 2:24¾, son of Worthy McKinney, and the fastest yearling of 1914, a mile in 2:23, and repeated in 2:23¾, last quarter of the second mile in :33. The only other two-year-old by Worthy McKinney has been a mile in 2:30. He is owned by Harry Montgomery and is being trained by Henry Williams at a farm near Georgetown. Moody also drove Willa Guy and Phoebe Sterling each in 2:17½, last quarter close to :33.

One of the fastest three-year-old fillies at the track is in Henry Horine's barn. She is registered as Miss La Jolla, by Peter the Great, dam La Jolla, by Ashland Wilkes, out of Grace G., by Alfred G., and she out of Mattie Swope. She was purchased some time ago by Dr. E. M. McKee, a distinguished surgeon of this city, and he changed her name to Lady McKee. He has kept her good in the Kentucky futurity, and other stakes, and if she continues to train as well as she has all season, she will be one to think about when racing time comes. She worked Friday morning in 2:19½ with lots up her sleeve.

John H. Dickerson, who is getting ready to go to the races, worked Bonington 2:06½ in 2:12½, last half in 1:03, last quarter in :30; Barbara King 2:15¾, in 2:13½, last half in 1:03½; Harlem Express 2:22, in 2:15, last half in 1:03½; Pony Express 2:22¼, in 2:19, last half in 1:07, last quarter in :32; Amina King 2:22, in 2:20, last half in 1:07½, last quarter in :32½; King Bellini 2:12¼, in 2:15½, last half in 1:04, and Atlantika (2) 2:20½, half in 1:06½, quarter in :31½. Etawah 2:03¼ was sent to Dickerson from Castleton last Tuesday and has already been a quarter in :30. Anvil 2:02¾ is also in Dickerson's barn. W. B. Dickerman, owner of the Hillanddale Farm horses, has been here for several days and is well pleased with the work they have done. David M. Look, the master of Castleton, is also here.

James Snell has been instructed by Middleton S. Burrill, of New York City, to take up and break his yearling brown colt, Middleton B. by Barongale, out of Immaculate 2:15½, and he will be sent to the track tomorrow morning.

Smith N. Whitcroft of Washington, Pa., accompanied by his friend, W. N. Orr of Apollo, Pa., is here with a view to buying a couple of horses if he can find just what he wants.

W. W. Milam, aged 70, one of the veteran trainers and drivers of trotters in this section, died at his home in Winchester, Ky., Friday, and was buried in the cemetery in that city. "Professor" Milam, who in his younger days was a teacher of the violin and a dancing master, drove a number of good horses in his time, but his greatest success was achieved with Oakland Baron when he won the Kentucky futurity, which had an aggregate value of $20,000, in 1895. The previous year he won the historic Lexington stake with Oakland Baron, and in 1893 he won the Kentucky stake with Eoline.—Horse Review.

NORTH YAKIMA ENTRIES.

2:08 pace, purse $750—Delmas, Big Squaw, Hal Norte, Allerdaw, Red Hal, Haltamont, Indian Hal, Teddy Bear, Mack Fitzsimmons, Dan Logan, Della H., Scarlet Trent.

2:12 trot, purse $750—Starost, Marquarita, Bonnie Ansel, Sargo, Kid Cupid, Merry Mac, Dan Matthews.

2:20 pace, purse $600—Bell Smith, King Zolock, Sonoma Maid, Elfreda D., Ruth Hal, Glad Wren, Rotheda, Hal Edo, Jennie May, Halmeta, Potrero Boy, Mac Fitzsimmons, William G.

2:18 pace, purse $600—Lady Hal, St. Elmo, Lena Patch, Nigger Boy, Elfreda D., Hal Norte, Tillamook Maid, Hal Edo, Aurelia Lou, Halmeta, Prince Zolock, Scarlet Trent.

Three-year-old trot, $200 and added money—Lindsay, Henry P., Robt. Kinzer, Oregona, Sela Cruzados.

Two-year-old pace, $200 and added money—Capt. Mc., Jerusha Dillard, Flyspoke, Boniquee.

Three-year-old pace, $300 and added money—Recall, Babylight, Sonny Jim, Maude Bond, May Day Hal.

2:25 pace, purse $500—Lady Hal, Malde De Fine, Sonoma Maid, Tempest, Lena Patch, Terry Ham, Nigger Boy, Lady Woodside, Hal Bear, Tosora, Nellie J., Elfreda D., Ruth Hal, Glad Wren, Tillamook Maid, Royal Express, High Ho, Aurelia Lou, Sally H., Halmeta.

2:20 trot, purse $600—Mark H., Gen. Brightheart, The Frisco, Bonniola, Flora Dora Z., Guy Light, Hallie B., Eloise Dell.

2:25 trot, purse $600—Going Some, Amy McKinney, Hops, Sedge Sparrow, Lathrop, Flora Dora Z., Guy Light, Al McK., Hallie B., Mercury, Columbia T.

2:15 trot, purse $600—Mark H., The Frisco, Marguerita, Sargo, Wild Girl, St. Michaels, Dan Mathews.

2:30 trot, purse $600—Going Some, Amy McKinney, Hops, Sedge Sparrow, Lathrop, Peter R., Flora Dora Z., Bonnie Ansel, Nellie Mack, Zombro Nun, Bon Diablo, Perrieo, Columbia T., Mercury.

2:12 pace, purse $750—Glenrose, St. Elmo, Truxton King, Hal Norte, Harold Welcome, Park Wood, Albia, Hal Edo, Bonnie Antrim, Indian Hal, Potrero Boy, Prince Zolock, William G., Star Tilden, Scarlet Trent.

Free-for-all pace, purse $750—Allerdaw, Red Hal, Haltamont, Indian Hal, Teddy Bear, Jim Logan.

LOVED AROUND THE WORLD.

Few hotels indeed are there whose fame has reached farther into all parts of the world than has that of The Palace in San Francisco. Under its hospitable roof have been entertained visitors of all degrees and every clime in the many years of its existence, and again and again its old guests return and bring new ones—truest testimony of the hold the big caravansary has upon their affections. Horsemen have loved it for years and made it their headquarters, always sure of a warm welcome from "the Colonel," who did so much for both hotel and horsemen. The Colonel's cheery greeting comes no more, but the comforts of The Palace become more and more pronounced as the years roll by, and within its walls still reigns the hospitable spirit of an older San Francisco. Typical of California is The Palace, and not to visit it during trips to the coast is to miss one of the rarest of opportunities for an indulgence in pure enjoyment and genuine comfort.

OPEN CLASSES AT SALEM.

Elsewhere we present the fields in the three early-closing events for the Oregon State Fair that filled on July first, and here we wish to call the attention of horsemen in the west to the array of purses that are still open, to close August 13, on which date horses must be eligible to the classes in which they are entered. For the trotters will be found the three-minute class for $300, the 2:15 class for $700, the 2:30 class for $500, the 2:12 class for $2,000, the 2:20 class for $700, and the 2:09 class for $700, while the pacers have open to them the 2:10 class for $700, the 2:08 class for $2,000 and the 2:20, 2:15 and 2:12 classes for $700 each. There is also a three-minute trot or pace for $300 to close at the same time, and a mile dash, distance handicaps, for horses of both gaits, purse $500, to close September 14.

Aside from the meetings at the P.-P. I. E., the program at Salem is the most pretentious one to be given on the coast this year and the patronage accorded it should be substantial. Racing opportunities are few and far between for Californians, and a number of local stables are pointed for the northwest.

Statistics of June Meeting at Exposition

COMPILED BY WILL M. NEAL.

No harness race meeting ever held on the Pacific Coast aroused the interest of the general public to such an extent as did the one just passed into history, held in connection with the Panama-Pacific International Exposition. Throughout the meeting this publication has endeavored to give its readers a comprehensive account of its various events, paying especial attention to the thoroughness of the summaries, giving the primal facts concerning every starter, where known. To conclude the report the following self explanatory tables are submitted, believing that they will be found of much use and interest to professional or amateur horsemen, or even to mere lovers of the game. Preserve them for future reference.

The Winners by Classes with the Time and the Purse.

Trotting Events.

Class.	Winner and Driver.	No. of Heats.	Fastest Heat.	Slowest Heat.	Value.
2:30	McCloskey (McDonald)	3	2:09¾	2:12½	$ 2,000
2:08	Peter McCormick (V. L. Shuler)	3	2:09½	2:11½	5,000

This concise summary of the first and only race meeting ever given in connection with a World's Fair will be found invaluable in the future to horsemen and lovers of the sport of racing harness horses. There is always room for some slight error in a compilation of this nature, but every care has been taken to make figures that appear herewith the proper ones.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

FIXTURES.

terstate Association Tournaments—

uly 8, 9, 10—The Interstate Association's Tenth Pacific st Handicap Tournament, San Diego, Cal., under the pices of the Pastime Gun Club; $1,000 added money. nner of first place in the Pacific Coast Handicap guar- eed $100 and a trophy; winner of second place guaran- d $75 and a trophy, and the winner of third place guar- eed $50 and a trophy. Several other trophies will also warded. Elmer E. Shaner, Manager, Pittsburg, Pa.

ugust 16, 17, 18, 19, 20—The Interstate Association's teenth Grand American Handicap Tournament, Chi- o, Ill., under the auspices of the Chicago Association Trap Shooters, $3,500 added money. Winner of first ce in the Grand American Handicap guaranteed $500 d a trophy; winner of second place guaranteed $400 and rophy; winner of third place guaranteed $300 and a phy; winner of fourth place guaranteed $200 and a phy, and the winner of fifth place guaranteed $100 and rophy. Numerous other trophies will also be awarded. ner E. Shaner, Manager, Pittsburg, Pa.

tegistered Tournaments—Pacific States and Terri- ies:

uly 1, 2—Vancouver Gun Club, C. A. Porter, Secre- y, Vancouver, Can.

uly 5—Eureka Blue Rock Club, H. A. Hine, President, reka, Cal.

uly 5—Sunrise Gun Club, H. S. Hill, Secretary, Sun- e, Wyo.

uly 5—Holbrook Gun Club, J. S. Hulet, Secretary, lbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Weick, Secre- ry, Laramie, Wyo.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, cretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, cretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secre- ry, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Sec- tary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and . A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, Presi- ent, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Sec? etary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secre- ary, Williams, Ariz.

WESTERN HANDICAP.

Never was a handicap pulled off under better con- itions than those prevailing at St. Louis, Mo., dur- ng the week of June 14, when the tenth Western Handicap was held. The tournament was held on he grounds of the St. Louis Trap Shooting Associ- tion and under the auspices of the Missouri Athletic Association. The grounds were perfect in condition; every imaginable detail had been looked after, and when Manager Shaner arrived on the scene, he found a shooting grounds on which a Grand American could have been held. The perfecting of all the arrange- ments was due to the faithful work of James W. Bell, most ably assisted by Louis Ebert. Five traps were used which worked smoothly through the week. Not a hitch occurred to delay the shooting from start to finish. The entrance in the Western Handicap on Thursday was the largest so far recorded in the his- tory of the event, 230 names being listed by the cashier. The local shooters turned out nearly 100 strong. The office force was headed by "Uncle" Jimmy Head, as cashier; D. H. Eaton, compiler of scores; C. T. Brantzell and J. PH. Germer, assist- ants. Wm. Tanner had charge of the bulletin board. The Missouri Athletic Association officers are: W. B. Willis, chairman trap committee; F. P. Ford, vice- chairman, and J. O. Victor. They all took an active part in the shoot. The members of the Gun Club committee were H. W. Geller, chairman, Col. J. A. Laird and Robt. Niedringhaus. The Handicap Com- mittee was selected from the shooters present and consisted of: J. W. Bell, St. Louis; J. A. Campbell, Tulsa, Okla.; G. K. Mackie, Lawrence, Kansas; G. Dering, Columbus, Wis., and T. L. Andrews, Law- renceville, Ills.

On the morning of June 14 an open match for the Hazard Trophy was shot, with twenty entries, Guy Dering of Columbus, Wis., winning on a score of 93 out of 100—50 pairs; S. A. Huntley, the former holder, was runner up with 88.

High scores were the feature of Monday, preliminary practice day, twenty-seven of the 58 entrants going out with 96 or better. G. W. Akard, of Humansville, Mo., was the star performer, leading the field with a straight score of 100; J. B. Goodbar, Memphis, Tenn., Woolfolk Henderson, Lexington, Ky., J. Noel, Nashville, Tenn., S. A. Huntley, Omaha, Neb., and W. S. Spencer and F. J. Reppenhagam, St. Louis, in a bunch on 98, followed by Guy Dering, Columbus, Wis., G. T. Hall, Laonie, Ill., J. W. Bell, St. Louis, Mo., and C. H. Dittean with 97 each. In the professional division, high honors were shared by J. R. Graham, Ingleside, Ill., and C. G. Spencer, St. Louis, with .99 each. Bart Lewis, Auburn, Ill., and J. R. Taylor, Columbus, Ohio, 98 each; T. H. Fox, Lynchburg, Va., R. W. Clancey, Chicago, Ed O'Brien, Florence, Kansas, H. Kennicott and Art Killain, St. Louis, F. G. Bills and Tom A. Marshall, Chicago, 97 each. The banner squads of the afternoon were Nos. 3, G. Dering, J. R. Graham, Wm. Raup, John Noel, and R. W. Clancy, and No. 7, B. Williams, Art Killam, J. W. Bell, D. J. Holland and C. B. Eaton, each making a perfect score of 100 in the second event. In the fifth event the same squads tied on a total of 99, G. Dering and B. Williams each dropping one target. The records showed 27 shooters with scores of 96 to 100, an indication of the class of the contestants, and of what might be expected before the big races were decided. The day was cloudy, with light showers in the afternoon. The program of five 20-target events was started promptly at 1 p. m. and finished at 2:55, being pulled off without a hitch of any kind. Several long runs were recorded during the afternoon. J. W. Akard headed the list with 100 straight; F. J. Reppenhagan 82; H. J. Donnelly 54; J. W. Bell 65; J. B. Goodbar 61, and G. T. Hall 64.

The shooters were greeted with clear skies on Tuesday, the opening day of the tournament, and the weather was ideal, not too warm for comfort and with no wind to disturb the flight of the targets. Under these conditions and considering the class of the contestants, good scores were expected, and were certainly made. The opening of the tournament was preceded by a short speech from Manager Elmer E. Shaner, who mentioned the superb condition of the grounds, giving deserved praise to James W. Bell and his able assistant Louis Ebert, for their efforts which have given St. Louis one of the finest shooting grounds in the country. At 9:15 T. H. Fox, the popular southern professional, fired the first shot in the program of the ten 15-target events, and at 2:10 the last squad sheet was brought to the office. The amateur class was headed by C. C. Plummer, A. M. Burr, G. W. Ball and E. S. Winbigler, with 148 each. Following them were A. C. Buckles, A. C. Connor and Geo. K. Mackie, with 147 each. In third place were A. H. Campbell, J. B. Goodbar, W. Henderson, J. Noel, J. W. Akard, D. J. Holland, S. A. Huntley, J. S. Frink and P. Baggerman, with 146 each. Art Killam, who has taken a leading place in the professional ranks this season, tied with Ed O'Brien for first place on 149. J. R. Taylor, the Columbus, Ohio, crack, and big Fred Bills of Chicago, were second, with 148 each. J. R. Graham occupied third place alone on 147. The special event at 25 pairs, followed the regular events, and was finished at 4:10 p. m. Forty-three shooters entered the event, D. D. Gross finishing high over all with 48. John Noel, of Nashville, Tenn., was at the head of the amateur class, and next to Gross, with 46, tying for second place with Ed. O'Brien on 46. John R. Taylor was third with 45. It is getting to be one man's job to keep track of the runs made by the long run trophy hunters, and it surely keeps him busy. A few of those recorded are: A. M. Burr 117, A. C. Buckles 110, A. Killam 109, W. S. Spencer 106, J. W. Akard 105, E. S. Winbigler 95, F. J. Reppenhagan 90. Thirty-five other contestants made runs ranging from 50 to 89.

A more beautiful day never greeted a crowd of anxious shooters than welcomed them on Wednesday, Preliminary Handicap day. Fresh, cool, and with a light breeze in the early morning, the day was all that could be asked for. Late in the afternoon a rain storm passed over the city, but the shoot was concluded and no damage was done. There were 124 entries in the morning's events at 100 targets, and this number was increased to 130 in the Preliminary Handicap. The quality of the contestants may be judged from the fact that considerably over half of the entrants in the regular events finished with over 90. C. C. Plummer of Swan River, Manitoba, led the ameteurs with 99; C. R. Ray, D. J. Holland and P. Baggerman, all local men, were only one target behind, with 98 each, and closely following them came W. E. Byrn, G. L. Dering, A. C. Connor, C. B. Eaton, W. Henderson and J. S. Frink with 97 each. The professionals had a merry struggle among themselves, finishing in bunches, with Ed. Banks, R. W. Clancy and Art Killam in the first flight on 99 each. O. R. Dickey, J. R. Graham, Ed. O'Brien and J. R. Taylor, giving them a hot race, and losing out by only one target, with 98 each. Then came T. H. Fox, Bart Lewis and and H. D. Gibbs, with 97 each. There may have been squads just as good as No. 18—S. A. Huntley, J. W. Akard, W. Henderson, A. Killam and J. R. Graham—but none could have been better, for in event 4 each member broke straight, making a squad record of 100. Squad 8, in event 2, and squads 17 and 19 in event 4, each made a total of 99. The Preliminary Handicap was hotly contested, and good scores were the rule. The handicaps were fixed by the following committee: J. A. Campbell, Tulsa, Okla.; J. W. Bell, St. Louis, Mo.; Geo. Mackie, Lawrence, Kansas; G. V. Dering, Columbus, Wis., and T. L. Aidrews, Lawrenceville, Ill. That its work was fairly done is evidenced by the fact that not a complaint das heard. When the last returns were in it was found that J. B. Goodbar of Memphis, Tenn., with a total of 97, from the 19 yard mark, was high, and he was awarded the first place trophy. F. Knittel, 16 yards, was runner-up with 96. A bunch of seven were tied for third trophy on 95: A. M. Burr, M. C. McGeehob, G. W. Ball, T. M. Ehler, each at 19 yards; Woolfolk Henderson, 23 yards, B. A. Ehrlich, 18 yards, and J. S. Frink, 20 yards. In the shoot-off J. S. Frink won with 19; A. M. Burr and T. M. Ehler, 18 each; M. C. McGeehan 17, and B. A. Ehrlich 15. Henderson and Ball withdrew and did not take part in the shoot-off. In the professional class in the Preliminary C. G. Spencer finished in the lead with 95 from the limit distance of 23 yards; W. T. Crosby, also at 23 yards, and L. Ebert at 20 yards, tied on 94 for second place. H. Kennicott, 22 yards, 92, and H. J. Donnelly, 20 yards, 91.

Thursday, Handicap day, was another one of ideal conditions for shooting. The attendance was larger than on the previous days and the contestants were closely watched by a large gallery of spectators, among them being many ladies. The morning events were well filled and many good scores were recorded. D. J. Holland set the mark of 100 straight, and was followed by J. W. Akard, S. A. Huntley, C. Funderbrenk and A. H. Campbell, only one target behind, 99 each. In the next place, with 98 each, were J. W. Bell, C. F. Linde, L. Seidner, W. J. Wauf, J. B. Goodbar and P. Baggerman. The professionals were just as classy as the amateurs in their work. J. R. Graham accounted for the whole century and Art Killam, W. R. Crosby, Ed O'Brien and F. G. Bills, dropping but one target each.

The Western Handicap event was closed with a record entry of 230. The contest was a close one, F. A. Snell, Carlinsville, Ill., 18 yards, W. J. Raup, Portage, Wis., 20 yards, and G. L. Grubb, Wetmore, Kansas, 20 yards, tying for first place on 97. In second place were A. C. Connor, Springfield, Ill., G. T. Hall, Laoni, Ill., J. H. Noel, Nashville, Tenn., and C. C. Plummer, Swan Lake, Manitoba, all at 20 yards, with 96 each. Then came M. L. Barr, Perry, Mo., 16 yards, and J. W. Bell, the well known St. Louis shot, 19 yards, with 95 each. The shoot-off for first money and trophy was a hot one. In the first round the men tied on 18. The second round settled the winner of first place, W. Raup scoring 19 and the others tying on 18. Then followed the shoot-off for second and third trophies. The first two rounds resulted in ties on 18 and 20. The next time Snell won on a score of 19 to 16 and took second trophy, Grubb getting third. The professionals also finished well up in the list. G. H. Ford, Nashville, Tenn., 16 yards, Ed. Banks, Wilmington, Del., 20 yards, J. R. Graham, Ingleside, Ill., 23 yards, 95 each; H. D. Gibbs, Union City, Tenn., 22 yards, 94; O. R. Dickey, Boston, Mass., 18 yards, Bart Lewis, Auburn, Ill., 21 yards, and J. R Taylor, Columbus, Ohio, 22 yards, 93 each. A complete list of long runs would require too much space. A few of the longest follow: C. C. Plummer, 212; D. J. Hollans, 73, 82, 119; D. D. Gross 106, 79; A. C. Buckles 115; J. W. Bell 79, Bert Waggoner 83, C. Funderburk 104, H. W. Cadwallader 115, Dr. W. Spencer 106, 61; J. W. Akard 105, 101, and several of 50 and better; C. G. Spencer 51 from 23 yards, and 106; Art Killam 109, 136 and 109. J. R. Taylor 100, 79; J. S. Frank 74; P. Baggerman 71, 70; E. Winbigler 95; J. R. Graham 177; A. H. Campbell 98; E. J. Linde 81; G. T. Hall 80. Squads 3 and 17 recorded straight scores of 100 in events 2 and 5.

D. J. Holland and C. C. Plummer tied for high amateur average on 344 out of 350. P. Baggerman 342, J. S. Frink and S. A. Huntley, 341.

Preliminary Handicap purse—82 entries at $5, $410; 5 penalty entries at $8, $40; 1 penaltry entry for targets only at $2, $2; 42 entries for targets only. 140 total entries, $452.00; added money, $100.00; total purse, $552.00.

Scores of 97 first money, $82.80; 96 second money, $71.75; seven 95's received $38.65 each; one 94 paid $22.10; five 03's paid $14.35 each; twelve 92's paid $2.75 each.

Western Handicap purse—80 entries at $8, $640; 3 penalty entries at $13, $39; 2 penaltry entries for targets only at $2, $4; 145 entries for targets only. 230 total entries, $683.00; added money, $200.00; total purse, $883.00.

Eighteen moneys, first, $132.45; 2nd $114.80; 3rd $88.30; 4th and 5th $70.65 each; 6th $61.80; 7th $52.95; 8th and 9th $44.15 each; 10th $35.30; 11th to 13th $26.50 each; 14th to 18th $17.65 each.

The $5.00 optional on 100 targets had 10 entries, 3 moneys, 99 paid $25.00, 98 paid $15.00, three 97's paid $3.30 each.

Squier money-back purse—50,000 targets at 1c, $500; 90 entries first day at $1, $90; 101 entries second day at $1, $101; 98 entries third day at $1, $98; total $789.00. Losses paid in full, 384.00. Surplus, $405.00.

Twenty-seven moneys 1st, $48.60; 2nd $44.55, 3rd $40.50, 4th $32.40, 5th $32.40, 6th $28.35, 7th $24.30, 8th and 9th $20.25 each, 10th $16.20, 11th to 13th $12:15 each, 14th $8:10, 15th to 27th $4.05 each.

Optional $5.00 sweep on 350 targets of regular program, 21 entries at $5.00, $105.00; six moneys first, $31.50, on score of 344; second $21.00, third $15.75, fourth $13.65, fifth $13.10, sixth $10.50.

Optional sweep on 150 targets on the 15th; 20 entries at $5.00; 6 moneys, three 148's paid $21.65 each, six 146's paid $5.80 each.

The $1.00 optionals in each event had 21 entries: In event 1 the 15's paid $2:10; event 2 15's paid $2:10; event 3 15's paid $3.50; events 4 and 5, 15's paid $1.90 each; events 6, 7 and 8, 15's paid $2.10 each; events 9 and 10, 15's paid $1.75 each.

Optional sweep on 100 targets June 16: 12 entries at $5.00. 99 paid $18.00, 97 paid $12.00, two 96's paid $8.40 each, 94 paid $7.20, 92 paid $6.00.

Optional $1.00 sweep on each event, 16 entries, event 1 the 20's paid $3.20, event 2 20's paid $2.25, event 3 20's paid $4.00, event 4 20's paid $3.20, event 5 20's paid $4.80, 19's paid 20 cents.

At the Traps

Golden Gaters.—The regular monthly blue rock shoot of the Golden Gate Gun Club at West Alameda, June 20, attracted an eight squad firing line.

"Bud" Havens was high average gun in the regular program of 50 blue rocks, with 48 out of 50. Andy Flickinger of Vallejo pointed his "door-knobbed" pump gun for 47 out of 50. B. Beckteil also ran a total of 47. Wilkes ran third with 46 birds.

The cup shoot at 20 birds was the opening skirmish. Havens and Fred Webster each scored 20 birds straight. This match was shot in 10 bird sections. Roy Avery, Tom Wilkes, Barney Worthen, Colonel J. W. Dorsey, R. E. McGill, Flickinger and "Swat" Terrill each scored straight tens in this event.

Tom Wilkes snuffed out 20 straight in the challenge cup race, at 20 clay pigeons. Seven other contestants were but one bird behind the leader. This shoot was also shot in two 10 bird frames. The ten straight men were: Converse, Lon Hawxhurst, Worthen, C. A. Haight, Havens, Flickinger, A. H. Beetham, Ed Forster and Billy Price.

In the subsequent challenges, Havens won out by twice scoring straight runs of 20 birds for the champion class cup. Worthen and Tom Wilkes each broke 19 out of 20, Billy Price won the first class challenge with 17 out of 20, and tied on 18 birds with R. H. Phinney in the second contest. Roy Avery ran 19 straight and missed his last bird in the third class challenge shoot. Pickersgill and Ashcroft were runners-up with 18 each.

The "grub" shoot was a hot scrimmage between two 20-men teams. Brigadier-General Prior's Grenadiers won over Captain Terrill's Mulligan Guards by the slight margin of one bird—146 to 145. The 10-straight men in this event were: Ed Forster and Charles H. Knight. Good scores in extra 25-bird races were shot: Worthen 25, Haight 24, Havens 24, T. Wilkes 23, Prior 23 and McGill 23, were the high scores. The day's results follow:

Events—	1	2	3	4

* * *

The Sooner the Better.—Throughout the United States and Canada, it is the exception to a general rule to find in cities of 50,000 and over, where a properly fitted up trap shooting ground is not located. Shooting grounds, easy of access and where the sport of shooting at clay pigeons can be enjoyed any day of the week and particularly during week-end afternoons, have become most popular resorts.

Every large city on the Coast is so equipped with the exception of San Francisco. Since the closing of the famous Ingleside grounds eight years ago, local trigger pullers have much deplored the lack of a local trap ground. True, the Golden Gate Gun Club establishment at West Alameda is open Saturdays and Sundays, but this opportunity to bang away at the tar disks only half fills the bill.

To meet the situation properly it is reliably given out that a number of prominent local and bay counties sportsmen will chip in—25 of them, it is reported—and raise a fund sufficient to secure a suitable shooting ground, in this county, and install a clubhouse, batteries of blue rock traps and other necessary equipment.

Such action will be a boon to the trap shooting fraternity and will meet with most liberal patronage from the powder burners. It will be remembered that when the Ingleside grounds were running four different gun clubs having large membership lists held regular shoots on those grounds once a month. Not only that, but the scheduled club shoots were augmented by gun members of the other clubs, such is the attraction of the blue rock shooting range.

A local trap ground where shooters can indulge in the sport on week days is sorely needed. Such accommodation would offer acceptable opportunity for blue rock shooting and what is more to the point—allow one to follow the bent of inclination for a trip or auto ride to the many increasing points of attraction throughout central California— a condition that has had considerable to do with cutting down the attendance of bay county club trap shoots during past seasons.

* * *

"One or Both Eyes"—As to whether it is better to trapshoot with both eyes open or to shut the eye not directly concerned with the sighting, seems to be a source of considerable worry to some shooters, especially beginners.

If a shooter is possessed of a pair of normal eyes, undoubtedly the proper way to sight a shotgun is to keep both eyes wide open and focused on the target in a natural and easy manner. The advantages of sighting in this way are a clear view of the entire field, including that part which would be otherwise cut off by the gun barrels, and freedom from the eye strain which results from any unusual use of the eyes.

According to one expert, "I should certainly advise all new shooters to learn to shoot with both eyes open, unless some actual optical defect makes it impossible. Older men, who have been shooting for a great many years with one eye sighting, will find some difficulty in changing, as constant practice will have cyrstllized into a second nature the habit of closing one eye. A point to be considered, however, is that you have nothing to lose by test, as it is easy enough to go back to the old system again, if necessary."

* * *

Garden City Traps.—Dr. A. M. Barker was high gun at the midweek San Jose Blue Rock shoot. Out of 100 shots he snuffed out 96.

The Class A county championship was won by C. H. Nash for the fourth time. That marksman had a high score of 95. There were nine men entered in the competition.

Wednesday's scores were: Dr. Barker 96, C. H. Nash 95, George Anderson 95, O. N. Ford 94, A. F. Lewis 93, Ada Schilling 90, Carl Schilling 88, C. B. Smith 85, A. F. Jones 84.

The club plans another big shoot for the morning of the Fourth of July. At that time there will be a 100 target handicap shoot. The handicaps will range from 5 to 35 birds. Valuable prizes will be hung up.

* * *

"Pull!"—The card for tomorrow will be the regular Exposition City Gun Club shoot at Easton.

* * *

There certainly was some pretty straight gun pointing at St. Louis during the Western Handicap tournament.

* * *

The Idaho State Sportsmen's Association tournament at Boise, Idaho, was attended by thirty shooters. Scores were received too late, however, for this issue.

* * *

The Hazard Trophy is a massive silver hand wrought pitched entitled "The Wave," motive and feeling of which are most successfully expressed in outline and decoration, and it is in every sense of the word a trophy worthy to represent the championship of the double target game.

PANAMA-PACIFIC INTERNATIONAL TOURNEY.

The international shooting tournament which is to be held in connection with the Panama-Pacific International Exposition, is one of the great special features attracting wide attention. The shooting tournament will be held from August 8 to September 26, on the Shell Mound Range, Emeryville. The opening day, August 8, will be the closing day of German week at the exposition. It is the aim and desire to make that day a gala day for all participants in the exposition and its varied attractions. The directors of the exposition and the directors of the International Shooting Festival Association propose to make the opening day of the shooting tournament memorable by the largest and most attractive demonstration possible, replete with special and attractive features.

The interest in the festival increases as the time approaches for the match. Frank J. Kahrs, editor of the National Military and Shooting Weekly, suggested to the directors of the shooting festival that a five-man team match be arranged between the East, West and Middle West to be held in connection with the international shoot next August and September. In conformity with that suggestion the directors of the festival will select five marksmen of known ability to challenge five-men teams from the West and Middle West on conditions to be agreed upon later. Each team is to deposit $1,000 upon entering the contest, and all money deposited is to go to the winning team.

There is a good prospect that at least two or more matches of that kind will be shot during the festival, which will bring into competition the experts of the rifle range, holders of world records.

Residents of Emeryville, Cal., have subscribed $300 for a gold and diamond medal which is to be presented to the marksman who will become king of the shoots.

Marksmen are invited and urgently requested to participate in the opening day demonstration and to inform Secretary Emil Pohli, 604 Mills Building, San Francisco, not only of their own plans but also those of their clubs.

DEER HUNTING DATES CHANGED.

The recent Legislature made numerous radic changes in the game and fish laws of this Sta These changes and new laws, signed by Govern Johnson, will take effect August 7. Meanwhile, t "old laws," so called, will be in force for the tin being, except where county boards of supervis have made changes in the seasons, either recent or in the past.

Of primary importance is the new district bi Under this bill, the State, while divided into twent seven districts, where there were but six distric before, nevertheless, for practical purposes, so fa as the average sportsman is concerned, consists four large districts and provides for all special pro lems, such as commercial fishing, game refuges an conditions peculiar to small sections of the State b separate districts.

For instance, Lake Tahoe and the waters whic feed it are covered by District 23, while all surroun ing territory is included in the big district designate as No. 1. Catalina island and adjacent waters ar now District No. 20. Likewise, all commercial fis ing waters, coastwise and interior, are covered b separate district lines. After making provisions fo all special problems, the State is divided into fou large districts.

Without going into further details, at this time, th question of paramount interest to local and bay cour ties sportsmen is in what manner the changes wil affect the open season for hunting bucks.

Under the State law that will be in effect unti August 7, when the new law prevails, the open seaso for hunting deer, in districts 2, 4 and 5, begins Jul 1 and closes September 1.

District No. 1 is now composed of all of old Dis tricts Nos. 1 and 3, and parts of Nos. 2, 4 and 6. Al that part of the San Joaquin valley lying west o the trough of the valley is now in District No. 1, a also is all that part of California lying east of the Sacramento valley up to Tehama county. And i addition all the extreme northern counties of the State: Del Norte, Humboldt, Trinity, Modoc and Lassen, are now included in District No. 1.

The open season under the new law for deer i District No. 1 begins August 15 and closes October 15, two months, cutting down the season two weeks. The new law does not change the opening day in the northern and Sierra counties of old Districts No. 1 and No. 3.

In the eastern parts of San Joaquin, Stanislaus, Merced, Fresno, Kings, Tulare and Kern (formerly District No. 4), the season will open July 1 and continue until August 7, closing again until August 15 and then remaining open until October 15, a gain of six weeks' open shooting.

District No. 2 will include the counties north of San Francisco bay, not embraced in District No. 1: Mendocino, Colusa, Glenn, Yolo, Napa, Lake, Solano, Sonoma and Marin counties.

Under the old law the season opened July 1 and closed September 1. The new bill provides for an open season from August 1 to September 15 in this territory, six weeks only, instead of two months.

Changes have been made by county boards of supervisors as follows: Mendocino, Marin, Sonoma and Napa counties will not be open until August 1; Yolo county also passed an August 1 ordinance, which, however, will not go into effect until July 8, leaving a week open in that county prior to August 1.

District No. 3 will include the counties lying south of San Francisco bay to the southern boundary of San Luis Obispo county and east to include also those parts of the counties of San Joaquin, Stanislaus, Merced, Fresno and Kern, which lie west of the trough of the valley, a line better described as the west bank of the San Joaquin river to the Mendota dam, the west bank of Fresno slough and lower Kings river to the Kings county line, to Bull slough, and the connecting waters to the southeast corner of Buena Vista lake, thence east to the State highway through Tejon pass.

Under the new law the open season for bucks in District No. 3 will begin August 1 and close September 15. Under the old law the open season in Districts 4 and 5, now District 3, will start July 1, thus making an open season in some counties, this year, of three and a half months.

The exceptions are Santa Clara and Alameda counties, which will not be open, by county ordinance, until August 1, thus conforming to the new law.

As matters stand, San Mateo county, where the season will open July 1, will be in line for an unprecedented invasion of venison hunters, and will have to stand the brunt of the situation this year, unless coast fogs baffle the hunters. Santa Cruz and Contra Costa counties also will be on tap for a minor invasion of riflemen. The ranges and canyons of Monterey, San Benito, San Luis Obispo and Santa Barbara counties are not too far away for automobile parties, and there is good deer shooting to be had in those sections, too, beginning July 1.

District 4 includes all of the counties of Southern California, with an open season during September only.

Another change—the open season for cotton-tail rabbits—will be identical with the open season for quail, to-wit, October 15 to December 15. The old law opened August 1 all over the State, which will allow about a week's rabbit shooting this season—August 1 to 7.

Drink Jackson's Napa Soda.

Fish Lines

Reports from Sierra trout fishing resorts indicate that the angler can now count on an enjoyable fishing trip. The upper Sacramento river stretches are said to be high, but the water is clear. At Shasta Retreat and above Castella, for instance, good fishing has been available.

The Feather river is rapidly getting in proper condition for fly fishing. Good fishing is found in the creeks running into the main stream. Bait fishing results have been excellent near Big Bar, Quincy and Camp Rodgers.

The Truckee river is reported to be running low and clear. At some places fly fishing is very good, at other points the baited hooks get the fish. The trout taken, however, are not the large Truckee denizens. The big fellows have been busy bottom feeding, gorging on hatching insect life. A recent report from Boca stated: "Fishing is not as good as it ought to be. No limits being caught. Everybody, by working hard, is taking fair catches. The river has been up and down, but does not get very muddy. June bugs are a failure this year. All fishing with flies at present."

James Thomson, John Barr, Pete Howard, James Maynard, Dick Ivers and Captain Harry Whitney of Honolulu and other well-known anglers were at Boca a week ago. Quite a delegation of rodsters left this city last week bound for favorite Truckee fishing spots.

San Francisco Fly-Casting Club members at the club lodge were: Mr. and Mrs. M. L. Gerstle, Mr. and Mrs. W. F. Bogart, Mr. and Mrs. Green, Carter Pomeroy, Tom C. Kierulff, Dave Sachs, Walter Heller and others.

Big Stoney creek, in Sonoma county, is always considered worth whipping about this time of the season. George Butler, Howard Nauman and son are giving the creek a four days' trial.

Kennedy's lake and the Middle Fork of Stanislaus river, in Tuolumne county, are now ready to deliver cut-throat trout limits, half-pounders, which fish rise to red spinner and gray hackle midget size flies. The roads up that way are good, but the Sonora pass is covered with three feet of snow and is not yet open. Such is the report of Con Grover and B. F. Hoyt, who were the first visitors in that Sierra section this season.

For the shorter week-end excursions to favorite trout creeks opportunity to land satisfactory baskets of fair-sized trout is offered at numerous easily reached resorts.

For one stream, Coyote creek, near Gilroy Hot Springs, is credited with offering better sport than for several past seasons. Trout from 8 to 16 inches have recently been taken with fly-dressed hooks. H. Root was one of the lucky fishermen. S. A. Wells, Graham Ridley and Fred Kahn investigated the situation Sunday. Isabella creek, a branch of Smith's creek, in the Mount Hamilton range, still holds good. William Ealand and H. Miller picked up nice baskets from the creek last Sunday. Farther down the range, in Alameda county, where the main stream is known as Calaveras creek, Professor Fusier found the fly fishing sport excellent also on Sunday.

The San Mateo coast creeks, from San Pedro creek, near Tobin, clear down to the Waddell, were stocked with over 250,000 trout fry Sunday. The baby trout were taken in cans, on the Fish and Game Commission's distribution car along the line of the railroad. Charles F. Breidenstein and other sportsmen met the car with teams and carried the various allotments of trout fry to different streams for transplanting. The creeks are in splendid condition for the re-stocking work, the value of which will be well in evidence next season.

The upper waters of Waddell creek in the Big Basin are worth a visit by the trout fishermen, if George McCullom's basket of 8 and 10-inch trout, caught with fly hooks, is any criterion.

San Gregorio creek and lagoon were fished for a week by A. Ray and Al Pollett. Trout were plentiful, some weighing 3½ pounds were taken.

According to "Pop" Fenton: Squaw, Rancheria and other Mendocino county streams offer good sport for rod and line. The fish run a bit small, however.

Good reports came down from the Williamson river fishing district, near Chiloquin, in Oregon. John McGeown writes the river is alive with small trout; the large fish are not yet in evidence. Plenty of bottom food accounts for the big fish dodging the angler. Cold weather, too, has retarded the appearance of insect life over the stream. Trout, however, under half a pound in weight give the man whipping a fly plenty of fun. Among the latest departures for the Williamson are: Ned Bosqui, J. B. Coleman, Al Paddon, J. Brickell and others. Dave Hearfield has returned from Klamath Hot Springs well satisfied with four weeks' good sport with the big, fighting rainbow trout of the Klamath river.

Professor Koch, of the Lowell High School, is at present enjoying a camping outing at Gold Lake, near Blairsden, in Plumas county. With him are a dozen of the Lowell High students, among them Mart Mitau, a nephew of Dave Sachs. That young Mitau is a natural-born fisherman was demonstrated one day. With several companions, taking a stroll along the lake shore, the boys noticed that trout were numerous, and, naturally, they desired to land some of the fish. One of the boys had a couple of hooks in his pocket. Young Mitau slipped off his shoes, took out the shoe laces, joined them together, and, with all other available shoelaces in the party, he improvised a fishing line. Digging a few angleworms, he baited his hooks and began fishing and in due time he landed quite a string of trout.

SENSATIONAL BATTLE WITH A DEVIL FISH.

The fondest hopes of the American Museum of Natural History, New York, has just been realized. It is to have on view a replica in plaster of the largest devil-fish ever mounted—a monster from the turbid waters of Florida that fought a boatload of men to the death.

Only the skill and daring of Russell J. Coles of Danville, Va., made possible this precious prize for which the museum has so long been seeking.

Here follows his story of the struggle which has resulted in one of the finest trophies of the undersea which has ever been taken in Eastern waters:

It was Sunday morning and one of the hottest days I have ever known in all my life. Captive island, Lee county, on the gulf side of Florida, seemed fairly to broil under the burning rays of the unrelenting sun that blazed from the cloudless sky. Not a ripple disturbed the water. Just the day to hug the little shade that fringes Captive inlet, but not for us, for we knew it was exactly the sort of dead calm weather that would bring the things we wanted to the surface of the slumbering gulf.

So off we started in the motorboat, the crew of four husky Florida fishermen and myself hoping for the best. We had harpooned two big fellows already—one thirteen feet across the fins, the widest part, and another fourteen, but we wanted at least fifteen feet, and hoped for better. We got it, a-plenty! And a female, too, just the good luck we wished, because our others were males.

The water on that calm April morning was the thickest I have ever known. You couldn't see three inches below the surface. It made it hard for us to get a glimpse of what was going on down below, but on the other hand, it brought to the surface those strange creatures that haunt the deep, to see what they could see.

Slowly we ran down the coast, keeping a sharp lookout until we came off Blind Pass. Our engine was hardly turning over and the sun was hot as a Pittsburg steel furnace, when suddenly our sturdy boat got a violent shock from below—it was bounced clear out of the water with a terrifice jolt and fell on its side with a mighty thud, barely escaping an upset. As it heeled 'way over two great black fins rose amidship on either side of us, and, like two mighty fans, flopped down on the water again. Our boat was still quivering when another shock made her stop and shake once more, like a frightened colt in a pasture lot, and the propeller ceased working—it had been hit by something under water.

We were in a school of devilfish before we knew it!

Abaft our stern four huge fins rose from the thick water, all at the same time. The one in the lead showed blood and a livid red scar at the end of the fin—it was the devil-fish which had run against our propeller, and it was mad clear through at the jagged cut it got in its tenderest spot. The monster behind it showed a loss of at least eight inches from one of its fins—marks of some furious battle of long ago.

Suddenly these four fins dropped below the surface—we lost sight of our quarry in the thickness of the waters. For fifteen minutes we waited—nothing doing. Then the tips of two more fins thrust themselves out of the water, but we didn't want them—we were after the bigger game in the offing.

We waited. For two hours we drifted, watching for the chance we hoped to get, or very slowly running around, looking to get near enough to the real thing to do business. We wanted the big one we hit first—a female, I knew, with her male following her. I realized that they would come up somewhere, and we were praying that it would be near enough for us to get busy. Luck was with us.

The push of a fin from out of the quiet water—there she was again, quartering across our bow, and the male—big as she—close at hand! I glanced at my watch; it was just 11:28. Charlie had his harpoon all ready and I stood close by, with another, poised for the chance we suddenly saw was ours.

"Let her go!" I yelled, when the monstrous thing was in close enough to strike.

Charlie and I let drive at the same instant. We both hit home. I had shortened my "drogue" to about fifty feet! It only took the monstrous creature a brief second to tauten out that rope as it had never been tautened before, but it held good and true.

A wicked head and half a body shot out of the water fifty feet beyond and took one sinister glance straight at us with those ugly, rolling eyes. Then the whole body suddenly revolved edgeways, the long, curling tail sticking straight up in the air, absolutely perpendicular. At that instant from the pouch of the mother fish a young manta made a leap, unfolding itself as it flew through the air, completing the circle which the mother was making, so violent was the rotary motion of the stricken monster.

The moving fins of the young one caught the air almost like a bird's wings and it seemed to float down to the surface like a flying boat, not hitting the water until the old one had gone under again in her agony. The little one, about four feet across the fins, lay flat on the water, until the canny male, almost human in his intelligence swept it up and with one powerful stroke pushed it down under the blood-stained waves, where it was lost to sight for keeps, saved by the bravery and brains of the father-fish.

And now came the fight of my life!

It was either the trashing devil-fish or the boatload of us. Again and again the enraged creature rushed madly against our sides with all the speed of a railway train and the strength of an elephant.

The water was so thick I couldn't see anything when my beast was below. I had to hurl my spadelance by guess. Luckily, it hit the bone. The maddened thing dropped its head and struck again, this time hitting the bottom of the boat an awful blow.

I snatched up the long-handled whale-lance. The devil-fish drew off and made another rush for us. I gave it an awful jab as it came on that would have killed anything less resolute and powerful. It came again, smashing up against our sides as if to turn us over. Both monsters now joined in the battle—the ironed female and the fearless male, free of wounds or rope. The male stayed right there, trying to up set us and to tear the female free. We dodged and jumped every which way, for one blow from either of those fighting fish would have ended our earthly careers then and there. Water poured into the boat. We were in danger of filling now and going under.

But I kept striking with the lance at every opportunity the wounded thing gave me. At last she began to weaken slowly. Her fins flopped more slowly. She started sinking. I had hit her twenty-three times, each a serious wound, before she gave up. Then we could feel the dead weight of the body on the sturdy ropes that held our harpoons fast in her quivering black back. We hauled in on the tightening line and made it fast to the bow when suddenly the creature revived and darted straight for the bottom. The bow of our boat was nearly pulled under, but then the line—the finest quality of hemp—broke like a thread cotton. However, the rope on the "drogue" held and another harpoon made her fast.

It was the thing's last effort. I glanced at my watch—it was 11:40. It had taken twenty-two minutes to kill our game.

We were three miles from the beach at Blind pass. It was with the greatest difficulty that we got the enormous body ashore and safely up on the sand, because our little boat wasn't powerful enough to bring the thing back alone. So we waited for help and then it took us ten hours to tow it to Captive island.

Next day we began work on our wonderful trophy. J. C. Bell, the man who makes the plaster casts for the museum, got busy with his stuff while we hauled the carcass up on skids, and rollers to the beach. We took photographs from a ladder tower and made true perspective pictures. Now we have a superb cast of both sides of this truly magnificent specimen, and the head, one pectoral fin and the large back end dorsal fin and tail are safely preserved in formalin.

She measures eighteen feet two inches across the pectoral fins, and the New York museum will soon have something to see for our fight to land this record-breaking monster!

Peters Points.

At the Indiana State shoot, Indianapolis, June 8-10, the State Championship was won by Mr. Walter Roach, Terre Haute, 293 x 300. High general average was won by Mr. C. A. Young, 493 x 500, who also made the long run of the tournament, 167 straight, and was high in the Interstate Championship event, 99 x 100. Messrs. Young and Roach both used Peters factory loaded shells.

At Alexander, Ill., June 9-10, High general average was won by Mr. H. W. Cadwallader, 290 x 300, using Peters factory loaded shells.

High amateur average at Springfield, Mo., June 7-9, was won by Mr. S. A. Huntley with Peters "steel where steel belongs" shells, score 582 x 600. Mr. C. B. Eaton was third amateur, 579 x 600, and made the longest amateur run of the shoot, 200 straight.

The Colorado State shoot held at Denver, June 3-5, witnessed a number of notable winnings by users of Peters shells. High amateur average on registered targets was won by Mr. Frank Bendel of Sedgwick, Colo., score 430 x 500, and Mr. C. H. Reilley of Salt Lake tied for high general average on all targets, 601 x 650, including 50 doubles and 100 handicap. Capt. A. H. Hardy made high score in the State Championship event and was high professional in the Denver Post Trophy race and had runs of 52, 55 and 78 straight. Mr. Max Weick was runner-up in the Interstate Championship, and the squad composed of Messrs. Bendel, Weick, Holsworth, Burt and Hardy established a new ground record on June 4, scoring 100 straight for the squad, a most consistent record and one which indicates superior and uniform shooting quality.

Rem-UMC Notes.

The Worcester County (Mass.) championship was won by J. W. Gates, of Leominster, at the Worcester Sportsmen's Club shoot, June 5. Shooting Nitro Club shells, he scored 92x100, which considering the high wind and uneven targets was an excellent score.

Dan McCoy, of Sikeston, Mo., won the Campbell (Mo.) Gun Club shoot, June 2, with a score of 142 x 150. E. S. Leming, of Dexter, and D. H. Dixon, a local shooter, won second and third places respectively. All three winners shot Nitro Club shells, while McCoy and Dixon also used Remington guns. The following day in a registered shoot, D. H. Dixon was high gun, scoring 145x150. Dan McCoy won second place with a score of 144x150.

The Life Story of Spriggan 2:08 1-4

AS TOLD BY THE HORSEMAN.

Spriggan 2:08¼, the discarded plaything of two millionaires, won the big $20,000 trot at San Francisco last Saturday, defeating Virginia Barnette 2:08¼, McCloskey 2:06¼, Peter McCormick 2:08¾, Baby Doll 2:10¼, Loe Blossom 2:10½, Electric Patch 2:09¼, San Felipe 2:09¼, Kid Cupid 2:08¾, John Mack 2:12¼, Bonnie Ansel, and Kinney de Lopez 2:23.

This is not to be a story of the race, but a tale of Spriggan.

Spriggan is a five-year-old bay gelding by the expatriated Baron McKinney 2:10¼; dam Helen Simmons 2:11¼ by Simmons 2:28. His tabulated pedigree appears in the next column. Spriggan was bred by Hillanddale Farm, Mamaroneck, N. Y., passed to R. J. MacKenzie, Pleasanton, Cal.; thence to his present owners.

Will DeRyder, the driver of the winner, is a brother of Charlie DeRyder. This is Will's first 2:10 trotter but he has been in the business for many years. One of his early winners was Miss Finley, p. 2:09¼, who took her record 18 years ago.

Spriggan, as already stated, was bred by Hillandale Farm, Mamaroneck, N. Y., owned by W. B. Dickerman, a millionaire horse lover of New York City. Mr. Dickerman is one of our leading breeders, a quiet, unassuming gentleman (he dislikes to see his name in print) who makes friends wherever he goes.

Both Mr. Dickerman and Mr. MacKenzie, second owner of Spriggan, have spent so much money in breeding trotters that each deserved to own the winner of a $20,000 stake, but since fate willed otherwise they will derive equal pleasure from having owned so great a trotter. Each gentleman sold Spriggan in one of his reduction sales and not for any fault.

In November, 1911, Hillandale Farm consigned to a New York City sale Baron McKinney 2:10¼, Druida 2:24¼, Prince Bellini, Winifreda 2:22¾, Biago 2:27, two yearlings by Bellini 2:13¼ and two by Baron McKinney, including Spriggan.

Baron McKinney sold for $4,400 and was purchased by the late Emil Jacobsen of New York City for export. The horse is now owned by Captain Rudolf Hein, Kagran Stock Farm, Vienna, Austria. Capt. Hein is now at the front as chief veterinarian of the Austro-Hungarian army. He also owns Dave Halle 2:06¾ and Baronward King 2:13½. His farm is leased from the Vienna Trotting Club, the owners of the property. Baron McKinney was third to General Watts 2:06¾ in the Kentucky Futurity and was separately timed very close to 2:10. In 1909 he started four times. He was second at Terre Haute, Ind., July 13. He won at Springfield, Ill., July 21, best time 2:10¼. He won at Detroit, July 27, best time 2:10¼. He won at Kalamazoo, Aug. 6, best time 2:15¾. He did not start again for two months. At Lexington, Oct. 16, he was fourth to General H. He is already the sire of 8 standard trotters, although he not leave many colts in America. His oldest colts in Europe are two-year-olds. He is a member of the famous "Silk" family.

One of the purchasers at the 1911 sale was Charles Dean, the well known driver of Palatine, Ill., who had a commission to purchase a yearling or two for R. J. MacKenzie, the Canadian railroad multi-millionaire, who has since centered his trotting horse interests at Pleasanton, Calif.

Dean was attracted to Spriggan because of his pedigree, so he informs us. "I noticed," said Mr. Dean, "that, in addition to being sired by a colt trotter, his first three dams were producers, his fourth dam was the great Alma Mater, and he had 19 thoroughbred crosses back of that, including Fanny G., the third dam of Palo Alto 2:08¾, and Jane Hunt, the eighth dam of Ecstatic 2:01¾."

The owner's statement about the colt was short. It read: "Spriggan is just broken. Was shod the first time the last week in September, He is a good colt and a good trotter. Broken single and is kind, pleasant and reliable." Then followed a list of his engagements.

Mr. Dean asked John Dickerson, who has trained for Hillandale Farm for so many years, what sort of colt Spriggan was. Mr. Dickerson praised the colt very highly and said he acted like a real trotter. Mr. Dean made up his mind to bid on the colt and, as he did not show any sensational brush in the ring, although he showed above the average, secured him for $400.

Spriggan was shipped to Palatine, Ill., and as soon as spring opened he began to show speed. The first time he was called on to step a quarter it was negotiated in 38½ seconds. The writer well remembers a day late in May when R. J. MacKenzie first saw his colt. There was quite a "gallery" of visitors present that day. Mr. MacKenzie' trainer, Havis James, was on hand. He had just arrived in Libertyville from California with his Grand Circuit stable, which included Joe Patchen II p. 2:17¼ (later 2:03¼). A party of Libertyville trainers had motored over to pay Dean a friendly visit. They were Dick McMahon, Will Fleming, Arlie Frost and Frank Goodwin. There were also present Joe Markey, Dr. Coover, M. I. Aronson, and Mr. McMannis.

Although there were several older horses that would naturally attract attention we recall that Spriggan made a striking impression and a reference to our story of the day shows these words: "Everybody was taken with a big two-year-old trotter by Baron McKinney out of Helen Simmons." A month later we said of him: "He has shown about as well as any northern trained colt. He looks the best of 20 two-year-olds at the Dean nursery."

Later in the season Charles Dean Jr., then only twenty years of age, made a campaign over the half-mile tracks of Wisconsin with several of Mr. MacKenzie's horses and Spriggan was one of the string. He started in four races for two-year-olds, half-mile heats, for $100 and $150 purses.

Spriggan did not win his first race, although he won a heat, but he won his other three starts. At Mineral Point, Wis., in the second and third heats he made a showing which horsemen of this vicinity talked about for several weeks. He come into the stretch last in each heat and won both of them by virtue of his great burst of speed in the last eighth.

At Monroe the two-year-old trot did not fill and Dean Jr. worked the colt a mile in 2:30, last half in 1:07, last quarter in 33 seconds. He then shipped the colt to his father at Dubuque, Ia., where it was proposed to see what he could do on a mile track, but that meeting was rained out and the colt's semester was over. The following is a brief summary of Spriggan's 1912 races:

Two-Year-Old in 1912.

Janesville, Wis., Aug. 14, 1912. $100, point system.
Baron Bates, br c by Baron Wilkes, Jr.....
.....(B. Chandler) 3 1 1
Angus Axworthy, b c by Hamlin Axworthy (Holt) 2 4 2
Wilton Clansman, b c by The Clansman (Wilson) 4 2 3
Spriggan, b c by Baron McKinney.....(Dean Jr.) 1 5 4
Time—1:19¾, 1:16¼, 1:13¾. John Berry, 5-3-5, Easterling, 6-6-7. American Rex, 7-7-6.

* * *

Mineral Point, Wis., Aug. 21, 1912, $150.
Spriggan, b c by Baron McKinney.....(Dean, Jr.) 6 1 1
Time—1:17, 1:15, 1:14. Baron Bates, 1-4-2; Wilton Clansman, 3-2-6. Early Victor, 4-6-3. Colonel Riser, Jim LaFollette and Myrtle Riser also started.

* * *

Darlington, Wis., Aug. 29, 1912, $150.
Spriggan, b c by Baron McKinney.....(Dean, Jr.) 1 1
Time—1:13, 1:11¼. Baron Bates, 3-2, Wilton Clansman, 2-3, Early Victor, 4-4, Colonel Riser, 5-6, Myrtle Riser, 7-5, Jim LaFollette, 6-7.

* * *

Platteville, Wis., Sept. 5, 1912, $150.
Spriggan, b c by Baron McKinney.....(Dean, Jr) 1 1
Time—1:12½, 1:11¼. Early Victor, 2-2, Myrtle Riser, 4-3, Colonel Riser, 3-4.

As a three-year-old Spriggan worked a mile over the Dean half-mile track in 2:20, last quarter in 32 seconds. In August Chas. Deane Jr. accepted a position as assistant trainer for the MacKenzie stable and went to California, taking Spriggan and several other MacKenzie horses with him.

The younger Dean returned to Palatine in 1914 and Spriggan went into the hands of "the top jock," Charlie DeRyder. He worked a mile last year, as a four-year-old, in 2:15, last half in 1:04½, and was considered a sure 2:10 trotter.

Last fall Mr. MacKenzie decided he had too many horses and sold several head, including Spriggan, at the third annual Pleasanton sale, Dec. 12. Spriggan brought $700, the second highest price of the sale, and was purchased by George Lowery. Mr. MacKenzie stated shortly after the sale, "I have sold a 2:10 trotter and if I was buying him I would have gone to $2,500, but I had to sell something." No one suspected then that Spriggan would beat the stable's choice for the $20,000 stake, which proved to be San Felipe. But the best laid plans "gang afte aglee" and Spriggan won while San Felipe was behind the money.

The owner's statement in the catalogue read: "Spriggan's breeding cannot be beat. He is a beautiful horseand anyone wishing to see him work can phone DeRyder. He worked a half in 1:04½ on the end of a mile in 2:15. We take pleasure in recommending him to any one wishing a good, game and sound trotter. He is sold for no fault but simply to cut down expenses."

The new owner placed Spriggan in Will DeRyder's stable and little was heard about him, at least east of the Rockies, till Tom Gahagan's story about his working at Pleasanton in 2:08½. Particular mention was made of his good manners and high class prospects, but evidently few expected him to beat Virginia Barnette, Peter McCormick, Loe Blossom, and other highly touted candidates for the big event. At that an offer of $6,000 from Lon McDonald was refused for him.

The Dam.

Helen Simmons 2:11¼, in the opinion of John H. Dickerson, was one of the gamest mares that ever raced. She had a record of 2:26¼ previous to 1900. In the latter year she started three times. At Cleveland, Ohio, July 26, she won a $2,500 event,, best time 2:11¾, defeating Bay Star 2:09 and 6 others. At Columbus, Ohio, Aug. 2, she won a $2,000 event, best time 2:11¼, defeating Lady Geraldine 2:11¼, Bay Star, and 4 others. At Goshen, N. Y., Aug. 23, she won a $1,000 event, best time 2:16, defeating Peter Swift and 3 others.

The following year she was put to breeding. The following is a partial list of her produce:

1902—Helen Kohl 2:20, blk m.....by Fred Kohl 2:07¾
1905—Senator Patchen, blk h (sire of 1).....
.....by Joe Patchen p. 2:01½
1906—Sim Kohl 2:20, b h.....by Fred Kohl 2:07¾
1910—Spriggan 2:08¼, b g.....by Baron McKinney 2:10¼
1912—Barbara King (3) 2:15¾.....by King Bellini 2:12¼

Helen Simmons 2:11½ was a bay mare, foaled 1895, bred by J. B. Dutcher & Son, Pawling, N. Y., passed to C. E. Still, Kirksville, Mo., then to Dr. Smith, Lehighton, Pa., then to John McCarty, Parkway Farm, Goshen, N. Y (who bred Helen Kohl, Senator Patchen and Sim Kohl); then to W. B. Dickerman, Hillandale Farm, Mamaroneck, N. Y., where we believe she is still owned. One of the best colts at Lexington is her three-year-old Barbara King which took a record of 2:15¾ on May 25.

Lady Helen, the grandam of Spriggan, was a bay mare foaled 1891, bred by W. H. Wilson, Cynthiana, Ky.; passed as a colt to J. B. Dutcher & Son, Pawling, N. Y. Lady Helen was bred as a three-year-old to Simmons 2:28, and produced Helen Simmons 2:11¼, her only record performer. Does any one know what became of Lady Helen and why she never produced anything else?

Almater, the third dam of Spriggan, was a chestnut mare, foaled 1884, bred by P. S. Talbert, Lexington, Ky.; passed to Kentucky Breeding Farm; then to W. H. Wilson, Cynthiana, Ky. She produced Ora Jansen 2:12¾ (dam of Morley 2:29¾) and Lady Helen (dam of Helen Simmons 2:11¼).

Alma Mater, the fourth dam of Spriggan, is too well known to need extended comment. She is the dam of 5 trotters, 7 sires and 2 producing daughters. Among her sires was Alcyone 2:27, great-grandsire of Spriggan, so the latter has two crosses of Alma Hater.

The late W. H. Wilson would be interested in Spriggan's pedigree. He bred McKinney 2:11¼, he owned Simmons 2:28, he leased George Wilkes 2:22 and brought him to Kentucky; he owned Sultan 2:24; he bred Helen; he owned Almater.

It is quite appropriate that Spriggan should win a $20,000 California event. He is owned there, and several of his immediate ancestors were bred there. His grandsire, McKinney 2:11¼, whose story appeared in The Horseman of May 5 and 12, 1914, was once owned by Charles G. Durfee of Los Angeles, Calif., who purchased him in Kentucky. Alma Mater, the dam of Alcyone, was sold to W. S. Hobart of San Francisco for $15,000 when she was 16 years old, but was a failure there. Sultan, sire of Spriggan's grandam, was bred by L. J. Rose of Los Angeles, Calif. In more ways than one Spriggan is a California horse.—Horseman.

GAITED SADDLE HORSE FUTURITY RE-OPENS.

Owing to the fact that the patronage accorded the California State Fair Gaited Saddle Horse Futurity No. 2 was not sufficient to justify its sponsors in declaring it closed, the date of entry closing has been extended from June first to July first in the hope that devotees of the gaited saddler will rally to its support.

While the three and five gaited horses have been more or less popular in California since the early days of her settlement, it is only within recent years that they have been given the true recognition that their merits justify, and with the establishment of a number of breeding farms devoted to their production the State Agricultural Society was quick to present to such breeders an unusual apportunity for the profitable training of their output for show ring purposes. The gaited horse was always accorded a prominent position on the state fair program, but the directors "went themselves one better" by inaugurating a saddle horse futurity and making it one of "the" features of the fair. The pronounced favor with which the contesting of the first stake was received on the part of fair attendants, coupled with a deep-seated interest in a newly established "infant industry" on the part of the board of directors and Secretary Chas. W. Paine, led to the announcement of stake number two under most attractive conditions.

The current stake of the series is for foals of 1915 to be shown this fall at the exposition, and as yearlings, two-year-olds and three-year-olds, at the state fairs of 1916, 1917 and 1918, respectively, giving eligible youngsters an earning capacity at a time when racing prospects with futurity engagements are merely a bill of expense. The initial and subsequent early payments on nominations are most modest and the conditions throughout are drawn on generous lines.

Should not sufficient entries to justify the expense of giving the stake be received on July first the directors will be compelled to declare it off, refunding all payments made by nominators, but it is most earnestly hoped that such a course will not be necessary. Secretary Paine is devoting his "best licks" to the effort of securing the support of all saddle horse breeders, and they will not pass unrewarded.

The produce of any mare bred in 1914 to a stallion registered with either the American or Pacific Coast Gaited Saddle Horse Association is eligible to this rich stake, and if you own such a foal and it is not entered, look up the conditions and remedy that defect at once.

Direct Hal 2:04¼, the great race horse and sire bred by E. F. Geers and the Chaffin Brothers of Columbia, Tenn., and owned since 1908 by Cobb Brothers of Wellsville, New York, died suddenly on May 26 at Elwood, Indiana, where for the last two seasons he has been in service under lease to the well known Indiana horseman, M. J. Lane. His untimely death removes a sire of great value to the breeding industry, as his get were for the most part natural free-legged pacers, including such famous performers as Ess H. Kay 2:00¾, Reproachless 2:04¼, Sadie Hal 2:05½, Walter Direct 2:05¾ (stated by Ed Geers to have been the best pacer he ever owned), Anna Hal 2:06¼, Empire Direct 2:07¼ and a number of others in the 2:10 list.

THE FARM

COVER CROPS AND BEES.

Dr. A. J. Cook, horticultural commissioner of California, in referring to the sprays that were falling upon cover crops, and which, it was believed, were killing bees in a wholesale way, gave it as his opinion that these spraying liquids would kill the bees in large numbers. There had been several experiences of that kind in California. He was recommending the vetches, which do not come into bloom when the sprays are applied. In fact, he doubted if it were necessary for fruitgrowers to spray as often as they were doing. If the work were properly done it would hardly be necessary, he thought, to spray when the cover crops of clover were in bloom.

He thought if the fruitmen and beemen would get together they could easily arrange the matter so there would be no loss to anyone.

Cover crops are being used to a very great extent, both to supply nitrogen to the soil and to keep it from drying out too quickly. When plowed under they furnish a fine humus, so necessary to the proper fruitage of the trees.

The vetches and annual yellow sweet clover, known as Melilotus indica, are being used almost exclusively in California for the purpose. In this connection it is proper to remember that the Melilotus indica is also known as the annual yellow sweet clover. This is also a honey-plant, but not quite the equal of the Melilotus officinalis, nor yet quite the equal of the white sweet clover, Melilotus alba; but the fact that the annual yellow sweet clover, Melolotus indica, is one of the best cover crops that can be used by the orchardist, suggests that they use the vetches, both of them supplying nitrogen to the soil, and at the same time make an excellent humus. The beekeepers should suggest that their friends the fruitgrowers try something else as a cover crop that will not be prejudicial to the interest of the beekeeper.—From Gleanings in Bee Culture.

HOME CANNING.

Can home canning compete with factory canning? The answer may be found by carefully weighing the advantages and disadvantages of each. The factory cannery has labor-saving machinery, has its labor wkell organized, buys its supplies at wholesale, and puts up an established article of trade. On the other hand, the home canner does not have to pay any cash for his stock. What he gets above the cost of packing is gain when he packs culls which would have gone to waste if they had not been canned. The stock can also be packed with more care and in better condition. This means better quality after the details of the work are mastered. Home labor may be used in many cases. A family alone can often put up a good-sized pack. Selling of the pack can be done direct to the consumer, or at least through the local grocers. This selling can be done when other farm products are sold

Success in the enterprise depends, first, on good quality. Then on the ability of the farmer as a salesman of his goods. Good quality is the greatest aid in selling. One should not try to sell anything that he would not be willing to eat. Attractive labels, advertising in the local papers, and care in selecting only such crops as the market needs, are points not to be overlooked in selling canned goods.

If a farmer wishes to try home canning, the companies which manufacture home canners give more or less complete directions for operating their machines. Follow their directions, because it is to the companies' interest that the user succeeds. There will be some failures, but the cause of each one should be looked into and corrected. It will take perseverance to learn the work, but the resulting profits will be worth the effort.

TO GET SIZE IN STEERS ON THE RANCH.

Where size cannot be obtained in steers by feed in places in which feed is scarce, it cannot be obtained by breeding and inheritance. This is the statement of E. N. Wentworth, professor of animal breeding in the Kansas State Agricultural College.

"Many cattlemen in the short grass and short feed -country," says Professor Wentworth, "cannot obtain size in their steers by feed, due to its scarcity, and hence try to obtain it by breeding and inheritance, through the introduction of big-boned and long-framed bulls. Yet it takes a definite amount of feed to make a pound of gain, and the big rough stock may require more feed a pound than smaller sized animals. The engine does not run without coal, but the larger it is the more coal it requires. The same is true of the steer, except that if it lacks fuel it does not deveop into as big an engine.

"The rancher says: 'If a big strain of cattle deteriorates so much in size, a smaller strain doing the same will disappear.' The small strain does not disappear, however, for in a state of nature, or of an agriculture differentiated as in the English shires, the smaller breeds live in the short feed countries, the large breeds live in the full feed countries, and each develops a siz and meat productiveness characteristic of that district. The secret of success in ranch breeding is not to seek corn belt tops where corn belt feeds are absent, but to adapt the ends to the means."

TIMOTHY AND ALFALFA.

TheLahontan dam on the storage reservoir of the Carson-Truckee irrigation project is said to be the largest dirt fill dam in the world. It holds 390,000 acre feet of water, which is used in the partial irrigation of 210,000 acres. Water is backed up by the dam a distance of 32 miles.

More than twenty rivers flow into the State of Nevada and only four flow out. This is one of the reasons why irrigation water can be supplied in large amounts from wells.

After checking up land for irrigation in Nevada many ranchers seed timothy with their alfalfa at the rate of five pounds of timothy to the acre and 15 to 20 pounds of alfalfa. This is most practiced where sufficient time cannot be put in to make a first-class job of leveling. In the low spots where the alfalfa is drowned out timothy takes hold well, while in the higher spots, where the timothy does not get a good start, the alfalfa covers the ground. In the rest of the land the timothy and alfalfa make a good mixture. In this way none of the land goes to waste and in addition the alfalfa and timothy make a well balanced ration.—Orchard and Farm.

NEW TEST FOR ACID SOILS.

A simple little device has been perfected at the Wisconsin Agricultural Experiment Station which promises to be of great value in improving and developing many of the soils of the state. It was devised by Prof. Emil Truog. By its use it is possible to tell how ocid a soil is and how much lime will have to be applied to correct this acidity.

It consists of an alcohol burner, a cup to measure soil, a graduate to measure water, a few strips of paper, and some chemicals which can be purchased at any drug store. It is "no trick" to mix the water, soil and chemical together in a flask and set this mixture over the alcohol burner, until it boils. Then by laying one of the strips of paper, soaked in another chemical, over the mouth of the flask for two minutes, observing the color the paper turns and comparing this with a card of standard colors, the farmer knows definitely how much acid is in his soil. The gas given off by the boiling mixture colors the strips of this paper in shades from light yellow to black, depending on how much acid is present to set free the gas.

The test can be made in the field and by any one who will follow the directions. It is described in Bulletin 249, a copy of which will be sent to any resident of the state who applies to the director of the experiment station, Madison, Wis.

DIVERSIFY FRUIT GROWING.

Diversified farming is rapidly coming into its own wherever the folly of the one-crop idea has been exemplified by crop failures, lack of markets or poor prices for the particular one-crop commodity.

Pajaro Valley has followed out the one-crop idea since agricultural pursuits were first begun in this valley and today the arguments for diversified crops are stronger than ever. First it was potatoes and grain; still later the sugar beet sprang into prominence and today the apple is our one big commodity. It is true that the strawberry and the apricot are produced here in large commercial quantities, yet the success of the valley each year rises or falls and depends upon the sale of the apples.

A number of our farmers have experimented successfully with oranges, lemons, olives and other fruits that are commonly regarded as growing only in tropical lands or in sections where a salubrious tropical climate prevails.—Watsonville Parajonian.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL
For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils, Corns and Bunions, CAUSTIC BALSAM has no equal as a Liniment.
We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.
A Perfectly Safe and Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Strains, Lumbago, Diphtheria, Sore Lungs, Rheumatism and all Stiff Joints
REMOVES THE SORENESS--STRENGTHENS MUSCLES

FOR SALE
RACING AND BREEDING MATERIAL
from the establishment of the late
WENDELIN J. MILLER
of Chico, Cal.
The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including
JOHN MALCOLM (2) 2:11½
stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.
CAPITOLA (2) 2:17¾, (3) 2:14½
stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.
BONDALEAN (2) 2:20½
winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¾, etc. As great a youngster as the country affords today.
KATALINA 2:11¼
(dam of Bondalean (2) 2:20½) by Tom Smith 2:13¾, dam Kate Lumry 2:20½ (dam of 5 trotters including Baby Doll 2:10¼, Ella Mac 2:11½, etc.) by Shadeland Onward 2:18½. Katalina was a stake winner, a great aged trotter, and her first foal is a fast, standard performer. She breeds regularly and will become more famous as a producer than is her dam.
TWO-YEAR-OLD FILLY
by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.
BAY FILLY, WEANLING
by The Proof (2) 2:29¾, dam Katalina 2:11¼. Nice individual and bred to make a fast mare.
LULU MACK
(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.
BAY FILLY
three years old, sister to Capitola (3) 2:14½, never broken.
FIRST NATIONAL
bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.
John Malcolm and Bondalean are in training at the Woodland Stock Farm, Woodland, Cal., their workout days coming on Wednesdays and Saturdays. You can see them at any time and they show for exactly what they are—two of the best young pacers in the land to race in this and future seasons. Prices and particulars of all kind may be obtained upon application by mail or in person to either of the undersigned.

REOPENING of UNFILLED HARNESS EVENTS

—FOR—

The Oregon State Fair

SALEM, ORE.

SEPT. 27 to OCTOBER 2, 1915

Mile Track; National Trotting Association.

All communications to W. Al Jones, Secretary, Salem, Oregon.

ALL EVENTS EXCEPT MARKED (CLOSED) TO CLOSE AUGUST 13, TO HORSES ELIGIBLE ON CLOSING DATE

MONDAY, SEPTEMBER 27

Three-minute Trot, 3 heats	$ 300.00
2:10 Pace, 3 heats	700.00
2:25 Trot (closed)	600.00
One-mile Handicap Dash, Trot and Pace	500.00
Great Western Relay Race	1,500.00

TUESDAY, SEPTEMBER 28

2:15 Trot, 3 heats	$ 700.00
2:18 Pace (closed)	700.00
Three-year-old Trot (closed)	2,000.00

Second day Relay Race.

WEDNESDAY, SEPTEMBER 29

Three-year-old Pace (closed)	$1,500.00
2:30 Trot, 3 heats	500.00
2:08 Pace, 3 in 5	2,000.00

Third day Relay Race.

THURSDAY, SEPTEMBER 30

2:20 Pace, 3 heats	$ 700.00
2:12 Trot, 3 in 5	2,000.00
2:15 Pace, 3 heats	700.00

Fourth day Relay Race.

FRIDAY, OCTOBER 1

Free-for-all Pace, 3 in 5	$ 700.00
2:20 Trot, 3 heats	700.00
Three-minute Trot or Pace, 3 in 5	300.00

Fifth day Relay Race.

SATURDAY, OCTOBER 2

2:12 Pace, 3 heats	$ 700.00
2:09 Trot, 3 heats	700.00
2:25 Pace (closed)	500.00

Sixth day Relay Race.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

For conditions of relay and any other information address

W. AL. JONES, Secretary and Manager, Salem, Oregon.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

2019 So. Figueroa St., Los Angeles.

WHOLESALE AND RETAIL

Care and Training of Trotters and Pacers....

Price $1.00 Second Edition Revised and Enlarged.

The first book on its subject printed in over 20 yrs. Previous works belong to the high wheel sulky era.

THIS book enables anyone to do his own care-taking and training until it is time to send the colt to a professional trainer. It explains why promising speed prospects should be handled professionally after a certain period. It covers the intricate details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented; nothing is left to guess work. The entire field is covered in lucid language. The instructions are concise and easily understood. Every man who owns a trotting or pacing colt should read this book. The work contains 160 pages, is handsomely bound in cloth, is clearly printed, is handsomely illustrated and contains no advertisements—it is not a catch penny publication that looks big in the advertisement and is disappointing when received. The work is as modern as a 42-centimeter gun. Both theoretical and practical views are outlined and compared. The book incorporates the views of such authorities as Thomas W. Murphy, Walter R. Cox, Ed Geers and others. Many professional trainers have purchased the book and have found it interesting. Despite the war over 300 copies have been sold in Europe and Australia. The titles of the chapters are: The suckling colt; The weanling colt; Making speed with yearlings; Preparing for the two-year-old futurities; Three-year-olds; Six principal defects in gait, shoeing colts; Shoeing of 101 famous colts of the past four years; Types of shoes illustrated; and Miscellany. This last chapter is full of many useful and valuable hints, too numerous to mention here, such as why horses should have water before hay, and hay before grain. Send us your dollar now. This book contains hints you can make use of at once. If you forget you may regret

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

DDITIONAL PURCHASES BY MR. ALBRIGHT.

Recent mention was made in these columns of the rchase by A. Albright, Jr., of Newark, New Jersey, the fast double gaited mare Zulu Belle 2:06¼ cing, 2:10¼ trotting, for breeding purposes, and fore the eastward movement among horsemen rac- g at the exposition set in he had three others to company the Belle on the journey to her new me—Josie Ansel 2:14, Katalina 2:11¼ and Wend- g, the latter a yearling filly by The Proof 2:11¼ d out of Katalina.

Josie Ansel, purchased from Woodland Stock rm, is one of this year's crop of new performers Prince Ansel (2) 2:20½, and is a sister to Joseph nsel (3) 2:12¾, being out of Josie D. by Nutwood ilkes 2:16½, grandam Everette (dam of Wesos 12¼) by Nephew 1220. She acquired her record the Woodland meeting in May and at various times her work has shown flights of speed at better an a two-minute gait. Whether or not she was purased for racing or breeding purposes is not known, t as she is bred on attractive lines and as Mr. Alight is known to be gathering a select band of atrons she is probably destined to become a mem- of the latter circle.

Katalina, formerly owned by the estate of W. J. ller of Chico, is well known in California both as race and brood mare, as she was the first of the tartette of trotters produced from the union of Tom Smith 2:13¼ and Kate Lumry 2:20½, J. W. Zibbell's great daughter of Shadeland Onward 2:18½, the others being Baby Doll 2:10¼, now at North Randall for the opening of the Grand Circuit, and Ella Mac 2:11¼ and Eddie G. (2) 2:30, both the latter still owned by Mr. Zibbell. As a three-year-old Katalina obtained a record of 2:15¼ and made a most excellent campaign, being first in the Stanford, second in the Occident and third in the Breeders' futurity here in California in addition to winning the events for trotters of her age at North Yakima, Spokane, Portland and Salem. As a four- and five-year-old she raced well on local tracks, and in 1912, from a mating to The Bondsman, gave birth to a brown colt now known as Bondalean (2) 2:20½, (3) 2:11¼, the latter a winrace record made at the recent exposition meeting against a field of aged horses, with Owner-Amateur Charley Silva in the sulky. To date, Bondalean is the best three-year-old prospect for this fall's pacing classics, and so good a horseman as Elmo Montgomery, his former trainer, gives him serious consideration as a likely candidate for William's seat as the three-year-old king. The filly by The Proof 2:11¼ is a good sized, well turned miss and will no doubt make a trotter, as The Proof has proved he sires 'em and Katalina is bred to produce them. At all events, the enviable position accorded California matrons in eastern esteem is not likely to suffer from the future record of Mr. Albright's purchases.

YOUNGSTERS FOR NEW ZEALAND.

Mr. Freeman Holmes of Christchurch, New Zealand, who has been in California for the last few weeks, during which time he has visited a number of near-by breeding and training establishments, has purchased from J. W. Marshall of Dixon, subject to their successful passing of the veterinary tests required by the New Zealand government, a pair of fillies whose breeding calls to mind the numerous fast performers that have preceded them from the Marshall ranch. The elder of the two girls is Bonilene, the three-year-old daughter of The Bondsman and Madeline Marshall (dam of Zomblack 2:10¼, etc.) by Demonio 2:11¼, and the baby is a nice big yearling by Demonio, out of Bally Pointer (sister to Sirius Pointer 2:15) by Star Pointer 1:59¼, grandam Trix Marshall (dam of seven, including Moortrix 2:07½, Aerolite 2:06¾ and Mona Wilkes 2:03¼) by Nutwood Wilkes 2:16½. Both fillies are good individuals, nice colored, and with the excellent natural action that their blood lines would indicate.

This is not Mr. Holmes' first experience in taking undeveloped California horses to his home, as some five years ago he was here and purchased from C. L. Griffiths of Pleasanton the Bonnie Direct mare Bonnie Jennie and her filly foal by Star Pointer 1:59¼, registered as Bonista. Bonnie Jennie was bred to Jim Logan prior to her shipment and proved with foal, though unfortunately the produce of the union died shortly after its birth. She was then bred to Harold Dillon and to his embrace also foaled a filly, now an unbroken two-year-old. At the races she proved a good winner and has recently been sold to John Porter, the owner of El Carbine, to which horse she will in all probability be stinted this season.

Though Bonnie Jennie (who, by the way, is a member of the Leonor family, her dam being the famous Jenny Mac 2:09 by McKinney 2:11¼) was bought for the account of Alfred Lawrence, Mr. Holmes purchased Bonista for himself and yet owns her. She won two good races at the last New Zealand cup meeting, was bred, and then made another nice winning, so that she has paid her owner a nice profit. At present she is in foal to Wildwood, Junior, twice winner of the New Zealand cup, and Mr. Holmes has great expectations for her career as a brood mare. Both she and her dam have raced around 2:16, with longer distances at a highly creditable rate.

Mr. Holmes leaves tomorrow or Monday for Vancouver, from which port he sails for home on the seventh, but the horses will not be shipped until the twenty-third, when the Marama clears from this city.

NOVEL ENDURANCE CONTEST.

An unusual feature that it is planned to hold in connection with the third annual New York Fair and Exposition at Empire City Park, Yonkers, N. Y., is a race between trotters and runners under saddle. The intention is to make this a twenty mile endurance contest, with the weight at 150 pounds. There is no doubt but that a handsome purse will be made up for this event, as it is one of the favorite bones of contention between trotting horsemen and running horsemen as to which type of horse would hold up best in a long distance race.

The value of such a trial of staying qualities is of more than ordinary interest to army men, especially since the Government is seriously considering breeding horses on its own account. The need of stock that can stand up well when called upon to make speed and keep it up beyond a short dash is particularly felt in the cavalry. Such a race as that projected at Empire City track would therefore have not only the enthusiastic support of all horse breeders, owners and dealers, but it would also furnish the officers of the United States Army with much valuable data on the relative merits of trotters and runners.

The gaits permitted would be a walk and a trot for the trotters, in the contest, and a walk and a gallop for the runners. At the present time no date has been set for running off this particular event, but it is quite likely that it will be put on early in September, when both runners and trotters will be on the grounds at Empire City Park.

The fourth of July will be celebrated by local horsemen on the following day, July fifth being the date chosen for a monster matinee at the exposition track as well as for the Alameda butchers' celebration at Pleasanton, when a good card of events will be raced for real money.

Thoroughbred Breeders Organize

"They're off!" will be the old familiar cry that will rise from thousands of throats out at the exposition track on the afternoon of Saturday, August twenty-first, when under the auspices of the Golden Gate Thoroughbred Breeders' Association the sport of kings will be re-established in California on an entirely new basis. Four years—four long ones—have elapsed since the barrier fell before the last field of thoroughbreds on a bay track, and the prospect of the runners "coming back" has aroused enthusiastic interest throughout the coast country.

For weeks, or really for months, there has been more or less talk of the probability of a meeting for the gallopers to be held during midsummer at the exposition track, talk that would not be downed, though nothing definite seemed to come from it. The passing of the Nevada racing measures, with the resultant westward swing of numerous stables of high class campaigners, gave the sponsors of the idea of holding a meeting locally some real foundation to build upon, and during the present week the project has assumed definite form.

Most persistent and active in the earlier days of the growth of the plans now being consummated were Messrs. Charles W. Clark of El Palomar, San Mateo; James C. Nealon of this city, and Charles T. Boots of California and Nevada. To them is due, in a very large measure, the successful launching of the Golden Gate Thoroughbred Breeders' Association, whose permanent organization was perfected Wednesday evening at the St. Francis Hotel, the following gentlemen, well known in many circles in this vicinity, being chosen to guide its destinies during its early career: President, Charles W. Clark; first vice-president, J. H. Rossiter; second vice-president, Dr. D. C. Jenkins; third vice-president, Judge E. P. McDaniel; treasurer, R. M. Tobin; secretary, J. C. Nealon; board of directors to include above named officers, together with the following: R. Porter Ashe, C. T. Boots, W. W. Dupee, F. J. Carolan, H. T. Griffin, Captain John Barneson, Charles Butters, W. F. Humphrey, W. H. Moffat, R. J. MacKenzie, Dr. H. S. Kergen, Dr. A. P. Tate, J. D. Grant, J. Cheever Cowdin and Jack Miller.

The association has been incorporated for $50,000 and does not hold forth to its members any hope of profit during the first years of its existence, at least, as the men behind it realize fully the many obstacles that must be surmounted before thoroughbred racing is truly re-established on a firm foundation, and freely admit that they expect to go into their pockets pretty deeply before they get any returns save those of the keen enjoyment to be derived from clean racing. They believe, however, that their activities will mark the beginning of the complete rehabilitation of the running game in California, as they propose to conduct their own meetings in such manner that they cannot fail to be awarded the seal of popular approval. Nothing succeeds like success, and if their efforts prove successful their organization will be duplicated in various quarters of the state, and the thoroughbred be "brought back to his own," on a basis that will make the sport enduring. True sportsmanship, rather than a hope of profit, prompts the Golden Gate Thoroughbred Breeders' Association, and true sportsmanship deserves ever the heartiest of encouragement. By all means, let us have the thoroughbred back with us on a new, clean basis, and let us extend every assistance to the men who are giving their time and their money to the movement to bring about this happy culmination.

The response from campaigning horsemen has been a ready one. The Reno meeting, which commences July 17 to run for thirty days, has attracted many stables from among the best of the land, and when Reno closes most of the best of these will make the trip to the Golden Gate for the thirty days of sport which is to begin on August 21. From the north, too, has come promise of many horses, for all who have ever raced here before cherish fond memories of the bay cities and their hospitality, and the outlook at this moment is roseate in the extreme.

Late News Notes from North Randall

[From the American Sportsman.]

Billy Andrews worked the Pastime Stable's two-year-old filly Volga in 2:15, last quarter in :31, and in another mile marched her a last quarter in 30 seconds. The full sister of Peter Volo (3) 2:03½ is surely a wonderful trotter.

Mike McDevitt gave several members of Captain Shaw's string some glib miles, the fastest being in 2:10¾ by Joan 2:04¼. The rugged daughter of Directum Spier (4) 2:11¼ looks grand this spring and should prove a mighty tough proposition to beat when Mike passes the word "she's ready." Peter Mac (4) 2:10½ now five and his full sister, Lillian the Great (3), both by Peter the Great 2:07¼ and out of Lillian R. 2:04½, trotted together in 2:16½ with a half in 1:05¼. The filly is an extra large, stout made one, and goes like one of great determination. Miss Directed (4) 2:18½, winner of the Inter City $2,500 Cup last season, romped off her best miles, they being in 2:13½ and right back in 2:12 with a half in 1:05.

W. W. Marvin stated that he would not race William (4) 2:00 against Tommy Murphy's trio in the proposed $5,000 race at Detroit. He remarked, however, that when the matter of a meeting was discussed, he was led to believe that Geers was to have Anna Bradford (3) 2:00¾, McMahon the gelding, Frank Bogash Jr. 1:59¼, and Murphy was to retain Directum I 1:58. Mr. Geers in an interview Saturday said that no arrangements whatever had been made with him relative to taking charge of the great filly, credited to one stallion is 205 trotters and 58 pacers; 2:02½ was in his stable and would be a contender in some of the free-for-alls, he did not see how he could race the Todd Mac 2:07¾ speed marvel.

"Kentuck" Floyd has what looks to be an exceptionally promising four-year-old trotter in The Eno (3) 2:19¼, a son of The Native 2:10½ and Anna B. (dam of Dictator Todd 2:08¼, Dolly Bidwell 2:08½, etc.) by John Burdine. On Friday Floyd let his colt extend himself a part of the road and the result was a mile in 2:13¼, last quarter in :31¾. He makes his first start at Youngstown and will no doubt be afforded a chance to stretch himself somewhat, because there are several other trotters being primed for the David Tod Cup, which can hike quite merrily also. When the widely known "Piggy" Friedman returned from his annual fall pilgrimage in the south in 1914, he proclaimed The Eno a wonderful colt and tried to influence some local parties into buying him, but they hesitated just a week too long.

The Pastime Stable's first string three-year-old, Rusticoat (3) 2:13¼, was given his fastest mile on Friday by Billy Andrews and a trip in 2:14¼ was no effort for the stout, handsome colt which so greatly resembles his sire, the noted Axworthy (3) 2:15½. Bacelli (2) 2:15 also three, trotted in 2:11¾; Lee Axworthy (3) 2:08 in 2:11¼; Hazel Laing 2:08¼ in 2:13¼, 2:12½, 2:12¼; John R. Dillon 2:11¼ in 2:12¼-1:05 in company with Newzel 2:05¼ with Mr. Devereux up and Leonor McKinney (2) 2:18¾ in 2:18½. Andrews' trotters are in fine shape and until Siliho went to his nose on Thursday, there was not a single incident to mar the tranquility of the entire contingent.

Fred Jamison shipped eleven head to Rockport on Saturday and after racing at the west side track will transfer most of the number to Cranwood Park and the balance to Cochocton, where they will be joined by another consignment from Arden, Pa. His large stable was training nicely until a short time ago, when practically all of them were taken ill and two of them, Major Spier (3) 2:10½ and the promising New York owned colt, The Scorpion, died. Fred now has here Ella Ambulator 2:04½, Don Patch 2:07¼, Bingo Axworthy 2:10¼, Carnation 2:11¼, Colonel O. 2:13¼, Jim Red 2:16¼, Countess Mobel 2:16¼, Guy Rea (2) 2:18½, Lady Maud S. 2:19¼, Tramp-a-bit (3) 2:23¼ and Catherine Vincent, a full sister of Florence Vincent 2:12¼.

Nick Grady arrived at Randall the first of the week with eight head and will remain for the Grand Circuit opening. The top-liner in the string is R. H. Brett (4) 2:03¼, the holder of several world's records and one of the very greatest racing pacers of his age to appear. The others consist of Dago 2:09, the handsome trotting gelding; Roy Miller 2:12¼, winner of the recent Horse Dealers Sweepstakes; Maxine Audubon 2:11¼, a half sister of R. H. Brett (4) 2:03¼; Florie D. 2:13½, Darah, a three-year-old trotter by Peter the Great 2:07¼; Beldon, a pacer the same age and by Bellini, and Dame Danvers, a five-year-old trotting mare by Danvers. Several of the above have won races, they being Roy Miller 2:12¼, winner of both his starts; Maxine Audubon 2:11¼, and Florie D. 2:13½.

William (4) 2:00, one of the very greatest champions which ever appeared, seems right now to be in the form of his life and, while it may make us appear ridiculous in the eyes of some when we say that he was oily and with ease to himself when romping a quarter at a 1:52 gait on the end of a 2:04½ mile, we will stand to be called foolish, because he really performed the trick with a number of the country's prominent teamsters clocking him. To add to the achievement, we will say that the track was not fast and he had a stiff wind to contend with, but he plowed right along in :32½, 1:04½, 1:36½, 2:04½, the last half being in a minute, the final quarter in 28 seconds and he was pacing a runaway clip at the wire. A week ago we stated that the champion was heavier in flesh than in 1914 and trainer Marvin considered him in great form, and his mile on Tuesday proves him to be right now in line for some banner achievements. We also learned that he had been a mile in 2:07 with a last quarter in 30 seconds over the Lafayette track before coming here a week ago, consequently his 2:04½-1:00-:28 trip here was not such a huge drop as it would otherwise appear. Not a single mare was bred to William (4) 2:00 this season and every effort was made to conserve his every particle of energy in view of making his 1915 campaign a memorable one.

"Gamey" Brennan, chief booster of McKennan Farm, Washington, Pa., and one of the most widely known followers of the light harness horse, put in his appearance Saturday at Rockport along with Fred Jamison's crew of deck-hands. Before the cook tent was in full running order, Gamey as usual complained of a vacancy in the region of his belt line and meandered toward Kamms in search of "garbage." Chancing to see a butcher shop, he dropped in and while there, a very energetic appearing boy came in and struck the proprietor for a job. "What can you do?" inquired the main guy. "Most anything," replied the boy and followed his remark by coming back with "How much will you pay?" "Three dollars a week starting right now. What can you do to earn the money?" "Most anything you want done," remarked the boy. "Well," said the boss, "what can you do right? Can you dress a chicken?" "Not on three dollars a week," replied the boy and then hit the grit.

Etawah (4) 2:03¼, the world's champion four-year-old trotter, has arrived and will be prepared by Mr. Geers for his late engagements. The son of Al Stanley 2:08¼ looks fine and it is to be hoped that he acquires greater distinction in 1915.

Siliho, the very promising three-year-old gelding owned by H. M. Hanna and being trained by Billy Andrews, tripped last Friday, while trotting a 2:10 shot, and it is feared that he will be laid up for some time. Two weeks ago he worked in 2:14½ and he was doing so nicely that his owner was looking forward with great pleasure to seeing him perform in the Youngstown Sweepstakes. As the youngster is one of Mr. Hanna's own breeding and the latter was particularly anxious to be represented at George Dietrick's initial speed festival, the accident is the more to be deplored.

On Friday Harry Stokes moved three of his string along in a manner to please him. The fast Cresceus 2:02¼ gelding Precious Cresceus 2:15¼ owned by Ed. Vietmeier, Sandusky, O., was changed a little in rigging, and the way he marched off a mile in 2:11¾ convinced Harry that he was up to trotting a mile in 2:10 at least right now. His heavily staked pacer, Patrick M. 2:11¼, reeled off a mile in 2:14-1:04¼-30¼ and was fairly flying at the end, while his convert Celia M. 2:14¼ was given a chance to straighten out through the stretch and trotted like a stake candidate, her mile being in 2:18, the last half in 1:05½ and final quarter at a 2:04 gait.

H. J. Schlesinger, Milwaukee, Wis., owner of Harvest Farm, was a local visitor last Saturday, and reports that he has some very precocious two and three-year-old trotters and some extra nice yearlings. In a short time Harvest Farm will no doubt establish quite a reputation as a trotting nursery, as Mr. Schlesinger has a very choice collection of mares and is breeding them to his trio of young stallions which are of such individual excellence and are representative of the families which no one can justly fault. The three stallions at Harvest Farm are Belwin (4) 2:06¾ by McKinney 2:11¼, one of the very greatest racing colts of his age and sex which ever appeared; Beirne Holt (4) 2:11¼ by Cochato (3) 2:11½, winner of second money in the M. and M. and an exceptionally fast trotter, and Wotan 2:17¾ by Bingen 2:06¼. The most of the mares at the farm this season were bred to Belwin (4) 2:06¾, and inasmuch as both of the $20,000 events at San Francisco were won by representatives of sons of McKinney 2:11¼, Mr. Schlesinger can look forward with renewed pleasure to the results of this season and likewise congratulate himself, as he unquestionably owns in Belwin (4) 2:06¾ one of the very greatest stallions by the wonderful son of Alcyone 2:27.

MASON CITY, IOWA.

CLARA MAC 2:04½ A DURFEEITE.

On Friday of last week Will Durfee made a to Woodland and before his departure from the metropolis became the owner of the fast pac mare Clara Mac 2:04½, the consideration invol in the transaction not being made public thoug ran well into the four figures column.

The history of this fastest daughter of Express Mac 2:25½ is too fresh in the minds of Califor race-goers to need extensive reviewing at this ment, as she was the outstanding star performer the local tracks in 1914, pacing seventeen winn heats over mile tracks in time averaging just fas than 2:07½. She was made and raced in her ea engagements by Walter Gallup of Hardwick, w drove her to a record of 2:05¼ the first time eit one of them faced the starter in professional co pany, and later acquired her record of 2:04½ in hands of Harry Dowling, Mr. Durfee incidenta shooing her out of the 2:06 class with White S It was the two "trimmings" administered to the ter mare by Clara at the state fair at Sacramen that imbued Mr. Durfee with a most profound spect for her, and it was rumored at that time th only her ineligibility for the 2:06 stakes prevent her purchase by Mr. Durfee then and there.

In the free-for-all pace at the exposition she ploded a number of persistent winter tales to t effect that she had suffered injury in her last rac in 1914 by winning the third heat in 2:06¼; faili to head the summary or equal her record she comes, under the time allowance clause in the pr ent racing rules, eligible to the 2:06 class for ne season, unless she knocks herself out of the allo ance by a fast performance later in the year, whi is not likely, owing to the fact that she has no e gagements. Mr. Durfee is laying plans for an easte invasion in 1916, and his present intentions inclu the coupling of White Sox and Clara Mac in th 2:06 stakes on the Grand Circuit.

AN ESSAY ON THE COW.

A schoolmaster asked his pupils to write an essa on cows, and a farmer's son produced the following— or so it is said:— "The cow is a no-bull and kin hearted creature. The man who looks after cows called a cowherd, but he is not a coward who look after cows. Cowes has a regatta every year, yet th cow is not a nautical animal. It is reported tha the cow sat at the head of the table in the Ark— so say arkcowlogists—because she was the only an mal that could calve. The cow is a good mother, an will look calf-ter her calf. Cows exist by means o the ox-ygen in the atmosphere. I got this from professor at Ox-ford. By the cow is milk made. know this to be true, for I have seen the milkmai by the cow. The cow has been introduced into song There is an old song called 'The Soldier's Steer.' Thi was written on beef flat, as also was that very pa thetic ballad, 'For Heifer and for Heifer.' The cow' sex is sometimes rather complicated. To call a cov an ox is to make a bull. Crutches for cows are calle acoustics. A cow likes resting. It will sleep in it shed and lie on the grass, but it will not stretc itself on a cowch; it does not go sofa as that. A cow does not carry on an argument very obstinately it will soon give whey. Cows seem to do pretty we for even at death they generally manage to unmake both ends meat. I can't think cow it is that so many calves die young. Perhaps the butcher could re-veal the secret."—W. A. Sportsman.

MATINEE AT EXPOSITION TRACK.

day of the recent harness race meeting at the I. E. was blessed with as pleasant weather as last Sunday, as the sun was bright and warm and wind less pronounced than it was earlier in the , the combination of nice weather and nice ng working to make a pleasant afternoon for members of the San Francisco-California Driving and their friends.

V., Joe Vermet's nice mannered little pacer, set pace in the early part of the 2:30 trot or pace, faded a bit at the five-eighths and gave way to Villa, with Laddie G. hanging to the revolution- chieftain's right flank and out-trotting him ugh the stretch. In the second J. V. led until toward the wire when the longer-striding Laddie ared him and beat him by a small margin in the l brush, a break soon after coming into the tch settling any chance the General may have to win.

he 2:18 pace brought Ed Ayres a hard jolt in the d heat, but fortunately no bones were broken. n Murphy had the legs of the party, composed Lady Listole, Emma M., Hamburg Belle and him- for the first heat, but lost the second owing to reak in the stretch. Lady Listole, a game lassie still fat and not up to a hard race, led from the f until well into the stretch, when Billy Malough ught Emma M. up with a lot of whizz and won by omfortable margin; Jerry Doran, after surrender- first place, shut off the juice just fractions of a ond too soon, as Charley Becker and Hamburg le buzzed up with the muffler wide open and ped place in the last few feet of the mile. In the l heat Lady Listole in the lead, with Tom Murphy iling, went to a standstill break past the quarter l Murphy went into Doran's sulky as Ayres tried swing him in the clear, Ed getting a nasty tumble t wrenched some of the muscles in his left leg and t painfully, but breaking no bones. The Murphy se after getting in the clear went on at a pace l finished alone, Harold Cohen catching him after had passed the wire. Hamburg Belle outfooted mma M. for the heat, but Malough's mare had the at of the summary by one point.

The 2:12 pace witnessed the debut of Jack Welsh d his new pacerino, Little Bernice, recently pur- ased from Sam Watkins, but the daughter of Del ronado that forced William to his record at a ee-year-old has not yet gotten back to her old form d was unsteady for both Jack and Harold Cohen, o had the mount in the second heat. Bradmont ished each heat like the genuine "gentleman's fun rse" that he is, but Charles Becker had Dick W. his good behavior and the Ottinger gelding won in aight heats, with apparently something left.

Harold Cohen warmed up both Muggins and Mat- an for the free-for-all trot, both the uncertain tors being on their good behavior. His choice the fray was Muggins, and the chestnut gelding stified the choice by making it two straight over . Patrick and Monica McKinney, never being in ious difficulties. When he is good he is very, y good, but when he is bad—wow! W. J. Clem- ts of the P.-P. I. E. staff made his first appearance cally as a starter on this occasion and rendered y good service. The summaries:

THE RUSH & HAILE SALE.

Only a small band of horsemen gathered last Saturday afternoon at Suisun to bid on the band of fourteen yearling and two-year-old geldings and fillies that formed the annual offering from Suisun Stock Farm, the home of Demonio 2:11¼, the boys and girls going for the most part into the hands of A. W. Longley, Elmo Montgomery and John Grimes, of John Gwynne fame. Mr. Longley, who was accompanied by Henry Smith of Pleasanton, started his purchases with number one in the catalog and picked out the following trio: Bay filly (1) by Demonio—Maude Washington by McDonald Chief, bay gelding (1) by Vernon McKinney—Gertie A. by Diablo, and bay gelding (2) by Demonio—Corinne by California Nutwood. Elmo Montgomery took two of the tops of the sale in the black filly (2) by Gen. John B. Frisbie—Anna Mak by Unimak, and the chestnut filly (2), sister to Memonio 2:09½, by Demonio—May Norris by Norris. E. McKean secured the black filly (2) by Gen. John B. Frisbie—Hanora (dam of Oro Mo 2:09¼) by Oro Wilkes, and Ed Scally rounded up the bay gelding (1) by Montbaine—Olita by Bradtmoor, while John Grimes took everything else offered, including the brown gelding (2) by Gen. John B. Frisbie—Rosie R. by Demonio, chestnut gelding (1) by Montbaine—Elvira (sister to Gracie R. 2:10½) by Demonio, chestnut filly (2) by Demonio—Hannah (dam of Gracie R. 2:10½) by Le Grande, brown gelding (2) by Gen. John B. Frisbie—Memonio 2:09½ by Demonio, bay filly (2) by Gen. John B. Frisbie—Edna Earle by Demonio, brown gelding (2) by Gen. John B. Frisbie—Elvira by Demonio, bay gelding (1) by Montbaine—Hanora by Oro Wilkes, and two aged saddle horses.

As was expected in the light of general conditions in the trotting horse industry throughout the coast country, the prices obtained for the offerings were less than in former years, though they compare favorably with the reports from other sales held in the past several months. Though the youngsters showed that they had been very economically raised the foundation of blood and individuality was clearly shown, and as most of them went into the hands of horsemen who will give them a chance it is a mighty safe bet that they will prove profitable investments and that some of them, at least, will mature into high class campaigners.

June 17.—Rain; declared off.

Record Performances at P.-P. I. E.

While the general inclemency of the weather from a racing standpoint served to keep down the time made by the winners of the various events at the recent meeting at the exposition track, quite a number of new records were made by performers credited with the brackets in former years, while there were a few newcomers to the standard list among both trotters and pacers. Fast performances by pacers were more common than on the part of trotters, owing, doubtless to the fact that the track is more to a pacer's liking. While two new 2:10 trotters appeared, it is of interest to note that no former member of the 2:10 list, at that gait, succeeded in reducing the already existing record. The additions to and corrections for the 2:10 and standard lists appear herewith under the proper captions:

2:10 Trotters—New.

SPRIGGAN, b g (1910) by Baron McKinney 2:10¼—Helen Simmons 2:11¼ by Simmons 2:28; bred by Hillanddale Farm, Mamaroneck, N. Y.; San Francisco, June 12, driven by Will DeRyder.....2:08¼

LOE BLOSSOM, ch m (1906) by Lepide—Lillian W. by Harry Hontas 2:24¼; bred (in Ohio) by Mrs. L. B. Schenk, Phoenix, Ariz.; San Francisco, June 17, driven by Frank Childs 2:09¼

2:10 Pacers—New.

O. U. C., b g (1909) by C. the Limit 2:03¼—Rosie Woodburn 2:16 by Easter Wilkes; bred by C. L. Crellin, Pleasanton, Cal.; San Francisco, June 19, driven by Frank Childs 2:07¼

DIRECTLINE, br h (1911) by Baron Direct—Woodland Echo by Woodline 2:19; bred by Herbert Stock Farm, Denver Colo.; San Francisco, June 11, driven by J. F. McGuire 2:08¼

POTRERO BOY, b g (1909) by Demonio 2:11¼—Potrero Girl by Prince Airlie; bred by Rush & Haile, Suisun, Cal; San Francisco, June 11, driven by L. B. Daniels.....2:08¼

LIZZIE DILLON, br m (1907) by Sidney Dillon—Angela S. by Silent Chimes; bred by Sterling R. Holt, Indianapolis, Ind.; San Francisco, June 19, driven by Marvin Childs 2:09¼

2:10 Pacers—Reduced.

HAL BOY, b g (1907) by Hal B. 2:04½—Altalena by Altamont 2:26¾; bred by August Erickson, Portland, Ore.; San Francisco, June 5, driven by Marvin Childs...2:06¼ to 2:05¼

WHITE SOX, b m (1908) by Del Coronado 2:09½—Subito by Steinway 2:25¾; bred (at Los Angeles)) by Clarence J. Berry, San Francisco; San Francisco, June 19, driven by W. G. Durfee.....2:06¼ to 2:05¼

THE BEAVER, br h (1909) by Searchlight 2:03¼—Ripple 2:28½ by Glenbrook; bred by Graham Taylor, Lexington, Ky.; San Francisco, June 5, driven by W. W. Fleming.....2:08¼ to 2:05¾

Trotters Slower Than 2:10—New.

BRUTUS, b g by Strathway 2:19—Minnie C. by Mendocino 2:19½; driven by S. Christenson 2:15½

BONNIE ANSEL, b m by Prince Ansel (2) 2:20½—Woodland Bonnie Derby by Chas. Derby 2:20; driven by A. D. Brown.....2:16¼

MISS RICO, br f (2) by Manrico (3) 2:07¼—Subito by Steinway (3) 2:25¾; driven by W. G. Durfee.....2:21¼

ANVILITE, b c (2) by The Anvil 2:02¾—Martha Spy by The Spy; driven by C. L. DeRyder 2:22¼

Trotters Slower Than 2:10—Reduced.

THE PROOF, br h by The Exponent 2:11¾—Chord 2:27 by Wilkes Boy 2:24½; driven by Chas. Spencer.....2:29¾ to 2:11¼

ELOISE DELL, br m by Alconda Jay—Princess Dell by Prince Lovelace; driven by Chas. Silva .....2:26 to 2:14¾

AGNES CARTER, b m by Nutwood Wilkes 2:16½—Excella by Monbells 2:23¾; driven by Chas. Becker.....2:20 to 2:15¾

COLUMBIA T., b m by Bon Guy (3) 2:11¾—May T. 2:15 by Monterey 2:09¼; driven by Chas. Silva .....2:22½ to 2:17½

ALLIE LOU, br f (3) by Kinney Lou 2:07¾—Lady Zombro 2:24¼ by Zombro 2:11; driven by Alonzo McDonald.....2:25 to 2:18¼

NICOLA B., br c (3) by Carlokin 2:07½—Atherine 2:16¾ by Patron 2:14¼; driven by W. G. Durfee.....2:23½ to 2:18½

Pacers Slower Than 2:10—New.

A. B. C., bl g by Young Monterey 2:24¼—Rosalie by Dudley 2:14; driven by Fred Chadbourne 2:10¼

ZOMBLACK, bl h by Zombro 2:11—Madeline Marshall by Demonio 2:11¼; driven by C. L. DeRyder.....2:10¼

JUDITH PATCH, b f by Dazzle Patch 2:09¾—Hal Raven 2:03¾ by Hal B. 2:04½; driven by Railey Macey.....2:25

Pacers Slower Than 2:10—Reduced.

BONDALEAN, br c (3) by The Bondsman—Katalina 2:11¼ by Tom Smith 2:13¼; driven by Chas. Silva.....2:20½ to 2:11¼

W. J. K., b g by Dexter Prince—Psyche; driven by W. Smith.....2:14 to 2:12¼

BRADMONT, b g by Alto Leyburn 2:24½—by The Earlmont 2:09¾; driven by T. D. Sexton .....2:17½ to 2:13¼

AGNES PATCH, b f (3) by Dan Patch 1:55¼—Louise Hersey by Arion 2:07¾; driven by Railey Macey .....2:24 to 2:20½

Thousands Won by the McKinneys

If the proof of the pudding is the eating thereof, then the proof of the pedigree is the performance of the individual endowed with it. The time has gone by when stallion owners solicited patronage for their horses on their merits as mere well bred individuals, for with the changing times has come a great change in the horse market—especially insofar as the trotter is concerned. Under present day conditions the trotter, to be profitable, must be a racing proposition, and the breeder's first object is speed. With this end in view the first question asked of a stallion owner is not concerned with his individual qualities of excellence, but concerning the ability of his get—and of the get of other members of his family—to race, and race to win. In support of a stallioneer's bid for patronage nowadays nothing he can present is so eloquent as a plain statistical statement of money winning performances.

Running through the summaries of the recent meeting given by the P.-P. I. E., even the hurried reader, were he anything of a horseman or a breeder, must have noticed the frequency with which members of the great family of the McKinneys popped into print inside the money. At any local meeting in California this would not be a matter for especial notice, as in this state the blood of C. A. Durfee's old premier is most thoroughly disseminated, but in a meeting of the scope of the one just passed into history, where Grand Circuit performers gathered from various quarters to compete for the largest amount of money hung up at any one meeting in recent years, the winnings of the representatives of this one house are a matter of much congratulation among Californians.

Eighty-eight trotters and pacers won money in the contests for a gross offering of $96,500, and of this number twenty-four horses, carrying a direct cross to the son of Alcyone and Rosa Sprague, won a total of $39,425, a showing that is most remarkable. Spriggan and White Sox, top liners of the trotting and pacing brigades, respectively, are both by sons of McKinney, the latter lass having a maternal cross to the founder of the line as well, and of the entire two dozen listed below Baron McKinney 2:10¼ is the only sire represented that was not bred within the confines of this state.

Knowing the widespread allegiance to the McKinneys that exists in the hearts of Pacific coast horsemen, the appended schedule has been prepared, showing the relationship of the various money winners to the "old horse." Only performers with "direct" crosses appear, though there are notable instances of winners not shown herewith who carry the family's blood in an indirect cross, as does Albaloma, who traces to this source through the dam of his sire.

Sons and grandsons of McKinney are arranged alphabetically, with the performers under the proper branch placed in accordance to the amount won. Where the cross comes on the maternal side, notation of such is made, while those with a double cross, through both sire and dam, are duly distinguished but appear only in one place, under the sire. The complete list is as follows:

McKinney 2:11¼ (1887) by Alcyone 2:27—Rosa Sprague by Gov. Sprague 2:20½; bred in Kentucky; brought to California 1889; left California 1903.

*Miss Rico, br f (1913)—Subito by Steinway (3) 2:25¾ ..... $ 500.00

SONS OF McKINNEY 2:11¼.

Baron McKinney 2:10¼ (1904)—Ettie Baron 2:21¾ by Baron Wilkes 2:18.

Spriggan, b g (1909)—Helen Simmons 2:11¼ by Simmons 2:28 ..... 11,275.00

Carlokin 2:07½ (1901)—Carlotta Wilkes by Charley Wilkes 2:21¾.

Nicola B., br c (1912)—Atherine 2:16¾ by Patron 2:14¼ 1,250.00

Carl, bl c (1912)—My Irene S. (2) 2:28¾ by Petigru 2:10½ 750.00

Esperanza, b f (1911)—My Irene S. (2) 2:28¾ by Petigru 2:10½ 625.00

Del Coronado 2:09½ (1897)—Johannah Treat 2:24¾ by Thomas Rysdyk 10649.

**White Sox, b m (1908) p.—Subito by Steinway (3) 2:25¾ 9,312.50

Teddy Bear, b h (1906) p.—Queen S. 2:23 by Sable Wilkes 2:18 ..... 312.50

Princess Louise, b m (1902)—Louise by Woolsey 5337 ..... 300.00

Dr. D. C., b g (1909)—not established.. 200.00

Expressive Mac 2:25½ (1900)—Expressive (3) 2:12½ by Electioneer 125.

Clara Mac, br m (1908) p.—Clara by Howard St. Clair 2:18 ..... 812.50

Madam Mac, br m (1910) p.—by Hawthorne 10935 ..... 225.00

Kinney Lou 2:07¾ (1897)—Mary Lou 2:17 by Tom Benton 15705.

**Allie Lou, br f (1912)—Lady Zombro 2:24¼ by Zombro 2:11 ..... 2,500.00

Oro Lou, ch c (1912) p.—Zeta. W. by Nutwood Wilkes 2:16½ 750.00

McMyrtle 58007 (1902)—Myrtledale by Iran Alto 2:12¼.

John Gwynne, b g (1908)—by Secretary 28378 ..... 200.00

Royal McKinney 2:29¾ (——) — Hattie Hero by Director 2:17.

Leata J., b m (1908)—Geraldine 2:16¾ by Mt. Vernon 2:15¼ 2,250.00

Tom Smith 2:13¼ (1897)—Daisy S. by McDonald Chief 3583.

Baby Doll, b m (1909)—Kate Lumry 2:20½ by Shadeland Onward 2:18½.. 500.00

*Bondalean, br c (1912) p.—Katalina 2:11¼ 400.00

Zolock 2:05¼ (1895) p.—Gazelle G. 2:11½ by Gossiper 2:14¾.

Zoetrix, ch m (1910) p.—Trix Marshall by Nutwood Wilkes 2:16½ 125.00

Zombro 2:11 (1892)—Whisper by Almont Lightning 1025.

*Virginia Barnette, b f (1911)—Zephyr 2:07¼ 5,450.00

Zomblack, bl h (1908) p.—Madeline Marshall by Demonio 2:11¼ 700.00

Imbro, br h (1907) p.—Athlene 2:19½ by Coeur d'Alene 2:19½ 225.00

GRANDSONS OF McKINNEY 2:11¼.

Barney Barnato 2:19½ (1899)by Zombro 2:11.

Sheldon B., b g (1912) p.—Ramona by Prince Robert 300.00

McAdrian 2:24 (1903), by Guy McKinney 37625.

Trix McAdrian, br m (1907) p.—Mountain Girl by Mountain Boy 4841..... 162.50

Wilbur Lou (3) 2:10¼ (1909), by Kinney Lou 2:07¾.

Natalday, br g (1913)—Ella J. by Bob Mason 2:27¼ 300.00

Total.....$39,425.00

*Maternal cross.
**Double cross.

The premium list of the Interstate Fair to be held September 13 to 18 at Spokane, Wash., is out and copies may be obtained by addressing Secretary George P. Larsen, Spokane. This is the twenty-second annual event of the Association, and as usual the premiums offered are liberal and the classification very comprehensive. The interstate is the "one best bet" among inland empire fairs and the patronage accorded it this season should make it the best of the series.

◈◈◈

White Sox 2:05¼ and Clara Mac 2:04½ look like a nice pair for Will Durfee to couple in his entries in the 2:06 pacing stakes on the big line next year—always providing, of course, that Sox doesn't race into a faster class this fall or that Clara doesn't "gum up" the second's time allowance that she acquired at the exposition meeting.

Lexington has a good list of entries for her fea events to be raced in October.

◈◈◈

The center of interest in the trotting world shifted from San Francisco to Cleveland, where Grand Circuit opens on July 19.

◈◈◈

During the absence of Boss DeRyder at the ra George Ryan is looking after the general welfar things at Pleasanton Driving Park, and just now everything in tip-top shape for the butchers' pic tomorrow and Monday.

◈◈◈

In response to a recent inquiry concerning breeding of Foxhall, the great runner was by K Alfonso, son of Phaeton and Capitola, by Vandal, his dam was Jamaica by Lexington, grandam Fa Ludlow by imp. Eclipse, great-grandam Mollie Ja son by Vandal.

◈◈◈

G. D. Armstead of the Hotel Reynolds and J. Backstrand, president of the Riverside District F Association, "represented" for Riverside at the cent race meeting here and did some good wo boosting for their fair, one of the very few lo expositions, with horse racing, to be given this y in California.

◈◈◈

While Will Durfee was rounding up some ste thousand dollars at the exposition meeting, the st at-homes at Los Angeles were not absolutely ba ward about making speed. King Lilly Pointer, the Nesmith stable, got along to a few miles bel 2:10 with halves in 1:01¼, and several others in t same string improved their previous figures cons erably.

◈◈◈

Mr. and Mrs. Dwight L. Hackett, after an easte visit of some months' duration, arrived back on t coast in time to witness a portion of the expositi meeting, where they met many old friends. M Hackett, formerly editor of this publication and mo recently proprietor of Wheel and Saddle, is muc improved in health as a result of his rest and ti change.

◈◈◈

The home guards at Pleasanton are saying nic things about the five-year-old mare Beretta Dee Charley D. 2:06¼, dam Beretta 2:22½ (sister C. the Limit 2:03¼) in the Lanark Park stable. Sh has been making speed nicely for Trainer Henry an late last week went the route in 2:13½, with a ha in 1:02¾. She is a nice individual and looks to b the making of the first 2:10 performer for her sir

◈◈◈

Charley and Will DeRyder, Bert Webster, Home Rutherford and Barney Barnes all shipped their can paigners from Pleasanton to Kearny, Nebraska, an will take in a few meetings in that locality prior t the opening of the Grand and Great Western Cir cuits. Charley and Mrs. DeRyder, with Pete Russel stowed in the tonneau as ballast and general hand man, made the trip overland in the big Lozier, an at last reports were progressing famously.

McKINNEY 2:11¼

Beating Back

Recently the Horseman published a tabulation entitled "Progress of the Century," mentioning the most noteworthy trotting performance recorded year by year since 1806, asking the question "How far back can you remember?" Here is an answer from one of their readers, proving him possessed both of excellent memory and genuine love for the horse:

I recall very well my ride in a milk train from Elgin to Chicago to see the trot between Flora Temple and Princess on Sept. 16, 1859. I arrived at my sister's home at 5. Her husband, Merritt Squires, was superintendent of the North Clark Street Bus line. I hold him the cause of my coming. He was amused and said, "I will make you collector on the bus line. I will run to the races." I met each bus about a quarter of a mile from the track and collected the fares until the races were ready to start. I remember one man refused to pay. I grabbed his hat and ran. Well, he paid.

I went inside. There I saw my first shell game. A man asked me to pick the pea for 25 cents. I won. Well, I guessed again and bet all I had, $5, and lost. I have never since then bet on another man's game.

And now my dreams were to be a fact. I ran to where Flora was and looked her over from hoofs to ears, ears to her short tail, and wondered where her speed came from. I watched the hitching, stood in front, at side and behind, and noticed how her eyes stood out. She could almost see her driver.

The other mare was really a Princess, the epitome of beauty and pride. The race was on. How I was thrilled at the finish of that first heat. My breath finally became normal. Princess knew she was beaten and was a vixen in the second and third heats.

I remember well the first horse I ever owned. It was a mustang, bought in June, 1898, of Mr. Phelps, a liveryman of Elgin. He had bought the horse out of a lot of mustangs that passed through Elgin. I had a fine pointer dog. Phelps wanted him—result, I gave my dog, a one-barrel shot gun, a meerschaum pipe, and a razor for the brute. One Saturday afternoon I was ready for my first ride. After some trouble he was driven in the stable, bridled, a sheet thrown over his head and a saddle strapped on. I was thrown on the saddle, the blanket was pulled from his head and then—well, he landed across the road against a carriage factory, whirled, bolted across the bridge, through under the railroad and out on the Plato road. As it was up hill for two miles, I got my wind, socked my spurs in for keeps, gave him a shout and commenced to enjoy my ride. The mustang finally said stop, but I was not through. A man cut me a stalk of orange hedge with the prickers on. When I got back to the stable he knew what "whoa" meant, and I was boss. Broke him to harness and sold him to a milkman and made $50.

My next purchase, in Kansas City in 1868, was a wind broken, pacing mustang. Then came a spavined gray trotter. Next a peacock mare, a fearful knee knocker. Having paid for the general blemishes I became a student. In the fall of 1870 bought a Mountain Boy colt from a mover from Vermont to Kansas. Very handsome and could trot in 2:50 on the road.

I helped organize a driving club in Kansas City. Delaware street was the wholesale district and we were all quite horsey. I wrote a membership agreement calling for 50 members at an initiation fee of $100, gave it to my shipping clerk and within two hours he returned with a filled list, Jerome and Carson subscribed $1,000. We completed a half mile track, and this was where our first fair was held, and where Jesse James rode through the grounds taking the money at the gates. We gave a race meet. Pilot Temple, Gov. Sprague and many others were there. Pilot Temple was the only horse I ever saw who could trot, pace, rack and run, all within 150 feet. Marvin was there, and that reminds me of Smuggler.

There were no railroads in southern Kansas and each spring four of us would hire a span of Indian ponies and carriage and make a trip of four to six weeks, visiting our customers. We left Kansas City one day at 1 p. m., drove to Olathe, 25 miles. The stableman told us of a stallion that belonged to a Methodist minister, who lived 12 miles south of Olathe, that could pace very fast, price $175. It was on our way to Paola and we stopped to see him, and that was Smuggler. We were gone about four weeks. On our return we neared Olathe and saw two men, a dog, and the minister's pacing horse. And there I saw my first trotting hobbles. Saw him fall, turn short, Marvin whipped his legs and set the dog after him, and he struct his first trot. I afterwards saw that great race at Cleveland when Marvin pulled out from behind, I remember, and his great drive. He won, I think, his record of 2:15¼. I afterwards owned a Smuggler gelding, bought from W. H. Wilson.

This reminds me of my first meeting with Wilson at Covington, Ky., in the fall of 1865. He paid me $200 for a pacing gelding that I had bought for $7.50 in the spring at a sale of condemned government stock. He moved to Lexington and sold the pacer for a large price. Mr. Wilson told me afterwards that the pacer started him in a winning channel. After he moved to Cynthiana I became very intimate with him and his family. I was the starter at Cynthiana meetings, and at one held in October, 1884, Wilson started Array by Arnold, out of Annie Cook, owned by Dr. Herr and Wilson, for a record. Wilson was a convert to Marvin's long toe, and Array had the worst bowed tendons I ever saw. He went to the half in 1:10, finished in 2:33. The next morning I told Wilson I thought he was making a mistake with Array's long toes, and then he gave me the only impatient word in twenty years' intimate friendship. "If you know better than I do about Array you better buy him." "Your price?" He blurted out "$500." "He is my horse," I said. I went into the office, wrote a check for $500. I at once had his toes shortened, shipped him to Covington that day, drove him barefoot three months, using my own wash on tendons, and in the spring his legs were perfect. And please remember I had a great team that summer in Array and Aifred. Alfred was by Socrates, dam by Justin Morgan. Array was very steady and Alfred could not run and now, twenty years afterward, the pleasure of many years with my horses still clings. Array died in his stall, his head in my lap, and my loving caress seemed to soothe him and so his spirit passed to a haven of eternal happiness to which he was entitled.

FUN DRIVERS TO CELEBRATE ON MONDAY.

Contrary to their established custom the members of the San Francisco-California Driving Club will not hold a matinee tomorrow afternoon at the exposition track, but on Monday will put on a card of five races over the P.-P. I. E. course, starting promtly at one o'clock. The exposition people furnish the trophies for the day and make the races a portion of the special free attractions that mark the "Fourth of July" program, there being no charge for admission to the race track enclosure or the grandstand. The entries include almost all of the favorites of the present season, as well as some "old timers" who make their first start of the year on this occasion, and some new ones for whom it will be their debut, locally. The fields are good sized ones in almost every instance and if the weather is favorable there will probably gather the largest crowd that the big grandstand has yet held, though it will be a case of "going some" if the attendance of June nineteenth is surpassed. The entries are as follows:

First race, 2:12 pace: Bradmont, Happy Dentist, Pointer Belle, Decoto Boy, W. J. K., Delilah.

Second race, 2:15 pace: Hamburg Belle, Edith Light, J. C. Simpson, Aerolite Jr., Tom Murphy, King Pointer, Jack, Palitea, G. J. P., Emma M., Senator H.

Third race, free-for-all pace: Dick W., Vera Hal, Little Bernice, Frank N.

Fourth race, free-for-all trot: Graham Bellini, St. Patrick, Agnes Carter, Muggins, Birdeye, J. C. Simpson, Monica McKinney.

Fifth race, 2:25 mixed: Hello Girl, Marin, Rose O., Victor Pointer, Laddie G., St. Thomas, Harold K., J. V.

MONDAY'S RACES AT PLEASANTON.

Folks in this section of California who are in a quandary as to where to spend the Fourth will make no mistake by selecting Pleasanton as the proper place for a day or two of enjoyment, as the Butchers' Exchange of Alameda county stage their annual celebration there tomorrow and Monday, devoting Sunday to a general good time and reinforcing Monday's program with a good card of horse races. There are no counter-celebrations in the Livermore valley or in Oakland, aside from the customary "splurges" at the amusement parks, and the Pleasanton affair should draw well, especially as the railroads have made very moderate round trip rates for the occasion.

The special race for members of the trade failed to fill on the original closing date, but the program will probably be rounded out by the staging of a late closing event, though as it stands a good afternoon's sport is assured. The fields are composed very largely of horses that were winners or contenders at the recent meeting at the exposition, the complete list of entries being as follows:

Special for members of the Oakland Stadium Club, purse $250: Lena Lee by Teddy Ray, F. W. LeBallister; Sleepy Dick by Grover Clay, Wm. F. Rutherford; Grand W. by Daken D., A. L. Hines; Hallie's Star by Star Pointer, A. Edstrom; Allegro by Star Pointer, G. C. Schreiber.

2:20 trot, purse $500: Eloise Dell, br m by Alconda Jay, C. F. Silva; Bon Cres, bl h by Bon Voyage, J. J. Campbell; Brutus, b g by Strathway, S. Christenson; Bonnie Ansel, b m by Prince Ansel, Alex Brown; Dione II, b m by Cupid, Santa Cruz Lime and Cement Co.

2:20 pace, purse $500: Bondalean, br c by The Bondsman, C. F. Silva; Asa Pointer, b g by Star Pointer, A. V. Mendenhall; Zoetrix, ch m by Zolock, J. W. Marshall; A. B. C., bl g by Young Monterey, W. B. Alford; William G., ch g by Clarence Wilkes, Wm. Godfrey; W. J. K., b g by Dexter Prince, Kenney & Smith; Mountain Dee, b h by Charley D., Santa Cruz Lime and Cement Co.

2:12 trot, purse $600: Columbia T., b m by Bon Guy, C. F. Silva; Bodaker, ro h by Antrim, S. Christenson; Bonnie Ansel, b m by Prince Ansel, Alex Brown; Harold C., b g by Bon Voyage, H. S. Burns; Redeem, b g by Directum II, J. W. Paulsen.

FUTURE OF HUDSON RIVER FARM.

Poughkeepsie, N. Y., June 9.—The Hudson River Driving Park, the property of the late Jacob Ruppert, will be continued and the fine mile track preserved. This became known yesterday when Colonel Jacob Ruppert, son of the late multi-millionaire brewer, visited this city and spent almost five hours at the driving park. Colonel Ruppert visited every part of the big farm, accompanied by W. W. Shuitt, the superintendent, who explained to him every detail of the workings of the farm.

Colonel Ruppert expressed a desire to carry out the wishes of his father in every respect and he soon made it known that he had no intention to tear the track up. While here he had a talk with H. N. Bain, proprietor of the Nelson House, who was a close friend of the late Jacob Ruppert.

In regard to the plans for the Dutchess County Fair, Colonel Ruppert said it was his desire to carry out the wishes of his father and that whatever arrangement he had made with the fair association would be carried out. Mr. Bain said he had had a talk with Mr. Ruppert in February in regard to the use of the driving park for the fair and he told of the plans as discussed at that time. The fair will be held in the fall as originally planned if the guarantee fund to be raised by a Chamber of Commerce committee to support the fair association is raised. The committee to canvass for this fund was appointed several weeks ago.

In discussing the future plans for the driving park, following Colonel Ruppert's visit here, W. W. Shuitt, the superintendent of the park, said there would be no changes until fall. In the fall the stock will be reduced about half. The number of stallions for public service will be reduced to two, Guy Axworthy and Wurtemburg. Oakland Baron will of course spend the rest of his days on the farm. The number of brood mares will be reduced from fifty to twenty-five. The colts and young horses will also be reduced by half. There are at present 126 young trotters at the park. About sixty head will be sold off. In reducing the stock at the farm Colonel Ruppert is only carrying out the plan of his father, who had before his death planned to cut down the stock.

Some of the stock farm will also undoubtedly be sold off as the acreage is considerably larger than necessary, especially in view of the proposed reduction of the stock.

The stall rent to trainers has been reduced. This, it is believed, will encourage more trainers to come here. Bud Murray is to arrive here Friday from Goshen with his great two-year-old trotter by Justice Brooke.

The driving park is a part of the property of the Jacob Ruppert Realty Corporation. By the will of Jacob Ruppert, Mrs. Ruppert, widow of the deceased, and Colonel Ruppert are to hold one thousand shares of the capital stock of the corporation. Colonel Ruppert is made president of the corporation. Colonel Ruppert will succeed his father as president of the Hudson River Driving Park Association. H. N. Bain continues as secretary.—Horseman.

Madsie McNutward by Madison McKinney, dam Abbie McNutward by Guy McKinney, foaled on June thirteenth a coal black filly by Derbertha Bells and has been bred back to the same stallion. The youngster's name, Triberbine Bells—a name that Owner J. W. Pendleton states her to appear worthy of in every way—serves to indicate her triple relation to Bertha and Columbine, with a line to Beautiful Bells.

◈ ◈ ◈

John W. Considine, after his recent visit in the Blue Grass, is most optimistic concerning the future of his youngsters in the stable of Hunter Moody. Suldine (1) 2:24¾ is trotting miles below 2:20 just like a genuine stake colt, and a number of the yearlings are showing a world of whizz, Mr. Moody being well satisfied that he can place Carrietta 2:18 in a truly unique position among matrons by giving her Peter the Great yearling a standard record this season, and "going this one better" in his predictions for Anselila, the precocious Prince Ansel—Ila Moko trotter. His aim with this lass is the reduction of Miss Stokes' world's record of 2:19¼, and from the way she is handling her work to date she seems to have a most excellent chance to make good.

◈ ◈ ◈

A recent letter from Dr. R. C. Simpson of Armidale, New South Wales, Australia, confirms Will Green's previous letter that Don Pronto arrived in Sidney in the best of condition, Dr. Simpson also going further and expressing his entire satisfaction with his new purchase, and his gratification concerning the square deal given him by Mr. Durfee and the excellent care rendered Don Pronto by Will Green, who is still looking after the game son of Silurian and The Director General. Dr. Simpson writes that he came in for a good deal of chaffing from his wise friends when he made an expenditure of well towards two thousand dollars by cable for a horse of which he knew nothing save his "paper career" and an advertisement's statement, but that now the laugh is the other way around. The Don is not only the fastest horse in Australasia but one of the most aristocratically bred ones in the world, and as evidence of the esteem in which he is held in his new home his book for his initial stud season, which commences on September first, is rapidly filling. Dr. Simpson deserves every success as a reward for his enterprise and judging the future at long range it doesn't look like the Don would long owe him any money.

SPEED PERPETUATING STALLIONS.

The official Year Book of The American Trotting Register Association states that 30,974 trotters in America, up to the close of 1914, had made records in standard time, viz., 2:30 or better. The number that then were credited with standard pacing records, viz., 2:25 or better, was 22,878.

The total number of performers that then had made records in standard time in America was 53,852.

The number of stallions that sired these 53,852 performers was 10,651, making the average number of standard performers, to each, five and a small fraction.

The greatest number of standard performers ever and furthermore, inasmuch as Napoleon Direct total 263. That stallion is Allerton 2:09¼, whose sire was Jay Bird 2:31¾, a son of George Wilkes 2:22. The stallion that comes next in rank as a sire of standard performers is Gambetta Wilkes 2:19¼, now credited with 111 trotters and 122 pacers; total 233. Gambetta Wilkes was a son of George Wilkes.

The value of a standard-bred trotting stallion as a stock horse depends upon his ability to breed on—that is, to perpetuate standard record speed quality through his sons and daughters, especially through his sons. Some stallions that have been very successful as sires of standard performers have not endowed their sons with the ability to transmit standard record speed qualities to their offspring which were less successful as sires of standard performers. Blue Zull 75 and Hambletonian 10 were good examples.

Blue Bull got 60 standard performers, 56 of which were trotters. Hambletonian got 40 standard performers, all trotters. It will be seen that the number of standard performers sired by Blue Bull was just 50 per cent greater than by Hambletonian, but the sons of Hambletonian sired 1717 that made standard records, while the sons of Blue Bull sired only 139. The sons of Hambletonian sired nearly nine and one-half times as many standard performers as those of Blue Bull.

Daughters of Blue Bull produced 182 standard performers, while those of Hambletonian produced only 119.

The 60 standard performers sired by Blue Bull added to the 139 sired by his sons and the 182 produced by his daughters show that his number of standard record performers in the first and second generations was 391.

The 40 standard performers sired by Hambletonian added to the 1717 sired by his sons and the 119 produced by his daughters make 1876 of his descendants in the first and second generations that took standard records.

Although the ability of Blue Bull as a sire of standard performers was 50 per cent greater than that of Hambletonian, the ability of Hambletonian to perpetuate standard record speed qualities was very nearly five times as great as that of Blue Bull.

There is no fairer or more accurate method of measuring the speed perpetuating ability of any stallion, or of determining the relative ability of different stallions as speed perpetuators than by learning and comparing the number of each made in the first and second generations which have made records in standard time, as shown in the Great Table of the official Year Book, issued annually by The American Trotting Register Association.

The late Col. Walter T. Chester, author of Chester's Complete Trotting and Pacing Records, classed as aristicratic sires all stallions which were credited with 50 or more descendants in the first and second generations that had made records in standard time; and, as supreme aristocratic sires, all stallions that were credited with 500 or more such descendants.

It has already been stated that the number of stallions which had sired one or more standard performers up to the close of 1914 was 10,651. According to a table recently published in "The Horseman and Spirit of the Times," the number of aristocratic sires or stallions that were each credited with 50 or more descendants with standard records was 383; and the number of supreme aristocratic sires or stallions, each with 500 or more such descendants to his credit, was only 28. Their names and number of descendants are given in the following table:

Year Foaled	Name of Stallion	Number Sired	Number Sired by Sons	Number Produced by Daughters	Number Descendants in Two Generations
1856	George Wilkes 2:22	83	3,201	207	3,491
1868	Electioneer 125	160	1,869	185	2,214
1870	Nutwood 2:18¾	174	1,318	397	1,889
1849	Hambletonian 10	40	1,717	119	1,876
1875	Onward 2:25¼	200	1,023	301	1,524
1874	Red Wilkes 1749	178	1,016	307	1,501
1882	Baron Wilkes 2:18	157	924	260	1,341
1864	Belmont 64	59	717	152	928
1878	Jay Bird 2:31¾	148	608	130	884
1876	Alcantara 2:23	175	504	191	870
1877	Alcyone 2:27	59	716	72	847
1864	Almont 33	37	609	136	782
1881	Gambetta Wilkes 2:19¼	233	369	160	762
1863	Happy Medium 2:32½	94	461	164	719
1886	Allerton 2:09¼	263	360	92	715
[illegible]	Wilkes Boy 2:24½	107	465	128	700
1893	Bingen 2:06¼	175	483	40	698
1871	Robert McGregor 2:17½	108	317	240	665
1872	Mambrino King 1279	77	383	202	662
1887	McKinney 2:11¼	192	380	44	616
1886	Axtell 2:12	151	343	105	599
1863	Dictator 113	60	365	144	569
1879	Simmons 2:28	136	307	115	558
1866	Strathmore 408	88	236	230	554
1879	Guy Wilkes 2:15¼	91	333	114	540
1875	Bourbon Wilkes 2345	98	334	97	529
1879	Pilot Medium 1597	127	292	109	528
1882	Ashland Wilkes 2:17¼	170	283	69	522

The wonderful ability of Hambletonian and his descendants to perpetuate standard record speed qualities is one of the most striking features of the above list of supreme aristocratic sires. In all, there are only 28 stallions that have gained that distinction. Hambletonian 10 is one of them, and 26 of the other 27 trace directly to Hambletonian in the paternal line. Five of the 26 were sons of Hambletonian, including George Wilkes, who stands at the head of the list, and Electioneer, who is next in rank to George Wilkes.

The number of standard record descendants of George Wilkes in the first and second generations is greater than has been produced by any other two stallions that ever lived. Eleven of the 28 stallions in the supreme list were sons of George Wilkes. This is more than one-third of the entire number of stallions in that list and more than twice as many sons as Hambletonian 10 has there.

Electioneer 125, who ranks next to George Wilkes as a perpetuator of standard record speed qualities, is not yet credited with a son in the supreme list. He is credited with one grandson there, viz., Bingen 2:06¼ and the latter is the most successful standard-record speed-perpetuating sire of his age that ever lived. His dam was by Young Jim 2009, one of the handsomest, best finished and most blood-like 16-hand sons of George Wilkes, and his second dam was by Red Wilkes 1749, another 16-hand son of George Wilkes, and one of his most successful standard-record speed perpetuating sons. Bingen also has gained the marked distinction of being the sire of the world's champion trotter, Uhlan 1:58, the fastest trotter by the records that the world has yet produced. Bingen is seven years younger than any other stallion in that noted list of the supreme aristocratic sires.

Another very remarkable sire in that list is Alcyone 2:27, foaled in 1877, and died at Highlawn Farm, Lee, Mass., July 4, 1887. Alcantara 2:23, also in that list, was a full brother of Alcyone 2:27, was foaled one year earlier than the latter, and was 31 years old when he died. He got about five times as many living foals as was begotten by Alcyone.

The number of Alcantara's descendants in the first and second generations that have made records in standard time is 870. The number of Alcyone's standard record performers in the first and second generations is 847, or only 23 less than Alcantara's.

The Year Book shows that 80 sons of Alcantara were credited with 504 standard performers, while 56 sons of Alcyone were credited with 716 that had sired an average of a fraction more than six standard performers each, while the 56 sons of Alcyone had sired an average of about 13 standard performers each. This shows that the ability of Alcyone to perpetuate standard record speed qualities was considerably greater than that of his full brother, Alcantara.

The four stallions that furnished a greater number of new standard performers in the first and second generations of their descendants in 1914 were Bingen 2:06¼, credited with 160; McKinney 2:11¼, with 84; Baron Wilkes 2:18, with 78; Peter the Great 2:07¼, credited with 76. No other stallion was credited with as many as 70 new standard performers furnished in 1914. It will be seen that Bingen furnished nearly as many new standard performers in 1914 as any two of the most successful speed perpetuating sires.

McKinney and Baron Wilkes, combined, furnished 162 new standard performers that season, which is only two more than were furnished by Bingen. McKinney and Peter the Great, combined, furnished 160, which just equals the number furnished that season by Bingen.

These plain facts gleaned from the official Year Boow show that, as a speed perpetuator in the first and second generations, George Wilkes surpassed any other stallion that ever lived. His nearest rival as shown in the table was Electioneer. The speed perpetuating ability of George Wilkes up to the present time, as shown by the table, was more than 50 per cent greater than Electioneer's.

The closest rival of Bingen as a progenitor of new standard performers in 1914 was McKinney, the most distinguished son of Alcyone; but the number furnished by Bingen was a fraction more than 90 per cent greater than by McKinney, and a trifle more than 105 per cent greater than furnished by either Baron Wilkes or Peter the Great. The wonderful ability of Bingen as a perpetuator of standard record speed qualities is becoming more apparent with the issue of each Year Book.—S. W. Parlin in the Horse Breeder.

DEATH OF DEXTER'S BREEDER.

Jonathan Hawkins, the breeder of Dexter 2:17¼, Dictator 113, and other famous horses, died at his home at Montclair, N. J., on June 15, aged 75 years. The deceased is survived by a wife and son, Frederick. He celebrated his golden wedding last year. In "The Horseman" of March 3, 1914, appeared Mr. Hawkins' own story of Dexter, whom he sold for $400. The McKinstry mare, grandam of Dexter, was the property of Mr. Hawkins' mother. In 1847 she was bred to American Star and produced the great Clara. Mr. Hawkins rode Clara to school for two years and the following year bred her to Hambletonian, then standing at a $35 fee, and the result was Dexter. The colt showed a lot of speed in pasture, romping with a dog to which he became attached. In June, 1862, when Dexter was a four-year-old, the late George Alley of New York witnessed this performance and paid $400 for the colt. The speed shown by Dexter and other Hambletonian colts caused Rysdyk to raise the service fee of his horse to $75 in 1863. In 1863 Dexter showed a mile in 2:31¼ for Hiram Woodruff, which was considered very fast for a green trotter in those days, and this trial and the showing of several other colts of Hambletonian caused Rysdyk to raise the horse's fee to $100 in 1864. In 1864 Dexter defeated Stonewall Jackson and in 1864 Hambletonian's fee went to $300. On Oct. 10, 1865, Dexter trotted a mile to saddle in 2:18¼, a new world's record. By doing so he won for his owner the big end of a $10,000 to $2,000 bet proposed by Eph Snedeker. In 1866 Hambletonian's fee went to $500, where it remained the rest of his life. In the spring of 1866 Dexter was sold at auction and bid in at $14,000. In 1867 he lowered the world's record to 2:17¼ and was sold to Robert Bonner for the then record price of $35,000, and was never raced professionally after that year. Mr. Hawkins was among the last of the Orange County breeders who had to do with the birth of the sport.—Horseman.

HORSEMAN CORRESPONDENT PAYS COMPLIMENTS TO AN ESTEEMED CONTEMPORARY.

June 18, 1914.

Editor of "The Horseman":

The report of the racing at San Francisco, on June 12, which appeared in the Horse Review, ought to be severely criticised for the false information it contains, as your contemporary promised "the most authoritative account of the San Francisco races in any turf paper," or words to that effect. I don't blame the presiding judge, who was supposed to report the meeting, for Saturday's story. It is difficult to see just how the report of June 12 could reach the Review in time for publication, if Uncle Sam's usual method of transmission was handling the only "authoritative" advice from the coast.

What then remained? Surely telegraph wires were not intrusted with news of such import, unless, indeed, a cipher code had been arranged. One way still remains—the wireless! Eureka! Why not that thought before? The plot (which e'en yet may make a bonanza for the enterprising movie man) unfolds as if by magic. The dark visaged, handsome correspondent-official inscribing the "authoritative" message with feverish haste—his rush to the wireless station (and perhaps his ascent up the towering pole above the Golden Gate, in his anxiety to get his message on the way)—its flight across desert, hill and dale, dale and hill and desert, until it was stopped by the swaying apparatus that surmounts the Masonic Building—the quick grasping by the statistical editor of the message, as it slid, word by word, off into his waiting fingers—hoarse orders—rumbling presses— and the only "authoritative" message is given to a waiting world.

But (and again we come down from our lofty flight to the stern realities of the work-a-day world) was the message preserved intact, and as originally drafted? Great as is science, there yet is no absolute protection against the possibility of messages becoming muddled up with one another. Wireless messages are speeding everywhere, in these troublous times. Villa is embracing Carranza, the Kaiser is submarining, the suffragettes are marching and voting, and Ben Walker is driving—all by wireless. May not a more reasonable (or at least charitable) explanation of the apparent discrepancies of portions of the only "authoritative" report of the exposition races, lie in the fact that one or more other wireless messages (even though less in import) of entirely different subject matter, came into head-on collision with it in its lonely flight across the Rockies and deserts, and in the incident caused the aggregate to become as hopelessly scrambled as interlocking directorates?

In the report of June 12, it is stated that "Al Whitney drew Dr. Burns, Jr., after the second heat, it being understood that he did not care to take any chances of injuring the stallion before the $20,000 2:06 pace next Saturday." My advice on the affair is that Dr. Burns Jr. was practically a broken down horse when he finished the second mile, and that it is extremely doubtful if he ever starts again.

Again, the Review report states that Spriggan finished the third heat "as comfortable as in the first." The "comfortable" part of the situation will appeal with particular force to those who imagined that the son of Baron McKinney possibly was irritated slightly in this mile in view of the fact that DeRyder was using all the skill at his command to land the gelding ahead of Peter McCormick, that cut down the lead so amazingly as to make the issue very doubtful.

It is unfortunate (?) that "The Horseman" has had to depend for information of the big events upon a mere, modest, daily paper scribe—Tom Gahagan by name—whose nosing around among the prominent stables from one end of the Grand Circuit to the other for a period of years, and whose acquaintance with owners, trainers and horsemen generally, being perhaps the most extensive of any correspondent of the day, could not in any sense qualify him to be considered so "authoritative" as a man connected officially with the exposition races. The advantages of the latter individual are unquestioned, as the public, no doubt, with me readily acknowledges.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

THE WOOD DUCK IN CALIFORNIA.

[By Harold C. Bryant.]

wood duck is the most beautiful of all our Its only near competitor in this respect is relative, the mandarin duck of Asia. But even lliancy of coloring in this species is super- by that of the wood duck.

nerly the wood duck was to be found through country west of the Sierras. At the present is but a rare local resident of the Sacramento n Joaquin valleys and westward to the coast. always been rare in Southern California, where ble conditions are lacking. A specimen taken mona, San Diego county, furnishes the south- st record. The wood duck frequents timber ed streams, fresh water sloughs, especially in k belt. It cannot be considered a distinctly ory species, for in most instances it is perma- resident within the State. Occasionally a migration toward the north in April and to uth in October is noticeable.

crest and the bright coloring of the wood duck conspicuous that the bird is usually recogniz- t sight. The pure white under parts and the d head crossed by white stripes are character- f the male. The female although lacking the coloration to be found in the male, displays metallic colors than do the females of other s of ducks and in addition it is recognized by hite eye-ring which extends back of the eye as te streak.

od ducks seldom stray far from the scheduled us and sloughs which constitute their habitat. ionally one may be startled from the ground oak forest or from the limb of a tree overhang- stream. But more often they are seen swim- in some secluded slow-moving creek or river. s one of the few ducks to select a hole in a tree nesting site. Usually the nest is built above ater and from fifteen to fifty feet above the d. Quite often the nest itself, which is com- largely of debris from the cavity and lined down, is placed several feet below the entrance hole. The hollow end of a broken off branch quently selected, as is also the deserted hole red-shafted flicker or other wood pecker. A number of eggs, usually ten to fifteen, are laid. wood duck returns to the same nesting site year year. Unlike most ducks, the male is usually found in the near vicinity of the nest, and he ently stands guard while the female is incubat- The young either tumble out of the nest, or as vers have asserted, are carried to the water one ie in the bill of the mother.

e wood duck is noted for its swiftness and grace ght. The bird is very much at home in a thick th of trees and it flies about among the branches apparent ease.

a rule the wood duck feeds upon aquatic insects plants found along the stream where it makes ome. But in addition the bird often forages t the woods in search of other food. They have seen feeding in corn and wheat fields and still often on acorns. The stomachs of several exam- have contained large quantities of acorns.

ie flesh of the wood duck is said to be delicious, for many years certain hunters preferred to this duck to the exclusion of all others. Our hope of making use of this bird as food lies in icial propagation.

ie bird is readily domesticated and there is no t reason why it cannot be raised in captivity and on the market. At present there is a brisk and from breeders and pleasure parks for it.

me of the early writers state that the wood duck very common in California in their day. In many es in the State, as, for instance, in Marin and oma counties, wood ducks were to be found in bers previous to 1890. There have been no re- s of the occurrence of this species in many of same localities in recent years. Individuals are sionally reported as having been seen along the ramento river and in the vicinity of Gridley, Butte ty, but farther than this, and an occasional one rted by a collector or market hunter, the species ow almost unknown. During the season 1895 to there were sold on the markets of San Francisco Los Angeles 440 wood ducks. During the season 910 and 1911 but six of these ducks were sold on market of San Francisco, and during the follow- winter, not more than two or three.

can be seen, therefore, that the wood duck, nerly abundant in California, is now nearly ex- t. Most of the eastern States have protected this cies for several years, and fortunately the federal ratory bird law now gives this duck total protec- in this state. It is to be hoped that legislation come in time to save this beautiful species.

ussian river, particularly in the deep holes near erneville, is said to be alive with crawfish—these staceans are called ecrevisse in the restaurants t you pay one buck, or more, per dozen for them.

SOUTH COAST COYOTE SHOOTING.

[By "Stillhunter."]

A long time ago, when I first began to scatter ink over the pages of Western Field, I wrote a short sketch on the stalking of a couple of the little gray wolves whose name adorns the head of this article. They are among the most characteristic of all California's fauna, and, next to the grizzly and the mountain lion, may be called typical animals of the State.

It is, doubtless, needless for me to state that the coyote is a small gray wolf, long of leg and thinner of brush than any other wolf known to the North American continent, yet in no wise like either the jackals or the hyenas of the Orient, nor yet the dingoes or wild dogs of the Antipodes, to all of which I have heard our California coyotes erroneously compared.

As a rule the coyote makes no den, in the sense of occupying a cave in the rocks or a hole in the hollow of a tree, as does the Eastern gray wolf, or even the big black timber wolves. These latter were the terror of the farmers of Minnesota and Wisconsin and Michigan in the days when I was a boy in those States, and I learned more of them than I could do now, when they are so nearly extinct in all civilized parts of the Union.

The female coyote makes a "form" in the tall grass or in the brush of some secluded canyon mouth in which to have her young, or, more rarely, scratches out the mouth of a badger or squirrel hole to a size sufficient to shelter her and her cubs. One family which I remember finding in the hills of the Chindo Ranch in Orange county were snugly hidden in a curve in a fallen sycamore trunk. They were found only by the writer's almost jumping on them as he cleared the log while following his pack of hounds which had treed a wild cat a few hundred yards down the canyon, and to whose frantic barking "treed!" he was responding as fast as human legs would permit.

So far as I can learn, though I have seen but three broods in my brief and plain career, the coyote mother has but two young at a birth, possibly three at the most. Families of five have been shown me as taken from one form but I doubted the hunter's word then, and have since had no reason to change my mind. The young are pretty little things, and insofar as so wild a beast ever can be tamed make nice pets, but not for the young generation, for they are as familiar with sharp teeth as a fox terrier puppy, and a deal more careless.

But for all the fact of their small broods, these little wolves increase at an astonishing rate, and, where there is much poultry raised, undoubtedly do some harm to such careless chicken farmers as do not lock the hen-roost door before the coyote finds it open. Beyond this, however, as one or two counties of the State have found to their cost, the coyote is an invaluable aid to the rancher in keeping down the jackrabbit crop, and in clearing out the ground squirrels, for both of which pests no effectual remedy save the coyote has ever been found.

From the sportsman's viewpoint—provided he knows what coyote hunting really is and how to carry it on—there is no mild out-door pastime of the Southwest which can equal it in the way of rifle practice, or on the other hand, excel it in strenuousness when the hounds are followed on horseback. Because the writer has an inherent love for the rifle he prefers to stalk his coyotes, to lie in wait for them at some waterhole, to "walk them up" in the edges of the lower hills, and to shoot them cleanly rather than to ride them down with a pack of hounds, before which the little wolf has not one chance in a thousand for the life to which he is entitled.

One of the earliest recollections of my shooting days is of my first coyote. By dint of much careful economy I came to be the happy possessor of a .25-20 rifle.

I started out one afternoon in late December through the high hills which slope down from old Saddlerock toward El Toro, looking for nothing in particular but for much in general. Sheep were thick in this part of Southern California then, and coyotes, wild cats and even "lions" were more numerous than I have ever known them in the years which have since passed.

Passing down a small draw to the west of the hill at whose foot two of us were camped, a jackrabbit jumped out of the long grass on the north side of the "hogback" and loped leisurely along some fifty yards ahead. At him the rifle cracked and he doubled up, quite dead and almost as well drawn by the soft lead bullet as he could have been with a knife.

Cutting a willow staff from the scant growth in the bed of the draw, I stuck it straight up in a level place between two of the low hills, skinned the rabbit and hung him up until I should return, intending him for a meal for the dogs, of which we had four in camp. Farther down the coulee I picked up two more rabbits, saw a couple of coyotes at both of which I wasted a cartridge, and then turned back, following the comparatively dry bed of the stream in the shade of the willow growth.

Wearing soleless leather shoes, as much like moccasins as any white man's footwear I have ever seen, I made almost no noise on the gravel of the creek bed, and so came opposite the hanging rabbit without disturbing a pair of coyotes who had preceded me. I say a "pair" of coyotes, though of course I have no reason to know they were a pair; both may have been females—the one which I killed was, and it is not always the custom of the little wolves to remain mated except during the breeding season.

I dropped down behind a clump of willows just as the two finished a careful inspection of the stake, the ground around it and especially my tracks leading away from the flat. One, the larger of the two, followed my steps out from the stake to a point where she could see well down the draw. There, just raised slightly on her forefeet, clear cut against the green hill behind, she made an irresistible mark and the rifle had another word to say.

Caught just beneath and a bit forward from the ear, the little wolf leaped straight up into the air, turned halfway over and fell on her side, stone dead. As soon as I could take my eyes from this one, I whirled to get in a shot at the other; but he or she, as may have been, was disappearing over the ridge as fast as four fleet feet could carry it. The bullet damaged the head of the coyote slightly, otherwise the skin was in good condition; proud of my kill, I carried that coyote, entire, with my three "jacks," to camp. Nowadays I would skin the wolf, but then it was a matter of pride to me to come stalking into camp with all my game slung over my manly shoulder, as I saw hunters do in so many magazine pictures. That coyote skin has long ago gone the way of all skins, worn out by many feet, mayhap moth-eaten a bit, but it served its time well, and its taking always will remain among the proud moments of my life, along with my first trout and my first deer.

One other way of killing the coyote of the Southwest—with greyhounds and horses, is fast dying out owing to the cutting up of the great ranches into small tracts by wire and other fences. Time was, however, when the San Gabriel valley and other open places throughout the southern end of the State echoed to the shrill sounds of the chase every Sunday afternoon and every holiday as well. For the most part in those runs over the level mesas and in open country where the eye had a sweep of many miles unobstructed by timber or hills, greyhounds were used. Not a few so-called "Russian wolfhounds" were brought in, but none of them are noted for any wonderful kills they made. Now and then a brace of greyhounds will grow up in a community with nerve and strength enough to kill a coyote, but I have seen even skilled foxhounds badly cut by the teeth of the little wolves before they managed to kill one of a pair they were running together.

As a rule the greyhounds are better for chasing jackrabbits than coyotes, and where they are still kept by ranchers and sportsmen it is for this purpose almost exclusively. To my mind there is no more utterly useless dog on earth than a greyhound, and though I once participated in a coyote chase after a pack of greyhounds I saw little sport in it.

The Santa Ana Valley Hunt Club, the principal sportsmen's organization at that time, however, had real sport every year, usually in the spring, in the chase of foxes, coyotes and wild cats with their pack of foxhounds. Stronger, braver and more intelligent than greyhounds, the foxhounds which have grown up in the past fifteen or twenty years of hunting over California hills lead the men on horses a most strenuous chase, often extending through the better part of the day ere some wary old coyote yields up his brush. The writer, with four dogs but quite alone as to human companionship, followed a coyote from a point in Brea Canyon opposite the Puente oil-well settlement to the canyon through which the road to Chino passes, a distance in a straight line of eight or ten miles, and fully fifteen in the roundabout course we followed. This chase was in April and was started just after the hounds had treed a wild cat (plateau lynx) which weighed nineteen pounds—a fair sized cat for the early spring.

This coyote was old and wary; he doubled on himself, jumped from a rotten log, ran in a small wet gulch as far as he could and leaped sideways far up the sidehill to mislead the dogs. But to all these tricks the hounds were trained, and the end was Mr. Coyote cornered in the head of a steep-walled canyon from which he could not escape.

Skilled in exactly what was expected of him, old "Colonel," the leader of the four, feinted at the coyote's throat and seized him in the foreshoulder, close up to his foaming jaws, bearing the little wolf back against the wall of rock. On the instant "Don Juan," running mate of the Colonel and half-breed bloodhound, set his teeth into the coyote's ham. There was a short struggle, marked by the useless clinking of the wolf's teeth as his jaws came together in vain attempts to snap the hounds, and all was over. Slung on the back of the pony I rode, the coyote's skin kept that of the little red lynx company.

Given a pack of good, well-trained foxhounds and lively coyotes, running through the rough, rock-strewn hills of the Southwest; follow them with a company of from twenty to thirty horsemen and a sprinkling of lady riders, and there is as good a day's fun—and as hard a day's work—as the average lover of horse and hounds can find. The chase here is entirely different from the "riding to hounds" which has made Kentucky and Tennessee and Virginia famous; the dogs are different and the horses are far from the lean jumpers of the Blue Grass State.

Thoroughbred hounds which have been brought from the fox-hunts of the East to slay the wily coyote have failed miserably. The life was too strenuous for them, the hills too rough, the land too dry for scent to lie well—any one of a thousand excuses were offered by their importers, but the fact remained that the squat, deep-chested hounds of the West ran away from them in the long grilling runs through the dry beds of the hill gorges. In fact, it is not recorded that these importations ever slew any of the wild runners of the California hills without the aid of the leaders of local packs. Hounds here differ from Eastern dogs in being shorter of leg, deeper of chest, finer of scent and of greater ability and willingness to fight anything that walks on four legs. Possibly over the runs of the Eastern hunt clubs our dogs would find as great difficulties in the chase as did the Kentuckians here, but it seems improbable to one who has seen the work of California-bred dogs.

Horses here in the West differ from the hunters of the East, as well as do the dogs, and one must see the ability, endurance and intelligence of the little cow-ponies in their long runs over the hills, through all sorts of rocky and bush-covered country, following the toughest hounds in the world, to appreciate just how perfectly adapted they are to work in the regions where they are used.

There is another wolf in Southern California, which, while not so large as the gray wolf of the East and North, is considerably larger than the coyote, and deserving of mention in these chronicles because it is, next to the mountain lion, one of the hardest animals to stalk in all the curriculum of the hunter. This wolf has a heavier brush than the coyote; it is of thicker fur and sturdier body than most of the little gray wolves of which I have just written. It confines itself to the hills rather more than the open country; in fact, I do not remember ever having seen them in the bare mesa, or running in packs as do coyotes. So far as I know they make dens, like the Eastern wolf, and have but two young at a litter, though I cannot speak with certainty of these things. Around Bakersfield and thence southward through the Tehachapi mountains and on down in the Fernando, San Gabriel and Sierra Madre ranges, this wolf is not uncommon, and is known as the "hill wolf," by most hunters, in distinction to the coyote. Undoubtedly they do a great amount of good in the killing of rabbits and rodents of every sort, while it is unlikely that they do any noticeable harm to game. Quail, about the only game bird they can catch, roost so high here that it is out of the power of a wolf or any other dog-like animal to kill many of them, while I have never heard of these wolves attacking deer.

There is little sport to be had hunting these hill wolves with dogs, as they seek the underbrush and heavily wooded canyons at once, where the best of hounds are soon worn out. To kill one by still hunting—which the writer considers the highest form of the hunter's art—is an achievement of which any rifle shooter may be proud. In all probability, nine-tenths of the hunters of the Southwest have never seen this wolf, though they have passed, doubtless, within ten feet of one or a pair of them every day while in the hills during the deer season. Securely secreted in a heavy clump of underbrush, a tangle of scrub oak, wild rose bushes or manzanita thicket, there is no seeing the gray animals. Even the sharp-nosed dogs rarely find them out, unless by accident they come on them up the wind. The writer has killed these wolves, as he has killed coyotes, by waiting at a waterhole on light summer evenings, or in early spring mornings, but this is by no means a sure way, and the hunter may lie in wait every morning for a month before one chances to come to the particular waterhole at which he has chosen to wait.

Interstate Association Tournaments—

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16; 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments — Pacific States and Territories:

July 5—Eureka Blue Rock Club, H. A. Hine, President, Eureka, Cal.

July 5—Sunrise Gun Club, H. S. Hill, Secretary, Sunrise, Wyo.

July 5—Holbrook Gun Club, J. S. Hulet, Secretary, Holbrook, Ariz.

July 9, 10—Gem City Gun Club, Max Welck, Secretary, Laramie, Wyo.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

PACIFIC INDIANS TOURNAMENT.

The eighth annual tournament of the Pacific Indians will take place at Tacoma, Wash., July 19, 20, 21 and 22. The program for this shoot and annual gathering states:

The Indians will give the usual thirty sterling silver average prizes—ten to the high places each day, three annual class trophies, daily long-run medal, something for the low gun each day, and several fine special trophies.

To the forty high guns on the entire program of 400 targets there will be paid forty cash average purses, ranging from $50 to about $7.

To compete for the above there will be an entry fee charge of twenty dollars only, covering all events except for individual trophies.

Monday, July 19, is practice day, an informal program of 100 targets, price of targets two cents each.

Tuesday, July 20, eight events of 15 targets each, total for the day 120 targets. To the ten high places on this program the Indians give ten sets of six sterling silver spoons. Ties for place to be shot off at 20 targets until winner is decided.

The Chingren Diamond Badge, emblematic of the target championship of the Pacific Coast, will be shot for on this day at 50 targets, all contestants standing at 18 yards rise. Entrance in this event $5, targets deducted at three cents each, balance of purse to be divided, 50 per cent to the last previous holder, trophy to the winner and remaining 50 per cent of net purse divided class shooting, 40, 30, 20 and 10 per cent., to second, third, fourth and fifth places.

Wednesday, July 21, eight events of 15 targets each, total 120 targets. To the ten high places the Indians give ten sets of six sterling silver spoons, eliminating, however, any contestants who may have won an average prize on the previous day.

A solid silver loving cup, donated by Frank C. Hart, will be offered in competition on this day, to be shot for for final possession, under the following rules: Fifty targets per man. Entrance $1.50, handicap based on previous record in regular events, 16, 19 and 21 yards.

Thursday, July 22, eight events of 15 targets each, total 120 targets. To the ten high places the Indians will give ten sets of six sterling silver spoons, eliminating, however, any contestants who have won an average prize on either of the two preceding days.

The time-honored custom of offering three class honor prizes has been adhered to, and immediately on conclusion of the eight regular events on this day, all contestants who have shot in all regular events for the three days will shoot at 40 targets each, thus rounding out the total of 400 targets for the tournament average for cash prizes.

In this event shooters will be placed in three divisions: Delate Class, those who have averaged 93 per cent or better on 360 targets in regular program; Skookum Class, those whose average was under 93 and above 88 per cent; Kloshe Class, those who averaged under 88.

A fine gold watch, donated by Chief H. R. Everding, will be offered in competition on this day, to be shot for for final possession, under the following rules: Fifty targets per man, entrance $1.50, handicap based on previous record in regular events, 16, 19 and 21 yards.

There will also be given a suitable prize each day for the longest straight run, as well as two daily prizes for the two low guns on regular program of 120 targets.

To avoid any dissatisfaction in handicapping, the three classifications will be taken to represent distances; that is, those who averaged 93 in previous regular events will stand at 21 yards, those under 93 to 88, at 19 yards, and all under 88 at 16 yards.

All ties for prizes will be shot off immediately following the events that developed them, at 20 targets per man, until winner is decided; targets two cents each. No shooter can win more than one average prize or money.

For the accommodation of any who may desire a greater hazard, the Indians offer an optional sweepstake of $1.50 for each of the twenty-four 15-target events, four moneys, class shooting; fifteen entries required to fill.

Any persons not wishing to compete for the $600 in average purses may enter in competition for all trophies on regular program by paying $4 per day for targets, or $12 for the entire program.

Competition in the Pacific Indians' annual tournament is open to all members and to all comers as invited guests. This tournament is given in behalf of true sport and good-fellowship, and, while all lovers of the game are most cordially invited to attend and participate, the management reserves the right to reject any undesirable entry at any time during the meet.

The annual meeting and pow-wow of the tribe will be called to order by the Tyee Sachem at 8 p. m., on July 21, at the Tacoma Hotel, for the transaction of regular and special business; and the annual potlatch and initiation meeting will follow at the same place one sun later.

A New Shotgun.—The model of a shotgun with new and simple fore-end, safety and lock devices, besides other good features, was shown us this week. The inventor is seeking capital backing.

Drink Jackson's Napa Soda.

THE GRAND AMERICAN HANDICAP

Never in the history of trapshooting in has there been as much enthusiasm shown any trapshooting tournament ever been held have the co-operation and support of as many nent and influential business men, including city, country and gun clubs and other organi as the coming Grand American Handicap. Th eral Promotion Committee is composed of re tatives from nearly every trapshooting organ in the vicinity of Chicago. The committee on has made arrangements to comfortably take all who attend the tournament, regardless large the number may be. The hotels of C deserve more than a passing mention becaus offer so much that is needed and hardly recc in the general thought of what is required some great trapshooting tournament is pl There is in the city of Chicago every possibl ety of hotel, with the best equipment, in de locations, and adapted to every possible visitor entrant can rest assured that there will be hotel accommodations at reasonable rates.

At the Traps

Ten Man Team Skirmish—A large gatheri "gun bug" enthusiasts attended the blue smashing argument at Martinez Sunday, Jun between teams of shooters representing the of the Sacramento Big Time Gun Club and of t hambra Gun Club of the "Wildflower City." visiting team was defeated by a margin of 130 Andy Flickinger of Vallejo, with 94 out of 100 high gun on the Martinez team and top indiv score of the match. Barney Worthen of this cit the next man up, with 91 kills. E. L. Ilgner Frank Newbert, with scores of 90 and 86 respect led the invaders. Straight scores of 25 were sh A. G. Wilkes, Worthen and Dr. Steiman. The ing sportsmen were entertained with a barbecu ner and things after the shoot, which was he Fred Burnham's Spring Hill Farm. A return m will be held in the Capitol City July 27. The re of the team match:

Garden City Traps.—July 4 is set for the shoo off of the San Jose Blue Rock Club handicap. tournament will commence at 9 o'clock in the m ing. The contestants are variously handicapped, O. N. Ford at scratch, and running up as high as Awards will be made to the high shooters. prizes are gold, silver and cut-glass ware. There also be a double event at 12 pair.

O. N. Ford, C. H. Nash, G. H. Anderson and Schilling will shoot for the honor of represen the San Jose club at the Coast Handicap.

Recent scores at the club are—100 birds: O. Ford 95, E. W. Jack 93, C. R. Arques 89, Ada Schil 87, A. P. Jones 85. A Hercules handicap score made by E. W. Jack, who broke 70 out of 75. Schilling and Louis Baumgartner have yet to t in their scores.

* * *

Nemours (Ladies') Trapshooting Club.—' women competed in the spoon and 5-bird events the Nemours Trapshooting Club June 24 at the Pont traps. The weather was ideal and brough number of visitors and beginners out to watch shooting and be measured with the "try guns." W handicaps were counted, Miss Smith and Mrs. Spri er tied for the sterling silver trapshooting spc

In the 5-bird events Miss C. D. Gentieu won first; Miss Smith the second and Mrs. Springer third.

The final shoot for the July trophies will be handicap event. Those who qualified for the fi shoot are: Mrs. E. L. Riley, Dr. Florence Sewa Miss H. D. Hammond, Miss Amy Schofield, M Harry White, Miss Teresa Smith, Mrs. Char Springer and Miss C. D. Gentieu.

Scores, June 24 (25 targets), follow: Mrs. Ha White, broke 9, handicap 5—14; Mrs. E. L. Ril 14-1—15; Miss Teresa Smith, 8-12—20; Mrs. Ch Springer, 15-5—20; Dr. Florence Seward, 6-6—; Miss H. D. Hammond, 18-0—18; Miss Mary Robins 2-13—15; Miss Amy Schofield, 9-8—17; Mrs. Ha Stidham, 9-10—19; Miss C. D. Gentieu, 11-5—16.

Citrus Belt Traps.—Los Angeles Gun Club members at the Venice traps June 13 made the following scores:

Event No. 1—Bruner and Kimble trophy, six shoots, three in June and three in July, best two scores to count for eight silver loving cups, class shooting, with added target handicap, four classes, A, B, C and D, 100 targets each man: R. H. Bungay 94, G. Holohan 94, T. W. Neel 92, S. R. Smith 91, E. Mitchell 88, W. Pugh 85, S. A. Bruner 85, R. H. Smith 93, C. D. Hagerman 83, L. M. Packard 82, C. F. Nichols 80, L. R. Mellus 79, H. Hoyt 76, A. W. Bruner 64, W. H. Wilshire 61, S. C. Miller 60, W. L. Cooper 59.

* * *

Trophy Winners, Attention.—Secretary E. Reed Shaner of the Interstate Association announces in a communication this week that winners of The Interstate Association Trophies at "registered tournaments" will receive their trophies in from two to three weeks after the trophy blanks are received at Pittsburgh.

Some blanks are not filled out by the respective winners at a tournament and this causes further delay in making shipments. The trophies for each tournament are ordered at the same time and it takes about two weeks to have them properly engraved.

* * *

Notable Arrivals.—Elmer E. Shaner, tournament manager of the Interstate Association, arrived in this city Thursday evening last week. Mr. Shaner is popular with local and Coast trap shooters. After a brief stay in this city he went south to San Diego, where the tenth Pacific Coast trap-shooting tournament will be held July 8, 9 and 10.

A. Muller, formerly Coast representative of the Winchester Repeating Arms Company, a sportsman also well esteemed by the trap-shooting fraternity, reappeared in this city last week after an absence of several years.

Pete J. Holohan, another blue-rock expert, high in the good graces of the mud-saucer demolishers, is here too on a brief visit.

Last but not least, T. E. Doremus, concluding that the St. Louis Western Handicap and Salt Lake City visits were close enough to the Coast to give San Francisco a look-in, landed here Thursday. The gentleman from Wilmington is not unknown to many of the Coast sportsmen with whom he is popular.

* * *

"Pull!"—The California-Nevada Interstate Association shoot is definitely set for August 5, 7, under the auspices of the Golden Gate Gun Club. Such is the information we received just before going to press.

* * *

The California Wing Shooting Club's regular monthly shoot at live birds will be held at the Sobrante grounds tomorrow.

* * *

The Bay View Gun Club regular blue rock monthly shoot is the card at the south Alameda grounds tomorrow.

REMINGTON ARMS PLANTS NOT FOR SALE.

Recently there have been very persistent rumors to the effect that Germany was seeking to purchase American ammunition making plants, not so much for its own armies as with a view of putting an end to the tremendous shipments which are going forward to the Allies. The Remington Arms-Union Metallic Cartridge Company and the Bethlehem Steel Company have both been specifically named as objective points of the German efforts.

But it now appears that there is not the slightest chance of Germany securing a dollar's worth of interest in either of these two great concerns, states the New York Commercial and Financial World.

Mr. Samuel F. Pryor, Vice-President and General Manager of the Remington Arms-Union Metallic Cartridge Company, was interviewed in regard to the persistent rumors that have lately been in circulation, to the effect that offers made by a foreign government for the purchase of the properties of that Company were under consideration, and that the additions to the Ilion and Bridgeport plants, which are under construction, are intended to be purely temporary and made only for the performance of special contracts entered into and are not intended for the permanent uses of the company.

Mr. Pryor was very emphatic in asserting that there was not the slightest foundation for these rumors; and he pointed out that one story necessarily destroyed the other, because, if a sale of the plants and properties was made, the additions would not be required for the purpose of enabling the company to perform its contracts for the supply of arms and ammunition.

Mr. Pryor stated that no sum which might be offered for the properties would afford the slightest temptation to the owner to dispose of existing contracts. Mr. Pryor was equally emphatic in asserting that the additions to the plants did not constitute a merely temporary expedient, but were largely made in accordance with the general policy of expansion adopted by the company before the outbreak of the European war, and that this policy would not be interfered with even if the war were to come to an end tomorrow. The additions to the plants, now under construction, are of the most modern type and of the most substantial, durable and permanent character.

THE DEER SEASON IS OPEN.

A foreward to the sportsmen who have a fancy for getting away the first days of the annual scramble for venison on the hoof. Distance this season does not cut any material figure in the projected trips to the deer-inhabited ranges, roads are good now and automobiles make quick trips from the city or from railroad stations to the scene of repeating rifle operations. When does the season open—in this, that or the other county, is the vexed question with many hunters. Under the statute now in force—until August 7, when the laws passed by the last legislature will be in force and effect the open season on bucks begins July 1 in districts 2, 4 and 5, deer hunting territory familiar to local hunters. In districts 1, 3 and 6 the season opens August 15.

County Boards of Supervisors have, however, set back the opening date to August 1 in Mendocino, Sonoma, Marin and Napa counties. Yolo county is also down for August 1, but the ordinance will not go into effect until July 8, leaving that county open for one week. Santa Clara and Alameda counties have been on the August 1 list for two seasons past.

The power of county Boards of Supervisors to shorten game seasons has been seriously questioned by many sportsmen. In fact, a decision by a Los Angeles court goes to upset the stability of county laws in this respect.

The Fish and Game Commission is here quoted to the effect that the Commission deputies will not make arrests and prosecutions for violation of county game ordinances. The claim is made that the State officials are only clothed with power to enforce State fish and game laws and have no authority to direct procedure in the matter of county laws. Many of the Commission deputies are also deputy sheriffs or constables. Such officers are, of course, empowered and expected to do police work in their respective bailiwicks in the enforcement of both State and county laws.

The Fish and Game Commission officials in this city gave out this week that Hale McCowen, Jr., district attorney of Mendocino county, stated that he would not prosecute any deer hunters arrested for hunting deer in Mendocino county prior to August 1.

The owners of the Jersey Ranch, in San Mateo county, have posted their property against deer hunters. Several arrests were made last season for illegal deer hunting in that section. Other reckless hunters are accused of killing livestock. Spike bucks will be on the prohibited list after August 1.

San Mateo, Contra Costa, Santa Cruz, San Benito, Monterey, San Luis Obispo, Santa Barbara, Kern, Tulare, Fresno, Madera, Merced, Stanislaus, Solano, Colusa, Glenn, Lake, Humboldt and Del Norte counties opened July 1 for deer hunting.

The situation in Santa Clara county is as follows:

"Hunters are advised to accept the deer seasons fixed by the Boards of Supervisors of the various counties, regardless of conflict with the State law, in a communication to the Los Gatos Fish and Game Association, issued recently. U. S. Webb, Attorney-General, is the author of the letter.

The Los Gatos club was advised by A. M. Free, district attorney of that county, that the law will be enforced as passed by the Board of Supervisors, to the letter.

The State law fixes the opening and closing dates of the deer season as July 1 and September 1, respectively. An ordinance of the Supervisors changes these dates to August 1 and September 15, respectively.

Webb states that all sportsmen are advised to adhere to local rulings, pending the final settlement of the question by the courts, which now have cases involving the points under consideration."

And that is about all the Attorney-General can do in the matter, just give out advisory information. County laws are no doubt passed for the best interests of the sportsmen and the protection of game, were made in good faith and to overcome defects in the present laws. But at that, it is a mooted question if such ordinances will stand the test of the courts.

When the new fish and game laws go into effect in this State, it would be decidedly for the best and to avoid future confusion, if each and every county fish and game law were revoked. Then uniformity would ensue and the sportsmen would know just where they were.

RED "W" MERITS RECOGNIZED.

The Winchester Repeating Arms Company was awarded the Grand Prize medal by the Panama-Pacific International Exhibition 1915. The Winchester exhibit in the Department of Manufactures and Varied Industries has been very popular with sportsmen and other visitors at the fair.

That merit tells is well illustrated by the following list of awards given the Winchester products at prior exhibitions: Certificate of Award, International Exhibition, Philadelphia 1896. Certificate of Award, First Degree of Merit, International Exhibition, Sydney, Australia, 1879. Gold medal, First Order of Merit, International Exhibition, Melbourne, Australia, 1880, 1881. Une Diplome de Grand Prix, Exposition Universale de Paris, France, 1889. Grand Prize, Cotton States and International Exhibition, Atlanta, Ga., 1895. Three Gold Medals, Pan-American Exhibition, Buffalo, N. Y., 1901. Gold Medal, Trans-Mississippi and International Exhibition, St. Louis, 1903.

FISH LINES.

Anglers, who have fished the Truckee river, near Boca, and at other favorite points the past week, all report pleasing sport with artificial insect lures. One development in recent fly-fishing on the Truckee, has been the generally good results accomplished with a pattern known as the Parmachene belle, a great favorite with Eastern anglers. This fly is somewhat like the Katie May, a good fly now on the Truckee.

C. J. Barnewell puts Independence lake in the anglers' itinerary with the report of "good fly-fishing now, no trouble to catch a limit in an hour, trout averaging three-fourths of a pound. The McGinty, blue upright and gray hackle are the killing patterns. The Little Truckee is good for daily limits, Eastern Brook, Loch Leven and Rainbow varieties.

Donner lake offers a tempting variety of sport with Loch Leven, Mackinaw and cutthroat trout. The creeks emptying into the lake are full of Eastern brook and rainbows, rather small it is true, but limits with light tackle are easy to land. Fishing in the lake, Charles Urfer advocates still fishing from a boat at the edge of the "drop," where the lake deepens abruptly. Using light tackle and a live minnow baited hook, casting out and letting the hook sink deep, a strike is soon felt.

Upper Sacramento river trout fishing resorts have been improving daily for the past week. Feather river points, Big Bar, Camp Rodgers, Tobin and Quincy are spoken well of by returning anglers last week.

Dobbyns creek, near Fort Seward, on the Northwestern Pacific road, is in line for limit catches of fair-sized trout, to be taken with fly patterns. The trout in this creek are said to run in larger sizes later in the season.

The Big Stoney, near Fouts Springs, was a trifle too high a week ago when visited by Howard Nauman and George Butler; fair fishing was enjoyed, however. Lake Macomber, and Butte creek, in the Mount Lassen country, offered splendid trout fishing for two weeks to several local anglers. Trout averaging 18 inches in length were plentiful.

Dr. Henry Abrams and Dr. M. E. Simon picked up nice baskets of trout fly-fishing in Lake Lagunitas last Wednesday. An odd experience was that of S. Stevens recently, who fished Paper Mill creek, from Garcia down to North Bend. One of those unexpected and exasperating incidents that will happen on a stream left him without flies or bait, just a bare hook or two. He tried the experiment of tying a small piece of red flannel to the hooks and succeeded in landing eight nice sized fish.

The San Mateo coast creeks were plentifully stocked last Sunday; over 300,000 trout fry were liberated under the direction of Charley Breidenstein and Fish and Game Commission deputies. San Gregorio creek and lagoon was good for limits of fair-sized trout, a week ago, when Joe Springer, Harry Thomson and Arthur Perry whipped the creek.

Coyote creek, in Santa Clara valley, has been in good fishing repute recently. Dr. J. Clark, of Gilroy, picked up a limit basket of trout running from 9 to 18 inches in size.

A large mountain lion was the unexpected quarry of Laurrie Barber while fishing in the Arroya Honda creek region recently. While busily engrossed in angling Barber suddenly noticed the big cat lying at full length on a log across the creek immediately in front of him. A hasty shot with a revolver tumbled the animal into the creek bed where it contiued to thrash about in a dangerous fashion for a short time.

The animal was a rare specimen of its species which has become nearly extinct in that region. It was a male lion measuring more than eight feet from tip to tip and weighing about as much as an ordinary man.

Santa Cruz streams have been restocked with over 500,000 trout fry from the Brookdale hatchery. Santa Clara county streams will be planted with 200,000 troutlets, Monterey county creeks will also be replenished with the same number of young trout.

There is a heavy run of quinnat salmon on the Santa Cruz side of Monterey bay. Bob Murdoch, C. E. Piper, Dr. Mark Benson and Judge E. C. Johnson landed 27 fish in three hours Sunday. Percy Henderson and George Dailey, of New York, made a catch of 18 salmon.

Black bass fishing still holds good at Middle river, near the Santa Fe railroad bridge. Louis Gotthelf's largest bass Sunday was a 6½-pounder.

Good catches of striped bass were made last Sunday near Wingo; about 30 fish were taken. Al Lindsey caught five fish in Appleby bay—a 20, 10 and three 8-pound fish. A thirty-pound bass was reported taken near the Wingo drawbridge.

The strange malady which has been killing wild ducks by thousands in the marshes around the Great Salt Lake each year, seems to be caused by an alkaline poison, according to a preliminary report of the U. S. Department of Agriculture's investigators. Fresh water is believed to be the only remedy yet discovered.

As the flats around Great Salt Lake dry after high water, salts and alkalis crystallize on the surface of the ground. When light rains form pools on the flats, or when a steady wind blows the water across the dry barrens, the soluble salts are taken up by the water. Ducks and other waterfowl are eager to feed on the newly flooded lands, and, imbibing these salts and alkalis, are poisoned and die.

THE GEERS STABLE.

Last Friday I received a call from Robert Neill, who for the past ten years has been Mr. Geers' secretary. Bob is one of the best known present-day Grand Circuit regulars, and since he was fresh from Memphis, and had all of the dope on Mr. Geers' stable, I searched him for information. "We have had the best of training weather," said Bob, "and as far as I can recollect, we have missed only one workout this spring. I am not going to say that we have a star stable, but I can truthfully say that the horses, with a few exceptions, are in grand condition. Of course, there are some cripples, but that is what is always to be expected in every stable. Mr. Geers came out of his operation for gall stones in good shape, and aside from being a trifle weak, due to his long confinement in the hospital, he is in better physical condition than for years past. Of course, he had to go to work as soon as the doctors would let him out. He is that way, you know, and nothing short of being bed-ridden will keep him out of the seulky. Mrs. Geers has never entirely recovered her health, and when Mr. Geers left she was planning to spend some weeks at a health resort, accompanied by her daughters, Mary and Sarah."

The Geers stable, sixteen strong, arrived safely at North Randall, Mr. Geers stopping over in Lexington to see Anvil 2:02¾ and Etawah (4) 2:03¼. John Benyon, so long second trainer, is still on the job, but farrier Fred Kope has abandoned the stable and will follow the Great Western Circuit. It would seem that in Presolite 2:11¼ and Hal Plex E. p. 2:09½ (neither having race records), and Hal Connor 2:14¼, Mr. Geers had a trio of very capable pacers. The last-named was purchased by F. G. Jones from A. H. Frank, of Memphis, and is a son of the Hal trotter Argot Hal 2:07¾, his dam being by Tennessee Wilkes 2735. Several weeks ago the stallion was a trifle off, but recently worked in 2:10½. Mr. Jones also owns the four-year-old pacer Bud Elliott 2:08, who was a very good three-year-old in 1914, and is not burdened with a fast race record, 2:14¼. Hal Plex E. is owned by Harry McCall of Chicago, and was sent to Mr. Geers last fall. Mr. McCall trained him over the West Chicago track, but after getting him up to 2:17 in mid-season, the horse threw a curb and had very little done with him. Yet he took a record at Memphis, late in the fall, of 2:09½. He must be a fast natural pacer to do that, with the limited work he has had. Murray Howe vouches for him, and that is a strong argument for the steed. Hal worked in 2:09½ and repeated in 2:07¾ before leaving for the north. Presolite, they say, is very speedy, and a game one. She has been in 2:07½, and Bud Elliott in 2:09.

"How about Napoleon Direct 2:02½?" I questioned Bob. "He will go in 2:00, and, unless I am very much mistaken, he will trim some of those top-notch free-for-allers several times this season," he replied. "He doesn't wear elbow boots now, has more stride, and you know that a year's seasoning, such as he had, is worth a lot."

To all of which I heartily agree. If Napoleon Direct does not get in the 2:00 class this season it will be because some misfortune occurs to prevent, and I think that I know what 2:00 means. He has worked in 2:06¼.

When Sparkle Watts (2) 2:10½ died, Messrs. Jones and Geers suffered a real loss, for the daughter of General Watts 2:06¾ was as game a two-year-old as ever wore harness; also she had a fine chance to repeat her two-year-old futurity triumphs. Well, after she died the papers said that Mr. Geers was left without a three-year-old futurity aspirant, but this was far from the truth. He has in Deroche (2) 2:22¼, a chestnut colt by John A. McKerron 2:04½, dam by Teddy Grattan, one that the others are likely to find a very hard nut to crack. This is the colt that Tom Murphy (not Tommy, of Grand Circuit fame), worked last fall at Hamline, Minn., in startling fashion. Deroche was not taken to the track until May, yet he worked a half in 1:03½ and a quarter in better than 30 seconds. That is some stepping for a two-year-old trotter that had never seen a race track until late in May. Recently Mr. Geers worked Deroche in 2:11¾, last quarter in :31¼. So you see the Grand Old Man is not going to be afoot when the futurities are called, not by a long shot. Paul C. Wilson, proprietor of Valley View Farm, Menomonie, Wis., bred and owns the colt, and the only thing that I can see in the way of Deroche being a crack, is the fact that Mr. Wilson is too good a fellow to have that sort of luck—I don't mean it just that way, but you know what I intend to say.

Russian Dame 2:24¼, owned by Charles S. Harris, of Galesburg, Ill.; The Guide and St. Frisco (3) 2:26¾, will represent the stable in the aged trotting stakes. Russian Dame, Bob tells me, is very fast and recently worked in 2:09½ and back in 2:08¾. She has had only a little racing experience, and I am not advised as to how fast she worked last fall. Her sire is George Muscovite 2:08¼, and her dam by Expedition 2:15¾. The Guide has been down the G. C. twice, and was a 2:07 trotter last fall. He is a fast horse, but had the fault of getting away slowly. With this remedied he will be a tough horse to beat, for he can go heats and never runs down. St. Frisco trotted better than 2:10 last season, as a three-year-old, and is the improving kind. He will, with maturity, drill into a first-class trotter, I believe. He worked in 2:10.

J. Malcolm Forbes (4) 2:08 is entered extensively, but there are doubts of his standing up on a hind leg which has bothered him for several years. Mr. Geers worked him around 2:10 last fall, and pronounced him one of the best gaited and fastest trotters that he had ever trained. He worked in 2:16¼, and was taken along with the hope that he would come out all right. Hy Jeanson, by High Admiral 2:07³⁄₄, was shipped with the stable in order that he could be worked and seasoned. He stepped in 2:15¼ and has the makings of a good trotter.

Guy Nella 2:07¼ was put to pacing this spring, but didn't take kindly to the conversion, and is now trotting around 2:14. She was a pleasant surprise in 1914, being a far better mare than she was credited with before going to the races. Dorsh Medium 2:06¼, owned by Lu Green, of Indiola, Ill., was a trifle ouchy early, but has worked out of it, and Mr. Geers entertains hopes of getting her in form. She was always a great favorite of his, but she has been a hard-luck trotter. Star K. (3) 2:15¼, the first foal of Burning Star 2:14¼, own brother of The Harvester 2:01, worked in 2:15 and will be raced in the class events. Paul C. Wilson owns him, also his sire.

Zomidotte, a four-year-old filly by Zombro 2:11, that was charged with a mile last season in 2:11¼, is the last member of the stable to account for. She has not been worked fast up to date. Barney Gibbs 2:11¼ and Judge Jones (2) 2:12¾, owned by Mr. Jones, were left at Memphis in charge of Arthur Morehead. They will be prepared for racing late in the fall.

Gen. C. C. Watts will, it is reported, send the three-year-old colt Allan Watts (2) 2:15¾ to Mr. Geers to be raced. Etawah will be shipped from Lexington to North Randall this week, and then the entire stable will be intact.—Marque, in the Horse Review.

THE FAIR PROBLEM.

It is getting close to the time when the responsibilities of county fair directors begin to manifest themselves. The average citizen who sees the fair has but a hazy idea of the work and study required to plan and complete a successful fair. In many instances the beneficial features of the fair are not taken advantage of and anything to draw a crowd to the town is adopted with a hurrah.

The county fair is a many-sided institution. It is a public tribute of appreciation of the leading industry. It is primarily educational in character and this feature is too often overlooked. The state and nation expends millions of dollars in pamphlets and lectures disseminating agricultural education. There is no place more appropriate to drive home facts than where concrete examples, illustrating the point are in full view, hence the fair presents opportunity. The most learned in dairying might try for hours to convey truths he has at his fingers' end, and if he has before his students, cows to compare and show his points, he can attain his object in a fraction of the time and in a more lasting manner. More and more the fair awards are coming to be placed in accordance with market demands and there is no place where you can explain these things so that the points are grasped to better advantage than at the fair. We believe the judge who places the awards should be required to explain to exhibitors why he discarded certain exhibits and why he placed ribbons on others.

In many of our smaller fairs there is a tendency to cover too much ground. We take the premium list of some other county and follow it because we don't know enough about the fair business to branch out on our own account. Premiums are offered for every plant that can be grown in the county, the idea being to bring out as many varieties of different kinds of stuff as possible. We remember in one instance where our county fair was anxious to out-do the adjoining county. With $3,000 in sight we hung up $10,000 and "put it all over" the rival fair. The way we paid the bills was an easy matter when you analyzed our premium list. On every breed of animals and every product that would in all probability never be entered, we placed our heavy premiums, all of which made a fine showing in the sum total and didn't cost a cent.

More consideration should be given to arrangement of premium lists. It is well enough to hang up a good award for a general display class with the view of learning how many kinds of varieties of products may be grown in the county. This has an educational feature, because it might develop a new commercial possibility. But it is not the best plan to spread the meager funds out in little dribblets covering innumerable varieties of products exhibited by individuals and leave but a pittance for the products that are of commercial value to the county and which carry the name of the county beyond its borders.

We know of one county that hung up first, second and third awards for twenty-five varieties of potatoes, with the idea that it would induce the growing of a lot of different kinds of potatoes and thus establish the county as a potato center. Another county fair management confined their awards to two kinds of potatoes and their first and second and third premiums sounded like the winners of heats at the race track. This policy resulted in bringing out a magnificent exhibit of potatoes and which when sent down to the state fair, established that county as a potato center for a long distance in every direction. And that is what counts. No community ever makes a reputation on the number of products possible to produce therein. It is a few varieties of high quality. It is well enough to offer prizes for the biggest pumpkins or the largest of any kind of product, just as you pay to see the freak in the side show, but the real award should be hung up for the product that is of a demonstrated commercial value in the county.—Pacific Rural Spirit.

LEXINGTON, KY., ENTRIES.

The Transylvania, $5,000—For trotters eligible to 2:08 class (3 in 5). (Starters to be named Sept. 15.) Nominators: Thos. W. Murphy, Pastime Stable, V. L. Shuler, Dick McMahon, E. A. Colburn, I. L. Borden, Beau Ideal Stock Farm, Geo. W. Slaughter, E. F. Geers, Hillanddale Farm, E. J. Tranter, J. W. Davis, W. H. Emerson, J. Crouch & Sons, I. Ross Thompson and Samuel Harris—(16).

The Castleton Cup, $3,000—Free-for-all trot (2 in 3). (Entries to close finally September 15.) May mack 2:04½, Joan 2:04¼, Margaret Druien 2:05½, Newzell 2:05¼, Etawah 2:03¼, Anvil 2:03¾, Sir Harvester 2:24½, J. Malcolm Forbes 2:08, Peter Volo 2:03½, Peter Scott 2:07½, Star Winter 2:05, Lee Axworthy 2:08, Rhythmell 2:04¼, Peter McCormick 2:08¼, Ross B. 2:04¼, Brighton B. 2:05¼—(16).

The Walnut Hall Cup, $3,000—For trotters eligible to 2:12 class (3 in 5): Belzona, Mawitza, Eaglin D., Axtien, June Red, Loe Blossom, Montferris, Linda Wrona, Peter Johnston, Worthy Prince, Pass All, Billy Mead, Russian Dame, The Guide, St. Frisco, Bronson, Little Lee, Princess Welcome, Peter Scott, Sadie S., Great Isle, Mirthful, Miss Rilda, Roy Miller, Adbell M., McCloskey, Nathan Axworthy, Junior Watts, Seneca Boy, Dick Watts, Beau Ashton, Isaac R. T., Lettie Hall, Lou Jennings, Todd Temple, John R. Dillon—(37).

The Ashland, $2,000—For trotters eligible to 2:19 class (3 in 5): Georgia's Prodigal, Miss Silver Todd, Ames Albingen, Loe Blossom, Silquis, Indirect, Grand Chimes, Bora, Bida, Linda Wrona, Al Mack, Poinsetta, Binola, Lou Guy, Lusitania, Celia Dillon, Rala Hall, Willow Mack, Allerta, The Eno, Russian Dame, The Guide, St. Frisco, Clifton, Lucy Reynolds, Bonnie Setzer, Peter Scott, Mary Guy, Miss Rilda, Laramie Lad, Slip Past, Peter Vaughn, Remission, Tropic Dawn, Todd McGregor, Brooklyn Hal, Director Russell, Red Silk, Princess Margaret, Emma Dillon, Miss Carroll, Tommy Todd, Star Tramp, Harry Hamilton, Zue Dillon—(45).

The Kentucky, $2,000.—For three-year-old trotters (2 in 3): Bilara, Brenta, Lady Anne, Georgie Axworthy, Captain Volo, Tregantle's Pride, Golden Axworthy, Bondella, Petress Burton, Sunshine Girl, Golden Frisco, Worthy McKinney, Onward Forbes, Luke A., Lady McKee, Silquis, Golden Spier, Jessie Watts, Toddling, Humfast, Allie Watts, Hattie Collins, Lillian the Great, General French, Kerrigan, Peter Potemkin, Native Spirit, Northspur, Mary Putney, King Bennett, Bronze Silk, Harvest Hope, Colorado B., Czarada, The Pierette, The Exposer, Isworthy McKinney, Anne Cecil, Colorado Range, Sherley DeForest, Binlon, Deroche, Miss Latell, Hollyrood King, Harlem Express, Barbara King, Harvette, Peter Belmont, U. Forbes, Red Bingel, Don Marque, Peter Chenault, Guerne, Henry Todd, Baroness Setzer, Prince Todd, Samoor, Clenathan, Rusticoat, Baceli, Silkobel, George N. Patterson, Binland, Margaret Castile, Bertha Forbes, Straight Sail, Guy Rea, Lord Stout, Lowell Axworthy, Allen Watts, Rose Watts, Robert M., Marchfast, Silver Axworthy, Peter Warren, Jauntfast, Eudora Spier, Prinelda and The Royal Knight—(79).

The Lexington, $2,000—For two-year-old trotters (2 in 3): Bassali, Bertron, Brillion, Barna, Signola Harrods Creek, David Rankin, Don Aristocrat, Walnut Tree, Maple Tree, Anvilite, Bingen Silk, Emily Axworthy, Adele Block, br. c. by J. Malcolm Forbes—Mary Ray, The Inauguration, Rowena Worthy, Great Minnie, Ashland Worthy, Hermione B., Tenbaron, Balmaacan, Good Gracious, Helena Bing, William Bing, Directum Bingen, Native Judge, Peter Axtell, Harvest Note, Leading Spirit, Ollie Watts, Marjorie, Willow Tree, Oak Tree, Peter Allen, Michaelowa, Pavlowa, Peter Look, Lady of the Clan, Ingria, Meja, Atlantika, Helen Alicia, Mighty Robert, Setzer Mac, Bon Set, Mike Axworthy, King Neb, Sis Bingen, Volga, The Scorpion, Peter Dixie, Peter Bing, Binworth, Lightsome Watts, Oscar Watts, Midnight Lad, Bow Peter, Louisiana Todd, Roi Bingen, Revelry, Betty Barry, bl c by Cochata—Miss Pratt, br f by Caduceus the Great—Nelly Tregantle, and bl. f. by Caduceus the Great—Nina Moko—(64).

The Cumberland, $2,000—For pacers eligible to 2:05 class (3 in 5): O. U. C., Single G., The Assessor, Jay Stone, Little Prince, Colombia Fire, Camelia, Baron A., Del Rey, Queen Abbess, Our Colonel, Fay Richmond, Doctor Burns, Major Ong, Hal S., Walnut Grove, Lelia Patchen, Beth Clark, Twinkling Dan—(19).

The Blue Grass, $2,000.—For pacers eligible to 2:10 class (3 in 5): O. U. C., Homer Baughman, Lillian T., Hal Boy, Camelia, Aconite, Periolat, The Importer, Russell Boy, Hal Plex, Budd Elliott, Hal Connor, Presolite, Queen Abbess, Major Ong, Hal S., Peter Farren, Zanzibar, Pointer Patch, Miss Miriam, Walnut Grove, The Beaver, Lustrous McKinney, Patrick M., Grace Ongale, Billy Law, Colonel Echo, Thistle Patch, Bingen Pointer, Dwight Logan, Judge Ormonde, Altawood, Fred Mac, Charley Tranby—(34).

The Kentucky Futurity, $14,000.—For three-year-old trotters (2 in 3): Bilara, Brenta, Lady Anne, Toddling, Tregantle's Pride, Lillian the Great, Golden Axworthy, Captain Volo, Barsac, Allie Watts, General French, Bondella, Petress Burton, Kerrigan, Peter Potemkin, Native Spirit, Mary Putney, Northspur, Denali, King Bennett, The Colorado Belle, John Lackey, The Exposer, Isworthy McKinney, Colorado Range, Worthetta McKinney, Sherley DeForest, Onward Forbes, The Royal Knight, Hollyrood King, Radiant, Harlem Express, Barbara King, Harvette, Janos Roxton, U. Forbes, Don Marque, Peter Chenault, Henry Todd, Baroness Setzer, Eudora Spier, Jessie Watts, Silquis, Britton Forbes, Golden Spier, Lorusia, Clenathan, Luke A., Lady McKee, Rusticoat, Bacelli, Silkobel, Devil Forbes, Margaret Castile, Binland, Bertha Forbes, Guy Rea, Lowell Axworthy, Allen Watts, Rose Watts, Guy Todd, Polly Overton, Samoor, Marchfast, Deroche, Silver Axworthy, Peter Warren and Prinelda—(70).

The Futurity, $5,000—For two-year-old trotters (2 in 3): Bassali, Brillion, Bertron, Barna, Signola Marjorie, Good Gracious (Likoe), Hermione B., br. f by Caduceus the Great—Nelly Tregantle, bl. f. by Caduceus the Great—Nina Moko, Native Judge, Harrods Creek, Suldine, Leading Spirit, Peter Axtell, Harvest Note, Ollie Watts, Willow Tree, Ettie Dillon, David Rankin, Lady of the Clan, Ingria, Moja, Atlantika, Bina S., Don Aristocrat, Mighty Robert, Setzer Mac, Bon Set, Roi Bingen, Tenbaron, Balmaacan, Walnut Tree, Maple Tree, Helen E., Bingen Silk, Adele Block, br. c. by J. Malcolm Forbes—Mary Ray, The Inauguration, Anvilite, Sis Bingen, Mike Axworthy, Rowena Worthy, Ashland Worthy, Great Minnie, The Scorpion, Volga, bl. c. by Cochato—Miss Pratt, General Yorke, Peter Dixie, Worthy Morgan, Sis Bing, Libya, Lightsome Watts, Sumloch, Midnight Lad, Bow Peter, Louisiana Todd, Directum Bingen and Binworth—(59).

The Pacing Futurity, $2,000—For three-year-olds (2 in 3): Arkancello, Sad Thoughts, Brook Axworthy, Battle King, Dorothy DeForest, Hosea DeForest, Peter DeForest, Edith the Great, Miss Harris M., Richman, Michael A. Powers, General Todd, Epeus, Laduse, Junior Forrest, Lady Booker, Peter Worthy, Lady Aubrey—(19).

THE FARM

COLTS vs. HEIFERS AS A SIDE-LINE—CONSIDER THE PROFITS.

Many farm horses now stand idle through the winter months, or for nearly half the year. During that time, not having much to do, they are put on coarse and innutritious foods. In the spring they come out with soft muscles, soft and distorted feet, and wholly unfit for spring work. How can we overcome these unfavorable conditions and at the same time derive some profit from the horses at all seasons of the year?

Brood mares should be kept on farms to a much greater extent than they are, and fewer mares should go to the city. There the brood mares and the young animals find an excellent home in the pastures, and on the soft earth of the plowed fields.

Farmers engaged in mixed farming, who keep three or four horses for each 100 acres of land, would do well to raise a few horses to sell each year. It costs only about $15 to $20 more to breed and rear a colt up to the age of three years than it does to rear a heifer to the same age. The colt may sell for $150 to $200, while the heifer may sell for $40 or $50. The cost of the food consumed by a colt up to three years of age will average about $25 a year, depending largely on the value of the various foods. If an open shed is provided for shelter in the winter, and good pasture in summer, the colts will require but little attention.

The brood mare has earned, by her work, her own and her foal's food, and, in addition, enough to pay any ordinary bills incurred in the breeding and rearing of the colt.

The selling of the colts seems to be the most difficult problem with the average farmer, zut it need not be when one considers it on sound business principles. In the case with the heifer, where the farmer raises it by hand from birth, he is well satisfied if he can sell it for 10 per cent above the cost of raising, but with the foal getting its own food up to the time it is weaned, and not receiving any more care than does the heifer up to three years of age, the farmer will ask anywhere from 100 to 200 per cent above the cost of raising. Is it not more profitable, while one has to keep the horses to do the work in the summer, to raise a few colts each year, than it would be to have them stand idle and depend on other sources for the profits of the farm? In this branch of stock raising, as in others, the animals are fed on the farm and the manure returned, thus enriching the soil and increasing the productiveness of the land. Raise colts as a side-line.—Rural World.

NEW HOME FOR AMERICAN ROYAL, KANSAS CITY.

Temporarily banished from the stock yards on account of extensive improvements being made there, the American Royal Live Stock Show this year will be held in Convention Hall, at Kansas City, the week of October 4 to 9. This was decided by the directors at a meeting held at Kansas City on May 31.

Convention Hall has been for several years the home of the Kansas City Horse Show. It is admirably adapted for exhibiting live stock and has a seating capacity of 15,000. Stabling facilities for the exhibits will be provided by erecting substantial wooden structures on a vacant lot just across the street from the main entrance to the hall. It is expected that arrangements will be made to switch cars containing exhibits direct to the hall.

As the American Royal will be the final tryout before the live stock show at the Panama-Pacific Exposition, which opens October 18, it is expected that all the leading show herds will meet at Kansas City. Arrangements have been made with the railroads to forward the San Francisco exhibits at the close of the American Royal on solid special trains operated on passenger schedules.

Following are the officers of the American Royal for 1915: President, E. F. Caldwell, Burlington Junction, Mo.; vice-president, Robert H. Hazlett, El Dorado, Kans.; treasurer, H. C. Duncan, Osborn, Mo.; secretary, R. J. Kinzer, Kansas City; assistant secretary, Jno. Hazleton, Kansas City.

COW TEST ASSOCIATIONS.

The purpose of the cow test association is to afford the average dairyman an economical means of obtaining records of the cost of producing milk and butterfat from each individual cow in the herd. Most dairymen realize that this information is of great value but fail to keep the records themselves. The keeping of such records requires regularity in testing and weighing of milk and feed and a systematic form of accounting. It is possible for the dairymen to weigh the milk and ascertain the yearly production from each cow. Many have bought Babcock testers and have started to keep records of the amount of butterfat produced, but it soon became a tedious task and was neglected under the pressure of other work. This is probably the reason why so many who know and appreciate the value of the records have failed to keep them. The association supplies an economical way of obtaining these records where the necessary time cannot be devoted to the work.

An association is made up of 26 members with approximately 400 cows. The cost per cow is usually $1.25 per year or ten and a half cents per month. A man trained in dairying and one that has had some practical experience with dairy cattle is employed by the association to keep the records. This official tester, as he is sometimes called, spends one day a month at the farm of every member of the association. He arrives during the afternoon and begins work by weighing and taking samples of the milk from each cow at milking time. During the feeding operation the roughage and grain consumed by each cow is also weighed. The following morning a similar record is made. During the forenoon the samples of milk are tested for butterfat and the value of the milk or butterfat is computed at market prices. The cost of feed consumed during a day of 24 hours is then figured. The difference between the cost of feed and the value of product will determine the profit or loss per cow. The monthly production and profit is determined from this day's work.

At theend of the year, each member is given a complete record of the production of the individual cows in the herd. The results of each year's work in the different associations are summarized and published in a bulletin. This work is particularly valuable in that it shows the increase in production from year to year.

There are several important advantages that result from having records kept by means of the cow test association:

1. It affords an efficient and economical way of keeping records.
2. It gives each dairyman th actual cost of producing milk from the cow and from the herd.
3. It determines the profit or loss per cow and gives one an opportunity to weed out the unprofitable cows.
4. It shows the advantages of using a pure bred sire by the increase in production.
5. It gives an opportunity to compare the value and effect of different grains and roughages on the production of milk.
6. Some of the associations are buying grain co-operatively and thereby saving from $3 to $4 per ton.—W. P. Davis, in Home and Farm.

PLANT AND TREE INSPECTION.

A ruling in keeping with the recent act of Congress designed to place a quarantine on the nefarious blights prevailing in the horticultural sections in other states has been transmitted in the daily bulletin of the post office department.

"The plants and plant products subject to terminal inspection in the state of California are described as follows:

"'All florists' stock, trees, shrubs, vines, cuttings, grafts, scions, buds, fruit pits and other seeds of fruit and ornamental trees or shrubs, and other plants and plant products for propagation, excepting vegetable and flower seeds, bedding plants, and other herbaceous plants and roots; Provided, that this list of plants shall not apply to plants shipped under the certificate of the United States department of agriculture for propagation in the plant introduction and field station of the department at Chico, Cal.

"The place to which a postmaster in the State of California shall send for inspection a package containing plants or plant products subject to terminal inspection is the one in the list below which is nearest to his office:

"Alturas, Auburn, Bakersfield, Colusa, El Centro, Eureka, Fresno, Hanford, Hillister, Independence, Lakeport, Los Angeles, Madera, Martinez, Marysville, Merced, Modesto, Napa, Nevada City, Oakland, Oroville, Placerville, Red Bluff, Redding, Redwood City, Riverside, Sacramento, Salinas, San Bernardino, San Diego, San Francisco, San Jose, Santa Ana, Santa Barbara, Santa Cruz, Santa Rosa, Stockton, Susanville, Ukiah, Ventura, Visalia, Willows, Woodland, Yreka, Yuba City.

CARE OF MARES IN FOAL.

"There is a lot of nonsense about the care of a mare in foal," says the Animal Husbandry officer of the Oregon Agricultural College. "After she is bred she should be kept rather quiet for several hours, but after that the best thing she can have is steady work and three good meals a day. She should not be worked so hard as to become run down on good feed. If there is any slackening of work it should be about the fifth or sixth month. During the last three months she can do a lot of farm work, such as plowing and harrowing, without injury clear up to the time she drops her foal. She will then be in good condition to stand the physical strain and have her digestive system in good working order."

WHITE DIARRHOEA OF CHICKS.

One of the most common causes of chick mortality is white hiarrhoe. No certain cure for this malady is yet known. While it has been established that this disease is usually communicated to the chick before it is hatched, it has also been established that the disease can be held in check and even prevented by proper feeding. The organisms that cause white diarrhoe are killed by weak acids. For this reason sour milk can well be made a part of the chicks' rations for the first few days. Either moisten the food with it, or set in shallow drinking pans. In addition, however, do not neglect to supply plenty of clean, pure drinking water.

Warranted to give satisfaction.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¾, etc. As great a youngster as the country affords today.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

MRS. W. J. MILLER, Chico, Cal.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

2019 So. Figueroa St., Los Angeles.

SAVE-THE-HORSE

TRADE MARK REG'T.

Nineteen Years A Success

And Still Leads Them All

ISAAC P. DANDY
General Photographer, Enlarging, Etc.

Alesia, Md., May 22, 1915.
TROY CHEMICAL CO.,
Binghamton, N. Y.

As I truthfully owe you this, I will say, some time ago I had a mare with a ring bone. She was fired. I then had her blistered by two doctors and neither could do her any good. She was so lame at that time I couldn't hardly get her out of the stable and she had a running sore about the size of a silver dollar and about a half inch deep.

I sent for a bottle of Save-The-Horse and used it as you directed and in three weeks she was as game as ever, and never went lame a step since; it was the cheapest bottle of medicine I ever bought and it did all you claimed. As I am widely known in the state of Maryland if any one wishes to see or write to me, I will gladly tell what Save-The-Horse has done for me. Wishing you great success,

Yours very truly,
ISAAC P. DANDY.

CURES THREE

Springwater, N. Y., Feb. 16, 1915.
TROY CHEMICAL CO.,
Binghamton, N. Y.

Dear Sirs: Please send me your new book. My father cured three horses with the Save-The-Horse. One had a spavin and one had a bunch just above the hoof and one had the heaves, so she was not worth one dollar. They are all sound horses today.

Yours truly,
LLOYD COLEGROVE, R. No. 2.

CANADA MAN WITH ONE BOTTLE CURES TWO

Mr. Armour Thompson, Box No. 36, Elmdale, Ont., writes:—Troy Chemical Company, Toronto: Concerning Save-The-Horse, it cured two curbs instead of only one, as guaranteed. Enclosed check for another bottle. Send instructions for windpuff.

$5.00 Every bottle is sold with a binding contract to refund money or cure any case of BONE and BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDON and OTHER LAMENESS. No blistering or loss of hair. Horse works as usual.

DERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field.

The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, and few of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up in their training are concise and easily understood. Every man who owns a bird dog should shoots in the field should read this book.

SAN FRANCISCO

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 178 pages, 5x7 inches.

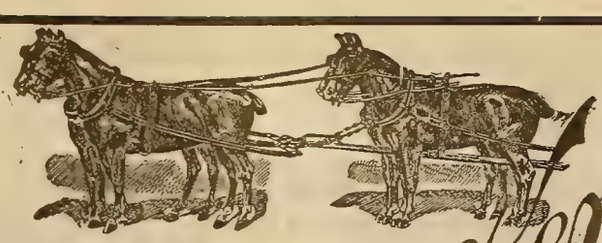
A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.



The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

"press up"
the carrier

The Easiest Repeater To Unload Is The

W WINCHESTER

MODEL 1912

Hammerless Repeating Shotgun

We copy the instructions covering the unloading of the magazine from our catalog:

To remove the loaded shells from the magazine without working them through the action, press up the carrier. They will then be forced out by the magazine spring.

That's all there is to it. In fact, the instructions may be compressed into these four words, "Press up the carrier." No gun that we know of can be unloaded so simply or so readily. This is one of the many features that commend this gun so highly to shooters. Others are set forth in our illustrated circular. Send for it. It's full of information and free. Dealers everywhere sell Winchester guns.

PHOENIX (Arizona State Fair)	Nov. 15-20

NORTH PACIFIC FAIR AND RACING ASS'N.

PORTLAND, OREGON	Beginning Aug. 2
SEATTLE, WASH.	Beginning Aug. 9
VANCOUVER, B. C.	Beginning Aug. 14
CHEHALIS-CENTRALIA, WASH.	Beginning Aug. 23
ELMA, Wash.	Beginning Sept. 1
VANCOUVER, WASH.	Beginning Sept. 6
SPOKANE, Wash.	Beginning Sept. 13
WALLA WALLA, WASH.	Beginning Sept. 13
HELENA, MONT.	Beginning Sept. 20
NORTH YAKIMA, WASH.	Beginning Sept. 20
VICTORIA, B. C.	Beginning Sept. 27
SALT LAKE CITY, UTAH	Beginning Sept. 27
SALEM, OREGON	Beginning Sept. 28
MISSOULA, MONT.	

WESTERN CANADA CIRCUIT.

MOOSEJAW, SASK.	July 19-13
BRANDON, MAN.	July 19-24
REGINA, SASK.	July 26-31
SASKATOON, SASK.	Aug. 2-7
EDMONTON, ALB.	Aug. 9-14
RED DEER, ALB.	Aug. 17-20

GREAT WESTERN CIRCUIT.

CLEVELAND (North Randall), O.	July 19-24
DETROIT, MICH.	July 26-31
PEORIA, ILL.	Aug. 2-7
BURLINGTON, IA.	Aug. 9-14
GALESBURG, ILL.	Aug. 16-21
DUBUQUE, IA.	Aug. 23-28
DES MOINES, IA.	Aug. 30-Sept. 3
HAMLINE, MINN.	Sept. 6-11
MILWAUKEE, WIS.	Sept. 13-18
SPRINGFIELD, ILL.	Sept. 20-25
SEDALIA, MO.	Sept. 27-Oct. 2
MUSKOGEE, OKLA.	Oct. 4-9
PHOENIX, ARIZ.	Nov. 15-20

GRAND CIRCUIT.

CLEVELAND (North Randall), O.	July 19-24
DETROIT, MICH.	July 26-31
KALAMAZOO, MICH.	Aug. 2-7
GRAND RAPIDS, MICH.	Aug. 9-14
MONTREAL, ONT.	Aug. 16-28
NEW YORK (Empire City), N. Y.	Aug. 30-Sept. 4
HARTFORD, CONN.	Sept. 6-11
SYRACUSE, N. Y.	Sept. 13-18
COLUMBUS, O.	Sept. 20-Oct. 2
LEXINGTON, KY.	October 4-16

THE WAR HORSE SITUATION.

The mounting of troops in an army is a most serious problem of an army. Not only must provision be made for a supply of horses sufficient to equip the mounted service for the ordinary routine work during peace, but a reserve must be provided in the case of an outbreak of hostilities. Statistics tell us that the Germany army requires, for complete mobilization, 770,000 horses, and she has about 4,523,000 horses. The French army is said to require 250,000 horses, which probably includes only cavalry, and France has 3,222,000 head. Great Britain requires about 400,000 horses for her army, and she has only 2,231,000. It is estimated that there are about one million horses in active service in the different armies of Europe. It is also said that Austria-Hungary has 4,370,000, Belgium 263,000 and Russia 30,000,000, and the United States 25,000,000 head.

The question arises, what have these nations been doing to stimulate the breeding of horses for their army?

Germany probably makes the largest total expenditures for this than any other country, and of the German states most attention is devoted to the subject in Prussia.

There are five breeding farms and eighteen stallion depots in the kingdom of Prussia, the farms containing a total of over 2,000 acres. The breeding work of the government is partly to encourage livestock breeding in general as well as for military purposes, but there are two provinces in Prussia known as the "Remount Provinces," where only the military object is considered. The stallion depots are most important from a commercial standpoint, and these contained 3,315 stallions in 1907. These stallions make the circuit from February to June at fees ranging from $1.19 to $4.76.

The French government has a breeding farm at Pompadour of 1,122 acres. Aside from this the breeding work is done through the medium of central studs, twenty-two in number, from which stallions are distributed throughout the country. In 1906 the French government owned and used for breeding purposes 3,321 stallions, which covered 151,414 mares at an average fee of $1.47.

The efforts of the Austria-Hungarian government to improve the conditions of horse breeding and other forms of the livestock industry surpass that of any other country in one respect—the magnitude of their breeding farms—and in addition stallions are placed in convenient places during breeding season. In Austria proper there are two horse breeding farms, one at Piber of 1000 acres and the other at Radantz with 23,809 acres. The government expenditure in Austria in 1907 was $938,000. In Hungary the great establishment of Mezohegys, with over 50,000 acres of land, 20,000 horses and 6,000 employes, Kis-ber, with over 18,000 acres, and Babolna with over 10,000 acres.

The Italian government does not devote so much attention to horse breeding as those mentioned, but 640 stallions stood for public service in 1906, covering 29,462 mares.

Just what kind of a horse is it that these countries want? I shall take England for consideration, as the other countries do not vary far from this.

"The British war office only requires horses for active military purposes that are from four to twelve years old. Crib-biters, wind-suckers, parrot-mouthed or undershot horses and animals with damaged knees or deficient teeth are not taken. Soundness in eyes, wind and limb is essential. No animals with worn, upright, or overshot joints, and none with curby hocks are passed.

"The cavalry horse must be a deep, short-legged, short-backed, good barreled one of the hunter type with substance and quality in true action. Light, active, well-bred horses that move truly and well in their paces, have plenty of bone and short backs, may thus be said to represent the ideal cavalry type. These horses' height at four years should be 15.1½ to 15.2½ hands, and more than four years they should measure 15.2 to 15.3 hands. England pays $200 for these at four years old."

"The artillery type required is a weight-carrying hunter, showing quality and ability to gallop in a gun team. These horses should be of the combined rider and driver type, with short backs, some bone and depth through the heart. They must be able to gallop when dragging guns and maintain the pace for some considerable distance. Here the height at four years old is 15.2 to 15.3 hands, and over four years 15.2½ to 16 hands. They cost about $210 at four years old."

England, France and Germany are buying horses in this country, while Russia has plenty of her own. It is estimated by some that they will take at least 300,000 horses out of this country.

Just what this means to the horse breeder in this country is the question of importance to us. Already thousands of horses have been shipped out of the Northwest. In the Country Gentleman of February 27, 1915, I read that Great Britain has been paying $210 a head for artillery horses, $175 a head for cavalry horses and $175 for mules. Dealers in Missouri who have obtained these army orders have kept their prices secret. Even some of the rural agents do not know what the British government has been paying for horses. All that these buyers know is that they cannot pay over $230 or $160 per head

It costs Great Britain and France about $300 a head to deliver an American horse at the front. The expenses are apportioned like this: $200 for purchase, transportation $85, insurance $10, feed $3, and he has from four to ten days' service in the battleline to pay for himself.

Three hundred thousand horses go from this country to certain destruction. Ten days is the average of a cavalry mount at the front, while the life of the artillery horse is only four days. Still some French officers say the average life is thirty days.

One dealer interested in buying a large Italian contract figured that each horse ordered would represent $650 by the time it reached Germany.

When the foreign nations started to buy horses last September a lot of small stuff was sent to the market which was turned down and a great deal of money was lost on this first rush.

Dealers often find that they have a lot of horses on their hands which are affected with heaves. One man who has a contract found himself with about ninety-two head of such horses. Did he lose for this and turn them out for private sales? He did not. He was a horseman by birth and what he did was to wet their feed for several days before inspection. Then, on the morning when the commission would pass on them each was given a brisk run of a mile or more, a good rub-down, and a dose of pine tar or coal oil. A horse so treated does not show the symptoms of the trouble, and eighty-five of the ninety-two got passed.

Army horses are not the highest priced sort. Medium in type, they are produced in large numbers during the efforts to breed better sorts. In times of peace they accumulate, and in times of war it is a good policy to cut them loose. Army horse inspectors are severely critical and independent in times of peace. This policy secures a higher excellence in horses for the service, and it creates the impression that horses suited for the army are scarce. It is true that horses such as officers might regard with keenest pride are scarce. They are in great demand for commercial uses, but a homely, hardy, serviceable horse, good enough to stand a lot of hardship and furnish a target for shot and shell can be bought ordinarily at a low figure. Such a horse has neither the size, speed nor looks to sell high.

It is claimed by some that this war as an outlet takes few horses that would not be used in the constructive policy we need in building up big drafters, fast trotters, gaited saddle horses and showy harness horses. It takes out the inferior sorts that the country can readily spare. Also, as one writer says: "The war horse prices are not such a boon to anyone's pocketbook as they are a boost to the industry of breeding valuable types of horses."

Still, it is held by some that the farmers are making a mistake in selling their mares and those animals that they need on the farm. Under pressure of immediate needs, as in the south where they can not sell their cotton, a great number of them will part with horses at prices that seem high just now. And later they will be unable to buy back what they require for farm purposes, because horseflesh is bound to go up.

A lot of them will be in the same position as the family that hocked the stove in July to go to the circus and could not redeem it in November.

It is also stated by some that out of this wholesale export over ten per cent of the animals are mares. This means that about 20,000 mares that cannot be spared in this country will go to the front for gunfodder.

One reason that the war horses are so scarce and will be in the future is because with the close of the civil war there started a rapid importation of draft horses from Europe and this trade has flourished till the present time with a period of depression in the nineties.

In the corn belt and in the irrigated sections of the west the draft horse is becoming the farmers' horse, almost to the exclusion of all other types. In some parts of the country where a prosperous farmer formerly kept a fine team of drivers to get about the country with, the drivers have been discarded and the farmer now owns an automobile of moderate price.

Although this is the motor age the situation in Europe in regard to the horse may be significant as to what may happen in any other country in war time or peace time. Trains and automobiles can carry troops and all kinds of equipment of war across the country and into positions as long as there are tracks of steel or roads of solid bottom. But in times of war who will vouch for tracks and wagon roads? It is only by the use of horses that the armies can cross plowed fields and the swampy places or swim the bridgless streams.

The British purchases are shipped by the way of Canada, and in November heavy losses were reported from pneumonia, which resulted in some changes of route and rigid precautions. All the French horses go by way of New York or Galveston, about 2,500 horses to a shipload.

One writer says, in regard to shipments: "I watched them loading a train with horses at Fort Worth. The shipment was bound for New York, and every car had extra boarding to keep out the cold, the weather being severe. There was to be a four days' run with two feeds, the long voyage across the ocean, the confusion of the rush to the front, and then the terrible work on the guns and the supply wagons, short rations, exposure to cold more cruel than any they ever experienced, the shriek of shells and blinding flashes of the explosions, the battlefield littered with stiff-legged carcasses!"

"Goodbye, o' feller!' cried one cowboy to the last car as the train moved out. "Gee, if he could only talk he'd sure be able to tell a story a month from now!"—Pacific Rural Spirit.

Harry Bell, the horseman, who has been spending some time here, and who left for the east last week, says that labor conditions in Canada, where he and his brother have a big lot of grain, are the very worst ever. He adds that the war in Europe has drawn on the men in Canada in a way that few realize. Thousands upon thousands of working men have answered the call of England to enlist for her cause in this European war and where there were two men for one job there are now a dozen jobs for one man. The laws of Canada are such that forbid the importation of workingmen, otherwise the lack of labor could easily be filled from this country. As it is, Mr. Bell fears that there will be thousands upon thousands of acres of grain go to waste this year because of lack of labor to harvest the crips.—Pleasanton Times.

Ventura is to have a county fair August 26, 27, 28, hanging up $500 each for a free-for-all trot and free-for-all pace, $250 each for a 2:20 trot and a 2:20 pace, and some good money for the runners.

Fun Drivers Celebrate at Exposition

In spite of the fact that the weather man threatened to cut loose with a little celebration of his own Monday in the vicinity of the Golden Gate, the largest crowd that the turnstiles have recorded since opening day found its way into the exposition grounds, and very many of its members journeyed the full length of the enclosure to find a perch in the big grandstand at the racetrack. The races, while under the auspices of the San Francisco-California Driving Club, were part and parcel of the exposition's big list of free special events in honor of our nation's natal-day, and a number of the local "pros" joined in the fun with a vim.

W. J. K., piloted as usual by the junior member of the company of Kenney & Smith, romped away with the 2:12 pace in straight heats and put the seal of approval on the classification committee's work by pacing both miles in 2:12 flat, Delilah and Bradmont furnishing the best of the competition and Happy Dentist, last year's king pin, who was making his first start of the season, coming in for honorable mention by finishing fourth each time out.

Jack, McDonnell & Conlon's little black gelding that had so far failed to head a field to the wire, failed to have the same consideration for the classification experts that W. J. K. evidenced, as he went 'em a little bit better in both heats of the 2:15 pace, doing the first one in 2:13 and the second in 2:14, Politea, Emma M., Tom Murphy and Hamburg Belle scrapping it out behind him for the lesser honors. Jack has been a little slow in getting into form, but on Monday was "right as rain." He is a handy rascal, don't wear 'em, and his wins got a good hand from the crowd.

With the following four pacers showing up for the free-for-all—Greatness, Little Bernice, Dick W. and Vera Hal—it looked like a case of "dog eat dog" for the trophy, with the odds in favor of Vera Hal, as she has worked faster than any of the others this season. Ottinger got away with the first heat in handy fashion but the little mare came back at him a little faster the next time and won in a hot finish. Ot then "resigned" in favor of Frank Burton, and Frank and Harold went at it hammer and tongs, the former winning in a strenuous drive in the stretch in an even 2:10. Greatness, who finished 2-2-3, went an excellent race for a three-year-old—a race that makes her look like a worthy rival for Bondalean and Little Express in the fall stakes.

Al Schwartz, who had the mount behind Little Bernice in the pace without getting more than a good ride out of it, evened up in the free-for-all trot by putting over Agnes Carter in straight heats and fair time, 2:15, making a double victory for the Ottinger stable. Muggins raced her for the first heat and Birdeye tried her out for the second but neither could show her the way to the wire. Rosie O., Jimmy Ryan's hope for the future pacing classes, made her first appearance locally in the mixed event, and got a nice start by annexing the trophy, standing 2-2-1 in the summary against 5-1-2 for Laddie G. and 1-6-6 for Hello Girl. Rosie is only a three-year-old, but she is a real pacer from all indications and with any sort of fortune ought to mature into a mighty useful mare.

The boys from the Presidio added spice to the program by staging a running race for cavalry horses and a Roman race, Lieutenant Brown acting as starter. The races were keen and took well with the spectators, who developed a hearty respect for horsemanship as practiced by our Uncle Samuel's swatties. The day in detail:

First race—2:12 pace:

W. J. K.	(Smith)	1	1
Bradmont	(Machado)	3	2
Delilah	(Goularte)	2	3
Happy Dentist	(Villar)	4	4
Decoto Boy	(Cohn)	6	5
Pointer Bell	(Frellson)	5	ds

Time—2:12, 2:12.

Second race—2:15 pace:

Jack	(McDonald)	1	1
Paletoe	(Burton)	2	3
Emma M.	(Malough)	5	2
T. Murphy	(Ayres)	3	4
Hamburg Belle	(Schwartz)	4	5
King Pointer	(Lecari)	6	6
G. J. P	(Consani)	7	7
Senator H.	(Hanks)	8	dr
Aerolite Jr.	(Roberts)	ds	

Time—2:13, 2:14.

Third race—Free-for-all pace:

Dick W.	(Ottinger-Burton)	1	3	1
Vera Hal	(Cohen)	4	1	2
Greatness	(Martin)	2	2	3
Little Bernice	(Schwartz)	3	4	4

Time—2:11, 2:10½, 2:10.

Fourth race—Free-for-all trot:

Agnes Carter	(Schwartz)	1	1
Birdeye	(Frellson)	4	2
Muggins	(H. Cohen)	2	6
Kinney Lou Jr.	(Burton)	5	3
J. C. Simpson	(Goularte)	3	7
St. Patrick	(Villar)	7	4
Monica McKinney	(Hoffman)	6	5

Time—2:15, 2:15¼.

Fifth race—Mixed trotting-pacing:

Rose O.	(Ryan)	2	2	1
Laddie G.	(Holland)	5	1	2
Hello Girl	(Keogh)	1	6	6
St. Thomas	(Roberts)	4	3	3
Victor Pointer	(Keating)	3	4	5
Harold K.	(Galindo)	7	5	4
Marin	(Kane)	6	7	dr

Time—2:19½, 2:20, 2:20¾.

Sixth race—Three-eighths, running (cavalry horses): Private Markin's mount, won; Corporal Wyatt's mount, second; Private Renshaw's mount, third. Time—:39.

Seventh race—Three-eighths, Roman race: Corporal Wyatt's team won, Private Trumbull's second, Private Troutmiller's third. Time—:40½.

STARS CONGREGATE FOR OPENING OF GRAND CIRCUIT.

[From the Western Horseman.]

The "clocker" who goes out to the North Randall track any day now and thinks that he can take a timer in each hand and catch all of the good miles has another guess coming. The big plant is now, without any doubt, the busiest training camp in the land and they are still coming in. On Saturday night there were 263 trotters and pacers stabled at the track and this number will be increased to near the three hundred mark by the time that this issue comes out, as Tommy Murphy has sent word from Poughkeepsie that he will arrive on Wednesday and has asked for thirty-four stalls. Last week they came in like a circus. Not a day passed without new arrivals. On Friday and Saturday the California bunch shipped in with their strings. The list from the coast included Frank and Marvin Childs, V. L. Shuler, Al Ruthven, Will Fleming and J. P. Quinn. Fleming, Quinn and Ruthven arrived on Friday, while the others reached the big track on Saturday morning.

* * *

Will Fleming, the man who drove the great Joe Patchen II 2:03¼ down the Grand Circuit with success in 1912, brought with him the good pacer, The Beaver 2:05¾; Alberta Dillon 2:10, Tropic Dawn 2:18½, and Seneca Maid 2:15½, all of which are owned by E. J. Rochon, the Winnipeg horseman who owned The Broncho 2:00¾, at the time that she was a pacing sensation.

* * *

Quinn brought but two, these being the trotters Albaloma 2:08¼ and Baby Doll 2:10¼. Both of these have shown a lot faster than their marks and Quinn thinks that they will get some of the money in their campaign on the Big Ring.

* * *

Frank Childs, the clever young teamster who raced the fast pacing mare, Leata J. 2:03, down the Grand Circuit two years ago, brought over three head, viz.: Loe Blossom 2:10½; Bon Guy 2:11¾, and the pacer O. U. C. 2:07¼. Loe Blossom will make a sensational trotter for Childs if he can get her manners perfected for she showed in her work at the coast that she was none less than a 2:05 trotter. Lon McDonald got up behind her one morning at San Francisco and without any effort the chestnut mare pulled him a mile in 2:06½. She was a starter in the big trotting stake but did everything that a good trotter should not.

* * *

Marvin Childs has in his stable the fast pacing gelding Hal Boy 2:05¼; Tom Smith 2:11¼; Imbro p. 2:12¾, and The Proof 2:11¼. Hal Boy is rated as a sure 2:03 pacer by the boys who saw him raced at the coast and is liable to figure in the fight for the big money down the line. The Proof is a son of The Exponent 2:11¾ and is figured as a 2:06 trotter.

* * *

The Indianapolis "racers," Peter McCormick 2:08¾ and Fleeta Dillon p. 2:08¾, stood the long trip in fine style and Mr. Shuler is well pleased with the trip to the coast. Besides these two he brought the trotter John Gwynne 2:11½, that he purchased while at the Pleasanton track. Peter McCormick's legs are in good shape and at present it looks as though he will get through the season without being bothered with the pins. Fleeta Dillon is a much improved mare in her manners and Lawrence Shuler pulled off two races with her at the big meeting, getting a piece of the money in another start.

* * *

The most talked of performer at the track is the two-year-old trotting filly Volga, a full sister to Peter Volo (3) 2:03½, that Billy Andrews is preparing for the futurities. On Monday Andrews worked her a mile in 2:12¼ and horsemen who witnessed the mile say that the filly seemed to be trotting well within herself all of the way. In a mile around 2:20 she stepped the last half in 1:03 and came the last quarter in 30¼ seconds. Volga is another trotting freak and many think that she will smash the two-year-old record.

"There is only one trotter on the grounds." That is what they all say when the subject of good trotters is brought up. I saw Andrews work the four-year-old trotter, Lee Axworthy (3) 2:08, on Friday morning and the son of Guy Axworthy stepped a mile in 2:09¾, with the last half in 1:03 and quarter in 31 seconds, and came back in 2:09, with the last quarter in :31¾. This colt seems to be good this year and I am of the opinion that he will lead any of the stake trotters a miserable life if he gets to the races in good form. Andrews has a cracking good three-year-old trotter in Bacelli, by Bertini 2:22¼, that he recently worked in 2:12. He has been a number of miles around 2:13 and right now looks like a 2:10 trotter.

The trotter John R. Dillon 2:11¼ by Sidney Dillon, has been the fastest mile of any trotter at the big track, he having trotted a mile in 2:08¼ last week. The bay stallion trotted the last half in 1:03¼ and the last quarter in :31¼. Newzel 2:05¼, with Harry Devereux in the sulky, went the distance in 2:09¼, the last quarter in 32 seconds. The three-year-old trotter, Rusticoat, worked in 2:13, quarter in 31 seconds.

* * *

Pop Geers and John Benyon are busy on the job with the big string that they have to work on and are able to show the railbirds a bit of speed. Pop had a bay trotter added to his stable last week which he thinks pretty well of. John Benyon also likes him. This is a five-year-old horse called Etawah that followers of the Grand Circuit will remember as having started a few times last season. The son of Al Stanley 2:08¼ was shipped up from Lexington with the Dickerson string and looks as round and sleek as a show horse. He has been in the stud at Castleton and has not been asked to beat 2:20 yet this year. The big chestnut pacer, Napoleon Direct 2:02¼, is working like a clock for Geers this season and has been around 2:06. Bud Elliott worked in 2:09½, with the last half in 1:03½, and St. Frisco went in the same notch on Wednesday.

* * *

Curt Gosnell, the Cambridge City, Ind., trainer, has the good pacer, Single G. 2:07¼, and the trotter

DICK W. 2:06¼, BY ATHADON 2:27
Winner of the free-for-all pace Monday at the exposition matinee.

r. A. L. 2:10¼, at the track but as he had scarcely become settled, did not go any fast miles. On Friday morning he worked Single G. in 2:13¼, and when Gosnell let loose of the son of Anderson Wilkes he came home from the half-mile post in 1:03, while the final quarter was in 29½ seconds.

* * *

John Dickerson let Bonington (4) 2:06½ down to a mile in 2:10¼ and the little chestnut trotter tramped the last quarter in 30¼ seconds. King Bellini went in 2:12¼, the mile being evenly rated. Both of these trotters look extra good and should be useful to the Hillanddale Farm trainer this year.

* * *

I saw Harry Stinson work The Toddler a mile in 2:10, with the last quarter in 30¼ seconds, and he came back in 2:10½. This colt can perform like a real trotter and Harry thinks that he will develop into a 2:05 performer. Last year he worked in 2:07½, but with Peter Volo and Lee Axworthy in the way, he did not stand much of a chance at getting much of the money in the futurities, and was not started. The roan trotting filly The Madonna, by Peter Donna 2:08, owned by Mark Leister, Tiffin, Ohio, worked in 2:19½ and is well thought of by Stinson. Peter Brown, the bay trotting colt by Peter the Great 2:07¼, owned by Fred Wilcoxson, of Norwalk, Ohio, has been around 2:30 for Harry and has been at the track less than six weeks.

* * *

"Kentuck" Floyd shipped from Memphis with his horses including the good trotter, Omar 2:05¼. The gelding is very lame this summer and will probably be turned out. Floyd worked the four-year-old trotter, The Eno (3) 2:19¼, a mile in 2:09¼ on Wednesday and let the young son of The Native trot the final half in 1:03. He is much taken up with this trotter and thinks that he will do in good company. Sarah Douglass, the green trotting mare by Bob Douglass 2:04¼, is also well thought of by the Southern reinsman. She has been around 2:10.

* * *

Mike McDevitt worked Joan 2:04¼ a mile in 2:12¼ and back in 2:09¼, with the last quarter in 31 seconds on Friday morning and the daughter of Directum Spier appears to be getting good. If McDevitt can get her back to the form that she displayed at Lexington last fall Joan will be hard for any trotter to beat. The sensationally fast Linda Wrona 2:05½ is going sound and worked in 2:10½ for Mike last Wednesday. In another mile a bit slower she stepped the last quarter in 30 seconds. The five-year-old trotter, Peter Mac by Peter the Great 2:07¼, that trotted to a time record of 2:10½ at Lexington last fall, is working fine this season and can beat 2:10 right now. This trotter resembles his sire more than any son that I have ever seen. The three-year-old filly, Lillian the Great by Peter the Great, and out of the good trotting mare Lillian R. 2:04¼, has been going good for McDevitt, who thinks that she will make good. On Wednesday morning she worked in 2:17½ and tramped home from the half mile station in 1:05½, the quarter being negotiated in 32 seconds.

* * *

Guy Rea has his good trotter of 1914, Junior Watts 2:11¼, going at his work like a good fellow and has been around 2:15, with a quarter in 32 seconds. Junior Watts was a great performer for young Rea last season, when he won ten or eleven $1,000 stakes over the half-mile tracks and wound up the season without a defeat chalked against him. He looks good and acts good this summer and I look for the son of General Watts (3) 2:06¾ to win more good races for Rea this year. Rea has been in 2:12, with The Emerald, and the trotter came the last quarter in 32 seconds. Hedger 2:13¼, the pacer by Hedgewood Boy 2:01, that Guy raced a few times last year, worked in 2:10¼, last half in 1:04¾, and quarter in 30¼ seconds, on Friday morning. He surely has the whizz this season and ought to get some of the money in his class.

* * *

Ben White is at the track with several head and looks to have some good material in his charge. The trotting mare, Lettie Lee 2:13¼, by Moko, that showed a lot of class in her races over the half-mile tracks last year, is working much to the satisfaction of her trainer and on Friday morning stepped in 2:14¼ and back in 2:13½, with the last half in 1:05½, final quarter in 31½ seconds. Queen Abbess 2:10¼, by The Abbe 2:04, a pacing mare that raced exceedingly well on the two-lap tracks last season, is another that White thinks will do some good this summer. She worked in 2:11¾, with the last quarter in 32 seconds.

* * *

Bert Shank worked Rhythmell 2:04¼ in 2:10 on Wednesday and le the black mare trot the last half in 1:04. The daughter of Rhythmic is acting good this summer and if she keeps on the straight and narrow path all through the season will cause the fast class trotters a lot of trouble. Evelyn W. 2:03¾, the old reliable from the Shank stable that caused the backers of other fast class pacers to lose their roll many a time when she was right, is being worked by "The Mayor" again this year and appears to be coming along finely in her work. She worked in 2:12 on Friday and breezed home from the three-quarter pole in 32 seconds. Shank has always said that Evelyn W. was better than a two-minute pacer and if she comes on all right in her work it would not be surprising to hear of her beating her record.

Contemporary Comment on P.-P. I. E.

HAWLEY, HORSE BREEDER

There has never been shown to a greater degree the absolute state of lethargy existing in the minds of owners and trainers than in the case of the Panama-Pacific Exposition. Just why owners of really capable trotters should have failed to grasp such opportunities as were offered by the managers of the trotting meetings given during the Exposition is a question that is unanswerable, and one must attribute the cause to the drivers. Surely there are enough high-class horses in training eligible to the rich prizes whose owners can afford the expenditure of shipping them west, and it would seem as if the trainers themselves did not wish to take the chances of shipping from one end of the continent to the other, or else they were fearful of making such an extended journey themselves. The idea that a horse cannot be shipped 3,000 miles, or even 5,000, raced in the best of company, and returned to his home without any very great danger of loss of form is ridiculous, for the thing has been done time after time, and with marked success. Years ago, when shipping was not as conveniently done as now, trotters of great capacity were sent to California and campaigned in gruelling races, and then returned to the Grand Circuit to take part in the events given during the summer. Lon McDonald had gumption enough to go west with his stable, and he well deserves whatever success has fallen to his lot, which, however, was probably not as great as he anticipated.

The efforts of the managers of the racing department of the Panama-Pacific Exposition were not appreciated by horsemen throughout the country, and, instead of presenting to the thousands of visitors the best trotters in training, little was seen of genuine class. What a man does with his horse is his own business, yet the efforts to furnish an increased earning capacity for the trotter seems to be hopeless, for either the owners or trainers insist on following old plans and customs. Doubtless many readers have been disappointed at the time recorded in the races at the Exposition, but any man who is familiar with the weather conditions in the vicinity of San Francisco knows that, at certain seasons of the year, the wind invariably blows half a gale for weeks at a time. There is no doubt that heats very close to 2:05 would have been recorded in several of the trotting events had there been an absence of wind, for a trotter, racing against a thirty or forty mile an hour gale, finds almost as great a resistance as if he were drawing a wagon.

* * *

I quite agree with the sentiment expressed in the sentence, "Every heat a race, and every race a joke," and I think it has never been shown more clearly that the system is absurd than during the meeting at the Panama-Pacific Exposition. In the free-for-all pace, Leata J. 2:03, whose campaign down the Grand Circuit proved her to be one of the gamest mares ever seen, was awarded first money because she appeared best in the summary, yet in each heat she did worse than in the one before, her standing being 1-2-3. In the 2:10 class, for trotters, with its $20,000 purse, the victory of Spriggan should have satisfied the racing public, even that part of it which knows little about the intricacies of heat races, for the son of Baron McKinney 2:10¼ won all three heats. Many of the races, however, under the "Point System" must have been, to the lay public, unsatisfactory, as, for instance, the race between White Sox 2:05¼ and Hal Boy 2:06¼. After winning the first two heats, the mare was beaten, and could not finish in front in any of the three succeeding miles, yet was awarded first money over Hal Boy who, at the end of the race, was winning, while the actual winner under the system was being beaten. The editorial in the last edition of the Breeder covers the subject very thoroughly, and to my mind is an unanswerable argument against the system, which does not award first place to the winner of the final heat, all of which is confusing and very unsatisfactory to the racing public.

TOM GAHAGAN, WESTERN HORSEMAN.

The exposition track is undeniably slow, especially for trotters, owing to its peculiar shape, which includes a very sharp turn which would just fit a half-mile course. A second handicap was the ocean gales which the horses were compelled to face up the back stretch—an effectual bar to all record breaking. In the majority of cases when a horse set the pace up the back stretch, breaking the wind for the others, he failed in the stretch, Spriggan, in the $20,000 stake, being the only notable exception to this rule.

* * *

The 2:06 pace was a really grand race, the best of the meeting. No fewer than seventeen pacers started, more horses than started in any Grand Circuit event last year, and it went the limit of five heats without any horse being able to show in front at the wire three times. The Los Angeles mare, White Sox, won, her victory in the first two rounds and being well up in the other three, giving her the decision when the five-heat limit put an end to the contest.

Fortune favored her in the drawing for position before the start, for of the seventeen, she was the one to secure the coveted pole position. Hal Boy and The Beaver, the two figured as the most dangerous in the field, drew twelfth and fifteenth positions respectively, which practically spoiled their chances as far as the first heat was concerned. The fast, but erratic O. U. C., and that other "front runner," Homer Mac, set the pace in the early part of the heat which afforded White Sox an effectual windbreak and still left her in a position to go the short route. In the second heat Hal Boy broke the wind for her in the early stages and then with O. U. C. and Hal Boy both winning heats, it was only a question of the mare being well up at the finish to get the decision at the end of five rounds.

White Sox is owned by Clarence Berry, brother of Henry Berry, owner of the local Coast League baseball team, and she was named for the Chicago American League team, which has trained on the coast for several seasons. She was originally a trotter and took a record of 2:13¼ at the diagonal mode of locomotion. Will Durfee, who has given her all of her education, raced her as a pacer last season when she was a consistent winner. At Sacramento she compelled Clara Mac to pace in 2:04½ to win, a performance which was doubly pleasing to Durfee for the record eliminated Clara Mac from the big stake at the exposition, which was for 2:06 pacers.

White Sox is a free-legged pacer, Durfee refusing to drive any of the hobbled variety of sidewheelers. Like practically all of the members of that trainer's stable, she goes very high headed. No pacer at the exposition meeting could go away from the wire faster. In a workout previous to her race she stepped the first quarter in 29 seconds. She makes a break occasionally, but usually recovers quickly. Her only mistake in the big stake came at the start of the final heat, but she recovered and landed second, which was necessary in order to cinch first money. She put in two heats in 2:05¼, and over a fast track with favorable weather conditions she should pace a mile in 2:03 or better.

* * *

While he was beaten, the little gelding, Hal Boy, was really the hero of the big stake. Drawing twelfth position before the start, he worked his way through the field and landed fourth. In the second heat he set the pace to the stretch and was beaten by White Sox in a hard drive. A break spoiled his chance in the third, but in the fourth and fifth heats he was by far the best and won handily. Had it been a "finish fight" be almost surely would have won, but as it stood, while the conditions of the race placed him second in the summary, his winnings were less than those of O. U. C., who finished third. This shows what a joke freakish conditions can make of a race at times. Had White Sox finished third instead of second in the final heat Hal Boy would have been credited with winning the race, yet would have received approximately $3,000 less than the portion assigned to the mare from the Durfee stable.

White Sox does not go to the Grand Circuit, but Hal Boy is entered straight through from Cleveland to Lexington, and, judging from his showing here, he is liable to be one of the stars of the season. He wears practically nothing but the harness, has perfect manners, will race in front or behind, can be placed anywhere, and his race here in the big stake demonstrated that he is both fast and game.

* * *

The Beaver did not race as well as expected. He drew fifteenth position for the first heat and finished third, pacing faster than the winner. In the second heat he made a bad break on the back stretch; then paced a terrifically fast last half and again finished third. This apparently put a slight crimp in him, as Hal Boy came from behind and outfinished him in the fourth, and another break spoiled his chances in the final.

H. T. WHITE, HORSE BREEDER.

Among the new sires of 1915 are three—Anvil 2:02¾, Maurico 2:07¼ and the pacer, C. the Limit 2:03¼—whose performances on the turf are so fresh in the public mind that mention of their achievements or their breeding would be superfluous, but down at the bottom of the list is a stallion—Kentucky Chimes—about whom some interesting facts are on tap.

Briefly stated, the bloodlines of Kentucky Chimes are: By Chimes, best son of Electioneer, dam, Queenie King, by Mambrino King. In other words, the horse that sired, in Grand Chimes, a trotter capable of taking a race record of 2:17½ on a half-mile track in June is a full brother of The Queen 2:10¼, a mare that not only had speed of the extreme order, but also ranks high as a matron. Bred at Village Farm when Mr. Geers was trainer for that noted establishment, The Queen, from the day she was broken to harness, showed extraordinary speed, and Mr. Geers once told me he believed her to be the fastest natural colt trotter of the Chimes family, which means a great deal.

But lameness attacked the mare the year she was at her best (1899), although, in spite of a handicap that would have kept a horse of less nerve force in the barn, she managed to race, and took a record of 2:10¼ in the first heat of a winning race at Columbus, the time of the other two miles being 2:12½, 2:12¼. Early in the season, at that time quite

lame, the black mare won the third heat of the M. and M. at Detroit in 2:10½, in one of the historic contests for that $10,000 purse, finishing the race third to Royal Baron 2:10½, and Kingmond 2:09, with the seven heats ranging from 2:15¼ to 2:10½. She took part in half a dozen other Grand Circuit races that season, and, at its close, was retired.

Of the four trotters, one pacer and one sire now credited to The Queen, the first trotter foaled was Laurel Bell 2:29¼, by The Beau Ideal 2:15½, her natal year being 1903. Queen Worthy 2:07½, winner of the M. and M., and the fastest of the family, was foaled in 1906. She is by Axworthy 2:15½, and, a year later, her full brother, Hamlin Axworthy, arrived. He was a big colt, but, as a yearling and a two-year-old (when I saw much of him), he was in many respects as promising a colt trotter for the work given him as I have ever seen. He got no record, but is already a represented sire, albeit given no great opportunity in the stud. The other trotters from The Queen are Queenie Prince (1908) 2:30, by Prince McKinney, and Hamlin Cord (1909) 2:26¾, by Silk Cord. The pacer, Queen's Ideal 2:13¼, was foaled in 1903 and is by The Beau Ideal.

C. the Limit p. 2:03¼, another of the new sires, comes in the male line from a strain that, by many, is considered about the most valuable, in a productive way, to be found in the Wilkes family, the head of the house being Alcyone 2:27.

C. the Limit is a notable example of the certainty with which the blood of Alcyone always has produced high-class performers, and also he is inbred to that strain, his sire, Searchlight A. 2:03¼, being a grandson of Alcyone, while his dam, Bertha (dam of two trotters, eleven pacers, five sires, and one dam), is a daughter of Alcantara 2:23, brother of Alcyone. Another interesting fact in the pedigree of the new sire is that his grandam was a daughter of Bayard, son of the pacer, Pilot Jr. Alcantara was not a sire of 2:10 trotters, having none of that brand to his credit, but he gave the turf six 2:10 or better pacers, the fastest being Sir Alcantara 2:05¼. His brother Alcyone, on the other hand, although he died in 1887 at the age of nine, while Alcantara lived to be thirty-one, got three trotters with records under 2:10 and one pacer in 2:10 flat. With this showing in mind, it is no surprise to find that a 2:03¼ pacer, sired by a grandson of Alcyone and from a daughter of Alcantara, gets pacing speed worth while, and, from what O. U. C. 2:07¼ (son of C. the Limit) has shown in his work, it is evident that he is a 2:05 horse, but not yet accustomed to the racing game.

Neither is it a surprise to find in Bertha (sired by Alcantara, dam by Bayard, son of Pilot Jr.) the most noted dam of pacers. Aside from Bertha, the daughters of Alcantara have done exceptionally well as producers, they figuring to date as the dams of six trotters with records running from 2:06 to 2:09¾, and of fourteen pacers whose marks range from 2:03¼ to 2:09¼, four of them being under 2:05 and nine better than 2:07. An Alcantara mare (Estabella) gave us the sire of the champion pacer of his day, Minor Heir 1:58½, and the whole history of the strain is replete with instances of the wonderful certainty with which it breeds on, and also as furnishing an example of the value of double gaitedness in both sires and dams. Miss Russell, universally conceded to be the greatest broodmare, is a daughter of Pilot Jr. In that instance, the Pilot Jr. blood was largely responsible for the production of a champion trotter, Maud S. 2:08¾, a champion sire, Nutwood 2:18¾, and the Miss Russell strain is breeding on today in the way of brood mares, as witness Kremlin 2:07¾, got by a son of Miss Russell. He is the greatest living brood mare sire, just as Nutwood, a son of Miss Russell, attained and held a like position in his lifetime.

* * *

I doubt if any two horses of the eastern contingent named in the Panama-Pacific meeting purses were more widely touted as probable winners than the Chicago pair, Dr. Burns Jr. p. 2:04¼, and the trotter Bessie Custer 2:29¼, and certainly none ever had worse luck when race day came, as the pacer was drawn after going two heats in his first race, having broken down completely in the second heat of the free-for-all on June 12, and did not start for the $20,000 purse on the closing day of the meeting.

I never knew an entrant for the big purse of any year to be so universally regarded as a "moral" for the event as was Dr. Burns, Jr., for the California pium. And on his 1914 races—where he was second all the time to William 2:00 and Flower Direct—he looked to be the best. A "game" leg finally put the Doctor out of the game after he had been shipped across the continent and wintered in California so that he might be good and ready for the $20,000 snap that was supposed to be his, and which, so far as the time of the race is concerned, would have been a walkover for him had he retained his form of last season.

Bessie Custer is another example of a colthood weakness coming to the front at the most inopportune time. As a two-year-old, the chestnut filly had a wonderful burst of speed for a brush, but a tendency to pace (which appeared to come from tender feet) developed, and not much was done with her. Later in life she raced pretty well, was sold, and, after reaching California, trotted miles around 2:12 in good form. But I note from the report of her start in the 2:18 trot, June 11, the Breeder and Sportsman's account of the initial heat reports Bessie Custer as "resting her feet by finishing on the pace."

Of late years, we have had no family of trotters in which tender feet were a characteristic, but in the early days of breeding, when Hambletonian 10 was to the front as a sire and many of his best trotters were from mares by Seely's American Star, it was a recognized fact that "the Star mares" were troubled with tender feet. Furthermore, they transmitted the same sort of underpinning to their immediate descendants, Jay Gould 2:21½, at one time champion trotting stallion, being a conspicuous instance, and the ailment appeared in some of his progeny.

VOLUNTEER, HORSE REVIEW.

Last Saturday the first of the great harness race meetings given in connection with the Panama-Pacific Exposition came to a close. In some respects the results were rather unsatisfactory, but in others they were very significant. The fields were regrettably small in all too many of the events, and the horsemen who, through some indifference, and lack of initiative and enterprise, failed to rally to the support of these munificent stakes and purses, have let pass a splendid opportunity that will never return; for no other like it will, in all probability, solicit their support. There should have been three times as many horses, competing as was the case—and, in particular, there should have been three times as many high-class horses from the east present and "battling for the coin." The argument that the battleground was too far away and the cost of getting there too great is beside the mark. The transportation facilities between this part of the country and California are excellent. There was ample time in which to return from the meeting for the Grand and Great Western Circuit openings. And the expense item will be more than counterbalanced by far less well-advised expenditures that will be made profusely in other ways.

In this respect the meeting was truly a "modern instance" of the besetting sins of lack of enterprise, lack of appreciation and in-the-old-rut-ness that today prevail upon the harness turf. We have no desire, however, to continue farther along this line of observation, which we will dismiss with the statement that, for the present, "Sufficient unto the day is the evil thereof." Let us pass to another "modern instance" of the meeting far pleasanter to contemplate and to discuss.

We refer to the instance of Spriggan 2:08¼. Here is the real equine hero of the meeting, and one whose "case" we commend to horsemen for their study and remembrance. Our editorial leader last week was devoted to him, due to the fact of his winning the great $20,000 trotting stake at San Francisco, June 12. Since then he has "repeated" in a $2,000 event. As, previously, in his first start at the meeting, he was third in another $2,000 event, it will be seen that his winnings aggregate the splendid sum of $11,250. Ponder these figures—and ponder the associated ones that Spriggan was sold to his present owners only a few months ago for just $700; and that his cost to the seller had been just $400!

Such are the possibilities of light harness racing in America today! And yet we are obliged to listen to long sermons upon the lack of opportunity which it presents, etc., etc. We do not wish to rob the pessimist of his stock in trade—but we are decidedly dubious regarding his ability to utilize such a trotter as Spriggan for his pet purposes. He is so strongly reminiscent of the square peg in the round hole that we fear he will be useful only to optimism. And, as we are thoroughly optimistic regarding trotters and trotting possibilities, to optimism we commend him unreservedly.

To the present owner of Spriggan, V. K. Dunne of San Francisco, we tender our congratulations—as well as to his so-successful trainer and driver, Will DeRyder, who has many friends and acquaintances "back east." It pleases us that the big plum of the Exposition meeting has fallen to a "new owner" and to a reinsman who has not previously been conspicuous as a stake winner—for it is precisely such owners and drivers in this category to whom such successes are doubly welcome and valuable; serving, as they must, to confirm and intensify their allegiance to the sport. We do regret, however, that Mr. R. J. MacKenzie, that munificent patron of the trotters, who formerly owned Spriggan, lost faith in him at the "psychological moment" when a slight continuance thereof would have been so richly rewarded.

Lastly, we tender our congratulations to Mr. W. B. Dickerman, of New York, at whose Hillanddale Farm Spriggan was bred. There is no breeder of like prominence today associated with the light harness turf who has so long been devotedly loyal to it as has Mr. Dickerman, or more thoroughly deserves to add so brilliant a credit to the score of his breeding successes. Incidentally, Spriggan is a double-and-twisted, a distilled and concentrated example of the breeding theory which the Review has so long and so consistently advocated—i. e., the "development theory." His sire is Baron McKinney 2:10¼, and his dam is Helen Simmons 2:11¼. The dam of his sire is Ettie Baron 2:21¼, while the grandam of his dam is Almater 2:24¼. As stated last week, it was most fitting that the $20,000 prize should be won by a grandson of McKinney 2:11¼, the latter-day trotting progenitor whose rise to fame occurred in California itself. The second dam of Spriggan, Lady Helen, is also a daughter of Sultan 2:24, another sire that sprang into sensationalism in the "Golden State." Sultan, too, was California-bred, while McKinney was not. Baron McKinney 2:10¼, sire of Spriggan, was, we think, one of the first crop of foals got by McKinney after he was brought east from the Pacific Coast. He was an unlucky horse, but one that we always liked—and it is unfortunate that he is among the army of fast record stallions that have found new homes in Europe and henceforth are beyond the reach of American breeders.

BEATRICE, NEB.

June 22—Three-year-old, purse $200:

Allie Watts, c m by General Watts.....(Edman)	1	1

Colt race, one-half mile heats:

Lady Tango, b f by Belmar.....(E. Burgoyne)	1	1
K. M. C., br g by B. C. King.....(J. Welsh)	2	2
Belmar McKinney, b g by Belmar (R. Fitzsimmons)	3	3

Time—1:12½, 1:13.

In a letter from Mrs. Chas. DeRyder, written from Salt Lake City, on Monday of last week, she says that she and her husband had arrived there that day from Ely, Nevada, having made the run between the two cities in one day, when all road maps and all garage men who had been asked about the trip between the two cities gave it as a two days' trip. Up to Salt Lake City, the couple had met with not even a puncture and everything was going along nicely. They are proceeding along the line of the old pony express line of the Wells, Fargo Company, and have been from 100 to 150 miles from a railroad all along except when they arrived and got near to Ely, Nevada. Mrs. DeRyder says that the route is the same as followed by the '49ers and is interesting all the way.—Pleasanton Times.

BUTCHERS' DAY RACES AT PLEASANTON.

Threatening skies early in the day and a counter-attraction at Niles combined to cut the attendance at Pleasanton Monday when the Alameda county butchers concluded their two-day celebration with a nice card of harness races which furnished good entertainment for the loyal lovers of the sport. Before the first event was called the day was bright and pleasant, the promised showers of the early morning failing to materialize. The trains from bay points were fairly well patronized, and many of those present made the trip by auto over the excellent roads and boulevards that connect the Livermore valley with both coast and interior cities.

The special race for members of the Oakland Stadium Club drew a field of five pacers that showed the trans-bay organization to have some nifty fun horses in its ranks, as well as some pretty handy amateur drivers. This is the first real race indulged in by the club,—and indeed its members were much in evidence throughout the day, the judges and timers stand being "manned" by them to a considerable degree—but they are looking forward eagerly to the future day when the new track near the Auditorium will enable them to stage frequent matinees of their own.

With Jerry Doran up behind Hallie's Star, many of the Oakland and Alameda contingent seemed inclined to consider him the pick of the field, but another son of Star Pointer 1:59¼ had to be reckoned with—Allegro. With the owner, G. C. Schreiber, doing the teaming the bay fellow was never in serious difficulties and never was the ultimate outcome in doubt after the first heat, Sleepy Dick and Grand W. furnishing most of the competition the first two times out, Jerry's mount leaving his feet in the stretch on both occasions. The little brown horse steadied in the third, however, and stood a nice drive and was beaten by only a small margin, though the Schreiber gelding apparently had something more left had its use been necessary. The field was nicely balanced and there was not a bad actor or a hobbled pacer in the bunch. The winner, Allegro, was bred by his owner and received much of his preparation for the race at the hands of Mrs. Schreiber, his manners and condition bearing eloquent testimony to her accomplishments as a horsewoman.

The 2:20 trotters were all money winners at the exposition meeting, and trotted right up to previously displayed form, or better, in three well-contested heats in which Bon Cres had the best of every final argument, Chadbourne being content to lay back until well into the last turn and out-trot his competitors through the stretch, Bonnie Ansel furnishing him consistent company.

Chadbourne made the afternoon a double header by taking the 2:20 pace with A. B. C., leading all the way for the first two heats and being beaten in the last one by Father-in-law Sutherland by only a very few inches, all three of the entrants finishing the final spin heads apart. The record is a new one for Zoetrix, who is headed for the ten list before the season closes, and William G., the big pacer from Colusa, for whom it was his initial event, went a faultless race for Loren Daniels.

Three heat winners developed in the special trot, with the bay gelding Redeem, driven by C. C. Crippen, having the best of the standing by finishing second in the other heats. This fellow has had trouble with one prop in the past, but showed mighty well for Crippen in this race. Columbia T. knocked a second and a half from her exposition record and save for a break on the first turn in the second heat probably would have gotten away with the race, as she finished a good second after her mishap. Nuristo was never in much danger in the final heat after taking the lead from Howard's Comet early in the mile, owing to a break on the part of that youngster.

During the afternoon Charley Spencer drove Con Harkins' "brood mare," Belle Bow, to a trotting record of 2:28¼, and M. Henry, trainer for R. S. Irvine's Lanark Park stable, put four in the list, the trotters Ala Moscovita 2:20¾ and Sonatine 2:29¼, and the pacers Lanark P. (3) 2:25 and Beretta Dee 2:13. The latter lass, by Charley D. 2:06¼ and out of Beretta 2:22½ (sister to C. the Limit 2:03¼) looks like the making of a high class campaigner.

Frank E. Wright of Sacramento "sent 'em away" in good shape and without delays, and the entire afternoon was enjoyable. Here are the details:

Pleasanton, July 5, 1915.

Special pace, Oakland Stadium Club, purse $250:

Allegro, b g by Star Pointer.....(Schreiber)	1	1	1
Grand W., ch g by Daken D.....(Lind)	3	2	3
Sleepy Dick, b g by Grover Clay....(Rutherford)	2	3	4
Hallie's Star, br h by Star Pointer.....(Doran)	4	4	2
Lena Lee, b m by Teddy Ray.....(Cross)	5	5	dr

Time—2:19½, 2:21, 2:18¾.

2:20 trot, purse $500:

Bon Cres, bl h by Bon Voyage....(Chadbourne)	1	1	1
Bonnie Ansel, b m by Prince Ansel....(Spencer)	2	2	2
Eloise Dell, br m by Alconda Jay.....(Daniels)	3	4	3
Brutus, b g by Strathway.....(Christenson)	4	3	4

Time—2:11¼, 2:13½, 2:12¼.

2:20 pace, purse $500:

A. B. C., b g by Young Monterey...(Chadbourne)	1	1	2
Zoetrix, ch m by Zolock.....(Sutherland)	2	2	1
William G., ch g by Clarence Wilkes....(Daniels)	3	3	3

Time—2:11¼, 2:12¼, 2:13¾.

Special trot, purse $120:

Redeem, b g by Directum H.....(Crippen)	2	1	2
Columbia T., b m by Bon Guy.....(Daniels)	1	2	3
Nuristo, br g by Nushagak.....(Spencer)	4	4	1
Howard's Comet, b g by Teddy Ray...(Sanders)	3	3	4

Time—2:16, 2:16¼, 2:18.

To beat 2:30¼ trotting:

Ala Moscovita, b m Alconda Jay—La Moscovita by Guy Wilkes .....(Henry) 2:20¾

Belle Bow, b m by The Bow—Dame by Monterey .....(Spencer) 2:28¼

Sonatine, ch m by Stanford McKinney—Sextette by Athablo .....(Henry) 2:29¼

To beat 2:25¼ pacing:

Beretta Dee, b m by Charles D. McKinney—Beretta by Searchlight .....(Henry) 2:13

Lanark P., b c by Zorankin—Bloom by Nushagak .....(Henry) 2:25

LOGAN POINTER SOLD FOR EXPORT.

Very shortly before leaving this city for Vancouver, B. C., from which port he sailed for his home on Wednesday of this week, Freeman Holmes, the New Zealand horseman, purchased from J. E. Montgomery of Davis the six-year-old stallion Logan Pointer, the buy being made subject to the lad passing the test for glanders, which is required prior to export.

There have been a goodly number of American stallions taken to the antipodes during the years in which trotting has flourished there, and while in every instance they have been excellently bred it is doubtful if any of them have had the extreme speed inheritance, close up, possessed by Logan Pointer. His sire, Star Pointer 1:59¼, first of all the line of two-minute performers, is a son of an extremely potent sire and a prolific dam, and in addition to being a race horse of sterling merit became the sire of over two-score standard performers, eleven of them earning records of from 2:04 to 2:09¾.

On the maternal side, the youngster springs from the matron that is by long odds the speed-producing champion of living mares of the Pacific coast—Effie Logan. Four great pacers own her as their dam, three of whom have proven the excellent qualities of their inheritance by transmitting speed to their get in generous quantities. First of the quartette to appear was Sir Albert S. 2:03¾, gelded at an early age. Then came the three-year-old champion, Jim Logan (3) 2:05½, who reduced that mark through annual and successful campaigns to 2:01¾, by virtue of which last performance he became the coast's champion racing pacer. Raced season after season he has had small opportunity for doing stud duty, but the first one of his get to be trained (Maxine) won the Breeders' Futurity as a three-year-old, raced to a record that year of 2:15 and showed in her work that she could beat 2:10. Dan Logan 2:07¼ came next, and he, too, has proved his worth as a sire, two champions being by him, Capitola (2) 2:17¾, (3) 2:14¼, and John Malcolm (2) 2:11¼, both stakewinners of renown. This spring, at the record meeting at Woodland, Lock Logan acquired a record of 2:07¼, and his only foal, the two-year-old Carolyn M., paced to a mark of 2:21. Not many brood mares can lay claim to four sons, three of them speed sires, whose average record is 2:05, an average that the future performance of Lock Logan will undoubtedly reduce to a still faster figure, as his racing career has not yet begun.

Logan Pointer is a good colored, good sized horse, well made and naturally fast, Mr. Montgomery having refused an offer well up in the thousands for him prior to the hard luck that retired him to the stud. New Zealand horsemen will like him when they see him, they can have only the deepest respect for his breeding, and that he will be both popular and successful in his new home is the opinion of those who know his family here.

WILLIAM LIKELY TO BE A SENSATION AGAIN THIS YEAR.

William 2:00, the pacing stallion that became the champion of his gait and age (four years) last season, is the star of more than 250 horses now at the North Randall track being tuned up for the opening of the Grand Circuit on July 19. If any doubt existed about this Indiana pacer not being the great horse that he was last year it was dispelled by his first fast work of this season, which took place last week —indeed, it is believed that he is an improved horse. William, when set down for a good mile, paced in 2:04¼, finished the last half in 1:00 and the last quarter in 28 seconds. Billy Marvin, his trainer, does not favor fast miles and last year before William started on his meteoric campaign the fastest workout was in 2:07¼, final quarter in 29½ seconds.

All horsemen are greatly impressed with the appearance of the stallion. William reached his full growth last year as a four-year-old, but he was somewhat waspy. Since his last race in October he has filled out and is 95 pounds heavier than just one year ago. Last year William had all the speed necessary for a pacer to have. It will be remembered that within one month from the beginning of his racing engagements he paced the first mile in two minutes in a race, and that he won three heats that averaged 2:01, a performance that is still the best on record. In September he really paced in 1:58, for he was at the throat-latch of Directum I in that fastest of racing heats.

The outstanding characteristic of William as a colt was that he could carry his clip, but last week's quarter in 28 seconds shows that he has the anticipated strength from maturity and increased weight. His disposition and manners are perfect as ever, so that it is simply conjecture how fast he will pace this year. There are many conservative horsemen who believe he will beat all records.

Marvin is getting William ready for the Grand Circuit and will start him in the free-for-alls, if such a class can be filled.—Horse World.

KAMMS (ROCKPORT), OHIO.

June 22—2:28 class trotting, purse $400:

Ima Jay, br m by Jay McGregor.....(Ernest)	1	1	1				
Clifton, b g by The Earlmont.....(Harrison)	2	2	2

Pickles, 5-5-4; Long Shot, 6-6-dr.; Nance, 7-dr.

Time—1:01¾, 1:01¼, 1:00¾.

In regard to the query of a San Mateo reader, Banker's Daughter 2:13¾ is by Arthur Wilkes 2:28½ but her dam was never established satisfactorily to the publishers of the year book, though it is presumed in some quarters that she was out of Sunflower 2:28 by Elmo 891. Arthur Wilkes is the sire of twelve standard performers, the fastest of which is the three-heat champion trotting mare, Maymack 2:04½.

◈ ◈ ◈

Reno's initial race meeting with pair-mutuel betting begins a week from today, with good prospects of success. Almost all the stables racing at Denver, as well as many from other points, shipped to Reno, from where most of them will come on to this city. A. T. Dobson will officiate as presiding judge, S. J. Rothert as clerk of the course, F. McClain as paddock judge, and C. D. Stevens will handle the barrier.

HOW TO BECOME A FLAGMAN.

Manager The Horseman's Correspondence School: Have just been appointed by the president of our association as flagman for our coming race meeting but have never been mixed up with racing before and ask you for information as to the duties of a flagman. Am lame, being compelled to use both a crutch and a cane, and would like to know if this will interfere with my work. Yours—Quick Step.

We are glad that you appreciate the qualities of this department so highly, that you write us for information, and we will endeavor to point out to you the proper way you should handle the important position assigned you; and the fact that you have no knowledge of the work makes it much easier for us, as you will not be compelled to give up any of your old habits to make it a success, since you know "it is hard to teach an old dog new tricks." The fact that you are crippled will make you more serviceable as we will proceed to show.

The president of your association must consider your friendship highly or else he would not have appointed you to such a high salaried position and you will find many ups and downs in your crippled condition, before you earn that dollar per, which you will collect at the end of the meeting. Of course in a job of this kind the salary is only given you as deposit to bind the bargain, the real money you must frame up to make yourself, and your crippled condition gives you an excuse to get this money; as, for instance, in this hobbled condition of yours, you are not expected to hurry very fast after a heat is over, to reach the judge's stand to report the horses distanced, you are expected to loiter, thus giving the shut-out drivers a chance to meet you down the stretch, away from the eyes of the judges and crowd, who will be busy watching the other drivers dismount. When these shut-out drivers meet you, it will be very cordial and they will insist on shaking hands with you. Of course, you must return this greeting cordially, but remember to withdraw your hand slowly from their and as soon as the hands are clear, shut yours quickly, as something that feels like a banknote may prevent you from shutting it very tight.

As soon as this happens, quickly note the number on the driver's arm, so that you will remember that he was at least a half length in front of your flag when it fell. You must cultivate a good memory, as several of these drivers may like you equally as well and of course all of their horses were inside the distance and the only ones that will be out are the drivers who forgot you were down there, and such cheap guys as those should be taught a lesson, as they cannot expect good treatment from a good fellow, unless they are affected with itching palms.

After you find that through some act of rare legerdemain, several greenbacks have passed into your hand, do not place them in your pocket at once, as this looks very suspicious and some wise knight of the flag, who has been there himself, may create scandal. Just hold the coin in your hand and at some convenient time slip it into your pocket, but do this before you reach the stand. Always keep your nerve about you and never get excited and remember one thing, that the best liar always makes the best flagman, because if you are accused of being too friendly to certain drivers you must protect them as well as yourself, by scientific lying, or you may lose your lucrative position. Just imagine, if everything goes well, how many heats there are in the course of a week, and you should collect something from each heat.

While still on this subject of voluntary contributions, we would also call your attention to another form of graft that works well, if you are a good judge of human nature. This requires much tact in handling and if not properly worked may result in damage to your personal beauty and your whole snap given away to the officials. This delicate little piece of byplay takes the form of flagging drivers unless they come across. In doing this you select one or more of the drivers who are just beating the flag, tell them you will report them out unless they do grease your palm and often you can get by with this, especially if they are green in the business and you impress them with being more important than you really are, although they know they have no chance of getting among the money winners, yet the fact that they are distanced may mean a lot to them in their owner's eyes, and rather than endanger their position they will scratch the center of your hand. Always get your money in advance, never trust, as you have no means of recovering. We have shown you how a flagman's job may be made to pay good money.

Now for more instructions. After you drop your flag, hobble slowly to the stand, stopping every now and then to talk or answer questions. In your route from the flag station to the judge's stand, keep close to the fence, where the crowd is leaning, greet everybody who greets you, particularly that close friend from miles back in the country. You can spare him several minutes and pay no attention to the call of the judges to hurry, as in your crippled state you will not be able to, and remember that everybody on the track is waiting for the judge's announcement and he cannot give it until he hears from you. You are always safe in thus loitering, as there is only one judge in a million who watches your flag drop and therefore your information is indisputable. You may also stop and tell everybody you meet about the distanced horses, before you tell the judges, as they are paid to wait and you also prolong the agony of those waiting to hear whether the favorite was distanced; of course he was not, if you have the coin in your pocket.

After you have reported, loiter among the judges, helping yourself to refreshments of all kinds and butt into their conversation, even to the extent of advising them about the work of the various horses in the race, notwithstanding the fact that you could only see about one-eighth of the track from where you were standing. Be particular about helping yourself to the refreshments, as it is a hot and hungry job you have and these eats and drinks may save you the price of a supper. If you are serious about it, eat your fill, then take several handwiches along with you as eating will help while away the time.

After you have left the stand, stop and again have talks with the hangers-on around the track; give them your opinion of the judge's decision, particularly tell the money losers how they were robbed. Even if the horses have already been given the word in the next heat, do not hurry any faster than to just allow the leading horses to pass your flagstand and some experienced (?) flagmen, if close pressed, drop their flag before reaching their stand and take a chance on being found out. This allows them to meet the handshaking driver nearer than usual, making the time of acquiring new wealth shorter and also saving the oncoming angel a shorter distance to walk.

Never ask the judges where you are to locate, as you have the choice between long and short distance stands, regardless of how many horses are in the race; just so you are somewhere. If you report to the stand that a horse is out and an unfriendly driver questions your word, measure off the distance he was out by your hand, as inches always count. Of course you are not responsible for ignorance, as in your own mind you know that horse, man or sulky should all be inside the flag, but if the judges declare a horse inside, just because his nose was three inches on their side of the flag, you must sympathize with their lack of knowledge of the rules and humor them by agreeing with their decision; it saves unpleasant comment.

Also be just as particular in being late in getting to your stand for the first heat as in the later ones, as it is an inspiring sight to see a lot of judges cackling around like a hen that has lost her chickens, over the fact that the flagman is not at the distance pole, while the horses are scoring or have already been sent away. This worry is appreciated by the judges, and they are apt to shake your hand in a different way, the first time they see you. Never offer any excuse for such lateness, just keep away from the stand.

Some flagmen become very successful by not going near the stand at all, as they imagine that the judges in the stand are mind readers and can tell what is happening in the flagman's mind, by looking at him one hundred yards away. This kind of a man saves himself many footsteps. Then again you could bury yourself in the crowd and never raise your flag, depending on a squit along the broomhandle for the distanced horses; the judges do not see this and think you are not working; these men in the stand are always such a mean lot, begrudging you the "salary" you are making.

As a private tip, we would not advise a flagman to stroll around the stables after the first day's racing, because the caretakers are liable to take up the grievances of the owners and drivers, and it would be very unpleasant to carry a pair of artificially colored lamps during the balance of the meeting. Confine yourself to the race track or secretary's office during leisure hours, as you have a better chance of sizing up the drivers and may make a few extra pennies by running errands. Some flagmen are bodyguards for officials of the association, as they have a better chance for free booze by hanging around.

Regarding the regalia you should wear while acting as flagman and also the paraphernalia you should use, we offer the following suggestions: Take a broom from somebody, saw or chop off the corn part of it, thus leaving a smooth handle. Then hunt around for an old red flannel shirt, tear out the back from collar to end of tail, tack this on your broom handle and you have an ideal and fashionable distance flag. Some flagmen, however, only use a nickel American flag, but the shirt flag is more stylish. As regards your own dress you should closely follow the style set down by all race tracks and while not expensive it is very effective.

This consists of a loose fitting pair of trousers, any color, but preferably black; attach to these a pair of suspenders that should also fit loosely, allowing you the free use of your arms and back in dropping the flag. The shirt should be of an ecru color, although it may be white on the first day and gradually assume the ecru color during the meeting, but remember, never change it until after the racing is over. Some "Beau Brummels" among the flagmen prefer well washed and faded yellow overalls and jumpers, but this is only a matter of personal taste. Any kind of shoes will do, as they are always covered with dust and do not show. The hat can be of a broad-brimmed western style, always black, and worn Fedora style; well worn derby hats are permissible, and oftentimes a cap is worn. Never wear a coat when handling the flag, it is bad form, and you should really wear no vest, so that the suspender effect can have full sway. With this equipment you will find that a flagman's life is not as hard as it is painted.—W. H. Shields, in the Horseman.

IS THE PROMISED LAND IN SIGHT?

From Lexington, Kentucky, through an article written by Henry M. Jones, for The Horseman, comes the news that Major P. P. Johnson has resigned or will soon resign the Presidency of the National Trotting Association. Glory be! And now if the secretary of that fearfully-managed and peanut-politics ridden organization would surrender his grip on the proxies and permit breeders, horse and track owners and horsemen to elect a governing board, we would start a new era of prosperity for the trotter.

As a presiding officer Major Johnson was satisfactory though a bit tempery and sometimes unfair because of that. He has been, however, as President of the National Trotting Association, a mill stone about the neck of our trotting interests, very largely because he gave no attention to the affairs of the Association except periodically during its Board meetings, leaving matters almost entirely in the hands of Secretary Gocher. With such latitude, the Secretary grew to be the governing officer. He selected the members of the Board and elected them with his proxies. Likewise he and his stand-bys dropped from the Board any member they desired who did not work well in their team. In fact, from the making of rules to the enforcing of them, from the collecting of money to the spending of it, the Secretary has been the National Trotting Association. Major Johnson seemed to think it proper and all right to permit the secretary to lead him and I can only account for such apparent apathy on the part of a man of his ability as simply being satisfied to receive his salary and let others shoulder the work and responsibility. His attitude in this has put him in a false light many times and his having no active interest in any track or trotting meeting and racing no horses of his own, not even entering them in the futurities, has put him entirely out of touch with the whole machine and he has been compelled to lean upon his trusted Secretary.

The three strongest members of the Board have attempted to resign and I believe have not served actually for some years. Their names have been kept on the list, however. They are not in sympathy with Mr. Gocher but so long as they keep their hands off they do not bother him and to retain them pleases Major Johnson. Of the twenty-three men composing the officers and District Boards of the National Trotting Association, only five can be said to be connected with the operation of tracks. One is the secretary of a track that has not given a meeting in several years, one was a commissioner of one of our large state fairs and while removed from office by change in party some time ago will likely be put back on the fair board now that his party is again in power; two are presidents of Grand Circuit tracks and one is president of an association of county fairs in Ohio. Of the remaining eighteen officers and Board members, one is a breeder on a large scale and two others are breeders on a smaller scale. There is not a single one of the entire number that lends any considerable activity or connection with the actual racing of the horses. By this I mean maintaining a campaigning stable. Of the fifteen men composing the district boards, the Eastern, Atlantic, Central, Southern and Western, ten are men selected by Secretary Gocher and put into office by his efforts. The all-powerful proxy has permitted the secretary to proceed in his schemes to the detriment of the Association and the entire industry and this in the face of strong resentment from the more efficient and stronger individual members.

There is no tenable criticism to be made of Secretary Gocher's ability and I doubt if one could be found who could conduct the affairs of this secretary's office in as efficient and as complete a way as is done by him. It is when he attempts to direct the affairs and control the operation of the machine itself that he falls down, and he has brought odium to the industry and to the sport by playing peanut politics in order that he might hamper the operations of the rival association, The American.

With all this inside friction to the machine we have been making little headway—and if improvement does not come soon, something will come along and butt the whole works to the side of the road, while the passengers already belated and harassed will be injured still more. Some one probably will charge that this is a case of "sour grapes" and that I have attempted to jacket the Association because I was some years ago fired from its Board. I am frank to admit that there is no pleasant feeling between Major Johnson, Secretary Gocher and myself, but aside from a surprise at the time, I never harbored any ill-feeling for having been fired. What I have written is mild and does not by any means cover the ground. Some of the inside history of the National Trotting Association would create a surprise if written but to write it would do no good and might do harm.

However, it cannot do harm to call attention in a mild way to the wrong that is being done our breeding and track interests through the friction and fighting of the two parent Associations. It should be stopped and the good and wise men in each Association should interest themselves enough in the matter to see that this friction is removed and that the two Associations be put together.

The future success of horse interests demands it. Every breeder, track owner, horseman or horse owner demands it.—H. K. Devereux, in the Breeders' Journal.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

BREEDING THE BLACK BASS.

In recent years much progress has been made in the breeding of black bass and the stocking of waters in which this fish has hitherto been almost a stranger. At considerable cost in money and expert energy the breeding of the black bass has been put on a practical and satisfactory basis for Federal and State culture. It is now a question of enlarging the field of bass culture so as to include the breeding of this excellent fish by individual landowners, writes C. J. Dittmar in the Country Gentleman.

There is no fish ranking with the black bass that will lend itself so readily to private culture. This is so because it is hardy, prolific and suited to a great variety of waters. It thrives in clear spring-water ponds that maintain a low temperature and also does well in ponds of creek water that have a low winter and a high summer temperature. Though it likes good gravel and sand bottom in the waters it frequents, it does not despise mud.

On nearly all country places of reasonable size there is some water that may be profitably used for the cultivation of the black bass. Unlike many other fish the black bass does not respond to the artificial methods of the modern hatchery. The spawn of the female cannot be taken and fertilized with the milt of the male and then be hatched in trays or jars by the operation of running water. The fish must therefore be bred in artificial ponds resembling somewhat their natural habitat.

Of first importance in the making of a black bass plant is the selection of the water supply. Many good bass breeders dislike spring-water brooks or large springs as a source of supply. On the other hand equally good bass breeders prefer to take their water supply from springs or spring brooks.

One objection that is frequently raised against a water supply from springs is that it lacks the nourishment furnished by creek and lake waters. The objection is valid, but it is, after all, of but little consequence. In artificial bass culture no water will furnish a sufficient amount of food. The bass must be fed artificially. The overhead expense of feeding twice a week is but a trifle less than feeding three times a week, so that the objection to spring water because of its lack of nourishment has not much weight.

Spring-water ponds furnish some food for bass, such as frogs, crayfish, and minute life that breeds in the weeds that grow in the shallow water. Lake and creek waters used for bass ponds furnish the same food to be found in spring-water ponds and, in addition, a quantity of other microscopic creatures that come from the territory drained by such water.

Springs and spring brooks have many advantages for bass ponds over ordinary creek and lake waters. For one thing the supply is regular and the temperature is more even, being some degrees higher than other water in winter and lower in summer. The supply of spring water is more easily controlled than the supply from other sources. Lakes and creeks that drain a large territory get wild in the spring and very often get beyond control. Moreover, at such times the water is roily, and for that reason is more or less objectionable.

As a rule there is a good fall on all spring brooks, and a proper amount of fall is essential to the control of bass ponds. Where ponds are on the same level they cannot be emptied except by artificial force, whereas when there is suitable fall a group of three or four ponds may be emptied separately or collectively by gravity.

When a spring brook or a number of springs have been selected as a source of supply, the ponds should be so arranged that the circulation will always be under control. If there are four ponds and these follow each other directly down stream, the water is likely to be too cold during the hatching season. Moreover, at this time, the less circulation in the breeding pond the better. It is essential, therefore, that the breeding pond be made on the side of the current, getting its water supply from the overflow from the stream. When the pond is filled the overflow can be stopped.

A good arrangement of four ponds on a spring stream is to make a pond of about two or three acres, to be used as a holding pond for mature fish. This pond should be about ten feet deep in the middle with a gradual slope to the banks, where the water may be from one to two feet deep.

From this pond the water should fall anywhere from three to six feet into a pond of less than half an acre in size. This pond should be shallow along the banks, with a depth of from six to eight feet in the middle. The water in this pond will get good aeration because of the fall and will on account of its size be of a higher temperature than the large pond above. While the upper pond will be suited to mature fish, the second pond will be useful for holding fish from the time they are yearlings until they are two years old.

The nursery pond, the third in line, need not be so large or so deep as the second pond. The fall coming into this pond may be anywhere from one foot to four feet. Some fall is necessary to the successful control of the pond and for aerating the water. Into this pond the fry are put as soon as they are taken from the breeding pond and should be kept there until the next season, when they should be taken out to make room for the new fry.

The breeding pond should be about an acre in size and should be built somewhere on the side of the other ponds, from which its water supply should come. The arrangement of this pond must depend upon the topography of the land. It should be enough below the upper pond so that water may be carried into it through a six-inch pipe. This pipe should be covered at the supply and the discharge ends with suitable copper screens. Another pipe should be put into this pond, leading into either the lower nursery pond or into the stream below. With these two pipes properly arranged the pond may be filled or emptied at will.

For a private estate the following pond arrangement should prove satisfactory: For the breeding pond, about twenty-five pairs of bass will be sufficient to produce between 200,000 and 300,000 fry. Not all of this number will be captured in the breeding ponds. After they have been transferred to the nursery pond many will be lost during the first year.

These little fellows are great cannibals, and when they meet their smaller brothers or sisters they do not hesitate to make a meal of them. Even after they have become yearlings they prey upon each other. There will be plenty of yearling fry left, however, to stock the two-year-olds' pond, and more than enough from this pond to supply the large pond where the mature fish are held.

In the latitude of Northern Illinois the black bass begin to spawn about the middle of May and continue until late in June. The small-mouthed bass likes to deposit her eggs on a gravel bed, but the large-mouthed variety appears to prefer a good clay bottom among the grasses and weeds not far from the shore.

When spawning time arrives the bass hunt about in pairs for suitable places to make nests. Where a gravel heap is chosen the fish use their caudal fins to form the nests and polish the pebbles.

When all is ready the female swims over the nest and deposits her eggs; the male following behind, deposits his milt over the spawn.

No fish shows more unselfish devotion to the hatching of its eggs than does the bass. In the watchfulness kept over its nest and the courage displayed in protecting it from intruders the bass is peculiar.

During the hatching period, which requires from one to two weeks, according to the temperature, one parent bass hovers over the nest, fanning the water gently with its fins, while its mate circulates about in the vicinity of the nest, ready to make war on any intruder.

As soon as the fry are hatched they rise in a school. During the period when they rise and fall back on the nest daily, the parent bass circle about, whipping back any truant disposed to break away from the family school.

In a week, all things favorable, the school breaks and the young fish scatter along the shore in the shallow water among the weeds and grasses, where they find microscopic life upon which they live. When the school breaks the parent bass drive the stragglers to the shore. Then the parent fish go away and all parental affection ceases.

Young bass appear to be hungry the greater part of the time, but they are often particular about their food. Once they get the habit of eating artificially prepared food they are likely to gorge themselves if they are given the opportunity. It is, therefore, wise to feed them a little and often. When they first leave the nest they should be fed very small quantities of thoroughly ground crayfish six or eight times a day. Later they may be fed twice a day with this same food and such minute aquatic life as may be captured with a net.

Old bass should be fed, except in winter, about three times a week on crayfish and minnows. In well-arranged bass ponds there is a great deal of natural food to be found in the shallow water among the grasses and other aquatic plants. Anything from a bug or a frog to a snake suits the appetite of a black bass.

In the northern latitudes the black bass seeks the deep water in cold weather, where it remains dormant until spring. Hence it is essential that mature bass find deep water in the ponds for their winter home.

As between the large-mouthed and the small-mouthed bass the latter should be given preference where the ponds are supplied with running spring water. This variety does not grow quite so large as the large-mouthed bass, but it is regarded as the gamer and better table fish. It likes clear water, sandy or gravel bottoms and a good current. Though the large-mouthed bass will do well in such surroundings, it will also thrive in sluggish water and clay-bottom ponds.

THE ANIMALS AT THE PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

One of the most surprising features of the Panama-Pacific International Exposition, to one who stops to investigate, is the importance of the part which is played in the Exposition by animals. Exclusive of the formal live stock showing, which makes up one of the principal divisions of the Exposition proper, a great variety of animals will be found in every part of the grounds, aiding, in numerous directions, in purveying entertainment and furnishing diversion for Exposition visitors—which in reality is the final Exposition purpose.

In the numerous enterprises that compose the "Zone"—as the amusement street is called—about 4,000 animals will be found. But even before these show animals were brought to the grounds the animal population of the exposition had taken on interesting proportions. No sooner had the great exhibit palaces been constructed than a number of uninvited wild visitors of a particularly objectionable species took up their abode therein. Some of them have been dislodged. Their eviction was accomplished with considerable difficulty after several months of persuasion, intimidation and subterfuges in the shape of bait and traps.

Following the skunks came a miniature invasion of rats, who fed upon the remains of workmen's luncheons, and for a while lived in luxury. Their occupation was short, however, and their disappearance furnished an excellent example of the "survival of the fittest." It must have been noised about the city that the exposition offered good feline hunting grounds, for there was shortly an incursion of cats, and the rats vanished. Many of the cats have remained in the buildings, and some of them have been made pets by the exposition guards quartered in the various parts of the grounds.

During the construction period a workman employed on the 435-foot Tower of Jewels brought two pet coons to the grounds. The pair made their escape, and since the completion of the tower have made their home in the dark recesses of the network of steel beams that forms its frame. All efforts to locate and banish them have failed.

Nearly all of the fifty-odd State and Foreign buildings that are included in the exposition have pet animals among their inhabitants, and in many cases the animals have been brought from the state or country represented. Australia, for example, has brought a family of kangaroos and several other original inhabitants of the South Pacific Commonwealth to the exposition. The Canadian building has a pool of water that affords a first-rate home for a trio of live beavers. A related family dwells in the Idaho building, which also contains a number of other denizens of the mountains of that State.

Flocks of pigeons form a definite part of the exposition color scheme, and greatly enhance its Oriental character. Several thousand of them are cooped in the upper parts of the great arches that mark the western and eastern entrance of the Court of the Universe.

The animal part of the Zone is large enough to stock a well-filled zoo. There is a large space devoted to an animal show, with the usual lions, tigers, leopards and familiar animals of the circus, while the 101 Wild West Show supplied several hundred creatures of appropriate variety. The Alligator Farm contains nearly three thousand specimens of alligators and crocodiles of all sizes, a flock of pelicans, herons, snake birds, eagles, horse-shoe crabs, sea turtles, some raccoons, and three trained sea-cows. In the Submarines concessions is a troupe of trained sea lions that follow the big steel boats under water. Their antics are visible through portholes of the submarines.

In the Principality of Toyland Grown Up, a $1,000,000 enterprise that comprises a whole amusement park within itself, will be found any number of animals, from the trained-flea circus to the troupes of trained reindeer, ponies, donkeys, dogs, sheep, monkeys and goats. Incidentally the monkeys are to be seen performing in a sketch entitled "A Night in a Monkey Music Hall."

The South Pole concession, which portrays Captain Scott's expedition to the Antarctic, has several wolf dogs, penguins and other animals brought from that region. Of special interest to the little folk are the four storks that promenade with great dignity in front of the Baby Incubators building or perch on the chimneys thereof. These birds were brought from Holland especially for exhibition at the exposition.

In the Australasian, Hawaiian and Samoan villages are to be found numerous animals indigenous to the countries represented, while on the slopes and crags of the "mountains" that form backgrounds for a number of concessions are painted goats, deer, coyotes, mountain lions and the like, that lend animation to the scene. In the same category might be included the various animals of strange or natural shape, as the case may be, that help to make up the sculptural decoration of the exposition. Camels, elephants, horses, giraffes, lions, bear, wolf, oxen, porpoises, all contribute to the "travertine" menagerie, as it has been called, imitation travertine marble being the principal building material employed in the exterior construction of the exposition.

Drink Jackson's Napa Soda.

INTERSTATE TOURNAMENT.

The fourth annual registered tournament of the California-Nevada Trapshooters' Association will be held under the auspices of the Golden Gate Gun Club, at the West Alameda trap grounds, August 5, 6 and 7. The dates were secured from the Interstate Association, through Tournament Manager Elmer E. Shaner, who was in this city last week, at a meeting of the gun club officials and prominent bay counties trapshooters.

The Interstate Association will hang up seven trophies for the seven high guns in the Interstate Association's Amateur State Championship, the feature match of the three-day tourney. The winner of the State championship will be eligible to shoot at the Grand American Handicap tournament at Chicago next month, in the national championship match, and draw down a $50 purse when he joins the gun bugs at Chicago. The secondary feature of the local tournament will be the California-Nevada handicap race at 100 targets. George Stall of Winnemucca, Nev., won this event in 1913, 95 out of 100 birds, at 18 yards. Last year, at Modesto, Tony Prior, 21 yards, 91 out of 100, was the winner.

The importance of this tournament in the eyes of gun club members of the association can be readily understood when it is known that a purse of $1500 will be distributed to winning shooters in the different matches each day. Besides the money prizes there are nine valuable trophies that will be shot for. These prizes require an individual three-time win to acquire permanent ownership.

The trophies were hung up several years ago when the Ingleside grounds were in vogue. Numerous individual wins were made at different tournaments. All of those prior wins, however, were chalked off when the Pacific Coast Blue Rock Association was organized and the trophies were started off again at Sacramento in 1912. The second shoot took place at Reno, under the auspices of the Reno Gun Club, the following year, the name of the organization was then changed to the present title. The third tournament was held in Modesto, under the auspices of the Owl Rod and Gun Club last year.

The winners, under the new regime, to date are the following:

Hunter Arms Company, Vase—Frank Merrill of Stockton, George Stall of Winnemucca, and G. H. Anderson of San Jose.

Grand Cup—B. H. Worthen, Harry Ogelvie of Lindsay, and Tony Prior.

Sorenson Diamond Medal—W. H. Varien of Pacific Grove, W. E. Staunton of Winnemucca, Judge E. A. Ducker of Reno.

Peters Cup—R. H. Bungay of Long Beach, O. N. Ford of San Jose, Frank M. Newbert of Sacramento.

Du Pont Shield—George Wingfield of Reno, Frank Leonard of Reno, J. F. Couts of San Diego.

Ballistite Cup—Harry Ogelvie, W. E. Staunton, twice.

Dick Reed Trophy—F. M. Newbert, W. E. Staunton, and Harry Ogelvie.

Roos Bros. Diamond Fob—W. E. Staunton, Judge E. A. Ducker, Theo. Handman of Oakland.

Hunter Arms Trophy, No. 2—W. H. Varien, O. N. Ford.

BEGINNERS' DAY SHOOT.

Through the Du Pont Beginners' Day Shoot, in which all gun clubs are invited to participate, it is hoped to accomplish two purposes: first, to secure for the sport of trapshooting publicity for the events held at local clubs throughout the country; and, second, to establish, as it were, a national get-together-day for sportsmen and shooters, at which time those desiring to become affiliated with trapshooting clubs will have an opportunity of doing so under most favorable auspices.

The national publicity for trapshooting that has been secured through efforts in the sporting periodicals, general magazines and the newspapers, has interested thousands of lovers of the great out-of-doors in trapshooting, who need but little encouragement to become active members of gun clubs and regular participants in the "sport alluring."

In every community where trapshooting is now enjoyed there are many such prospective trapshooters, and to assist the officials of active and deserving clubs in interesting them in a way that will prove mutually beneficial, is the aim of the Beginners' Day Shoot.

New members in any club will mean a new lease on life for the club, because, in addition to enjoying the sport of trapshooting, they will have new ideas and an abundance of enthusiasm which are most valuable assets to any organization.

Should the interest in the first annual Beginners' Day Shoot warrant doing so, it is the intention to make the affair an annual event. At any rate, every trapshooting club should have at least one "beginners' day" each year, not only with the idea of increasing the membership and thereby greatly benefiting the club, but also that the many sportsmen who are not now trapshooters will feel impelled to make an effort to become acquainted with the best of all out-of-door pastimes trapshooting -and with some of the best sportsmen to be found anywhere—trapshooters.

To every trapshooting club holding a Beginners' Day Shoot under the rules suggested by us, we will agree to provide a suitable trophy to be awarded the beginner making the high score at the shoot.

This trophy will be a handsome bronze watch fob of a suitable design, the medallion of which will portray in shooting pose the figure of Mr. Jack Fanning, of New York, greatest of all instructors in the art of trapshooting. Mr. Fanning has for years advocated the use of the try-gun to determine the dimensions of guns to meet individual requirements of sportsmen, and so help them to improve their scores, and consequently increase their enjoyment of the game. Mr. Fanning is also known the country over as the first man to thoroughly appreciate the possibilities for real pleasure and enjoyment existing in the "Hand Trap," and for years has been a most enthusiastic exponent of hand-trap shooting. In view of his past activities and interest along these lines, it is most fitting that his name be associated with the Du Pont First Annual Beginners' Day Shoot.

In addition to the trophy presented to the beginner in each club making the high score in this shoot, there will be presented, by the Du Pont Powder Company, a loving-cup trophy to each of the 100 trapshooting clubs having the greatest number of actual beginners participating in the Beginners' Day Shoot, to be shot for under such rules and conditions as may be determined upon by the clubs receiving same.

All trapshooting clubs are eligible to hold a Beginners' Day Shoot and compete for the Du Pont Beginners' Day Trophy.

To receive a trophy a club shall have at least five beginners competing.

Beginners only, viz., men and women who have never shot at clay targets previous to the Beginners' Day Shoot, shall be eligible to win the trophy.

The Beginners' Day trophy event shall consist of at least 25 targets. This event may be shot in five (5) target events in two 10 and one 5-target event, or in any other way that may seem advisable, but it shall comprise 25 targets.

Contestants shall not be allowed to shoot practice events prior to the shooting of the Beginners' Day event.

The beginner making the high actual score shall be awarded the Du Pont Beginners' Day Trophy.

The Beginners' Day shoots may be held any time during the month of August. This will give all clubs desiring to hold Beginners' Day shoots ample opportunity to make the necessary arrangements and to work up the shoots in such a manner to insure them being highly successful.

Applications for trophies will be received up to July 31. No application bearing a postmark of a date later than July 29 will be considered, as we must have a few days in which to complete the final arrangements. Trophies for the Beginners' Day Shoot will be ready for distribution about July 15.

Clubs receiving Beginners' Day trophies must agree to furnish the Du Pont Powder Company with a report of the shoot for same, giving the name and address of each contestant on blanks supplied by it for the purpose.

At the Traps

Time Wasted—Anent the recent death in the big war of Grand Duke Michalovitch, brother-in-law of the Czar, the story of how Annie Oakley once divorced the duke from a fat wad of kopeks is worth telling. It happened in 1889 at the Paris Exposition. The Paris Gun Club, of which the great Oakley girl was an honorary member, were entertaining a number of kings, dukes, m'luds and women of nobility, when the grand duke offered to shoot Frank Butler a match. Butler was a wise old owl and chucked it, because he knew the grand duke was quite a blooie dooie artist, but offered to back his wife (Annie Oakley). Well, the match was made and what Annie handed the Czar's relative was like Salvator trimming Tenny—the same being a gorgeous lacing. The head of the house of Rothschild, richer even than the Standard Oil mag., was present and opined that some of Sister Oakley's exhibition rifle shooting must have a trick in it, to prove which he threw up his watch, which watch cost more than a thousand washers. There was no watchful waiting by Annie, b'gosh! and yet Annie wasted time, for when the rifle cracked, she "got" the whole works. Quite a timely blooie. History doesn't record that Plutocrat Rothschild gave the Americano senora a wad, or a watch, but it does mention that the titled ginks present grabbed His Richness, slammed him down onto the tender green grass and rolled him for the drinks—bubbling waters, of course. Annie certainly had a fine time in the olden days and Grand Duke Michalovitch wasn't the only hombre she "showed."

* * *

Live Bird Shoot.—Trout streams and deer coverts put a kink in the attendance of wing shots at the California Wing Shooting Club's monthly pigeon shoot July 4 at Sobrante. Pete Walsh led the trigger pullers with a score of 35 out of 36 birds trapped during the day. Captain DeBray, Toney Prior and Ted Riley were each a bird behind Walsh.

Toney Prior (32 yards), Ted Riley (28 yards) and Walsh (27 yards) each scored a straight dozen birds in the club medal match. Clarence Nauman (32 yards) and Walsh (27 yards) divided first and second money in the club purse match.

Two six-bird pool shoots made up the balance of the day's programme. Ten straight scores in both matches cut down the money division materially. Results for the day follow:

Medal match, twelve birds, distance handicap, high guns:—

T. D. Riley	28	yds.	1122	2222	2221—12
Toney Prior	32	"	1121	1221	2222—12
P. Walsh	27	"	1121	1121	1212—12
Capt. A. W. Du Bray	32	"	2222	2122	2220—11
J. G. Sweeney	27	"	1121	1121	1221—11
E. L. Hoag	32	"	2212	2022	2022—10
C. C. Nauman	31	"	0112	1221	1021—10

Purse match, twelve birds, $50 added, distance handicap, high guns:

C. C. Nauman	32	yds.	1211	1111	2111—12
P. J. Walsh	27	"	1111	1111	1211—12
Capt. A. W. Du Bray	29	"	2211	1101	1122—11
E. L. Hoag	29	"	2021	1212	2212—11
Toney Prior	32	"	1221	1202	1221—11
J. G. Sweeney	28	"	2211	2121	0211—11
T. D. Riley	29	"	2022	2202	2221—10
Northcott	30	"	0100	2100	0110— 5
Thompson	30	"	0011	0011	2111— 6

Six-bird pool, thirty yards' rise:

Du Bray	1	1	2	1	2	1—6
Hoag	2	2	2	1	1	2—6
Nauman	1	1	1	2	1	1—6
Prior	1	1	1	1	2	2—6
Riley	2	2	2	1	2	2—6
Walsh	1	1	1	1	1	2—6
Northcott	1	2	0	2	2	2—5
Thompson	1	1	0	2	1	0—4
Sweeney	1	1	0	2	0	1—4

Six-bird pool, thirty yards' rise:

Riley	2	2	1	2	2	2—6
Nauman	1	2	2	2	1	2—6
Hoag	2	2	2	2	2	2—6
Du Bray	2	1	2	1	1	1—6
Walsh	2	1	1	1	1	0—5
Prior	1	2	1	2	2	0—5

Gaden City Traps.—Clem Arques won the 100-target handicap shoot at the San Jose Blue Rock Club in the Sunday Fourth of July shoot. G. H. Anderson took first prize in the doubles event and Louie Baumgartner brought the honors home in the Hercules handicap of 150 birds.

The following are the scores:

San Jose handicap—Clem Arques 82, added 18, total 100; A. F. Baumgartner 95-7—100; E. C. Smith 83-18—100; O. N. Ford 96-3—99; George H. Anderson 92-5—97; C. H. Nash 89-5—94; Mrs. Ada Schilling 84-9—93; Dr. A. M. Barker 85-5—90; Carl Schilling 81-9—90.

Hercules handicap—Louie Baumgartner 141, added 12, total 150; E. W. Jack 137-15—150; Mrs. Ada Schilling 134-15—149; O. N. Ford 141-8—149.

Doubles, 12 pairs—G. H. Anderson 22, Mrs. Ada Schilling 20, Dr. Barker 20, O. N. Ford 19, A. F. Baumgartner 18, C. H. Nash 17.

* * *

"Pull!"—A score of blue rock shooters indulged in practice shooting at the Golden Gate trap grounds, West Alameda station, Saturday afternoon. Among the powder burners was Lester H. Reid of Seattle, professional high average trap shot, on registered targets, for the United States during 1914.

* * *

T. E. Doremus of Wilmington, Del., a prominent member of the Dupont Gun Club, arrived in town last week en route for San Diego.

* * *

Elmer E. Shaner left last week for San Diego, where he will manage the Pacific Coast handicap three-day tournament, July 8, 9 and 10.

* * *

It is anticipated that there will be a record attendance at San Diego for a Coast trap shoot this week. Among local knights of the trigger who will be in attendance are: Clarence A. Haight, T. D. Riley, Toney Prior, Tom Wilkes, G. W. Wilkes, F. Wilkes, Roy Avery, J. S. French, W. B. Stadfeldt, Captain A. W. DuBray, Hugh E. Poston, J. G. Heath, Charles H. Knight, Dick Reed, Fred Willet, and others.

From near-by points the following were counted on to go south: Andy Flickinger of Vallejo, H. R. Phinney of Berkeley, "Bud" Havens and A. N. Howard of Oakland, Fred K. Burnham, Martinez; O. N. Ford, L. Baumgartner, Mrs. Ada Schilling, C. A. Nash, San Jose; W. P. Sears, Los Banos; Dave Ruhstaller, Sacramento; Henry Garrison, Modesto; Charley Huber, Newman; H. Plasket, Lindsay; H. R. Everding, president of the Portland Gun Club, P. J. Holohan and D. Holohan, Portland, Ore.; Lester H. Reid, Seattle; T. E. Doremus, Wilmington, Del.; George Wingfield, Reno; C. A. Sage, Goldfield; Frank C. Riehl, Tacoma; E. M. Sweeley, Twin Falls, Ida., and others—an aggregation of shotgun talent that are expected to do some tall clay pigeon shooting.

Fish Lines

Favorable reports from mountain trout streams and Sierra lakes started an army of anglers from this city last week, all bent on taking advantage of a holiday outing.

Just what sport was expected at various resorts may be inferred from the reports. From Boca, Truckee and other points along the Truckee river, fly-fishing is now better than at any time since the season opened. A large delegation of local anglers last Saturday joined the rodsters who have been taking an outing at Boca.

Near Union Mills, Charles H. Kewell, Walter D. Mansfeld, John Seibe, F. Fitzpatrick and other members of the San Francisco Fly-Casting Club were at the club lodge. Monday the floodgates at the Lake Tahoe dam were opened for a short time. The result was that upper Truckee anglers caught nearly fifty Loch Leven trout, fish scaling from three to five pounds. E. S. Heller of this city was among the anglers who took advantage of the situation at that time. E. P. Masterson, Ralph Friedman and Dr. H. Abrams joined the Truckee delegation for a week's or more fly-fishing. Trolling in both Donner and Independence lakes has been producing splendid results.

At Sims and other upper Sacramento river-fishing resorts, the sport has been very good. Walter Matthews, D. Turner, W. D. Cooper and other Sacramento river experts have landed numerous baskets of trout.

Ernest Schaeffle, W. H. Shebley and N. B. Schofield, Fish and Game Commission officials, returned from a week's inspection trip of Rising river, Hat creek, Burning creek, Clarke's creek, Big Canyon creek, Pitt river, Fall river, Tule creek and the upper McCloud. Trout fishing was generally poor, and fish taken were small. The McCloud was muddy. Hat creek will not be fishable for years. During the recent Mount Lassen eruption thousands of trout were picked up by the Indians.

Frank Maskey recently fished Bartlett and Cache creeks, in the vicinity of Bartlett Springs. While these streams still hold plenty of water, he made catches of eight to ten inch trout, and also larger fish, up to one and a half pounds. The sport will be somewhat better in those creeks for fly-whipping about the end of July.

The Big and Little Stony, in the vicinity of Fouts Springs, are considered good creeks at this time of the year.

Cisco is a point convenient to good fishing places along the Yuba, and the north and middle forks of the American river. Floyd Judah, Dr. Hopkins and J. Bromfield left for Cisco to stay over the Fourth. Will Fisher and Al Tallant are making a ten day's stay in that region. Dr. and Mrs. F. Burgess are there for a two weeks' outing.

Recent reports from Yosemite valley indicate that the Merced river and creeks in the floor of the valley are somewhat too high for good fly fishing. In the south fork of the Merced, near Wawona, however, the sport is better. Trout running from six to twelve inches seemed to well fancy brown hackle flies when E. F. Tulk and party were there a week ago. Trout, scaling one and two pounds, were numerous in the big pools, but paid no attention to fly inducements—too much bottom food probably. Fair fishing can be enjoyed in Merced lake at present.

Feather river advices are encouraging for the July angler. Near Blairsden, fishing in the river and creeks is very good. Lake fishing is excellent. Near Johnsville, in the lakes, trout "are rising beautifully to the fly." The oak, coachman, royal coachman, blue bottle and black flies are the killers for rainbow. Loch Leven and Eastern brook trout—averaging from ten inches up to a pound in weight. The larger trout seem to fancy the spinning spoon.

The river and creeks in the vicinity of Belden are low and clear. Fly and bait fishing are both productive of trout. The spinning spoon and live grasshoppers are both fine lures in the early morning and evening. At Big Bar fine sport has kept many anglers busy. Nothing doing at Keddie, but very good fishing in the Big Meadows waters, mostly trolling, where W. W. Smith will fish during the holiday period. Moe Uri banks on good fishing at Quincy during a few days' visit. Near Camp Rodgers several local anglers have been catching daily limits with fly patterns. The water is now and clear and weather very agreeable.

Off for a fortnight's fishing in the Williamson river, in Oregon, are William Berg, Charles McIntosh, Osgood and Robert Hooker. W. Davis, J. B. Schofield and H. Lindsay are just back from that fishing resort. They report fishing but fair during their visit. Alex Vogelsang, Lindsey Scrutten, John McGowan and other local sportsmen are still in camp at Silvas. Joel Harlan, Nat Boas, Ned Bosqui and J. B. Coleman were dissatisfied with Spring creek and shifted over to Wood river without finding much improvement in angling conditions. The Williamson and branches are evidently late this year. The anglers are counting on a decided improvement in conditions by the middle of the month—by which time the big five and six pound trout will run up stream from Klamath lake.

The rooms of the California Anglers' Association were well filled by jolly anglers and their friends on Wednesday evening of last week, at which time one of the series in a prize whist tournament was the feature of the gathering.

Purissima creek, down the San Mateo shore, produced nice baskets of trout for Al Wright and a friend last Sunday.

Recent developments in striped bass fishing were strong enough to tempt every rodster away to his favorite fishing resort during the holidays. Wingo seems to have had the call on the best results in the sport. Frank Holland landed an 18 and a 20-pound bass one day, and followed that nice catch Sunday with three bass that scaled 25, 22 and 10 pounds, respectively. Jack Hannah also connected with two large fish and landed them. Another fisherman was credited with capturing a 35-pounder. The Garbarino Club made a combined catch of three carelss striped fish, Charley Renaud's being the heaviest. Hugh Copeland fished near the Wingo drawbridge nearly all day. He had one strike and a run by what was evidently a large bass—but the fish did not stay to get acquainted with the fisherman. Tim Lynch landed two good sized bass. All of which is indicative that there is a run of bass on now in the Wingo creeks and sloughs.

Near Black Point four good sized bass were taken by Harry Mence, Stanley Herman also landed a 11 and a 20-pound striped bass. Farther up Petaluma creek, near the "twin houses," about 15 bass were taken Sunday. Billy Augstein is credited with three bass. Another rodster caught two 10-pounders. Among the San Antone regulars out were: Frank Marcus, Emil Accret, Hugh C. Draper, Gus Christianson and others.

Corte Madera creek, near Greenbrae, may be worth attention, for a 10 and a 20-pound bass were caught in the creek. Across the bay, in the estuary, near the Fruitvale power house, many small sized striped bass have been caught during the past two weeks. The run is a large one, and the fish like clam baits.

A run of striped bass is reported in the lower bay, near the Newark bridge. Even so, the stingrays are so thick there as to make fishing an infliction instead of a recreation.

In the "white house pool" and the "big fill," near Point Reyes, good catches of medium sized striped bass have been made by Jim Andrews, James Black, young Tom Irving and others.

Near Oroville, in the Feather river, striped bass are also plentiful. A party of seven fished near Hazelbush and caught 46 fish, running from three to seven pounds.

Russian river, near Duncans, is reported to be full of both striped and black bass. For that matter, these varieties are also rather numerous many miles further up the river. The striped bass have been feeding on smelt and other small fry, that came in from the ocean when the bar was open. Now that the bar is closed again and the supply of small fish steadily decreasing, there should be some fine striped bass fishing available. The season for black bass in Russian river opened July 1. Harry Palmer, who shifted recently from the Wingo striped bass haunts to Russian river, has been enjoying splendid salt-water fishing. Saturday, when a phenomenally low tide prevailed, he gathered a number of gigantic abalones and some exceptionally large mussels.

Ed Schultz, George Klarmann, Charley Breidenstein and F. B. Lathrop spent the holidays at the ark of the Middle River Bass Club, where black bass fishing still holds good, according to Louis Gotthelf's Saturday and Sunday experience.

FIXTURES.

Interstate Association Tournaments—

July 8, 9, 10—The Interstate Association's Tenth Pacific Coast Handicap Tournament, San Diego, Cal., under the auspices of the Pastime Gun Club; $1,000 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

July 9, 10—Gem City Gun Club, Max Welck, Secretary, Laramie, Wyo.

July 12—Rawlins Rod and Gun Club, H. Breitenstein, Secretary, Rawlins, Wyo.

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Eureka Shoot.—The Eureka Blue Rock Gun Club registered shoot, July 5, drew an attendance of over thirty shooters. Six 20 bird and two 15 bird events were shot—150 targets. H. A. Hine 139 and R. V. Falk 137 were high guns. The scores will appear next week, being received too late for this issue.

PINTAIL DUCKS IN CALIFORNIA.

[By Harold C. Bryant.]

The pintail or sprig duck is not only one of the commonest ducks in California during the winter season, but is among the largest ducks and one of those most desirable as food. This duck is almost cosmopolitan, being found throughout the northern hemisphere. It breeds throughout the northern part of Europe and migrates south in winter to Northern Africa and Southern Asia. In North America it breeds most abundantly from North Dakota to the Arctic Ocean and Alaska. During the winter season it moves southward and is to be found widely distributed throughout the southern United States and Mexico. In California the pintail is both a resident duck and a winter visitant. By far the greater number, however, belong to the latter category. Although primarily a fresh water duck, the pintail is often to be found along the coast on the brackish marshes.

Whether resting on the water or in flight the pintail duck may be recognized by its large size and by its long, graceful neck. The male may be distinguished by its long middle tail feathers, dark brown head with a white stripe on sides of neck, pale rufous wingbar and pure white under parts. The female, although much like a female mallard, is readily distinguished by the dull brownish speculum, the more slender, pointed tail, and the long neck. The mellow whistle of the drake and the hoarse, muffled "quack" of the duck is so rarely given that the voice can seldom be used for identification in the field. A habit of "slanting in" to a pond with wings set is a field mark used by almost every hunter.

Each year some individuals of this species remain and breed within the State, although most of these ducks go far north of California to nest. The past summer the writer found this species at Los Banos, Merced county, and at Live Oak, Sutter county, and there are a number of other places where they are known to breed regularly. The pintail was reported as being the commonest breeding duck at Tulare lake in 1907. Five to eight eggs are laid the last of April or the first of May. The nest itself is seldom more than a hollow in the dry grass and down, and is usually less well concealed than that of other ducks, often being placed in grass not more than six inches high. A heavy layer of dark gray down covers the eggs, while the female parent is away from the nest. The young are to be found from the middle of May until August. They are cared for entirely by the female.

Pintails fly very fast, at a great height, and often in V formation. When "slanting in" to a pond a distinct whistling noise made by the wings can be heard at quite a distance. The birds gather in flocks of as high as fifty in number, and when flushed crowd close together, thus making good "pot shots." On the water this species sits high and swims gracefully. Although the pintail does not resort to diving for the purpose of securing food, yet it does dive readily and swims for long distances under water when wounded.

The food of the pintail is made up very largely of vegetable matter—weed and grass seeds. In some places in California pintails feed extensively on snails. Like the mallard, they enjoy gleaning in the grain fields. Seeds of ditch grass, pond weed, knot weed and bullrush seem to be favorites in this State.

As a table duck the pintail ranks with the mallard and canvasback both as regards size and flavor. Consequently it is a favorite with hunters. When it first arrives in California, it is uniformly fat and of fine flavor, usually having taken the first chance to become grain fattened.

The number of pintails sold in the markets suggest that this is one of the species which can not long exist in numbers if something is not done to conserve more of the breeding stock. Over forty thousand pintails were sold in the markets of San Francisco alone during the season of 1910-11. The constant diminution of numbers to be seen from year to year is convincing evidence that the breeding stock is being seriously crippled. The old idea that so long as ducks were protected on their breeding grounds they would continue to appear in normal numbers has been proved incorrect. The survival of many of our game birds can only be assured by more rigid protection than they now receive. It is only when the annual toll properly balances with the normal rate of reproduction that a species is able to hold its own. Particular attention needs to be given those birds like the pintail and mallard, which breed within our State and for which we are responsible the year round.

Rem-UMC Notes.

Leon Davis won the New England Handicap Championship, at Hartford, Conn., with a score of 92x100 and 20 straight in the shoot-off. He shot Nitro Club shells in this event, and also in winning the high over all average for the day, scoring 187x200.

F. A. Weatherhead of Billings, Mont., won high amateur average at the Montana State Shoot, shooting a Remington-UMC pump gun and Nitro Club shells, scoring 598x630. This is the third consecutive time Mr. Weatherhead has won either this event or the State Championship.

An interesting shoot was staged recently at Round Lake, Ill. W. V. Jackson, shooting a Remington pump gun and Nitro Club Steel Lined Speed Shells, won the meet with 97x100.

THE JERSEY ISLAND SPRING SHOWS.

Instead of being an interested spectator at the Channel Islands' May shows, as has been my wont for the last few years, here I am in a little town situated within the zone of military operations, but about 60 kilometers from the firing line. I regret that circumstances are such as would render my visit to the Channel Islands impossible at this time, all the more so as my trip there this year would perhaps have been the last for many years to come. However, force of habit becomes very strong, even to a mere reporter of agricultural and live stock events, and, although my role at present keeps me vegetating here, I thought perhaps some of your readers would like to know something about what is happening in Jersey. Through the kindness of my correspondents there I am able to give some details of the two spring shows.

Notwithstanding the great difficulties experienced by the farmers just now the April bull show resulted in an entry of more than 60 head. In under-one-year calves the prize list was: 1, Veno 2d (sire Royal Guide). 2, Sunray's Son (sire Gilbert). 3, Sweet Sultan (sire Rochette's Jolly Sultan). 4, Hero du Coin (sire Hamptonne Grey). Yearling bulls: 1, Kingsway (sire Oxford You'll Do). 2, Leda's Cowslip Noble (sire Cowslip's Golden Noble). 3, Slim Jim (sire Noble of Rozel). 4, Jemima's King (sire Cannon Grey).

In aged bulls the first prize went to Golden Fern's Noble, owned by J. A. Perree. A splendid photograph of this bull appeared in the Holiday "Gazette." He was dropped August 4, 1909, and bred by F. D. Houillebecq. His dam is Lady Aldan. He was sired by Noble of Oaklands. Mr. Perree was also awarded the second prize on his other herd bull, Combination's Premier (sire Combination; dam Oakland's Bess). The third prize went to Hamptonne Grey (sire Cannon Grey) and the fourth to General Cowslip (sire General Brown).

Aged bulls, shown with and to be judged by the merits of five of their female progeny: 1, Golden Fern's Noble. 2, Oxford Majesty. 3, W. Alexander's General Cowslip.

In the competition for the F. S. Peer Perpetual Channel Cup, Golden Fern's Noble again gained premier honors, thus recording a triple triumph—an almost unique distinction at an Island show. The reserve was awarded to Oxford Majesty.

The important show of female stock, held on May 20, lost much of its attraction owing to the cancelling of the butter test, a feature of the exhibition which has become increasingly popular with breeders and the public alike. But really, one feels rather astonished that the May show could be held at all. A great proportion of the farm laborers are of Brittany and Normandy origin, and many of these have been mobilized by the French. On the other hand, the Jersey government has called up all its able-bodied men to serve in the Jersey militia for home defense. So it will be readily seen how short-handed farmers must be. This is just the time of the year when one could see many of the Brittany and Normandy peasants with their wives and children crossing over to Jersey to gather and pack potatoes and plant tomatoes. It will be difficult to garner the crops and get the farm work done satisfactorily in Jersey this summer and autumn. Some of the poor farmers and their wives will have to work almost night and day. Even to milk the several thousand cows on the Island requires a goodly amount of energy, and many farmers of the wealthier class are now compelled to milk their own kine, for, in spite of wars, holidays, scarcity of labor or anything else, her majesty the cow never stops giving milk.

There were no less than 221 entries, and I understand few of these were absentees. The sensation of the show came forward in J. A. Perree's Golden Oxford Ivy, a young cow with her second calf. After winning premier honors in her class she entered the arena to compete in the open class for the Theatre Challenge Cup, the winner of which is generally regarded as the champion for the year. Notwithstanding the strong competition of the older matrons, Golden Oxford Ivy defeated them all, thus winning the trophy outright for Mr. Perree, for, according to the rules, "the cup shall become the absolute property of the member who wins it on any three occasions." Mr. Perree won it in 1905, 1911, and 1915. No other member has ever won it on more than one occasion.

Golden Oxford Ivy was calved Dec. 7, 1911. Her dam is Golden Ivy and her sire Oxford You'll Do, plenty of whose blood has been disseminated in the United States. She was bred by J. B. Badier. Strange to say, Mr. Perree expected winning on Fern's Lady, a Golden Fern's Noble cow, but she delayed calving until the date of the show and so could not be exhibited. The winner will go to America with the next shipment to Linden Grove.

Yearling heifers: 1, Clarencia's Benedictine (sire Benedictine's Nobleman). 2, Reading Royal (sire Royal Guide). 3, Fly 20th (sire Design's Golden Noble). 4, Oleander (sire Oxford Noble). Heifers in calf: 1, Golden Augustine 3d (sire Lackland). 2, Summer Valentine 2d (sire General Cowslip). 3, Foxglove 9th (sire Golden Fern's Noble). 4, Keal Nancy 3d (sire Noble Monarch). Heifers in milk: 1, Village Beauty (sire Cowslip's Golden Noble). 2, Bertha of Highland (sire Noble Sultan of Oaklands). 3, Tapon's Butterfly (sire Combination's Premier). 4, Doreen of St. Luke's (sire Cowslip's Golden Noble).

Cows 3 to 6 years old: 1, Golden Oxford Ivy (sire Oxford You'll Do). 2, Bright Blonde (sire Bright Prince). 3, Zellina's Favorite (sire Rower, winner of the Peer Challenge Cup 1914). 4, Wonder Mary (sire Aldan's March Hare). Aged cows: 1, Sultan's Finance (sire Sultan of Oaklands). 2, Raleigh's Finance (sire Mabel's Raleigh). 3, Lady Rosebay 8th (sire Honest Lad). 4, Princess Merlucke (sire Lucy's Prince).

Theatre Challenge Cup, Golden Oxford Ivy. Reserve, Sultan's Finance (reserve winner last year, and now eight years old).—John Ashton, in the Breeders' Gazette.

TICKY CATTLE BRING LOW PRICES.

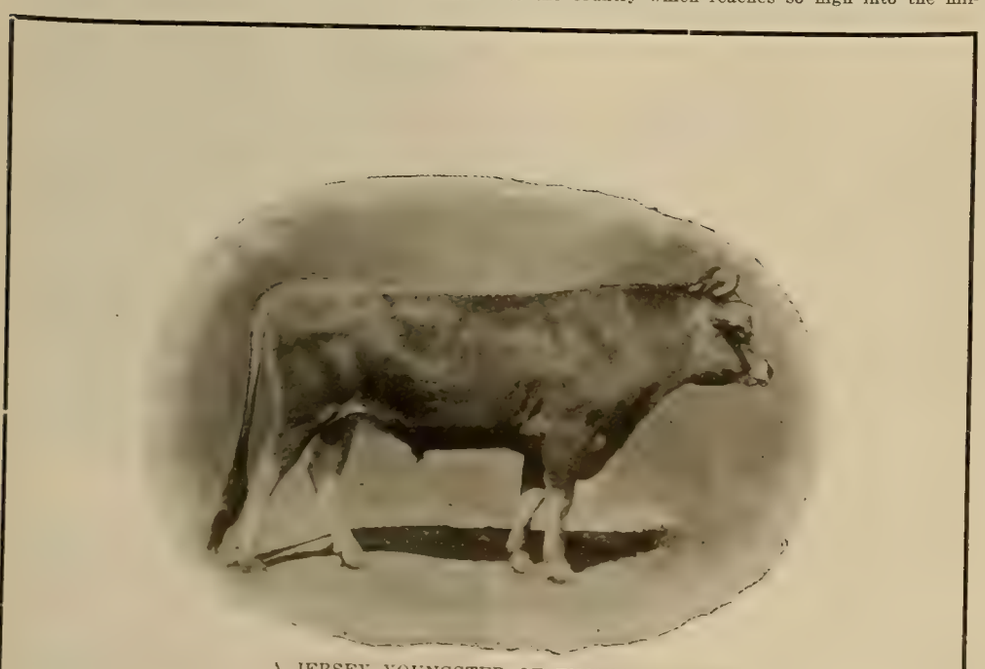
Washington, D. C., July 3.—After an eight months' fight, the foot-and-mouth disease has been practically stamped out and the danger of another great destructive animal plague averted. For this the country has reason to be thankful, for American live stock already suffers from disease to an extent of which few persons are fully aware. Hog cholera, tuberculosis, and the cattle tick cause an annual loss to the country which reaches so high into the millions of dollars that is is almost impossible even for trained statisticians to estimate it. The direct loss in deaths can be computed with reasonable accuracy but the indirect losses which agriculture in all its branches suffers whenever and wherever there is a scarcity of stock cannot be reckoned at all.

Greater production of live stock upon the farms undoubtedly would go far toward solving the problem. This is especially true of the South. In an estimate quoted recently by the Secretary of Agriculture, it was stated that the average farm home in Georgia produced less than one-twelfth of a beef in the course of a year for each person on it. Instead of producing beef to sell to the rest of the country, the South imports much of what it consumes.

For this condition of affairs specialists hold two things responsible—cotton and ticks. The danger in a one-crop system of agriculture has now been made apparent and there are many farmers who would gladly abandon it if some substitute were available. But in any sound system of agriculture live stock is indispensable, and while the cattle tick flourishes the production of cattle is not an inviting prospect. The grower in a tick-infested country labors under a crushing handicap. His cattle weigh less and bring less per pound than those of his competitor in tick-free sections.

In Alabama and Mississippi, for example, the average price for beef on the hoof was, on January 1, 1915, only 4 cents a pound. In Connecticut, it was 8.4 and in no tick-free state was it as low as 5 cents. The average price of beef cattle over two years old was $20 in Alabama and $22 in Mississippi. It was $64 in Wyoming and $60 in Montana. Vermont, with an average of $39, was the only tick-free state in which the price was below $40. In North Carolina, South Carolina, George, Florida, Louisiana and Arkansas—all more or less tick-infested—the average price was below $30.

Such differences are too striking to be ignored. They represent an annual loss to the farmers of the South of millions of dollars. The Georgia farmer may expect to receive $18 for his beef animal, the Ohio farmer $56, Kentucky, Kansas and Indiana men, $54. For the ten tick-infested states—North and South Carolina, Georgia, Alabama, Mississippi, Florida, Louisiana, Arkansas, Oklahoma and Texas—the general average is $25.90; for the remainder of the country it is $48.47. In considering these figures it must be borne in mind that many of the states in the tick country have succeeded in freeing large areas from the pest. Otherwise, the differences in values undoubtedly would be much greater. A great deal of North and South Carolina, for instance, is as free from ticks as Ohio or Indiana. Oklahoma also has grappled so vigorously with the pest and has cleaned so much of its territory that the average value for cattle has risen to $42 a head. In Florida, on the other hand, where no systematic work has as yet been done, the average is $18.



One reason for the low average value of Southern cattle is unquestionably the disastrous effect of the tick upon all attempts to improve the breed. Pure-bred stock imported for breeding purposes are exposed to such danger of death from tick fever that it is not sound business to incur the risk. Producers are, therefore, compelled to do the best they can with the native cattle, which have acquired a certain degree of immunity. That there is no profit in scrubs is an old cattle raiser's maxim and in this connection a comparison of average weights of beef cattle may be interesting.

In Florida, on January 1, 1915, it was 340 pounds; in Wyoming, 985; in Idaho, 966; in Montana, 938. In Mississippi it was 550; in Alabama, 500; in Louisiana, 471; in Georgia, 419. Outside of the tick country, Connecticut was the one state to fall below 600 pounds.

There are, of course, other factors than the tick in the raising of beef in the South, but in view of these figures, it is hard to escape from the conclusion that wherever the tick is, there the value of cattle is low.

It follows, also, that the farmer makes little effort to develop this source of profit—or what would be a source of profit under other circumstances. Not only does he himself suffer financially in consequence—directly from loss of income, and indirectly through loss of soil fertility—but the whole country suffers from an inadequate meat supply.

For this reason, the Federal government is as vitally interested in the work of tick eradication as it is in the suppression of hog cholera and the prevention of tuberculosis. Throughout the tick-infested territory, wherever the people have voted to free themselves from the tax the pest levies upon them, Federal inspectors are co-operating with the local authorities and organizations in the erection of vats and the supervision of regular systematic dipping. As fast as territory is cleaned, the quarantine is removed from it and stock owners in the community thus enabled to market their cattle on an equal footing with stock from other sections of the country. As has already been said, 253,288 square miles have been freed in this way since the beginning of the work in 1906, and in addition much useful work has been done in areas still under quarantine. Within fifteen years, if the same rate of progress is maintained, the entire country should be free and ticky cattle a forgotten evil. But there is every reason to believe that as the evidence against the tick piles up, progress will become more and more rapid. It can not be too rapid for the good of the entire country.

A JERSEY YOUNGSTER OF EXCELLENT TYPE

THE FARM

DAIRY COWS AND READY MONEY.

Consider the dairy cow as a wealth producer! Her other name is "ready cash"! From her such sources of revenue as butter-fat and skim-milk flow!

Who but the cow is the originator of the "cream check"! Animated machine though she be, the consumer of his silage and his roughage, isn't she the one friend of the farmer that fattens his bank account twelve months in the year? Nor is this all! She is the mother of the calves and the sole author of the sustenance from which they are fed the first months of their lives. Few cow owners appreciate how valuable her warm, sweet skim-milk isf or the young stock of the farm!

And the yellow butter-bat! What is it but so much gold! Even after the separator extracts the butter-fat from the whole milk all the bone and muscle-forming elements are left. How warm, sweet separator skim-milk makes the calves, the pigs, the chickens grow! And it comes from the cow!

For every dollar's worth of fodder fed her she returns 100 per cent in dividends. Instead of robbing the soil of its fertility by selling off your produce, feed it to the cow!

Then the solid and liquid wastes from her body! Do they not keep up the fertility of the soil? In converting hay and grain and grass and silage into milk and money isn't the manure her most valuable by-product? What a boon the dairy cow is to the impoverished soils of "run-down" farms that lack many of the elements that make plant life flourish.

But there is still another source of revenue from the dairy cow. Even her old, worn-out body, about to succumb to wear and tear, has its market value! Her carcass can be sold to the butcher and her hide to the tanner!

Farmers are deeply indebted to the dairy cow! They are on her "pay roll"! She furnishes them a steady cash income in fat months and in lean and she makes their fields more fertile and productive.

Blessed be the cow! How could the world live without her? What a blessing she is to babies and how indispensable she is to adults! Consumers of dairy products — men, women and children everywhere—echo the sentiment: blessed be the cow! All people pay homage to the source of their sustenance, to their humble servant, the uncomplaining cow! Benefactor of mankind!

And how much the cow contributes to the wealth of the community! Her very presence makes the mother earth more productive. She not only tends to elevate and enrich her owner, but she furnishes food for his family and he sells the surplus to his neighbors. Cash circulates more freely and merchants feel the stimulus of such a steady flow of milk-money! No cream check, no cow!

Few men who form partnerships with the cow ever complain of hard times! If they treat her kindly and develop her milk producing possibilities intelligently they never consort with the chronic calamity howlers who outrage nature by bankrupting their soil with grain crops and then blame failure on the political party in power!

Pages and pages could be written in praise of the dairy cow! But "So, Bossy" needs no lengthy eulogium.

Her name is so linked with prosperity in the minds of farmers, bankers and merchants that her achievements alone entitle her to first place in the hearts of those who follow agricultural pursuits for their livelihood.—De Laval Monthly.

AN IRRIGATED HOG RANCH.

Although alfalfa is the standard crop for stock production in irrigated districts, John P. Daggs & Sons of Modesto have only seven or eight of their thirty-acre hog ranch in alfalfa, finding this about the right amount. Although this is a breeder's ranch and methods are somewhat different than would be used in merely producing hogs for the block, there would be little change in the system as far as the land is concerned if the hogs were simply raised for slaughter.

Hogs are pastured on the alfalfa which is later plowed up and planted to barley and corn, and other land planted to alfalfa in its place. By this system there is a rotation of crops and all the land sooner or later is renewed by a stand of alfalfa, and the alfalfa is new enough to be in first-class condition.

The 20 odd acres not in alfalfa are kept producing steadily by the use of irrigation with barley and one or other of the grain sorghums, of which feterita has met the highest favor the last year or so. In the fall barley is planted, and in the early summer when the barley is harvested feterita or another grain sorghum is planted, and so on until alfalfa is set out. Some other stock is also kept on the place and buttermilk is hauled from the creamery and fed. Although alfalfa is such a fine producer and excellent feed, grain is needed to make the best kind of a hog, and the combination of barley and feterita with alfalfa makes a profitable use of the land for hog raising.

Of the barley, beardless marley is mostly grown, as its absence of beards makes it a much better fed than ordinary barley for hogs and Mr. Daggs claims that it is fully equal with him to bearded barley in acre production. This is one of the best known hog ranches on the coast and the Durocs from it are well known from their show ring records and otherwise.—Orchard and Farm.

WAR AND WHY.

The first wars were fought for food.

The second wars were fought for revenge.

The third wars were fought for women.

The fourth wars were fought for religion.

The fifth wars were fought for conquest.

The sixth wars were fought for aggrandisement.

The seventh wars were fought for liberty.

The eighth wars are being fought for all or most of these things, save the last.—The Dallas Democrat.

A bathing pool is the greatest thing in the world for hogs in the blistering days of the good old summer time. The mother hog will leave her feeding and flop down in this place for her wallow and in a few minutes get out and return to grazing again. So the day is spent in alternate wallowing and feeding, except when the animal has a sufficient amount of food. Then she will lie down and sleep. This is a regular routine from day to day and the little pigs as well will very soon take to the bath.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

A Perfectly Safe and Reliable Remedy for Sore Throat Chest Cold Backache Neuralgia Sprains Strains Lumbago Diphtheria Sore Lungs Rheumatism and all Stiff Joints

REMOVES THE SORENESS--STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $120.00 paid in doctor's bills." OTTO A. BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet R.

The LAWRENCE-WILLIAMS COMPANY, Cleveland, O.

The California Limited Oil Company, operating in the Kern river oil fields near Bakersfield, has set out 25 acres of the oil land owned by the company to oranges, giving an indication that orange growing on an extensive scale may be started in the local oil fields. Washington navels are being planted almost exclusively, although a few lemon trees are being set out as an experiment. The grove will be irrigated from the domestic water supply of the company, which affords a large supply of water for pumping at a lift of 400 feet. The water is piped to the high points of the orchard.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Sixth day Relay Race.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

For conditions of relay and any other information address

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

Nineteen Years A Success

And Still Leads Them All

ISAAC P. DANDY
General Photographer, Enlarging, Etc.
Alesia, Md., May 22, 1915.
TROY CHEMICAL CO.,
Binghamton, N. Y.

As I truthfully owe you this, I will say, some time ago I had a mare with a ring bone. She was fired. I then had her blistered by two doctors and neither could do her any good. She was so lame at that time I couldn't hardly get her out of the stable and she had a running sore about the size of a silver dollar and about a half inch deep.

I sent for a bottle of Save-The-Horse and used it as you directed and in three weeks she was as game as ever, and never went lame a step since; it was the cheapest bottle of medicine I ever bought and it did all you claimed. As I am widely known in the state of Maryland if any one wishes to see or write to me, I will gladly tell what Save-The-Horse has done for me. Wishing you great success,

Yours very truly,
ISAAC P. DANDY.

CURES THREE

Springwater, N. Y., Feb. 16, 1915.
TROY CHEMICAL CO.,
Binghamton, N. Y.

Dear Sirs: Please send me your new book. My father cured three horses with the Save-The-Horse. One had a spavin and one had a bunch just above the hoof and one had the heaves, so she was not worth one dollar. They are all sound horses today.

Yours truly,
LLOYD COLEGROVE, R. No. 2.

CANADA MAN WITH ONE BOTTLE CURES TWO

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

FOR SALE

RACING AND BREEDING MATERIAL

from the establishment of the late

WENDELIN J. MILLER

of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½ stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½ stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½ winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

TWO-YEAR-OLD FILLY by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

LULU MACK (dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

MRS. W. J. MILLER, Chico, Cal.

L. B. DANIELS, State Fair Grounds, Sacramento, Cal.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

Simply "press up" the carrier

The Easiest Repeater To Unload Is The

W **WINCHESTER**

MODEL 1912

Hammerless Repeating Shotgun

We copy the instructions covering the unloading of the magazine from our catalog:

To remove the loaded shells from the magazine without working them through the action, press up the carrier. They will then be forced out by the magazine spring.

That's all there is to it. In fact, the instructions may be compressed into these four words, "Press up the carrier." No gun that we know of can be unloaded so simply or so readily. This is one of the many features that commend this gun so highly to shooters. Others are set forth in our illustrated circular. Send for it. It's full of information and free. Dealers everywhere sell Winchester guns.

TWO NOTABLE EX-CALIFORNIA SIRES.

Coincidences are sometimes merely curious—and again, they may be much more than that. Among those falling in the latter classification are the ones that marked the decision of the two great $20,000 stakes at the recent Panama-Pacific Exposition at San Francisco. We refer to the facts that the winners of both, the trotter Spriggan 2:08¼ and the pacer White Sox 2:05¼, were each by a son of McKinney 2:11¼. At any other meeting this would have been merely a curious item, perhaps—though still, we would say more than that. But, occurring as it did at the one in question, it was something far different.

By all means the greatest trotting progenitor ever identified with the Pacific Coast was Electioneer, the "monarch of Palo Alto." That renowned stallion died in 1890, and at that time there was growing up on the coast a colt that had been taken there undeveloped, which was destined to become the greatest speed sire that has ever flourished there since Electioneer's day. This was McKinney. We need not refer, more than by mention, to his wonderful career in that part of the U. S. A., alike as a performer and a progenitor. It raised him to such a pitch of fame that he commanded a price of $25,000, which Mr. Henry B. Gentry paid his owner, Mr. C. A. Durfee, in order to bring him east, where the demand for his services had become insistent. And only a couple of seasons later Mr. Gentry resold him to his present owner, Mr. William Simpson, of the Empire City Farms, for double his cost, or $50,000—the sale taking place a few moments after his great California-bred daughter, Sweet Marie 2:02, had won a Transylvania so thrilling that it will never be forgotten.

McKinney is still hale and hearty at twenty-eight, he having been foaled in 1887, but is now retired from public service. Unlike many other sires that won brilliant successes in California and were brought east on the strength thereof, he has been also wonderfully successful this side of the Rockies. It was shortly after arriving here that he sired Baron McKinney 2:10¼, the sire of Spriggan 2:08¼, winner of the $20,000 trot at San Francisco; while only a few seasons before leaving California he had sired Del Coronado 2:09½, the sire of White Sox 2:05¼, the winner of the $20,000 pace. Both Baron McKinney and Del Coronado were themselves Grand Circuit winners—and the former, but for a series of misfortunes, would undoubtedly have secured a record several seconds below 2:10. But this is not all of the McKinney blood in these two winners—for White Sox, in addition to being by McKinney's son, Del Coronado, has for a grandam a daughter of the same imperial progenitor, the pacer Jenny Mac 2:09, in her day a race mare of class, and now a noted matron. Again, we may also observe that not only did W. G. Durfee, son of C. A. Durfee, "the man who made McKinney famous," drive White Sox to victory in the $20,000 pace, he also drove the winner of second money in the $20,000 trot, Virginia Barnette, and, as our table of the winning reinsmen at the Panama-Pacific meeting, printed last week, shows, headed the list with $17,137.50 to his credit.

There is, however, one circumstance still to be noted that we cannot view with such pleasure—namely, that both the winning sires, Baron McKinney and Del Coronado, are now exiles from their native land. With their usual good judgment, the foreign buyers acquired them some time ago, and each is now far away across the water. When their European owners read the San Francisco summaries, they will assuredly feel well pleased with their recent purchases—while the American breeders who allowed these two horses to slip through their fingers, almost without a passing thought, will have food for reflection of an altogether different sort.

A trotter capable of trotting the sixth and seventh heats of a winning race, over a half-mile track, in 2:13¼ and 2:15, even if in a postponed event, is surely a performer deserving special comment. This feat was performed last week at the meeting at Cranwood Park near Cleveland, O., by the seven-year-old stallion Electric McKerron in the 2:20 class, in which he defeated ten classy competitors. Electric McKerron is further interesting to us because he is owned right here in our home city of Chicago by Mr. A. B. Getty, who has for a long while been known as an ardent admirer of light harness race horses and the owner of quite a few good ones. Beyond that, he was raised here in our home state of Illinois by one of its leading breeders, Mr. John Calder, of North Henderson, who has previously sent out to the races numerous notable winners, including that grand trotter Redlac 2:07½.

Electric McKerron is well enough bred to do almost anything in the line of fast trotting. He is by John A. McKerron 2:04½, that great race horse and sire whose name is a "household word," and his dam is Ellene 2:28¼ (double progenitor), by Electioneer 125; grandam Lady Ellen 2:29½ (dam of seven and grandam of eleven) by Carr's Mambrino 1789. Lady Ellen was, if we recollect aright, the first mare to produce two daughters, own sisters, that each produced a 2:10 trotter. These were Helena 2:11¼, dam of Orlean 2:09½, and Nelly May, dam of Baron May 2:07¼. Both Helena and Nelly May were by Electioneer also, hence own sisters of Ellene—and as the last named's son, Electric McKerron, on his race at Cranwood last week, must surely be able to trot a mile track in 2:10, there is an early possibility that ere the season closes Lady Ellen will enjoy the unique distinction of being the dam of three mares, all own sisters, each of which has produced a 2:10 trotter.

It would also appear that John A. McKerron, who already has five 2:10 trotters to his credit, is in line for two more in the near future—Electric McKerron and the three-year-old colt Deroche (2:22½ at two), that has worked for Mr. Geers in 2:11¼ recently, and is, we understand, to be given a new record at Cleveland this week, pending his debut in the Grand Circuit colt stakes.—Horse Review.

The publicity agent of the Omaha Driving Club is sponsor for the report that Marvin Childs will hereafter make the Nebraska City the headquarters of his training operations, and surface indications give a fair basis for such a prediction. Edward Peterson, Marvin's principal patron, is the head of the Omaha association that is putting that town back on the map, and it would no doubt add much pleasure to that gentleman's ownership of horses if he could see them regularly in their work, as Mr. Peterson is one of the kind who owns horses because he likes them. Childs is one of the young men who are rising rapidly in their profession, and a permanent location at Omaha would bring him all the patronage he desired, or could take care of. California and the northwest will miss him, but Omaha will be ahead one good humbre and a live wire trainer if he does decide to call her home.

GREAT ENTRY LIST AT OMAHA.

When the Omaha Driving Club announced some months ago that they would attempt to put Omaha back on the trotting map, horsemen throughout the country rejoiced exceedingly and promised their support. Omaha is one good town and the people behind the driving club are the right sort, but the support that really materialized for the three-day meeting of August 5-6-7 must have surprised even its sponsors. Five thousand, six hundred dollars was put up for the initial event, the various classes receiving the high average of twenty-four entries, the original nominations ranging in number from nine to forty-one, as follows:

2:30 trot, $500—Custer Boy, Tommy Hooper, Harty Bingen, Minnie Obtin, MacRose Queen, Ben Nutwood, Timothy Hall, Queen Traveler, Pronto J., Charley Marrs, Mighty Ghould, Wineschenk, Fred R., California B., Col. Vidmer, Red Rico, Great Ivan, Sand Hill Pete, Belle W., Allie Axwood, Little Hunter, Bill Murry.

2:22 pace, $500—Peter Craig, John B., Cotton Patch, King Will, Reba R., Fire Alarm Jr., Major Constantine, Brown Betty, Fred Hill, Doctor H., Bessie Winfield, Bob Strong, Eva Direct, Virginia C., Marquis Bay, Shadeland Nutwood, Miss Clark, Colonel Hunt, Western Flyer, Tiptop, Don Quixote, Armadillo, Frank Holloway, West Point, Charline, Myron Onslow, Star On, Ellen Chimes, Van Sickle, Red Wood, Happy Heart, Debently, Karo, Ludwig C., Louie Mack, Red Rose, Thorson, Will Wantoo, Nancy V. C., Jennie Fitzsimmons.

2:15 trot, $500—Miss Omer, Tena G., Heir Reaper, Dr. Wayo, Jim O'Shea, Sweetwood, A-1, Murdo Mc, Lord Duke, Aubrey O., Golden Rush, Louise, Arondo, David Look, Ina Archdale, John Emerson, Dr. C. H. Cole, Billy Murry, The Orphan, Watsey Todd, Edith All Tell.

2:19 trot, $500—The Orphan, Billy Murry, Jack Paine, Geo. Summers, The Chief, Seal Allerton, Ina Archdale, John Emerson, Great Northern, Bolock, The Corsair, Watsey Todd, Kitty Red, Golden Rusk, Desmoines Bell, Joe Vincent, Homer Allerton, Charm King, Edith All Tell, Allie Medium, Hick, Harry Onslow.

2:12 pace, $500—Shady Butterfly, R. W. E., Kid Riley, Cambridge Bell, Cecil Boy, C. D. M., Strathtell, Shadeline, Radview, M. F., Fay Bernard, Axcybeta, Bertha Creighton, Annona, Allator, Mollie Bringer, Irene Beau, Budweiser, Adrian R., Hal Patch, Danpa, Prince Arlington, Joe Joe.

Three-year-old trot, $300—Rose Hedgewood, D. I. Burke, Sweet Aubrey, Daisy Todd, Bin Bon, Busy Todd, Office Boy, Lord Archdale, Billy Todd.

2:08 pace, $500—Adrian R., Irish Lad, Sir Lain, Axcybeta, Irene Beau, College Gent, C. D. M., M. F., Cambridge Bell, Hal McKinney, Columbia Fire, R. W. E., Prince Arlington.

2:24 trot, $500—Dolly Dimple, Kitty Red, Belle W., Allie Axwood, Hick, Charm King, Tommy Hooper, Sand Hill Pete, Red Rico, Great Ivan, California B., Fred R., Mighty Ghould, Charley Marrs, Pronto J., Timothy Hall, Ben Nutwood, Custer Ray, The Orphan, Billy Murry, Harry Onslow, Nutwood Lou, Ei Bel Maden, Ira Thorn, Little Hunter, Harty Bingen.

2:17 pace, $500—Ocean Wave, Johnnie Mills, Red Wood, Ora Vidmer, Dan W., McVerde, Belle W., Van Sickle, Helen Chimes, Star On, Myron Onslow, Charline, West Point, Frank H. Holloway, Armadillo, Don Quixote, Western Flyer, Shadeland Nutwood, Bob Strong, Doctor H., Brown Betty, Bessie Winfield, Major Constantine, Bill Curtis, Reba R., King Will, Colonel Hunt, Happy Heart, Debently, Last Chance, Louise Mac, Red Rose, John B., Allator, Mollie Bringer, Budweiser, Fay Bernard, Bertha Creighton, Ludwig, Thorsen, Jennie Fitzsimmons.

Entries close August first at Vancouver, B. C., and Spokane. Good purses, good tracks, good treatment to all comers.

VANCOUVER, B. C.

Vancouver, B. C., July 10, 1915.—The Vancouver Amateur Driving Association staged a nice program of harness races here today before a well pleased crowd of spectators, the receipts for the afternoon going to help swell the patriotic funds being raised in support of the Red Cross and Daughters of the Empire. The fields were not large but the events were well contested, with the time in a number of heats highly creditable.

Vancouver, B. C., July 10, 1915.

Marketing Young Stallions

This is a day of opportunity for the breeder of purebred horses in America, remarks a recent correspondent to the Breeders' Gazette. The war in Europe has knocked the bottom out of the horse importing business. Trainload after trainload of horses is being sent to the seat of war. Country newspapers are reporting that scarcity of horses exists due to the fact that so many have been sold. Prices everywhere for good horses are fair. The outlook for the future is splendid and encouraging. In the immediate future farmers are going to raise many horses. This will mean that there will be a very strong demand for breeding stock. There is a stronger tendency than ever before to produce horses of good market quality. To that end purebred sires of large size and the right quality will be sought. Stallion laws in many states are exposing grade, scrub, and unsound stallions and undoubtedly their numbers are decreasing, causing a corresponding increase in the numbers of purebred stallions.

The owner of young purebred stallions is very naturally desirous of securing the highest prices possible. The American farmer is comparatively inexperienced in selling purebred horses and must in a single season rise to meet the situation or else fail to secure the most of his opportunity. Underneath the whole proposition of selling to the best advantage

A "home-grown" draft colt of winning caliber
SALVADOR FOREST KING 13385
Champion Shire Stallion at California State Fair, 1914, and now owned by E. W. Westgate, Rio Vista—"Ready money" at any time, and especially valuable under conditions created by the war.

there lies the old time-worn principle of salesmanship which is "to please the buyer." American importers of horses have long catered to the buyers' demands. Importers have fattened their horses, they have taught them to show well, knowing that the buyer would select for size and weight and manners. Breeders of purebred beef cattle have long been catering to the whims and fancies as well as to the just demands of the buying public. At prominent sales of purebred beef cattle the offering is brought out in a marvelous condition of size, flesh and training.

The young stallions must have size, flesh and training to sell for the best. Feed of good quality and plenty of it with the right care is necessary. If feed is in any wise stinted the product will never grow to his full normal size, nor will he develop his best draft type. Of course feed will not make a first-class animal out of one possessing inferior characteristics. However, any animal will be distinctly more salable when well fed and developed to his greatest possibilities.

There is nothing extraordinary to suggest as feed, possibly there is nothing new. Simply the good old-fashioned farm feed liberally used will accomplish the purpose. Pasture must not be neglected. Corn-belt pastures are universally poor during summer-time. Horsemen must learn to provide better summer pasture. Not long ago I asked a noted stockman for his opinion as to America's greatest drawback in the production of good horses. He had lived in England and had traveled through other European countries. His reply was: "The lack of good summer pasture."

A two-year-old that is to be sold next winter or spring as a three-year-old needs grain during the summer, fall and winter to increase his growth and to put him into attractive form for selling. The yearling needs grain to cause him to grow into a big heavy drafter. Oats are the staple grain for growing colts. Good ear corn can be used as part of the ration with splendid results. In the north pease may well make up a part of the ration. The first two-year-old stallion I ever cared for was fed as follows: Ear corn in the morning, oats at noon, and at night a big feed of bran with cooked pease and oats, and all this covered with skim-milk direct from the separator. He grew three pounds per day during the summer season. If hay is needed, alfalfa or clover of good clean quality is undoubtedly best. A growing drafter needs protein and either of the above will supply that in abundance. Where there are several young stallions it is best for them that they be allowed to run together away from the horses.

There will be a market for all good young purebred stallions. The man in a remote locality with only a very limited number, perhaps only one or two, may think that he is handicapped. He can secure a market by advertising. County draft horse associations may unite to sell their surplus stock. It would be a very easy matter for the secretary of a local or county association to keep a list of all stallions available for sale. Advertising could be done in the name of the association; prospective purchasers could be informed by the secretary where their needs could be filled. If advisable a joint sale could be held. Showing at fairs and horse shows will prove a splendid opportunity for selling. Men who have been importers previous to this year will be out looking for likely young stallions. We may well expect the ex-importer to become a dealer in homebred stock. The market for real desirable young stallions is very promising. It remains simply for the American breeder to take advantage of it.

TROTTING PROGRESSES IN WESTERN AUSTRALIA.

The past fortnight has seen much advancement in the work of the Western Australian Trotting Association. Grounds have been secured on the goldfields and at Fremantle at considerable cost. This evidences the determination of the Association to foster the sport and to assist in its introduction to parts where it has hitherto not been indulged in. Progressiveness on the part of any organization is made only when opposition has been overcome and in this particular the Trotting Association has had its experiences. It is still having them, for there is opposition from many quarters. Other bodies see in the progress of trotting that which will be harmful to their interests, for there is no doubt that the popularity of this form of horse racing has had an effect upon galloping meetings and the attendances thereat. Though most racing men are good sportsmen it is not expected of them that they will view with equanimity the introduction of a form of sport that is likely to form a serious rival. The proprietary interests are not solely those that have viewed this onward march of the trotting people with alarm. Those who are at the head of affairs in other clubs are finding that the once despised trotting enthusiasts are very much in the limelight.

The acquiring of grounds at East Fremantle and Kalgoorlie has added further to the attention which trotting is demanding, and there has been perturbation both at the Port and on the goldfields in consequence. Though the Boulder people extended a we come to the visiting committee men last week the was not any rush on the part of the representative of the racing clubs to welcome those who are intr ducing trotting. There has, however, always bee this want of encouragement shown towards trottin and it has demanded a good deal of determinatio and grit to place the sport in the position that i holds today. However, the executive of the Associa tion anticipate big success for trotting on the gol fields. They have not lost any time since their visi A day or two ago we had an opportunity of lookin at the plans for the new course which is to be lai out at once. It will not be many weeks before th goldfields people will have a new course with a half mile track 70 feet wide, and with straights over eigh chains in length. The enclosures will be spacious and the other appointments of the most modern kind The Kalgoorlie-Boulder train line runs along one boundary of the course, and the Boulder Block line along another boundary. The electric lighting of the track alone will be done with 100 lamps, of 1000 candle power each.

The East Fremantle ground is also bordered by a tram line. It is just about a mile from the center of the city, and is as suitable a place as could be imagined. It is a natural amphitheatre, and will permit of the laying out of a track of any size, while there are slopes that will provide ample accommodation for thousands of spectators. It is somewhat surprising that this place has been allowed to lay idle for so long. On this ground, also, the Association proposes to expend some thousands of pounds, and to introduce to the people of Fremantle and suburbs racing under electric light on as lavish a scale as that enjoyed by thousands of people in Perth.—W. A. Sportsman.

THE PSYCHOLOGY OF CROWDS.

Chicago had a 500 mile automobile race last Saturday. In less than two months a corn field was turned into a two-mile board track speedway by promoters unknown to the general public and all Chicago sat up and took notice.

Why? Because everything was done on a large scale. The two-mile track, the millions of feet of lumber, a regular army of workmen (pictures of the pay line were impressive), the size of the purses, the wide advertising, all contributed to stir Chicago as it has not been moved in many a day.

First prize $20,000, second prize $10,000, and eight other prizes from $5,000 to $1,400; totalling $50,000, all for one day's program. The figures were staggering. "This is no cheap show. This is a big game. We must see it," said Mr. Chicago, and Mrs. Chicago agreed, just as she had expected to agree all along.

Why do we mention these things in a horse paper? Because there is a lesson here for the secretary of every race track. And if the secretary reads it right he will study the psychology of crowds. One could write a book on that subject. Someone should do so. And race track secretaries should read it.

Methods that used to attract crowds will not do so now except, perhaps, in rural communities. Suppose the Chicago auto derby had been "put on" like the average county fair and race meeting. It wouldn't have attracted 5,000 people. But it was handled in an up-to-date way, by men who understand the psychology of crowds, and they were not afraid to risk $50,000 in prizes on a one-day affair and they took in $400,000 at the gate.

Locally, Chicago is one of the deadest towns in a trotting-horse-race-meeting sense we know of. But we venture the prediction that if there was money enough behind the right people to put on a one-day meeting with $50,000 in prizes, and the meeting was handled by one who understands the psychology of crowds, that $100,000 could be taken in at the gate! Of course the track would have to be weather-proof.

We venture another prediction. If the secretary of the smallest racing association in the United States would manage his meeting in a similar but proportionate manner he would double, if not triple, his gate receipts.

Our Indiana correspondent has called attention to the fact that the Indianapolis News quoted betting odds on the recent annual 500 mile race in that city, and rather condoned gambling in connection with that event, yet, when Indianapolis tried to put on a Grand Circuit meeting with betting, the News called on the sheriff to stop gambling!

Now a newspaper may lead public sentiment but can't buck it. A strong newspaper is one that keeps one step ahead of its readers, going in the same direction, but not leading. When the editor makes a statement it should be one (as we once heard Arthur Brisbane remark) that causes the reader to say to himself: "Those are my sentiments. That is the way I would have written that editorial. I haven't given the matter close thought, but if I had done so, I would have arrived at a similar conclusion, etc."

The Indianapolis News is wise. It knows that the public is inclined to "slop over" once in a while. On a holiday people do things which at other times they would criticise There is a tinge of gambling in every one's blood. People who would protest in horror against a 30-day running meeting with gambling, or against a 6 day trotting meeting with gambling will themselves wager a small amount on a one day 500-mile auto race, conducted on a big scale, and held but once a year.

And so we recommend that race track managers spend a quiet hour now and then in contemplating the psychology of crowds.—Horseman.

AN FRANCISCO-CALIFORNIA CLUB MATINEE.

St. Patrick, J. J. Ryan's performer that hasn't issed a matinee this season, trotted away with the ree-for-all event at the exposition track last Sunday n straight heats. In the first he breezed to the wire n 2:15 ahead of Monica McKinney, and in the se held Birdeye safe.

The 2:12 pace was more of a contest, and it re-orded a big surprise when Dick W., winner of the ig pace on Independence day, was defeated. Dick .V. was a sick horse and made a poor showing in onsequence. The winner turned up in George Gian-ini's game little Bradmont, who came on with his isual stretch paces to take the last two heats. In the irst Pointer Bell acted kindly and beat Jack. In the econd Bradmont out-dueled Dick W., and in the hird and final heat the little racer led Jack to the wire.

The 2:15 pace was a split-heat affair, with Ham-burg Belle, Emma M. and Senator H. each getting 'a first. Hamburg stood best in the summary.

The 2:20 mixed was marred by an accident in the second heat. After Victor Pointer beat Rose O. in the first heat the pair were in close contention at the quarter pole, when Victor shied at a shadow, Rose O. put her foot through Victor's sulky and the pair went down. The drivers luckily escaped injury, but Rose O., J. J. Ryan's promising three-year-old, hurt her leg and was drawn. Victor came out in the third and final to beat Peaches. The summary:

First race—2:15 pace:
Hamburg Belle .....(J. Ginocchio) 1 2 3
Emma M. .....(Wm. Malough) 2 4 1
Senator H. .....(Joe Kidd) 4 1 3
Tom Murphy .....(E. T. Ayres) 3 3 dr
Time—2:16¼, 2:14, 2:16.

Second race—Free-for-all trot:
St. Patrick .....(J. J. Ryan) 1 1
Birdeye .....(Combatalade & Robbins) 3 2
Monica McKinney .....(D. E. Hoffman) 2 4
Kinney Lou, Jr. .....(R. Burton) 4 3
Time—2:15, 2:16¼.

Third race—2:12 pace:
Bradmont .....(G. J. Giannini) 3 1 1
Pointer Belle .....(Joe Kidd) 1 6 6
Jack .....(McDonald & Conlan) 2 5 2
Dick W. .....(A. Ottinger) 6 2 5
Happy Dentist .....(J. Ryan) 4 3 3
Delilah .....(Frank Goulart) 5 4 4
Time—2:11¼, 2:12½, 2:13½.

Fourth race—2:22 mixed:
Victor Pointer .....(D. W. Keating) 1 * 1
Peaches .....(R. Burton) 3 1 2
Rose O. .....(J. J. Ryan) 2 * dr
Time—2:17¼, 2:31, 2:22.

*Did not finish; accident.

KEARNEY (NEB.).

Kearney, Neb., July 1.

2:19 trot, purse $400:
Peter Dallas, b g by Peter Kane.....(Williams) 1 1 1
Great Northern, br g by Wayland W.....(Ward) 3 3 2
The Corsair, b h by Walnut Hall.....(Huber) 4 2 3
Baffin, br h by Bingara.....(Dennis) 2 5 4
Jack Panic, 6-4-8; George Summers, 5-7-6; John D., 8-6-9; Homer Allerton, 9-8-6; Nat U Rich, 7-9-7.
Time—2:17¼, 2:18¼, 2:16¼.

2:17 pace, purse $400:
Zomblack, bl h by Zombro.....(DeRyder) 3 1 1 1
Jenny Fitzsimmons, b m by Bob Fitzsimmons .....(Dennis) 1 2 2 2
Ora Vidmer, bl m by Major Vidmer..(Ginger) 2 3 5 5
Last Chance, ch g by Prince Online..(Rhodes) 7 5 3 3
Shady Lady, 6-6-4-4; Fay Bernard, 4-4-7-7; West Point, 8-7-dr.; Gratta, 5-dr.; Armadillo, dis.
Time—2:19¼, 2:19¼, 2:15¼, 2:18¼.

Three-year-old trot, purse $300:
Allie Watts, ch f by General Watts.....(Edman) 1 1
Forest Bingen, b c by Albingen.....(Forest) 2 2
Daisy Todd, b f by George Todd.....(Rhodes) 4 3
D. J. Burke, b g by The Corsair..... Huber) 3 5
Bin Bon, 5-4; Alf D. M., 6-6.
Time—2:24¼, 2:23¼.

July 2—2:24 trot, purse $400:
Pronto J., bl g by Strathway.....(Sebastian) 1 1 1
Charm King, b m by Norval King.....(Morton) 3 2 2
Socius, b h by Spokane.....(Dennis) 2 3 3
El Bel Maden, b m by Almaden D.....(Ward) 4 4 5
Dolly Dimple, 5-5-4; Sand Hill Pete, 7-6-9; Ivan Thorne, 8-8-6; California B., 6-7-8; Kitty Red, 9-9-7.
Time—2:25¼, 2:24¼, 2:24¼.

2:22 pace, purse $400:
Josie Knight, gr m by Twelfth Knight .....(Dennis) 2 1 2 3 2
Don Quixote, b g by Argus.....(Huber) 8 2 1 2 3
Redwood, ch g by Aldenwood....(Coombs) 3 3 4 5 4
Frank Holloway, ch g by George W. Mc-Kinney .....(Sebastian) 10 11 3 1 1
Mabel Barrister, 9-7-11-6-5; Ludwig C., 6-6-10-7-dr.; Van Sickle, b h by Gambetta Wilkes, 1-9-8-5-dr.; Nancy V. C., 11-8-9-9-dr.; Madam Mack, 4-12-5-4-dr.; Charline, 5-5-7-dr.; Helen Chimes, 7-4-6-dr.; Colonel Hunt, 12-10-dr.
Time—2:19¼, 2:19¾, 2:20¼, 2:20¼, 2:23.

Three-year-old pace, purse $300:
Oregon Hal, br c by Hal B.....(Dennis) 3 1 1
Sir Archibald, bl c by Ash Bud.....(McKay) 1 3 2
Arkancello, b c by General Watts.....(Edman) 2 2 0
Baron Cochato, bl c by Cochato.....(Chandler) 4 4 0
Time—2:23¼, 2:29¼, 2:25.

July 5—2:30 trot, purse $400:
Mamie O. C., b m by Fair Exchange.....1 1 1
Great Ivan, b g 6 2 2
May Harriman, b m 7 6 3
Fred R., Charlie Mars, California B. and Belle W. also started.
Time—2:19¼, 2:22¼, 2:20¼.

2:08 pace, purse $400:
College Gent, bl g by Kentucky Patterson .....(Barnes) 6 2 1 1 1
.....(Stantz) 2 3 3 2 2
Columbia Fire, b g.....(Williams) 3 5 6 4 3
Dan Mack, b g.....
Ovieda, Hal McKinney and Shadeline started. (Ovieda won the second heat, establishing a track mark of 2:10)
Time—2:12¼, 2:10, 2:11, 2:13, 2:15.

2:15 trot, purse $400:
Dr. Wayo, b s by Wilkhurst.....(Ward) 3 2 1 1 4
Merlo Mac, b m 2 3 4 2 5
Lord Duke 4 7 3 4 2
Bertha Carey, Tena G., Grand Chimes, Aubrey O. and Nat U Rich also started.
Best time—2:15¼.

2:13 pace, purse $400:
Trixie Bee, s m by Bee Gee.....(Sebastian) 2 4 1 1 1
Axcybetta, ch s .....(Aulger) 1 2 3 4 2
Danica, b m .....(Huber) 3 1 4 3 3
H. T. and Major Hardie started.
Best time—2:15.

WALTER MOORE PICKS HISTORY MAKERS AT CLEVELAND.

According to the reports emanating from the vicinity of the North Randall track at Cleveland where the Grand Circuit for the season of 1915 opens next week there are more high class horses quartered there at present than at any time in its history. The west has sent a number of excellent stables, whose personnel and performance are fully known to our readers, and from all other quarters of the country have gathered tens and dozens and scores and hundreds of the best trotters and pacers ever brought together, the number now on deck being in excess of the three hundred mark.

With such an array of talent in evidence, the pencil pushers of our eastern contemporaries have had much to write about of late, quite a bit of their comment having previously filled their western engagements on the scissors circuit by appearing in these columns. Of the various news letters from the Ohio speedway, however, none have been more interesting than that of Walter Moore in the current issue of the Horse Review, from which are gleaned the following paragraphs concerning the "six best bets" for the future's history makers:

* * *

At a track where there are more than 300 horses at work there is sure to be some chaff among the wheat, but I think it is the unanimous opinion of the North Randall visitors and watch-holders on work-out days, that more good horses can be seen here now than was ever noted among a like number. I asked a number of experts to name six of the ones most likely to make turf history this year, or the stars of the day now at work at North Randall. The list was made prior to the arrival of the Murphy stable, and here it is in the order of their estimate: Volga (2), sister of Peter Volo (3) 2:03½, Billy Andrews' futurity two-year-old; Peter Mac (4) 2:10½, by Peter the Great, owned by Capt. David Shaw and trained by Mike McDevitt; William p. (4) 2:00, owned by A. E. Van Atta of Otterbein, Ind., trained by W. W. ("Billy") Marvin of Lafayette, Ind.; Atlantica (2), by Atlantic Express 2:08¼, dam The Huntress (dam of Margaret Druien (4) 2:05¼), by Onward Silver, owned by Hillanddale Farm, Lexington, Ky., and trained by John Dickerson; The Toddler (4), by Kentucky Todd, trained by Harry Stinson, and Single G. p. (4) 2:07¼, by Anderson Wilkes, owned by W. B. Barefoot, Cambridge City, Ind., and trained by Curt Gosnell.

All of my experts placed Volga first by many points. One said she can do as much or more right now than Peter Volo could at the same age and time. John Dickerson said: "She is the greatest two-year-old yet foaled. She can jog a mile in 2:10. I thought I had a great filly, the best one I had ever seen, when I left Lexington, but, pshaw, Volga will lose my filly if she stays in form." This is about her story. She is, as stated, an own sister of Peter Volo, two years younger, by Peter the Great, dam Nervolo Belle, by Nervolo p. 2:04¼, grandam Josephine Knight by Betterton 8022, son of George Wilkes 2:22; third dam Mambrino Beauty (dam of H. R. Hiatt, sire of Uncle William 2:07¼) by Mambrino King. I learned this week, and believe it has never been in print, that Nervolo Belle paced in 2:11 as a two-year-old for Scott Hudson. She is already the dam of three, and her breeding shows that while Volga and Peter Volo may have a dam by a pacer, she might be expected, both on breeding and self-ability, to produce champions as she has.

Volga is named for a river in Russia. A medium sized, burnt chestnut in color, with a reddish mane and tail, many of her shades of chestnut resembling those seen in Independence Boy p. 2:01½, but all my experts liken her to Lou Dillon p. 1:58½ in poise and color. Unfortunately for me, I did not get to see her work, but she is described as a noiseless eight-cylinder type of trotter, with a head full of trot, which makes trotting to her as easy as play. She is a little straight on her front ankles, and very straight legged behind, but as sound and fresh as new. She is ready for speed with 7-oz. shoes and 2-oz. weights forward, and plain light shoes behind. Her best work is a mile in 2:14½, a separate half in 1:03¼, and a quarter in :30½, but mind you, she can do a lot more if allowed to.

The next among the six greatest was made so by the rain of Wednesday, forcing the trainers to work over the wet-weather half-mile track. Mike McDevitt came out with Peter Mac (4) 2:10½, while the track was crowded with horses and a rather large harrow was also taking up the pole position as it traveled around. Peter went away in a hurry, passing the harrow near the quarter pole, gliding on around among the horses. When he started around the first turn the second time, he swerved out as if to take up, but Mike sighted him on around the turn, turning him rather abruptly when fully out to fourth place. Down the back stretch he was tearing along and finished not forced, but rating right along. A crowd of onlookers near the gate, among them "Doc" Tanner, thought to joke Mike by declaring the mile much faster than they supposed it had been trotted. In unison they announced 2:11¼ as their time, expecting a strong denial from Michael, and he did look surprised, but from another angle, as his timer registered 2:10 1-5, while from the timers' stand rushed Mr. Hopkins and showed his timer, which registered 2:09 4-5, and Mike had the laugh on the fun makers. The track was not fast, in appearance, and the conditions of the work well out in the track around harrows and other interferences made it look to the entire party like the most remarkable mile ever trotted over a half-mile track. He is a very fine type of race trotter. Fortunately, I think, for the other stake trotters, Peter is not staked and will not be raced this year.

The next of the selected six was William p. 2:00, chosen on account of his looks and work since coming to North Randall, June 14. The first horseof real interest that I noticed work on my arrival at the track was William. The critics said he is great and Marvin has discarded seven ounces from each front shoe. He is bigger, stronger and lighter gaited. About that time Marvin worked him in 2:10 as easily as a Packard goes 10 miles an hour. The next time he came out, Marvin asked Billy Andrews to work him a mile. "How fast?" asked Andrews. "About 2:07½," said Marvin. "I won't miss it a quarter of a second," said Andrews. The mile was in 2:05½, last half in 1:00, last quarter in :29½, with Andrews laying back among the cushions.

For the first time in a long acquaintance with Marvin I saw him show a little animation as he said: "That's the first time I ever saw the colt" (meaning William—not Andrews) "at speed." He had previously been in 2:04½, last half in 1:00, last quarter in :28, so you san see that he has some whiz right now."

Then I investigated the shoeing story, and here it is from the cradle up. Unlike most any pacer in the books, William wanted to trot when shod light, even when being started as a two-year-old, he at one time carried 24 ounce shoes and 4 ounce weights. Think of that for a two-year-old pacer. When he first started as a three-year-old at Terre Haute, he had on 13 ounce shoes and 3 ounce weights and finished the season in 10 ounce shoes and the same weights. Last year he opened the season at North Randall with 10 ounce shoes and 3 ounce weights, and finished the season with 8½ ounce shoe and 3 ounce weight. In order to accnustom him to lighter weight, Marvin kept about the same weight on him all winter, and today he carries a 6½ ounce shoe and a 2 ounce weight—so the great reduction in weight is partly a myth. Marvin stated that William was in good health, which was apparent; that he thought he had gained a little in strength, and that Detroit would be his first start, when a comparison with his 1914 form could be made, which is a characteristically conservative statement of the champion's trainer.

Atlantica, John Dickerson's two-year-old filly, I would put next in the list of six greats, as she is a grand one. I believe she trotted a half in 1:06½ at Lexington, but if Volga was out of the way, would stand out among the two-year-olds. She has only been in 2:23 at North Randall, but will be let down the first good day and track.

Harry Stinson's Toddler, fifth on my list, worked twice in 2:10, and on his three-year-old mile last fall in 2:07¼, must stand in the compliment receiving line.

The last is my own selection and is based somewhat on what I saw him do as a three-year-old, and it is Single G. p. 2:07¼. He worked the Cambridge City, Ind., track before coming here in 2:10, last quarter in :29, but 2:13 is his best since arriving at North Randall. He is one that has been rather radically changed in his shoeing, as he has always gone with a much heavier shoe behind than in front, finishing the season last year with 8 ounces behind and 5 ounces in front. Now Gosnell has him shod with 4½ ounce shoes all around. He has had a lot of work this winter, many moderate miles this spring, and is probably better fitted than at any time in his life.

PETALUMA MATINEE.

[Exchange.]

A large crowd of devotees of light harness racing attended the races Sunday at Kenilworth Park given under the auspices of the Petaluma Driving Club. An excellent day's sport was furnished and much enthusiasm was manifested. The track was in good condition and several fair miles were reeled off.

The first race, 2:40 class mixed, was a tame event. Lady O, driven by Will Offutt, outclassed Nutwood Demonio and Nig, winning both heats and the race by a city block. The time was 2:41 and 2:38.

The second race, 2:25 class mixed, was a more thrilling affair and was won by Springtime. In the first heat Alameda Maiden driven by Jack Grimes led until the half mile pole was reached with Glenwood and Springtime close up. Alameda Maiden broke when her chances for winning looked propitious. Glenwood then assumed the lead and maintained it until the home stretch was reached. In a drive down the stretch Springtime won the heat in 2:30, Alameda Maiden was a tolerable third, Tom Mc was a poor fourth. Alameda Maiden took the second heat from Glenwood and Springtime in a furious drive down the home stretch. Time, 2:27. Springtime captured the third heat and the race from Glenwood with ease. Alameda Maiden ruined what chances she had of winning by making a bad break at the first turn. The time made was 2:29.

Glenwood Mc, the speedy son of By Mack, and Lady Glenway, driven by Jack Grimes, won from Clara C. and Petaluma Girl in straight heats. Time, 2:19, 2:19. Glenwood Mc won the first heat with Petaluma Girl second and Clara C. third with ridiculous ease. He was forced to extend himself in the second heat. Clara C., driven by Joe Ryan, led until Glenwood Mc overhauled her and won in a driving finish by half a length.

NORTHWESTERN CLASSES CLOSING AUGUST 1.

Owing to the fact that on June first a number of classes throughout the North Pacific Fair Circuit failed to fill, there are yet many opportunities open to western horsemen to make entry in excellent purses on August first, the closing date for the events yet open at several points, and on August thirteenth, when Salem closes.

First to be raced among the meetings where entries may yet be made, is the program at Vancouver, B. C., to be given in connection with the Vancouver Exhibition, August 14 to 21, the purses for trotters and pacers reaching a total of $5,500. The colt classes, which include a mixed event for two-year-olds and races for three-year-old trotters and pacers, respectively, are limited to babies bred and owned in Washington, Oregon, British Columbia, Montana, Idaho and Utah, but for aged horses the following events are open to all comers: 2:30 trot or pace, $500; 2:20 trot or 2:25 pace, $500; 2:25 trot, $1,000; 2:15 trot or 2:18 pace, $500; 2:15 pace, $1,000; 2:10 trot or 2:06 pace, $500; free-for-all trot or pace, $500. H. S. Rolston is the secretary, and the track holds membership in the American Association. In the face of every discouragement, our Canadian friends are doing their best to keep the sport alive, and they deserve the support of every horseman who can possibly arrange his campaign to include this meeting.

At Spokane, where Geo. P. Larsen is ably filling the post of secretary so long held by Bob Cosgrove, only one of the early closers filled, the 2:25 pace, leaving seven events to close on August first, all for purses of $750 and all on the three-heat plan. For trotters the classes are 2:11, 2:15, 2:18 and 2:25, and for pacers 2:11, 2:15 and 2:18, thus giving owners a good chance to race most members of their stable. The fact that Walla Walla and Spokane race during the same week need in no way deter horsemen from making entries at both points, as classes programmed on Monday at Walla Walla will be raced at Spokane on Thursday, and so on through the week, special arrangements having been made for quick transportation of horses between the two cities. The track at Spokane was never better, according to the boys training there at present, and the policies pursued in the past by Mr. Cosgrove in making the Interstate Fair popular with horsemen are being steadfastly observed by Mr. Larsen.

At Salem, which is the most pretentious meeting in the northwest and is also the last "big noise" before the fall meeting at the exposition, the open events range from $300 to $2000 in value, from slow classes to free-for-alls, the program having been recently reviewed at length in these columns, and appearing elsewhere in the present issue. W. Al Jones is the secretary to whose activities the Salem program owes its chances for success, and who will be glad to furnish inquiring horsemen with all information desired. Both the Salem and Spokane associations belong to the N. T. A.

CALIFORNIA'S INTERESTS AT NORTH RANDALL.

While harness horse activities on the Pacific Coast are at a very low ebb this season, the Grand Circuit opens Monday at the North Randall track under highly favorable conditions which point to a most successful season on the big line. In almost every instance the fields are large and well balanced, and the entrants in every event have shown "class" of a high order in their training or previous engagements.

The west is well represented, and in addition to locally owned horses that are in evidence there are many others that were wintered in California or raced at the June meeting at the exposition, so that the "stay at homes" this side of the big divide will watch the proceedings on the eastern tracks with unusually keen interest. The following brief synopsis of the daily programs gives the events in which our friends are entered:

Monday—2:08 trot, The Duchess; 2:07 pace, Rastus and Rose Equity; The Edwards, 2:10 pace, Hal Boy, O. U. C., The Beaver and Walnut Grove; Forest City Sweepstakes, two-year-old trotters, Anvilite.

Tuesday—2:19 trot, Loe Blossom; 2:12 pace, Hedgewood Patchen and Imbro.

Wednesday, 2:11 trot, Adbell M., Laramie Lad and Tom Smith; The Ohio, 2:09 trot, Albaloma, Alberta Dillon, Baby Doll, Mahomet Watts, McCloskey and Peter McCormick; 2:09 pace, Fleeta Dillon.

Thursday—The Tavern "Steak," for trotters that never beat 2:14¼ in a race, Laramie Lad and Seneca Boy; 2:17 trot, The Proof and Tropic Dawn.

Friday—2:05 trot, Star Winter; 2:21 trot, Loe Blossom.

The western contingent is, of course, up against the very best horses that the whole country affords, but if they stood the ship and change of climate in any sort of decent shape the whole fields are not going to finish ahead of them in any of the events.

Ovieda 2:05, the fast Idaho mare campaigned by Warren Dennis, set the track record at Kearney, Neb., in the 2:10 hole but failed to win her race.

◈ ◈ ◈

Bob Sebastian is giving a good account of himself down in the Central West, his horses grabbing first money about as regularly as those of anybody's stable, and very seldom ranking too far down to be in on the cash distribution.

RACES AT HEMET TODAY

The "open season" for neighborhood race meetings in Southern California is generally well along by this time, but the absence of the Durfee stable from Los Angeles has probably been the cause of the failure of the horsemen of that city to stage their customary July record meeting, Hemet stepping in ahead of them by putting on a modest card today. Two races are scheduled, and perhaps a few youngsters may be marked, the entries to the competitive event being reported by Secretary McFarland as follows:

2:18 pace, purse $50—Walter C., b h by Carpus-Thoroughbred, Geo. A. Schumacher; Fiesta Lou, b g by Wilbur Lou—Fiesta Queen by On Stanley, Hemet Stock Farm; Nealon, b g by Worth While—Nealy W. by Geo. W. McKinney, Frank Rees, Agent.

2:30 trot, purse $50—Pico Boy, br g by Zombro—by Hancock J., Bruce Morris; Don de Lopez, bl c by Kinney de Lopez—Eradiate by Geo. W. McKinney, Hemet Stock Farm; Sleepy Dick, b g breeding unknown, Geo. A. Schumacher, Agent; Crisis, br g by Zombro, Gilbert Spence.

TOMORROW'S MATINEE CARD.

The matinee program arranged by the San Francisco-California Driving Club for their regular weekly event tomorrow afternoon at the exposition track has an "intercity" air, owing to the presence of the stables of Messrs. Harry Cowell and Charley Silva, who are leading an expeditionary force from Sacramento. Five good races have been filled, the classes and entries being as follows:

2:15 pace—Emma M., Wm. Malough; Tom Murphy, E. T. Ayres; Palitea, John Kremer; Senator H., J. H. Kidd; Hamburg Belle, J. Ginocchio; King Pointer, H. Campodonico.

Free-for-all trot—Muggins, H. Cohen; J. C. Simpson, F. Goularte; St. Patrick, J. J. Ryan; Kinney Lou Jr., H. S. Durfee; John Mack, S. H. Cowell; Kid Cupid, Chas. Silva.

Free-for-all pace, special, cup presented by Luke Marisch—George Woodward, S. H. Cowell; Dick W., A. Ottinger; John Malcolm, Chas. Silva; W. J. K., W. J. Kenney.

2:12 pace—Bradmont, G. J. Giannini; Delilah, F. Goularte; Happy Dentist, J. J. Ryan; Pointer Belle, Kidd & Luce.

2:22 mixed—Rosie O., J. J. Ryan; Victor Pointer, D. W. Keating; Aerolite Jr., R. Roberts; J. V., Joe Vermet; Peaches, F. E. Burton.

THOROUGHBRED BREEDERS PROGRESSING.

The gentlemen composing the Golden Gate Thoroughbred Breeders' Association have held numerous meetings and conferences of late, with the result that the plans for their proposed running meeting to be held at the exposition track during the thirty days immediately following August 21 are beginning to assume definite form. Six races a day will be carded, the minimum daily offering being a total of not less than two thousand dollars, with the offerings on special days running generously in excess of that figure. Special events for gentlemen riders and army men will add variety and interest to the program occasionally, and the members of the association look forward to the deriving of much pleasure from the meeting, though they have small hope of profit.

With pari-mutuel betting in full swing under state sanction, the thirty day meeting at Reno begins this afternoon with plenty of horses present, from all reports, to assure good sport and plenty of it, seven races daily constituting the regular offering. The track is said to be a good one, though not especially commodious, its narrowness causing the fields to be limited to ten starters. Twelve machines and a like number of cashiers have been installed and speculators can get any sort of action they wish, straight, place or show, at sums ranging from two to ten dollars. A good many of the local followers of the game are in attendance, and the success or failure of the venture will be watched by California horsemen with considerable interest.

Jud Smith and May Davis haven't appeared at the head of a summary yet this season, but "old man Bud," who looks after the family's affairs, generally has business with the paymaster on getaway day just the same, and before many weeks go by the chestnut mare and her youthful teamster will be levying a little heavier assessments, unless our dope is all wrong.

◈ ◈ ◈

William G. Durfee and Mrs. Durfee, who have been making their home at the Matsonia Apartments in this city since May, started for Los Angeles one morning this week in their car, which William pilots with the same sang froid—(blame this on the Review)—with which he teams a winner under the wire in a big field. Since the close of the June meeting the Durfees have been taking in the exposition and having a good rest with local friends, their protracted sojourn causing some little anxiety among "home folks" in Los Angeles, some of whom claim they have not heard from Will since he won that twenty thousand stake. However, they'll find him the "same old boy" as ever when he does show up, and the worst luck we can wish him is that he repeat in the fall.

The bell rings Monday at Cleveland.

◈ ◈ ◈

Did you see that list of entries at Omaha? Nothin more encouraging has been noted in a month Sundays.

◈ ◈ ◈

William's mile in 2:04½ and that last half in 1:0 and quarter in :28 make him look like a better hors than ever. There is a rumor that he may chang hands.

◈ ◈ ◈

Fred Ward was among those who got some of th cash at the California reunion at Kearney, being firs with Dr. Wayo, second with Great Northern, an fourth with El Bel Maden.

◈ ◈ ◈

Henry Delaney is getting a number of horses read for the coming Ventura County Fair, and the wire less reports that all Henry's pupils leave in thei trail is a large vacant place in the atmosphere.

◈ ◈ ◈

The Australian papers continue to say nice things about Don Pronto 2:02¼, which is right and proper and entirely fitting. The breeding season there begins shortly and the Don's book is being rapidly filled.

◈ ◈ ◈

It is a hard matter for the Cedar Valley Circuit speed merchants to keep H. E. Armstrong from "horning in" whenever the secretary goes to settle up, as The Empress and Hal J. are staying in the money mighty consistently.

◈ ◈ ◈

Our auburn haired friend Barney Barnes and our old college chum College Gent headed the summary in the 2:08 pace at Kearney. The Gent still bears that reputation of never having been behind the money, and bids fair to carry it through the season.

◈ ◈ ◈

W. R. Murphy, who for a long time conducted a sale stable in Los Angeles and maintained training quarters at Exposition Park in that city, is now at the track at Santa Ana with a stable of ten head, including a pair of green trotters by Carlokin that can 2:15 now, a three-year-old by Red McK. that can trot in 2:18, a good green pacer by Del Coronado 2:09½, a green trotter by Don Reginaldo that has worked for him in 2:20, the aged trotter Danube 2:12¼ that can still trot close to his record or better, and a number of youngsters just "coming along."

◈ ◈ ◈

Katalina 2:11¼, recently purchased by A. Albright Jr. of Newark, has been sent to Col. Ruppert's establishment at Poughkeepsie and has been bred to the great young sire Guy Axworthy 2:08¾, whose star is rapidly rising in the east. Zulu Belle, who was bred to Carlokin prior to her shipment east, has been tried regularly since her arrival at her new home and has so far refused to take service, leading Mr. Albright to have well grounded hope that she caught to the cover of the Durfee premier, in which case he would become owner of a youngster bred like the coast's champion futurity winner, Esperanza (3) 2:09.

◈ ◈ ◈

Wee Willie Van Atta, past master of the Golden Gate David Harum Association and presiding genius of the local organization of practical jokesmiths, is spending a few weeks at Calistoga Springs, indulging in a well earned rest and recuperating from the strain attendant upon carrying three hundred and some odd pounds daily to a vantage point in the grandstand during the exposition races. He is imbibing generous quantities of the famous health giving waters and all will doubtless go well unless he accidentally loses his grip and falls into the spring, in which case the high tide in Napa Creek will entirely obscure the recent activities of Mt. Lassen's pet rivulet, the Hat.

◈ ◈ ◈

The people of Denver seem stuck on a straight running meeting as is evidenced by the twenty-day season of good racing which closed on Monday of last week. The attendance ranged all the way from 5,000 to 15,000 and the sport was clean as it has a license to be under the pari-mutuel system of betting, which eliminates the bookmaker and makes it a percentage game for the association. The promoters of the show have cleaned up nearly $200,000 on the doings. There was some rough riding in the early days of the meeting but the judges dealt summarily with the offenders so that in the outcome the horses were not bothered in the running, although Jockey Molesworth was set down on the last day for bunching John Graham, the stable mate of Loftus, so he might win the Independence handicap for a mile. Judges P. A. Brady and A. T. Dobson were on the alert for anything that appeared to be shady and kept the racing end of it clean and above board. Starter Edward Tribe's work was something phenomenal and we never saw a better man at the barrier. His position was a trying one when it is considered the material with which he had to work. The ponies were here from all over the United States and it is certainly a commentary that of all the entrants not one was bred or owned in Colorado, which shows how our breeding operations have been kangarooed. Most of the caravan pulled out this week for Reno, Nevada, where a twenty-day meeting will open on the 17th, and then they will go to San Francisco for thirty days at the Panama beginning on August 20th.—Field and Farm.

BUILDING THE HORSE BARN.

Some excellent suggestions in the stable construction are to be found in an article in The Farmer's Advocate, some of them being here reproduced.

Any horse, young or old, light or heavy, work or pleasure, will do better and be more comfortable in a box stall than tied in a single one, but while we recognize the impracticability of providing a box stall for each horse, we wish to emphasize the fact that no stable can aid to approach completeness without one or more box stalls—more if possible, but at least one. It is necessary in case of sickness, lameness, or any case where a horse accustomed to regular work is to have a few days of idleness. In the latter cases, it has a great tendency to prevent diseases of various kinds that are liable to result under such conditions unless the amount of food be materially reduced. When in a box stall, a horse takes considerable exercise, which, when he is healthy, idle and well fed is necessary in order to retain health. It is convenient for the pregnant mare during the winter months, and necessary during the latter stages of pregnancy, and especially necessary during parturition, and afterwards until the weather will permit of dam and foal being left on pasture.

As regards the size of box stalls, we may say they cannot be too large—the larger the better; 10 by 12 feet is a fair size; even eight by eight feet is better than none.

Single stalls may be too wide, in which case there is danger of the horse rolling and becoming halter cast. At the same time they may be too narrow, which leaves too little room for the groom to do the necessary work besides the horse in the stall, and also prevents the horse from lying in comfort. For ordinary-sized horses, stalls should be at least five feet wide and not more than six feet. Stalls built for very small or very large horses may be smaller or larger according to their specific purposes. The stalls should be about nine feet deep, exclusive of mangers, and the partitions should be strong and about seven feet high, especially in front, and may slant backwards to four or five feet. The ceiling should be nine to ten feet high. Having decided upon the number, kind, sizes and arrangement of stalls and passages, the necessary size of the building can be determined.

Ventilation is a very important point that in many cases gets very little attention and is more a matter of accident than of plan. In mild weather, ventilation is not difficult, but in cold weather it involves a question of temperature. Provision for the removal of contaminated air and for the introduction of fresh air into the stable, which air must be artificially warmed either before or after its introduction, must be made. Perfect ventilation consists in the removal of foul air as soon as it is formed and at the same time replacing it with an equal amount of fresh air at the required temperature. This is practically impossible, and we must be satisfied with something less than perfection. When air is warmed it has a tendency to expand hence it becomes lighter and ascends, and is replaced by cooler air, which either descends from above or is introduced from below. The heat from the bodies of the animals and the air expelled from the lungs warms the air in immediate contact with the animal, hence this air ascends and if arrangements are correct will escape from the stable. The problem then is to introduce fresh air without drafts and without materially lowering the temperature. As heat expands the air, it necessarily follows that the spaces or openings for its escape from the stable should be somewhat larger than those through which the fresh air is admitted. It is estimated that it requires about 25 square inches of space to allow entrance for sufficient air for each horse and that the space allowed for exit should be about one-eighth larger. It would not be wise to make an inlet and an outlet for each animal; at the same time a number of each gives better results than one of each which by the estimate would be sufficient for all. There are many different systems of ventilation. One system to raise the temperature of the air entering the stable is to conduct by an underground pipe for a considerable distance before reaching the stable. This system, on account of the cost and the fact that unless there be a wind to force air into the pipe through the cowl that stands up a few feet above ground at its commencement, insufficient air will not be introduced, is not often adopted. In most cases there are several inlets on each side of the building, two or three feet above the floor. If the building be brick, stone or concrete, these are generally of tile; if a wooden building, they are also of wood. The total capacity of these inlets is much greater than the space actually required and they are arranged with shut-offs, so that if the wind be strong those on the windy side can be partially or wholly closed and the necessary air can enter through those on the other side. So far as the outlets are concerned, it is wise to figure about what capacity is needed and divide this into as many as is considered necessary. These are made of lumber, and placed along the walls and in the ceiling. Those along the walls should have an opening three or four feet from the ceiling and another at the ceiling. In some cases, several of these pipes are conducted to a common center just below the ridge of the roof, where an opening of sufficient size extends through the roof, and, of course, is protected by a structure built on the ridge and arranged with slats so placed that while it allows escape of the air it will not allow too free entrance of air in case there be a high wind. Probably the better plan is to have each pipe open individually just under the eaves. This practically prevents the entrance of cold air, as it is practically protected from the effects of wind. As stated, there are many systems of ventilation, but all are designed for the same purpose, and many differences of opinion exist as to which give the best results.

The site of the building is supposed to be such that drainage from the outside is natural or easily provided. The removal of liquids from the inside must be then considered. In most cases, this is left to soakage of the bedding, and removal by fork or broom; and when we consider that this gives reasonable satisfaction and that any regular system of drainage is expensive and demands a lot of attention, we may be be inclined to trust to the former. A system can be arranged by having iron troughs behind the horses, by being covered by perforated iron flat pieces on a level with the floor. The doors of the box stalls being hopper-shaped, with a grating in the center through which the liquids are conveyed into the iron pipes, which, with the troughs, incline to a given center, from which an iron pipe passes out of the building and empties into a cesspool, from which the liquid can be pumped into a wagon tank and drawn to the fields and used as a fertilizer. When this system is used, it must be flushed out occasionally and the perforations opened up, else the whole system will become clogged, as the flow of liquids is not sufficient to carry with them the solids that enter.

Few horsemen will deny that wood is the best material for a horse to stand and lie on. Bricks and stone are very hard on the shoes and it is impossible to keep horses sharp-shod in winter time, and if a horse has the habit of pawing he is very likely to injure his feet. In addition, unless bedding is plentifully supplied, floors of this kind are uncomfortable to lie upon. Cement floors have largely the same objectionable points, and in addition are very slippery. Earthern floors are probably the better for the feet, as they provide a certain amount of moisture; but it is impossible to keep them dry and clean and avoid odors and filth, and if the horse paws or stands largely in one place it is not possible to keep it level. The ideal stable floor consists in a cement floor deeply creased in both directions in the passageway, the floor of the single stalls about two inches higher in front than behind, then covered with plank; the cement in the box stalls also given a slight incline towards the passageway and covered with plank. The incline in either stall should not be greater than sufficient to ensure the liquids running towards the passage. Have the floors as nearly level as possible.

Many stables are poorly lighted. There should be a sufficient number of windows to light all parts thoroughly. A number of small windows is probably better than a few large ones. They should be on both sides of the stable, so high that when the sun shines the rays will not strike on the horses' eyes and so arranged that they can be partially or wholly opened, either by sliding into the wall or hinged at the bottom, so that they can drop inwards to allow entrance of air and wind, and when those on both sides are opened will create a draft that tends to lower the temperature in hot weather and at the same time the draft is so high that it will not strike the horses.

There is no question about the fact that the ideal manner of feeding both grain and hay is off the floor, but so far as grain is concerned this is not practical, as in order to do so a movable grain box must be used and when placed before the horse with grain in it an attendant must remember to remove the box when the grain is eaten, else the animal will in all probability paw the box and probably hurt himself. It would prove very inconvenient to have this attendant always on hand, hence it is necessary to have a stationary feed box at the proper height. As regards hay, it is different. If the horse be fed only the amount he will eat, he will soon learn that he must not paw it back under his feet. But if given more than he wants, he will of course render the remainder unfit for the next meal. Most teamsters are not satisfied unless their horses have hay before them at all times. This is a mistake, but a fact nevertheless, and on this account it is probably wise to have mangers in single stalls. Elevated racks of any kind are undesirable; a horse should not need to elevate his head to reach the hay. Mangers should not be higher than the horse's breast and should not be so deep as to render it necessary for him to cause pressure upon his breast in order to reach the bottom of the manger with his mouth. At the same time they should be boarded to the stall floor; no place should be left at the bottom into which there would be a possibility of him getting his feet while rising or under any conditions, hence there should be a false bottom in the manger; better if this be made of slats and removable, so that it can be lifted and the seeds, dust, etc., removed. In horse stalls there should be a stationary box for feeding grain, but there should be no manger or rack for hay. Here the animal can follow the hay, and if not given much more than is good for him, there will be no waste.

The ordinary system of hanging the harness in the stable behind the horses or on the stall posts is convenient, and while it gives reasonable satisfaction it is better to have a dry and well-ventilated compartment outside the stable proper or even a closet in the stable. This protects the harness from moisture and the gases that form, especially in poorly-ventilated stables. Both the leather and the mountings continue to look better and will last longer under these conditions. While probably the convenience of the ordinary method may warrant its adoption for the work harness, there certainly should be a separate compartment in which to keep the good harness, whether heavy or light. While we don't claim to have suggested anything new in the construction of horse stables, nor that the ideas we have given are the only good ones, nor even the best, we hope that they may cause prospective builders to think and acquire the knowledge they can before adopting plans.

HOW TO BECOME A PRESIDING JUDGE.

Editor The Horseman: I notice that lately you have been giving much valuable advice regarding men who constitute the race track family, and for that reason I write to ask the conditions under which a presiding judge would become successful. I am an expert on pedigrees, and therefore think I would make a good one in the presiding game.—Yours, A. M. Aposer.

This is a very responsible position, and you should think seriously before undertaking it—that is, if you intend being a high-class presiding judge. Of course there are many grades of this species, some of which cause much levity when operating on the job; others cause the Lord's name to be taken in vain, not because they are efficient, but because of their fool actions and decisions. Both of these kinds are abundant and can be seen on many tracks.

Do not worry about knowing the rules, as these printed instructions were only framed to annoy people and not to improve racing. Some of the rules should be studied, however, because the discussion of them will give you an artificial air of knowledge, and to look wise is the most important adjunct of a presiding judge, except possibly a show of dignity; the latter, combined with a satisfied pose, makes an ideal judge. The best type of a presiding judge is one that has plenty of avoirdupois and that wears his clothes prodruding in front like a fat man; on this bay window should rest a large chain, decorated by a charm, all of which should eontain plenty of metal. A light suit and broad-brimmed hat help to make up a true conception of the big judge. A strong voice may help some.

There are a few small and thin men who have become fair presiding judges, but the specifications generally call for fat men, and this order should be filled to the letter to be impressive, so, if you are thin, commence to put on a 46 waist line.

You need not expect to have an easy job in any stand, as you will always have the company of at least two other gentlemen who are equally as learned as you are as regards the rules and will always agree to your decisions, providing you do not decide against a friend's horse, or if they have a bet down and your decisions would lose their money; then they are apt to make you look like Robinson Crusoe without his Friday. These associate judges are a cold-blooded lot and really go into the stand to father their own ends. They are generally selected for their standing in the community and not for their knowledge of the rules.

Politicians, boss barbers, big business men and any old thing that is a benefit to one or more of the fair officials, knowledge of racing rules being far away from their thoughts. Some of these associates are noted as posers, and you generally find them looking at the grandstand while the horses are racing on the back stretch, but they always see everything that happens outside of the race track.

You will have your hands full in handling these helpers (?) of yours. You must stand the brunt of all kicks and at all times be the "Angora"; in fact, you and the starter are held responsible for everything that happens, since both of you are drawing pay. Some of these helpers may become very officious and usurp your authority, so be good natured and let them do it, particularly if you want to go back another year; there will always be times, however, when you will come into your own. For instance, let a driver rush into the stand with fire in his eye, ready to eat somebody up. Your associates will fall over themselves to point you out, so that you can take the blame. But if a driver visits the stand wearing a smile your associates will divide the honors between them, and you must be satisfied with "taking the air."

You will have your own troubles when you punish a driver, particularly if he is prominent and you expect support from your associates. They will say that they did not notice anything wrong, and may even take you aside and plead the driver's cause, forgetting that they are judges, and if you assert your authority and stick to your first decision these associates will stick together and overrule you. The only thing for you to do is to pout and refuse to talk to them, and if they hand out peace offerings, in the form of cigars, don't take the smokes; just glare at them. Always be on the lookout for those associates who agree with everything you say and then, after the races are over, circulate among the crowd and say: "I did not see it that way and fought against it, but was overruled."

To be a good judge you should accept invitations from all horsemen racing at the meeting at which you are presiding. Take cigars, drinks, suppers, auto rides, or anything they offer, as it will have the effect of compelling you to give an unbiased opinion in their favor should you be called on. Be a good mixer, as it establishes the confidence of the people, particularly if you allow a driver to do as he pleases without punishment, after he has treated you to a big supper the night before, or else has introduced you to a bunch of his brood mares in the saloon the night before. This friendship should mean a semi-blindness to the driver's shortcomings in future races.

If you want to make yourself real strong as a just and unrelenting judge, borrow money from one or more drivers, and the fact that you owe them money is a strong argument that you will let them do as they please. You can do these friendly drivers a favor in a number of ways; for instance, if you are calling out the finishes, place the driver several positions in advance of where he belongs, and then be positive, not allowing any changes in your decisions—even the assisted driver will appreciate your staunchness and the inability to buy you. Many good presiding judges are swayed by these supper or booze-buying owners and drivers.

Some presiding judges never see anything wrong, no matter what is taking place in the races, and even if a driver is put over the fence or badly injured this mild-mannered saphead cannot tell you how it happened. The chances are he is working a side line, such as selling sulkies, harness, feed or other things, and he would not judge the wrongdoings of a possible customer. The fact that he is going to make a sale operates wonders in his feelings towards a rough-riding, foul-driving teamster, as because of a few dollars in sight he will throw down everybody else.

In some sections of the country it is customary for a presiding judge to take his orders from the pool-sellers, and his leniency is governed by reports from the betting ring. The president or other officials of the association may be heavy gamblers and will want the presiding judge's assistance in winning their money. Of course if the judge takes any money for helping out he is frowned upon as being crooked, yet he is expected to pull off shady decisions to help other crooked ones cash in theirs. If he will not help he is ruined in that locality; in fact, he is ruined anyway.

If a presiding judge rebates any fines he places he is said to stand in or is playing to the grandstand; the fact is, the average presiding judge is hired only to occupy so much space at so much per, and there his duties are supposed to end. Some judges, when their associates do not agree with them, leave the stand and refuse to serve; this act gives them plenty of publicity and at the same time gets them a lot of work next year. Another kind of good presiding judge is one who attempts to conduct everything in the stand, telling each one his duties and being very officious.

The amount of work expected of the average presiding judge would lead the layman to imagine that the job paid a fat salary, but, strange to say, many of these bumpers for others' misdoings have only a trip to show for their hard work, as the money remuneration is eaten up in expenses. Presiding judges can often put up strong bluffs by carrying field glasses, year books and blanks of various kinds, but this display of artificial knowledge does not fool the wise ones, because the chances are if you examined this outfit closely you would find the most important thing of a judge's outfit missing, and that is a "book of rules." Carrying such a book might show up his ignorance at some time during the meeting, and therefore he leaves it home.

Some presiding judges use their spare time during each day's racing to increase their popularity among the fair sex, and you can see these "chasers" with a different "fair face" each evening of their stay in town, and thus some of them are never anxious to play return dates to the same town, fearing unpleasant experiences that are prejudicial to the dignity of a judge. This kind of a judge is often compared to the sailor or traveling saleman.

It is so seldom that a presiding judge gets wise to crooked racing that, when he does, it is heralded all over the country. He stares at a field of horses racing, follows them closely with his eyes, but never sees anything; and if a driver makes a complaint of a foul, a dozen other people are questioned and then no decision is given, although the good judge should have seen such a glaring foul as was reported and should not have required witnesses to prove it. That bland, obsequious salute given by offending drivers pats the usual kind of judges down the back, as they are fooled, thinking the driver means humbleness, when the knight of the sulky is laughing up his sleeve.

We hope by this time you have gulped down the above pointers and have decided to occupy your usual place in the grandstand, allowing those blase individuals all the honor that goes with a presiding judge. Trouble comes soon enough without butting into it. Bye! Bye! Oh! Slush!—W. H. Shields, in the Horseman.

TEX RICKARD, CATTLE KING.

If the late A. Dumas had only known "Tex" Rickard he would have had a real doer of big things to write tales about, remarks a recent contributor to the Spokesman-Review.

Most people remember "Tex" as the man who put Goldfield, Nev., on the map by offering $30,000 to J. Gans and B. Nelson as a reward for their battle to decide the lightweight pugilistic championship of the world, or as the daring speculator who gave Jim Jeffries and the negro Johnson $101,000 to come out

But these things were mere amusements to Tex. They were just incidents to his busy life. He is one of the big and cheerful Americans that Kipling wrote about as maching Destiny for the beers.

Now he is one of the world's cattle kings, being at the head of a ranch in South America that is a real wonder.

"They've had me down now and then," said Tex in telling a few of his doings, "but they'll never count me out till they get me under ground."

Think of a tall, rangy, big-chinned, steel-jawed American, and you have a good picture of Rickard. His thin-lipped mouth shuts in a long, straight line. His eyes are bluish gray and steady as fixed stars. When he talks he does not "sling buckskin," as the westerners mockingly call the use of the dialect of the plains. He says his say in the fewest words possible and bites off his syllables crisply. There is no misunderstanding him. No one ever has to ask him to say anything over again. His words never miss the bullseye.

Down in the Chaco country, extending into Paraguay and the Argentine republic, he has a cattle ranch almost as big as the state of New Jersey. To be exact, it covers 7,000 square miles—a matter of 4,300,000 acres. On it he has 70,000 steers and cows, but hopes before long to make it a full 100,000. He thinks in millions and thousands are his units of measurement.

Rickard was born at Kansas City, Mo., on January 2, 1871, of a family of Illinois pioneers. In boyhood he drifted to Texas and punched cows at $30 per and found. While he was at it he learned all about cows and filed the information away in his never-slip memory. He worked up to Alaska, happened to lead the rush over the Chilkoot pass and became one of the pioneers of the Klondike. He helped to make Nome, too. Thence he dropped down to Nevada, long after the glorious days of the Comstock lode had faded to pale memories, and suddenly electrified the world with the wonders of Goldfield and the other new finds of the yellow gold.

He was christened George Lewis, but history won't know that. He was a witness in one of the Scheftels cases a few years ago before Judge Ray, who came from classic old Norwich, N. Y., to preside over the United States district court.

"'Tex'?" cried his honor. "Why do they call you 'Tex'? Are you a clergyman?"

"No, judge," the long, lean witness replied, careless like. "I've been in Texas a lot, so the boys in my gambling house just call me 'Tex' for short."

"Gambling house?" queried the judge incredulously.

"Surest thing you know," Tex answered. "All regular and licensed by the state of Nevada. She's worth $150,000 a year to me."

She was, too. But somehow Tex tired of the game presently and wandered to South America to look for a little land. The pioneer blood in him couldn't be denied. He and his wife took steamship from New York, sailed south, and on the 23d day arrived at Buenos Ayres, the capital of Argentina. Lingering only a few days in the Paris of South America, they sailed four days up the River Platte and the Paraguay river to Ascuncion, the first Spanish capital of the New World. Thence a lumbering old sidewheeler took them two days more upstream to Concepcion, in the very heart of the southern hemisphere.

Mr. and Mrs. Rickard each rode a mule and carried their baggage and camp equipment on two others. Thus outfitted, they strolled out for a year's exploration of the vast tract known as the Chaco, a region of rich grass and clear streams about as large as the state of Texas.

Mrs. Rickard has described that ride as the finest nerve cure in the world. Their wants were few and easily supplied, as the poet says, and they will remember the journey as the pleasantest they ever enjoyed, not only for itself but for what it led to.

Returning from the voyage on the plains, Rickard found that his mules had gained in flesh to the extent of 50 pounds apiece.

"And if they gain like that," said he, "after all the hard work we gave them, what do you suppose would happen to steers that have nothing to do but loaf around in this rich grass and put on fat?"

Thereafter came the organization of the great cattle company, with Kuhn, Loeb & Co., Speyer Bros., the Societe Generale of Paris and the house of Schrader, London, among the backers. Rickard is general manager, on a long contract. The land is divided into paddocks leagues in length and well supplied with water reservoirs for the cattle.

Down the river a thousand miles most of the big American packers have slaughtering establishments, and still nearer at hand is the famous Liebig Extract plant. So Rickard has an eager market for all the cattle he has to sell.

Scattered over the Rickard ranch are thousands of quebrancho trees from which tannin is extracted. Millions of tons of this product are shipped out of Paraguay to all parts of the world, one New York concern alone importing into North America vast quantities of it. The Paraguay Land and Cattle Company's income from this source is probably as great as from its cattle operations.

Only a few days ago the Paraguayan government granted to Rickard a concession for an immense meat treating and chilling plant. Arrangements are now being concluded for the immediate launching of this big enterprise. Heretofore Rickard has sold his cattle at from $25 to $30 a head. By turning the product into chilled beef in his own plant he will be able to realize from $50 to $60 a head. Ocean-going steamers call at the port of Ascuncion, 1000 miles from the Atlantic, and it is not unlikely that within a comparatively short time the United States will have beef coming direct from the Rickard ranch.

Rickard is not the only American cattle man on the immense property, for a number of his former colleagues have followed him to the newly discovered cattlemen's El Dorado. Mrs. Rickard is there, too, and the ranch house cook is none other than a former American prize-fighter who at one time was under Rickard's management.—Spokesman-Review.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

AN EXAMPLE IN PROTECTION.

he Conservation Commission of the State of New
'k takes issue with the statement made recently
the effect that "the beaver is now nearly extinct
the United States." The observations of sports-
n and game protectors at Lake Placid and in other
p tions of the Adirondacks bear out the conteition
o the Conservation Commission and go to show that
the Great North Woods at least, the favorite
nts of his ancestors, the beaver is far from be-
ning extinct, states the New York Times.
Reports received by the Commission indicate that
re are now between 1500 and 2000 beavers in the
irondacks; that, no longer persecuted by hunters
d trappers, they are establishing colonies and mul-
lying rapidly, and that there is reason to believe
it the time is not far distant when the Adirondacks
y again be entitled to the name "Kohsaraga," be-
owed upon the region by the Iroquois Indians, which
ans "the beaver-hunting country."
It was in 1905 that the restocking of the Adiron-
cks with beaver was begun by the State. The
egislature appropriated $300 for the purpose in 1903,
it it was not until 1905 that three pairs of the little
imals were released. Two pairs were set at lib-
ty on the northeast inlet of Big Moose lake, but
ey moved into Beaver river, about twenty miles to
e north east. The third pair were liberated in a
nall stream entering the Moose river.
That same year a dozen beaver were liberated in
e preserve by Edward H. Litchfield near Big Tup-
er lake. It was at this time that the then State
orest, Fish, and Game Commission learned of the
xistence in waters northwest of the Upper Saranac
ke of a small colony of native beaver, the last of
ie original stock in that section. The official esti-
iate of the beaver in the Adirondacks was then
bout fifty.
Encouraged by the result obtained with the first
mall appropriation, the Commission asked for and
eceived in 1905 an additional $1,000 to be used in
he work of restocking the Adirondacks with beaver.
n 1906 seventeen beaver were obtained from Yellow-
tone Park. These were distributed at several ad-
antageous points, and before the close of the year
t was estimated that the number of beaver in the
mountains had increased to one hundred.
Locally the increase of the industrious little ani-
nals has been noted with interest by sportsmen and
thers annually spending the summer here. Years
go Lake Placid, at the highest altitude of any of
he larger Adirondack lakes, was a favorite haunt
of the beaver, but as the country was opened the
highly prized fur-bearers were taken by the trappers
and hunters, until they were completely wiped out.
It was about seven years ago that the first attempt
to restock Lake Placid with beaver was made. Then
Hon. George A. Stevens on a return trip from Can-
ada brought back a male beaver and released the
animal on this lake. As he became more accustomed
to the new surroundings he began damaging trees
along the lake shore. At once he was blacklisted by
the irate campers, and after a period involving the
expenditure of much ammunition and more profanity,
he was finally shot.
Two years later Mr. Stevens liberated another
beaver in Lake Placid. In the second spring follow-
ing his arrival this animal went down the Au Sable
river, and, establishing a home in that stream at the
village of Au Sable Forks, became for a time the
pampered pet of the place. He grew exceedingly
tame, and the bridge across the river would at times
be thronged with townspeople watching the antics of
the hard-working little fellow. At last, however, un-
able longer to stand the discharge from the pulp
mills in the vicinity, the animal disappeared down
the river, going on supposedly to Lake Champlain.
A third beaver was liberated in Lake Placid by
Mr. Stevens four years ago and for a time remained
about the lake, minding his own business and annoy-
ing no one. After a while, however, this beaver,
illustrating the wonderful intelligence and colonizing
instincts of the animals, went up Chubb river, and
there found a mate that made its way over from the
Raquette river via Cold River and Moose Pond. They
established their home at a point about four miles
from the village of Lake Placid, where they now have
a colony of six or seven and have built two dams,
raising the level of the water about two feet.
Near Elizabethtown, twenty-seven miles from Lake
Placid, are two beaver colonies, one at Hull's Falls,
on a branch of the Boquet river, and the other on
Gates Brook. The former colony, which has been
established for some time, has been a source of much
interest to members of the summer colony in Pleas-
ant Valley, who last summer used to journey by auto-
mobile and carriage to the spot to watch the beavers
at their work.
The Gates Brook colony is a new one. In addition
to building a dam 75 feet long and causing the
stream to flood twenty-five acres of land, they have
built a lodge 15 feet in diameter which accommo-
dates from ten to twelve beavers.
On Smith Kiln Brook, in the town of Saranac, Clin-
ton county, a short distance from Plattsburg, a col-
ony of beavers has been located. They have built
a dam thirty feet long. The water thus set back has
flooded about an acre. Another colony in that portion
of the country that established itself last spring near
the mouth of the Au Sable river has moved up to a
spot near the village of Au Sable Forks.
In the St. Regis river district beavers are reported
as numerous around a place known as Ten Mile, and
several families of the animals are established on
Alder Brook.
Reports show that beavers are more numerous on
the Fulton Chain of lakes and about Raquette lake
than in any other portion of the Adirondacks. Sev-
enty-nine colonies, numbering 223 beavers, are re-
ported from the Fulton Chain, and it is stated that
the animals have erected seventy-six dams.
Some striking illustrations of their intelligence and
perseverance under difficulties are given. When a
dam on Eagle Creek which had flooded a highway
was torn down, it was promptly rebuilt overnight by
the industrious animals. When a lighted lantern
was placed in one of their lodges to drive them away
from a location on First lake where they had invaded
property, the beavers cleverly extended the lodge
over and around the lantern in such manner as to
block out its rays.
To keep them out of a yard, where they were
cutting poplar trees, a wire fence was erected. Noth-
ing daunted, the beavers piled sticks of wood against
the fence until they could surmount it. There are
numerous colonies of beavers on Raquette lake, with
a total of more than 250 inhabitants.
From the vicinity of Lake Pleasant, in the South-
ern Adirondacks, come reports showing beavers to
be very numerous. Three dams were located on the
Miami river, two with colonies of about twenty beav-
ers each, and the third a new dam under construc-
tion. On Whitney creek the beavers built two large
dams a half mile apart, the lower one to support
that above which floods the stream for a distance of
one mile.
A colony of considerable size was found on Mill
Brook and a small colony on Mosey Fly stream. At
the outlet of Spencer lake a colony of at least two
hundred beavers was located. There the animals had
built a large dam, backing the water for two miles.
On the north branch of the Sacandaga river there
is a colony of thirty or forty. A new colony recently
established themselves at the outlet of Samson lake
and built a dam there. From the Long lake section
a colony of at least thirty beavers is reported. A
large colony is located in the Grasse river and
another in Cranberry lake. There are four colonies
of good size in the town of Newcomb, one in the
town of Minerva, and two in the town of North
Hudson.
Quite aside from the respect and admiration the
little animals command by their industry and intelli-
gence, every true sportsman is the friend of the
beaver. Especially are they of value in trout streams.
Their dams afford protection against the havoc that
would otherwise be wrought when the ice goes out
each spring. The ice pack that would tear down be-
tween the banks of these mountain streams, sweep-
ing everything in its path, is held in check by the
beaver dams and disappears slowly beneath the
warming rays of the sun, doing damage neither to
the fish nor to their favorite pools along the shores.
Also, the beaver is the friend of the trout, for his
dams flood the streams and marshes, concealing the
pools in which the fish propagate, thus giving them
an even chance with the fishermen, who must use all
their skill to catch them under the conditions created
by the beaver.
Some beaver dams, if built by human beings, would
be styled feats of engineering. They are by no means
located haphazard. Each site is carefully selected
and each dam accomplishes a purpose that seems
as if reasoned out in advance.
Trees are felled with a nicely that can be dupli-
cated only by skilled woodsmen. And the beaver
does not limit his tree cutting to saplings. In the
Adirondacks the animals have been known to cut
down trees twenty inches and more in diameter. They
prefer yellow birch and poplar, though they will cut
any tree that seems necessary for their purpose.
The dams are built of alder sticks, mud, and grass,
and are finally chinked with moss, making a solid
wall that often must be dynamited to be effectually
destroyed.
The cutting teeth of the beaver are very sharp
and there is great power behind the little jaws. Ordi-
nary beaver chips are about the size of the chips
made by the average woodchopper and they much
resemble chips made with an axe, so smothly are
they cut. When digging recently for the foundation
of a building on the shore of Lake Placid, workmen
came upon a "beaver stick" that had probably been
buried seventy-five years or more, yet the teeth
marks of one of the animals were as plain as if made
but the day before.

Drink Jackson's Napa Soda.

THE CALIFORNIA VALLEY QUAIL.

One of the serious problems that confronted the State authorities interested in the propagation of fish and game has been the conservation of the valley quail. The introduction of the automobile as a means of transportation to the hunting fields has sadly depleted the supply of this bird, and stringent efforts are to be put forth to give it a chance to increase.
The new law passed by the Legislature will place the open season for valley quail from October 15 to December 31 and provides a bag limit of but fifteen birds per day and thirty a week. In addition to this game wardens will be instructed to use extra vigilance during the open season and to give this bird every possible protection at all times. This change has met with opposition from bird dog trainers and handlers but in the main is acceptable to sportsmen.
During the past year a few complaints were received from farmers in different localities asking permission to either trap or kill the quail, saying they were making serious inroads into the crops. To every complaint of this nature the Fish and Game Commission offered to send two experienced trappers to catch and convey the birds to some other locality and in every instance the offer was refused.
It is more than possible that the day is approaching when the State will be compelled to set aside certain localities for quail refuges. This is being done at the present time by a number of farmers who are interested in the welfare of the game.
Especially is this true down in the river districts, states the Sacramento News, where the pheasant has been introduced. This bird holds so closely to its nesting places in the alfalfa fields that in cutting hay the nests are destroyed. One farmer in the vicinity of Courtland, to prevent this, has set aside an acre of alfalfa which he never allows to be cut or disturbed in any way, giving the birds a secure retreat. Another rancher in the vicinity of Elkhorn does the same thing, and he has extended such security to wild birds of all kinds that the valley quail and pheasants come up to the barnyard at feeding time and eat grain with the domestic fowls.
Just what the general prospects are for the fall quail shooting season is at present a bit problematical. Two reports, from widely separated districts, are here given:
For San Luis Obispo county it is claimed, "Not one pair in ten have any young. The late rains destroyed the greatest portion of the eggs and the coyotes, snakes, foxes, squirrels, magpies, jays and other harmful animals and birds are responsible for the remainder. Foxes, coyotes, bob cats, raccoons and owls work at night, feeding on the birds on the nests and then eating the eggs. Gophers undermine the eggs and allow them to drop down in their holes. Snakes, squirrels, hawks, magpies, and jay birds work during the day."
Rather pessimistic, that. The closing down of the rabbit season in that section—as well as all over the State, until the quail season opens in October, will, however, help matters materially. The alien rabbit hunter has no doubt, for years past, been more effective in depleting the quail supply than any other cause.
From Southern California, where the automobile of the gunner has been said to be thicker than orange trees, comes a more acceptable forecast:
Brighter prospects for a splendid quail season are to be found in the hills of Orange county this season than during four or five years past, according to County Game Warden W. E. Adkinson.
Adkinson is perhaps better qualified than any other man in the county to speak of subjects pertaining to game as he has spent the greater part of his time in the hills and has made keen and careful studies of the habits of the wild birds and animals. Because of the fact that the quail were to be found in very small bunches scattered widely in every section, this indicated that they were mating freely. Adkinson is certain that when the season opens, the hunters will find a better crop of birds than during the past six years.
"Quail are great weather prophets," states Mr. Adkinson. "Their instinct tells them just what kind of a season is ahead. If the rains are going to stop early in the spring and there is going to be a scarcity of food, they seem to realize it instinctively.
The mating of quail depends entirely on weather conditions. If food is going to be scarce and but little water in the mountain streams, they will not pair off. If the rainy season is going to be long continued and the food prospect looks promising, they will mate freely but will delay the mating as long as possible, for their instinct tells them that to hatch their young in rainy weather is bad. Favorable conditions prevailed this year and that is what makes me almost certain that there will be a splendid crop of birds, but that the season will be somewhat late.
There was more water in the creeks and streams this year than there was last year, and last year there was more than during the three preceding seasons, during which there was a period nearly approaching drouth, at least as far as concerned water in the hills.
Food is ample. In fact, the birds will have better feeding grounds this year for themselves and for their young than they have had in the last years.
Not only are the quail to be found in from two to three pairs but they came farther down into the valleys than I have known them to do of late years. This proves that they were extremely busy hunting for nesting places."

Adkinson states that in his opinion practically every egg laid this year would be hatched. During dry years eggs are found scattered everywhere, having been laid promiscuously and having every indication that the birds never intended hatching them. This year the eggs are found only in carefully concealed nests. In unfavorable years, during mating season, may be found a small proportion of paired-off birds, while the greater proportion makes up large coveys, the members of which are unmated.

One of the most experienced quail hunters of the State, T. S. Van Dyke, in the following description, gives one some idea of the real pleasure experienced in hunting the "hoodlum of the valley," and of the habits of the wary creature:

"At your first advance into the place where the quail last settled in confusion, a dozen or more rise in front of you and as many more on each side, and from five to fifty yards away. They burst from the brush with rapid flight and whizzing wing, most of them with a sharp, clear 'chirp, chirp, chirp,' in the tone of which there is more of defiance than of alarm. Some dart straight away in a dark blue line, making none too plain a mark against the dull background of brush, and vanishing in handsome style, unless you are very quick with the gun. Others wheel off on either side, their mottled breasts shining in the sun as they turn, and making a beautiful mark as they mount above the skyline. Some wheel and pass almost over your head, so that you can plainly see the black and white around their heads and throats and the cinnamon shading of their underwear."

But that refers to conditions prevailing many years ago. In the days when the valley quail were extremely plentiful it was a very common bird on the markets and could be obtained at practically every hotel and restaurant. Records show that during the season 1895-6, 70,370 quail—most of them valley quail—were sold in the markets of San Francisco and Los Angeles. Market hunters in those days were able to kill over 200 quail in one day.

The valley quail has been widely introduced into neighboring States. They were successfully introduced in Washington in 1857. In Oregon and Nevada they have done marvelously well and unless one were informed he would take them for native birds in the places where they are now found. The valley quail found on the islands off the coast of Southern California are said to have been introduced there many years ago. Plantings made on some of the Hawaiian islands have also proved successful. Attempts to acclimimatize this bird in the east have met with as poor success as have our attempts to get Bob White in California.

Hunting is an important factor in the increase or decrease of birds. In many places this has been the most important factor in causing a decrease in the number of quail. With the increased traveling facilities and the increased efficiency of firearms, this aspect of the question is yearly becoming more and more important. Twenty years ago hunting involved not only considerable time but considerable inconvenience; today, with the automobile and the increased transportation facilities, a hunt takes but little time and almost no inconvenience.

Shooting from automobiles, a practice of the present day, is an easy way of filling the game-bag but it is a dangerous practice when viewed from the standpoint of conservation. Most game birds, on account of their prolificness, can withstand a certain amount of shooting, but the wholesale slaughter of the past few years undoubtedly oversteps the danger point.

A comparison of the present status of the valley quail with its former status, as cited above, shows that the annual destruction has exceeded the yearly crop and has cut into the productive brood stock. It has been proven time and again that the valley quail is a bird which can quickly recover after excessive destruction when it is given a chance. At the present time there are many sections where drastic protection measures must be observed in the near future if the quail is to survive. Wherever the valley quail is given proper attention it thrives.

PHEASANTS TO BE LIBERATED.

Owing to a change in the rabbit shooting season which will be made to conform this year with the quail season, the bunnies will have unwonted respite from the guns just when the shooting was at its height. This lull in the firing will result from the change in the shooting law for this year.

The old law in which rabbit shooting begins August 1 holds good until August 9. Under the new law the rabbit shooting opens October 15. Sportsmen will thus be in a position to shoot rabbits under the old law from August 1 to August 8 and will then have to call a truce until the new law comes into effect October 15.

Such being the favorable conditions, the first liberation of pheasants from the State game farm at Hayward will take place when 100 birds will be turned loose in the Sacramento country. Thereafter a similar number will be liberated about every two weeks in different parts of the country.

The new duck pond at the game farm which has just been completed is an object of interest to tourists. Over 200 wild ducks of various kinds, a number of which were raised in captivity, swim about on the big new pond.

The striped bass barometer has seemingly taken somewhat of a drop at various frequented resorts.

PACIFIC COAST HANDICAP.

A total of one hundred and five shooters attended the four day session of the Interstate Association's annual smokeless powderfest last week. Seventy-one guns stayed through the general average program of 350 targets and twenty-nine shooters went down the line for the whole tally of 700 birds. Seventeen "pros" lined up before the traps. Thirteen scatter gunners—including two of the fair sex, represented the bay counties' trigger pullers. Nevada's delegation numbered over half a dozen. The scores were received this week too late for arrangement and publication in this issue, but will appear next week—possibly at no tournament yet held in the United States will the average of 90 per cent and over have a better showing. The following report of the four day shoot is by a San Diego scribe, "Tenderfoot," a genial pencil shover who knows the game and has the pleasing faculty of injecting a little "chile" in the story:

Practice Day, Wednesday, July 7.—A dark horse pranced into the big glare at the opening session of the tenth Pacific Coast Handicap. Unheralded, unsung and without a suspicion that he had a look-in, Dr. R. N. Fuller of Tulare, rambled out to the firing line and rambled back again with 100 clean breaks to his credit, high gun in the century practice string that opened the big shoot.

The doctor went along to trap 5 with 80 straight and then the crowd wised that the midnight steed had arrived and had an outside chance to dash under the wire a winner. Down the firing line, from peg to peg, Dr. Fuller pointed, each shot bringing the welcome call, "Dead!" When the last dirt-bird raced into view, the Tulare medicine man calmly kicked the tar out of it and the trick was turned—100 straight for a genuine amateur; his really and truly first in his whole life. Congratulations were showered on the astonished physician, who accepted his sudden honors with modest demeanor, but with the light of supreme joy shining in his eyes. Nice work, Doc, and don't forget that a Du Pont century watch fob is yours.

Toney Prior of San Francisco, a roly poly, hard shooting, genial little hombre, was first to "show" with a chance for high honors, his 96 looking rosy to a few uninitiated, but his chance faded into a pleasant memory when San Diego's crack squad raced into the stretch, pointing even better than the ginks that licked Pakenham's invaders at New Orleans in the sometime since. Foster Couts headed the squad with a clean 97, Julie Weisser and Lee Couts tied Toney's score, while Andy Ervast with 95 and Jim Dodds' 94 gave them the squad championship of the day—22 down in 500. Second high squad included "Big Ed" Mitchell, Charley Spencer, C. B. Monoghan, W. F. Cobb and W. H. Rodden, whose lost birds totaled 23 in 500.

The big blazing star of the preliminary skirmish was Charley Spencer, the Mid-West crack. Spencer shot in grand form, smoking the birds close up and pointing easily. He started the day with an unfinished run of 115 straight, boosted the score to 153, dropping a bird, whistled to his mascot and then tore off another string of 108, finishing the seance with an unfinished run of 52. In his last 300 targets Spencer missed two, while in 400 (his total shot at to that time) the Eastern crack dropped eight. Very, very nice work, Charley. I'll speak to the boss about it!

Les Reid, the Pacific Slope's great professional, was not shooting up to form, not by several points, but the tournament was only started. Possibly the railbirds were to be treated to a down-to-the-minute Garrison finish by last year's champion professional. Cheer up, Les.

In morning practice Mrs. Ada Schilling broke 91, while Mrs. A. G. Wilkes accounted for 76.

None of the scores made in practice count on the official averages. But the sting of this statement is squelched by the fact that any and all runs of 50 and better are taken care of by the Du Pont Powder Co., of Wilmington, Del., the best boosters trapshooting has in the nation. Each run of 50 straight draws a Du Pont watch fob and for each additional 50 a solid gold bar is given—to the amateurs. Ray De Mund of Phoenix broke 65 straight—which hooked Ray up with a Du Pont memento worth wearing.

Thursday, July 8.—The big attractive feature was the event at 25 pairs. Spectators quickly massed back of Trap 2, when the doubles began flying, and they were treated to some spectacular gun-pointing.

Toney Prior of San Francisco led off and this tough little bird quickly showed that he is a master gunman in the twin clay game, finishing with 47x50. Later, however, Foster Couts bested the clever San Franciscan by one bird.

There were no particularly high runs in the ten events at 15 singles, but at one time a half dozen men were in easy reach of high gun honors, which made the race interesting. Les Reid and Earl Morgan finally pinched the glory with three down in 150, which figures out 98 per cent, a corking fast gait.

Racing right at their heels were a dozen gunpointers with five and six down in 150. These included Ray De Mund, Julie Weisser, Denny Holohan, Hugh Poston and Guy Holohan, 146; Archie Julian, O. N. Ford, W. G. Warren, Ed Mitchell, Charley Spencer, Dick Reed, 145; Lee Couts and "Stan" Bruner, 144.

High runs for the day that won Hercules and Pont sequence trophies showed 15 amateurs entit to receive the powder companies' rewards for strai runs. The list follows:

Du Pont winners—Archie Julian, 86 straight; J Couts, 99; Ray De Mund, 65 and 70; Mellus, Pfirrmann, 99; Dennis Holohan, 75; Monoghan, 66

Hercules winners—Dodds, 65 straight; Avery, Peace, 51; "Stan" Bruner, 50; Foster Couts, 73 a 75; Downs, 65; Ogilvie, 65.

Friday, July 9.—Charley Julian's sensational w ning of the Preliminary Handicap today was only part of the high class gunpointing shown by the tr shots. Milt Barber was first to hang up a high sco posting 97 breaks, and it sure looked good. A lit later "Stubby" arrived at Trap 5 and the crowd so wised that this was no novice with fluttering nerv but a seasoned campaigner, and in spite of his dou handicap Julian kept on grinding the clays to bla smoke. At Trap 1 he dropped a bird, ran straight the next flinger, fudged one at Trap 3, and from th on the tarhawks hooped up with a hammering.

Julian's gunplay was remarkable. Handicapped the loss of his left arm, and shooting with the be trap talent in Sunset Land, his 98, from 18 yards, really a record on this Coast.

Milt Barber's pointing was one of his best exhil tions, smashing the clays close up in excellent tim He dropped one each at the first, fourth and fif traps. A little later squad 10 arrived at Trap 5 f the acid test and W. G. Warren, of Tonopah, Ne with three gone, got by with a straight, tied wi Barber. This called for a shoot-off after the handica was finished, which Warren won rather easily. Th settled first, second and third prize winners.

Archie Julian, a San Diego boy, Dr. R. N. Fulle and Bob Bungay finished with 95 each. Sizing the up dispassionately, praise for their fine trap wor should be apportioned equally.

H. B. Havens, W. S. Peace, W. L. Harris and A. Wilkes finished with 94, which frequently in hand cap events is good enough to win. Wilkes blew hi last chance to win second high at Trap 4.

The professionals staged some real fireworks i the regular events. Spencer started with a run o 44 from the day before, and in his easy fashio batted bird after bird until the century string wa finished, when he posted an unfinished run of 14 Les Reid broke 98 in the same events. Yesterda morning he had Spencer two down in 150 for hig average. This morning they started the final grin each with five gone in 250, 98 per cent. High averag for the tournament will be determined on 350 targets which includes the first 100 today.

The first five moneys in the Preliminary Handica were paid as follows: Charley Julian, $77.05; W. G Warren, $64.20; Milt Barber, $51.25; Archie Julian Dr. R. N. Fuller and Bob Bungay, $37.16 each.

Among the long runs were D. Holohan with 75, G Holohan with 11, Monoghan 66, Archie Julian 88 O. N. Ford 59, Ogilvie 59, Foster Couts 80, Julie Weisser 71, Clarence Sage 50 and W. G. Harris 59.

In the Panama-California Gold Cup event, Paymaster H. M. Williams of the cruiser South Dakota broke 50 straight, W. G. Harris 49 and W. H. Rodden 49 yesterday. This event is at 100, the final half being staged today. A total of 81 are entered in this event.

Saturday, July 10—The tenth annual Pacific Coast Handicap closed today, in two spectacular, hard-fought struggles to determine the winners of the Exposition Gold Cup and the Pacific Handicap. Of the two, the gold cup struggle was the spotlight feature, that unreeled a beautiful race between Julie Weisser of San Diego and W. G. Warren of Tonopah, Nev., a veritable dirt-bird marathon. Three men tied with 97 each in the cup event and an the shoot-off Paymaster H. M. Williams, the third man, dropped out, while Weisser and Warren tied again with 25 straight. On the second tie 25 both shooters missed one, calling for a third string, which ended in another tie of 23 each. Then came the final session that finished a remarkably clever exhibition of shotgun-play by two cool, fast pointing amateurs. Final score: Warren 96, Weisser 95.

Followed then the race at 100 targets to determine permanent ownership of the cup. Frank Stall of Winnemucca, Nev., and Bob Walsh of San Diego had previously won a leg on this trophy. In the final shoot-off Warren quickly showed he was master, and the race ended this way: Warren 94, Stall 89, Walsh 81. Which permanently ended the gold cup race. In this event Warren shot at 300 targets, breaking 97, 96 and 94, for a percentage of .9566. In addition to these he blazed at 150 other targets Friday, turning in a percentage of 95.60 for 450 clays shot at.

The Pacific Coast Handicap event saw four men tied with 98, shooting from handicaps that ran back to 21 yards. Heinie Pfirrmann of Los Angeles, Paymaster H. M. Williams, U. S. N., Andy Ervast and Foster Couts of San Diego faced the trap in the shoot-off to determine winners in this blue ribbon event. Blazing at 20 birds, Williams was first to drop out, missing two. Andy Ervast soon followed with a lost bird, and the race narrowed to Pfirrmann and Couts. Couts stood at 21 yards, Pfirrmann 18; and the extra three yards finally exacted the almost inevitable toll.

Pfirrmann won the final shoot-off, dropping only two birds to Couts' five. Which finished the prettiest race ever staged for this Sunset Classic. Couts broke 66 straight from 21 yards in this event, and finally lost out to one of the Angel City's crack gunpointers.

Final of this race: Pfirrmann, first; Couts, second; Ervast, third.

Purses in this event gave Pfirrmann $133.60 and first trophy; Couts, $105.90 and second trophy; Ervast, $86.05 and third trophy; Williams, $66.80.

High professional average of the tournament was won by Les Reid of Seattle, who posted 343x350; Charley Spencer of St. Louis 342; Guy Holohan of Los Angeles 341; Dick Reed of San Francisco 340. High over all at all targets was won by Spencer, who carded 672x700, which included doubles and the handicaps. Spencer also made the longest straight run of the shoot, 157.

High amateur average was won by Foster Couts and Julie Weisser, who tied with 339 each; Denny Holohan came next with 337; Ray De Mund, 336; and O. N. Ford, 335.

At the conclusion of the handicap event Elmer E. Shaner announced to the crowd that he had been selected to announce an unexpected trophy which had been won by Clan Pastime's president, E. M. Barber. This was presented by Shaner on behalf of the donors, and when displayed was some surprise. The gift, a watch fob, was a handsome token, made up of a replica of "English Betsy," Barber's shotgun, as the crossbar; two dirtbirds, an Old English B made up of diamonds set in platinum, two more clays and the snap, all connected with gold links. Barber made a happy spiel of acknowledgment that got by in fine style.

The great struggle for the gold cup wound up the finest tournament ever staged on the Pacific Coast, best in every way except attendance. In brilliant gun-pointing and remarkable in the number of ties, with two gruelling shoot-off struggles to determine winners of the big events, the tenth Pacific Coast Handicap will go on record as great from every angle, barring attendance. This was disappointing, but lack of numbers was more than evened by the class shown on the firing line, which developed sensational headline features.

Straitaways.

Mrs. A. G. Wilkes of San Francisco covered herself with glory in the "prelim" when she beat Fred Burnham one bird. Burnham, let it be known, is the hombre who once met five grizzlies in Alaska, blew their lights out, chased a bull moose up a tree and winged a perfectly good totem pole with his last cartridge. Mrs. Wilkes received many compliments for her really clever gunpointing. Less than three months ago she tackled the birdies and Wednesday she broke 84x100.

Capt. A. W. Du Bray of San Francisco, one of the old guard, was circulating with the railbirds. For many years Du Bray has contributed shooting stories to the magazines under the name of Gaucho, and is one of the famous oldtime characters in the shooting world.

Teddy Doremus, big sachem and generalissimo of the Du Ponts, was fluent in praise of Dirt-bird Roost. "Money couldn't improve the natural advantages of these grounds," said Teddy. J. S. French, Peters Cartridge Co.'s high chief, was equally pleased with Clan Pastime's home.

THE DOVE SEASON.

Sportsmen who regard dove shooting with favor, at a time of the year when nothing but "clay pigeons" are in open season, will be put to their wits' ends to dodge the game wardens. Under the statutes now in force, July 15 is the opening day in districts one and three, as in former years. This game law situation enabled the Grass Valley Sportsmen's Association to hold the annual camp dove stew Friday, July 16, as already announced. Dove shooting must stop August 8, when the new game law goes into effect.

In districts two and five the dove season will open —under the old law—August 1 and remain open until August 7, a week's shooting. In districts four and six the season for dove shooting under the old statute runs from September 1 to October 31.

Until the new law goes into effect the daily limit bag for doves is twenty. Under the new lew the open season for doves will begin September 1, and close December 1, throughout the whole State, thus giving quite an extended period for dove shooting in some counties this year.

The bag limit has been cut down to fifteen per day under the new law.

BIG RUN OF SALMON.

Telephone messages early this week from Santa Cruz and Capitola to local salt water anglers conveyed the pleasing tidings that there was a big run of quinnat salmon in Monterey bay, off the Santa Cruz shore. Floyd Uhden's boat came in with a catch of 70 fish. Quite a number of the salmon caught weighed from 15 to 30 pounds. Other boats were comparatively as lucky. There has been a fairly good run of salmon for a week past, but the latest developments have given local rodsters a jolt from center to circumference.

A large fleet of bay fishing launches are awaiting the expected run of the salmon up the coast and into the bay. The pioneer fish weighing 13 pounds was taken off Mussel Rock last week, one or two stragglers have since been caught in the bay.

Al Wilson and Bob Sangster, two of the most skilled striped bass fishermen about the bay, made several catches of bass in Raccoon straits last week. Wilson fished near Sugar Loaf Rock and caught a 14, two 10 and a 3-pound striped bass one day last week.

ECHOES FROM THE PAST.

W. H. Bruning, of Cedar Bluffs, Neb., is in San Diego taking in the Exposition. Years ago, in the palmy days of the 6-gun, this old time Nebraskan was known all over the short-grass country as Bill Bruning and also was reasonably famous as a real plainsman. Bill was one of the few men "Wild Bill" Hickok chummed with. Gossiping recently at the Cycle & Arms with a squad of the Pastime Clan, Bill vocalled a bit of the old days.

"'Wild Bill' was a grand shot with a 6-gun," said the veteran, and into his eyes crept a far-away expression, as they swept back through the years and space to Nebraska in the '60s, when "Wild Bill" was just coming into his national fame as a modern knight of marvelous gun skill—when the great plains were in the heyday of that wild, romantic period that was merely an echo of Robin Hood's time. And Bruning detailed how the Grand Duke Alexis, at that time future Little Father of all the Russias, made his famous stage ride down the canyon trail to Stockville, in Frontier county, when the grand duke was in America on a big hunt. Buffalo Bill handled the ribbons that controlled two span of plunging broncos. As the stage started down the last hill a short, well-built man, with the map of Ireland stamped all over his face, a famous fighting face, stuck his head out of the coach and yelled to Cody, 'We're late, Bill—hit 'er up!'"

Then America's beau-ideal cavalry leader, General Phil Sheridan, settled back in his seat and grinned. 'Hang on, Duke!' Cody shouted to the royal Russian, who was riding on the driver's seat. "Yee-ou-u-u-ee! Scratch gravel, you rats!" yelled Bill, at the same time popping his whip with sharp reports. Surprised, insulted, half frantic, the bronks grabbed the bits and sprang into furious speed, plunging down the narrow trail at headlong speed. The old coach rocked like a dory in choppy going, and every one hung on tight. His royal nibs got excited and yelled a string of Slav expletives, which the wheelers resented by kicking free-born dirt into the autocrat's features. But the Little Father-elect was no piker—he was game as a pebble all the time, even when the Nihilists boomed him years later. Then 6-guns began to bark and pretty soon the old wagon negotiated the worst of the trail, after several tight squeaks, then it was easy sledding to the hotel, where the outfit drew up with a regular old-time dust-cloud, bang! bang! flourish.

That was some hunt the grand duke was handed. According to Bruning, buffalo, elk, black-tailed deer, antelope, Indians and fleas swarmed everywhere on the great plains. Red Cloud, Spotted Tail, and a big following of the Lo family joined the outfit on Red Willow creek and the real hunt began. When the grand duke downed his first buffalo the Indians circled the imperial Nimrod and pulled off an impromptu jollification dance, with aboriginal fluffy ruffles and flourishes that had none of the hesitation about it. Nay, nay, the only thing Lo hesitated about was just how to stick his royal nibs for the drinks.

And it came to pass that Alexis proved a good shot, a fine rider and a capital good fellow—a cosmopolitan who thoroughly enjoyed the wild, free life of the plains—the maddening, exultant rush of buffalo killing and the barbaric abandon of Indian feasts and dances. When Lo danced his untutored fancy leaped high—the stars were the limit—and he feasted with equal gusto and also to the limit of his amazingly capacious tummy. And so the big hunt unreeled, each day a kaleidoscope of that thrilling age-old pastime, the chase.

"Most of that outfit are gone now," said Bruning, "and so are the good old days when the 6-gun was paramount and the wild game swarmed. Fifty years from now I suppose mortals will be staging stunts upstairs in air-wagons that will make the plains stuff look cheap. Well, it's all a part of this old world. That chap hit it when he said, 'Life's just one damn thing after another,' didn't he?"

He certainly did—scored a clean 100 per cent.

Humboldt Bay Traps.—The initial registered tournament of the Eureka Blue Rock Club can be mentioned as a successful and enjoyable affair. Over thirty guns were on the firing line. Quite a number of the shooters were practically new beginners. The scores were the following:

Events—	1	2	3	4	5	6	7	8	Ttl

FURS AND STEEL TRAPS.

The fur business is in a "parlous" state. About 50 per cent of the annual fur catch goes abroad, and since the beginning of the European war there have practically been no exports. Consequently the market is glutted and more than three times as many raw furs as ever before are being carried over in cold storage to another season.

Prices are abnormally low, lower than for many years, and trapping was almost at a standstill last fall and winter. There was small incentive in trapping to the farmer boy, who is the principal trapper, when muskrat and skunk pelts, which are the chief catch, commanded only from one-third to one-half the price of the previous season. So the sale of steel traps in the fall of 1914 was about one-quarter of that of the previous season. Nor is the outlook any more promising now, nor will matters improve much until the war ends and brings back the principal customers. And it may be then that for some time the European people will be too poor to indulge much in the luxury of furs.

Meanwhile, something may be hoped from the coming of better times in this country. Also, Americans are learning to treat and dye and finish their own furs so that they shall no longer be dependent on Europe in such matters.

DU PONT TROPHY WINS AND LONG RUNS.

Much high class shooting developed at the Pacific Coast Handicap tournament at San Diego. Out of a total entry of 105 participants, over 30 per cent of these contestants made 53 long runs—of 50 straight or more, shooting with Du Pont Smokeless Powders.

Guy Holohan made one run of 120 straight and followed with a sequence of 111. Dr. Roy Fuller started on Practice Day with a feeler—100 straight, he accentuated that performance with a 113 sprint. J. N. Weiser, tied for Amateur High Average on regular program, 339x350; H. Julian, winner of Preliminary Handicap, 98x100, 18 yards; H. Pfirrmann, winner of Pacific Coast Handicap, 98x100, 18 yards; W. G. Warren, winner of Exposition Cup, 97x100—all won with Du Pont Smokeless Powders.

Among the long run prize winners were:

J. N. Weisser	75	Du Pont Selby—Win.
C. E. Groat	54	Du Pont U.M.C—Parker
L. H. Reid	62	Du Pont Peters
R. P. De Mund	65	Du Pont U.M.C
R. C. Reed	58	Schulze U.M.C—Rem.
Dr. R. N. Fuller	113	Du Pont W.R.A—Win. '12
Frank H. Mellus	69	Du Pont Selby—Rem.
H. Pfirrmann	99	Du Pont Selby—Parker
Guy Holohan	53	Du Pont U.M.C—Parker
Lee Couts	99	Du Pont—W.R.A—Rem.
P. J. Holohan	94	Du Pont Selby
Archie Julian	86	Du Pont U.M.C—Rem.
L. H. Reid	91	Du Pont Peters
R. P. De Mund	70	Du Pont U.M.C
R. C. Reed	63	Schulze U.M.C—Rem.
D. J. Holohan	75	Du Pont Selby—Win.
C. B. Monahan	66	Du Pont Win.
Guy E. Holohan	111	Du Pont U.M.C—Parker
Harold Havens	58	Du Pont W.R.A—Rem.
W. T. Jones	65	Schulze U.M.C
Archie Julian	88	Du Pont U.M.C—Rem.
J. Plaskett	77	Du Pont U.M.C—Parker
Thos. Wilkes	64	Du Pont Peters—Win
C. E. Groat	54	Du Pont U.M.C—Parker
O. N. Ford	59	Du Pont U.M.C
L. H. Reid	75	Du Pont Peters
J. N. Weisser	71	Du Pont Selby—Win.
Archie Julian	61	Du Pont Selby—Rem.
W. G. Warren	58	Du Pont W.R.A—W. R. A.
Thos. Wilkes	55	Du Pont Peters—W.R.A.
C. B. Monaghan	65	Du Pont W.R.A.
Robt. H. Bungay 21 yds)	54	Du Pont U.M.C—Rem.
J. G. Heath	59	Schulze U.M.C—Rem.
W. H. Rodden	70	Du Pont U.M.C.
G. E. Holohan	120	Du Pont U.M.C—Parker
S. R. Smith	59	Du Pont U.M.C—Rem.
F. H. Mellus	61	Du Pont Selby—Rem.
H. Pfirrmann	65	Du Pont Selby—Parker
R. P. De Mund	78	Du Pont U.M.C.
R. N. Fuller	50	Du Pont Win. Lead.—Win.
R. C. Reed	67	Schulze Arrow—Rem. P.
R. H. Bungay	66	Du Pont Arrow—Rem. P.
C. J. Couts, Jr.	55	Du Pont Parker—Win.
A. H. Jones	50	Ballist. U.M.C.
H. Havens	54	Du Pont W.R.A—Rem.
L. H. Reid	90	Du Pont Peters
H. Pfirrmann	53	Du Pont Selby—Parker
L. M. Packard	55	Du Pont Peters—Parker
H. Pfirrmann	69	Du Pont Selby—Parker
C. A. Haight	61	Du Pont W.R.A—Parker
R. C. Reed	50	Schulze Arrow—Rem. P.
C. H. Knight	53	Du Pont Win.—Win.
R. N. Fuller	56	Du Pont Win. Lead.—Win.
R. P. De Mund	81	Du Pont U.M.C.

Interstate Association Tournaments—

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

July 12, 13, 14—Los Angeles Gun Club, Fred H. Teeple, Secretary, Venice, Cal.

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

Aug. 5, 6, 7—Fourth annual tournament California-Nevada Trapshooters' Association. Auspices of Golden Gate Gun Club, West Alameda trap grounds. T. D. Riley, Secretary, Humboldt Bldg., San Francisco.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

FARMERS' PACKING HOUSES.

Farmers' co-operative meat packing companies recently have been organized in a number of communities in Wisconsin, Iowa, and Minnesota and more than a score of others are reported to be contemplated. Such marked interest in the possibilities of co-operation in the packing business is being manifested in various sections of the country that the Department of Agriculture is making a study of the movement to determine what conditions are essential to the success of this plan of co-operation and to give rational counsel in the matter wherever help is requested. Specialists of the department's Office of Markets and Rural Organization, working in conjunction with the Bureau of Animal Industry, call attention to a number of important factors which cannot be disregarded without danger of disappointment, if not disaster.

In the first place, it is said that communities in which co-operative packing houses are proposed should understand that one of the requisites for interstate shipment of meats from any plant, whether co-operative or privately owned, is Government inspection of the plant and of the animals and meats handled. Regulations of the United States Department of Agriculture provide that an authorized Federal inspector or inspectors be stationed at every plant engaged in interstate business. Before granting inspection privileges to a plant, however, the Government requires the plans and specifications of the plant, including sanitary arrangements, to conform to official standards. By communicating with the department regarding this matter and with officials of the State Agricultural College and Experiment Station or others who are in a position to give official aid, serious mistakes may be avoided by communities which are on the point of organizing such an enterprise. The importance of this point is evident, in view of the fact that most of the companies recently organized, it is said, were promoted by persons from outside the communities concerned. The Department of Agriculture is prepared to furnish advice relative to proposed plans, and welcomes inquiries regarding these matters wherever it can be of service to the farmers of any locality, or to officials of cities contemplating the establishment of municipal abattoirs.

Attention also is called to the importance of considering the complexity of the packing-house business before attempting to engage in the industry in a co-operative way. As beef and mutton in the main must be sold fresh and the equipment, refrigerator cars and extensive selling organization essential to the success of this business obviously make it so complex as to render co-operative management extremely doubtful, such establishments naturally will be confined chiefly to pork packing. The first consideration is a uniform and adequate supply of hogs and a reasonably even distribution of receipts during the year is required for the most satisfactory operation of a packing business. Private plants have been abandoned in many places because of an insufficient supply of hogs tributary to them and it is not uncommon to find smaller packing houses running at a loss during the summer season in order to keep up the organization and equipment necessary for the winter kill.

It should be borne in mind that the statistics showing the total number of hogs in a county or district are not a reliable indication as to the number of hogs available for slaughter. In considering the census statistics of live stock, for example, due allowance must be made for breeding stock and immature animals, and in the case of cattle, dairy cows would not be available for slaughter although included in the total number of heads reported. There is danger of overestimating the surplus of stock to be had for killing purposes in the same way that the number of cows frequently is overestimated in figuring on the possibilities of a creamery in a new location.

Equally important is the loyalty of the members of the organization, particularly as expressed in their willingness to sell hogs to the company, even though prices elsewhere at times may seem tempting. The co-operative bacon factories in Denmark which have been highly successful require their members to pledge themselves to sell their hogs only to the association for a period of fourteen years. Numerous attempts at similar enterprises in Canada and in Germany have failed largely because of the omission of this important feature of the Danish plan. There appears to be some question as to the validity of such provision under the anti-trust laws of the United States and of the various states. How far co-operation in pork packing can be conducted successfully in the absence of some such protective feature that will compel support on the part of the membership at least until the plant is established on a sound basis, has yet to be demonstrated.

In considering the feasibility of a co-operative packing business the number and location of plants already drawing supplies from the locality in question ought to be taken into account. In many cases it will be found that comparatively small plants already are taking considerable numbers of hogs besides those which go to the large market centers. In Minnesota, for example, there are pork-packing plants which have Government inspection, and therefore do an interstate business, at seven points besides St. Paul. These plants in 1914 slaughtered 150,662 hogs and 11,602 cattle. In Iowa there are eight packing points besides Sioux City at which Federal inspection is maintained, and these plants in 1914 slaughtered 1,439,528 hogs and 77,773 cattle. In Wisconsin, at four points (not including Milwaukee) plants having Government inspection slaughtered 82,303 hogs and 2,214 cattle.

These figures indicate that the small plants thus far established at interior points have not been able to divert a large number of hogs from the large central markets. Furthermore, during certain seasons many of these plants buy more or less hogs on special orders at the large stockyards in order to obtain the number and grade of hogs required for this trade. Some of the smaller companies state that they can sell a large part of their product to the large packers more advantageously than elsewhere. Altogether it is manifest that prospective investors should look carefully into the factors which seem to limit the field of these smaller plants. In this way certain mistakes may be avoided and valuable information obtained which will aid in the development of these organizations along wise and safe lines. One or two co-operative companies already have been organized and at least one is in operation. It is suggested that communities contemplating similar enterprises avail themselves of the experience of this pioneer in the field before proceeding along untried lines.

It is not to be taken for granted that the products of a meat packing plant always may be marketed quickly, easily and at satisfactory prices. Competition in this field remains keen, and the location of satisfactory markets, together with the devising of effective marketing methods, should receive early attention. The selling branch of such an enterprise is quite as important as any other.

The more successful packing enterprises have developed gradually, having started on a relatively small scale, and experience has not shown that new undertakings of this sort can be begun successfully in as large a way as is planned for some of those which now are under consideration. Packing plants, especially those which it is proposed to handle upon a co-operative basis, should be under competent, thoroughly experienced management. Men known to be well qualified to fill positions of this sort are not numerous and generally command relatively high salaries.

The amount of capital required to establish and operate successfully a packing business of this kind is considerable, especially in the case of a new concern establishing a trade for its products. It is believed that the size of the investment required for this purpose is often underestimated, and this seems to be one of the causes contributing to the failure of several packing houses. The ability to obtain credit sufficient for operating purposes is of great importance and should receive very careful consideration before the establishment of a plant is undertaken.

Authorities on co-operative organization agree that the more simple the processes involved, the more certain is the success of the co-operative scheme. As a conservative measure calculated to prepare the way and feel out the possibilities of a community as a field for co-operative packing, it is believed that a simple object and form of organization—such as the carlot live-stock shippers' associations that have proved so successful—are well adapted to the needs of the live stock farmers in many of the localities in which co-operative packing plants are being seriously considered.

The first thing to ascertain is whether the farmers of a community will be able and willing to adjust themselves to the simple requirements of an association for shipping stock together in carload lots to be sold at the large markets. Until such a demonstration has been satisfactorily made it would seem advisable to defer the matter of organizing a complicated undertaking in the packing business. In any case the careful observance of the precautions herein enumerated cannot be too strongly urged.

MONTANA STATE FAIR.

Thirty thousand dollars in cash and special premiums are offered for exhibits at the Montana state fair this fall. This annual premium list for the big exposition has just been issued from the office of the secretary and shows a very attractive list of prizes for which the farmers, stockmen, fruit growers, poultry men and others may compete. The one big grand prize offered is for the best wheat display, that being a seven-passenger, six cylinder Studebaker automobile of 1916 model, which cost the stae fair $1,565 laid down in Helena.

The cash prizes offered in the horse division total $2,237 and in addition to that there are special prizes which bring the total up to $2,320. In the cattle division the total offerings, cash and special, amount to $7,528.10. This liberal sum indicates the steady growth of the pure bred cattle industry in Montana. At no other state fair are the offerings more generous.

The prizes for swine this year aggregate $2,400, an increase over the amount offered in the same division last year. This department of the fair has shown a magnificent growth during the past few years and is getting bigger each year. For sheep and goats the prizes total $1,763. The prizes offered for poultry and pet stock aggregate $2,288.

The farm products division is a most attractive field for Montana agriculturists. The offerings in this department amount to $3,928, and in addition to this there is offered $723 in non-irrigated farm products class, and on top of that $2,375 is offered i the county collective competitive class.

The horticultural department is also growing fro year to year, and for 1915 the fair offers premium amounting to $1,893. In the culinary, fancy work fine arts, educational and butter and cheese depar ments, and for the boys and girls contest and th Montana manufacturers, the offerings total $3,700.

As a whole the premiums of the Montana state fai for the present year are the most attractive an interesting for the competitors that the institutio has ever announced.—Rocky Mountain Husbandman

A GOOD OREGON STABLE.

Geo. Swisher, who has his own track at his farm home at Provolt, Wash., is at the Medford track writes a recent correspondent of the Rural Spiri from the Rogue River valley city. He works his horses awhile there each spring, then comes here but wants to finish their "prep" on the mile track a the state fair grounds, Salem, and will go there shortly, having remained here for the Fourth of July program. George has a string of horses this season that gives promise of pulling down some money. Practically all of the seven he has in charge are staked all the way round the North Pacific circuit. At the present time they are all acting well and rounding into form in the most satisfactory manner.

Hallie B. 2:24¼, by Hal B. 2:04¾, is owned by Mrs. L. W. Watts, of Portland. The mare is staked around the entire circuit beginning at Vancouver, B. C., and is looking good.

St. Michaels 2:15, by McAlropa, owned by Fred Wilson, Banks, Ore., is staked all the way around. He is working good and Swisher promises that his mark will be lowered.

Nellie Mack, a green trotter by Unmack 2:22, dam by Nutwood Wilkes, is owned by Scott Wolf of Medford. He is entered around the circuit and gives promise of making them step some if they beat him.

Grace N. (p) 2:18, by Hal B., owned by A. G. Holden of Portland, was entered all the way round, but in some places her races did not fill and she will be entered in late closing events.

Oregonia (3), a full sister to Bonniola, that has a record of 2:24½ as a two-year-old, is by Bonaday, dam by McKinney. She is owned by T. L. Davidson of Salem and is entered in the futurity there. She could not be working nicer.

Sunny Boy (3), pacer, by Sunny Jim 2:11, dam Speckle Bird by Fred Hamilton, is another owned by Mrs. Watts. He is a nice colt, going well.

Oregon McK., a green trotter by Oregon Patch, dam by Alfonzo, is owned by L. E. Fisk of Cornelius. He has lately been gelded, which required a let-up on his work, and he will be held over for next year.

Robert Kinzea (3) by McAlzo 2:17¼, dam Velma Z. by Zombro, is owned by Swisher himself. He is entered in the Oregon futurity and in some of the three-year-old trots. He is a big, good going colt and will do to keep an eye on.

LADNER, B. C.

Ladner, B. C., June 26.—2:30 pace, purse $150:

John D., b g breeding unknown.....(Wright)	2	1	3

Time—2:36¼, 2:33¼, 2:32.

Drink Jackson's Napa Soda.

THE FARM

REASONS FOR BABY BEEF.

Baby Beef is looked to as an increasingly promising product of intensive farming, and with the large amount of surplus alfalfa and the necessity for getting something to consume it, baby beef appears to have better prospects in irrigated districts than anywhere else. Steers used to go to market four years old and over, but baby beef can be turned off at from 13 to 20 months with the probability of still further reductions in age by improved breeding and better feeding. Good baby beef commands a heavy premium in the market.

The U. S. Department of Agriculture in a recent publication summarizes some of the reasons for baby beef.

(1) Younger cattle make more gains on the same amount of feed than older cattle, but it is necessary to push them from the time they are dropped. Grain should be given from the start and the calf should not know when it was weaned.

(2) Money invested is turned faster in 18 months instead of five years.

(3) The herd kept can be smaller and feed once given to two and three-year-olds can be fed to cows and the output thus increased.

(4) Open heifers market just as well as steers provided they are marketed at less than two years, and they will finish better and make better use of their feed.

(5) The baby beef market is the most stable of all cattle markets. This applies more to the East than to the Pacific Coast, but in each case there is no surplus and the market is ripe to be educated to quality.

Results with good breeding and hearty feeding in the East indicate that the alfalfa grower need fear no danger of small returns if cattle production is properly conducted and the marketing machinery properly developed.—Orchard and Farm.

TWO CLASSES OF FARMERS.

As a man thinketh, so he is. I was impressed with this truth one day as I waited at a blacksmith shop to have shoes tacked on our driving horse. In came a little man with a very light team, poorly fed. The little man was thinly clad and exhaled an air of doubt and despondency. In reply to a query he answered thus: "Yes, I am farming the old Brown place. It is only a little farm, but I do not want very much. I see our wheat has frozen out badly, and yet we put on 125 pounds of fertilizer to the acre" (less than a pound to the square rod). The little man got his team shod and went on his semi-despondent way..

The next man came in with a shout and a cheer. He brought three magnificent young drafters, full of power. "Just look their shoes over a little, will you?" he asked. "I like my horses to have good footing. Say, there is a team to put in front of a plow! I drive them myself and give my man the old mares. They are good, but I enjoy driving the young horses myself. It makes me feel that I am doing something. No, I am not renting now. I rented for nine years, but last year we bought a farm of our own. We are in debt a little on our land, but that is nothing with prices as they are these times. Anyway, we have a good time up there. These horses and myself make things move."

Now, which class are you in?—Joseph E. Wing in the Breeders' Gazette.

AGE OF WORK HORSES.

Men who have had time for figures tell us thatthe average age of a draft horse is from 15 to 16 years, while the driver lives to be from 18 to 20 years old. Determining the exact ages of horses is a difficult matter, for the reason that horses usually change hands a great many times after they pass a certain period in their lives—the period of greatest usefulness. But there are record cases where horses have been known to reach an age of 40, and even 50 years. Some horses have worked up to an age of from 25 to 30 years. Mares have been known to foal as many as 30 colts in their lifetime. Stallions have seen active service up to their 25th season. It is highly probable that the average natural age of a horse is 25 years, with the margin above that in favor of the driving horses. The English have a breed of draft horses called Suffolk Punch, noted for being exceptionally long-lived.—Exchange.

DAIRY STRIPPINGS.

[By L. L. De Bra.]

Dairying is one job where a fellow has to do all his sleeping nights; and not much of that. There's no let-up; it's just one thing after—an udder!

I've noticed that the hired man that eats the most is not always the best worked; nor is the cow that eats the most always the best milker. Join a cow-testing association and find out which cows are giving a profit and which are simply boarders. Then beef the boarders.

The "little red schoolhouse" has been the bulwark of our civilization; but that doesn't necessarily mean that the little, old red cow is worth much in the dairy business.

The farmer has few friends more faithful, or profitable, than a good dairy cow. She turns in good profits surely and regularly and yet she enriches the soil instead of exhausting it.

A stream cannot rise above its source; nor can a cow be any better than her sire. Moral: Better buy a better bull.

Careful investigation and long, accurate tests have demonstrated that a manure spreader pays for itself by increasing the fertility of the soil because it applies the manure more evenly and before the fertilizing value has all seeped away. Then, why be without one? Manure piles around the dairy barn are dangerous; a manure spreader turns them into profit quickly and easily.

A cow needs plenty of cool, fresh, pure water. Water the cow and let her attend to the milk.

The other day we were in a stable where a man was milking a cow under test for quantity and for the fat content of her milk. One thing noticed was that he gave the cow something to think of while milking her. She had a mess of feed and was evidently enjoying it. This took up her attention and gave her a certain degree of animal comfort, which is a most desirable thing. And then the milker did not speak except in the lowest possible voice while he was doing his work. It probably was somewhat distracting to the cow to have a number of visitors rubbernecking around there at that particular moment, but she did not show it. She just went on eating her ration and giving down milk. It seemed as if she must have been pretty well satisfied with the situation.

Again, the milker was not in a hurry. He simply went about his work steadily, quietly and stuck right to his job to the very last drop. And this is the one thing we wish to emphasize. It seemed to be the milker's determination that there should be no milk left in the cow's udder after he was done. He kept putting one hand high up on the side of the udder, stroking it softly downward, as if by that movement to bring down as much of the milk remaining there as possible. Over and over again that gentle, stroking motion was repeated, taking one quarter after the other, until the time came when the very lsat drop had been stripped. Then the man got up, weighed the milk and set the result down in the proper place.—Field and Farm.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

1915 WINRACE
—and—
ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

P. O. Drawer 447,
SAN FRANCISCO, CAL.

REOPENING of UNFILLED HARNESS EVENTS

—FOR—

The Oregon State Fair

SALEM, ORE.

SEPT. 27 to OCTOBER 2, 1915

Mile Track; National Trotting Association.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

For conditions of relay and any other information address

W. AL. JONES, Secretary and Manager, Salem, Oregon.

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and second in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, including proven race horses good in their class, the best racing prospects on this coast, matinee horses, stallions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

2019 So. Figueroa St., Los Angeles.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.

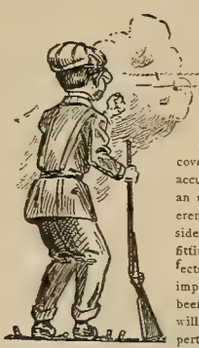
Training the Hound

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.



The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

BREEDER AND SPORTSMAN, 366 PACIFIC BLDG. SAN FRANCISCO.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Is Your Brother a Shooter?

A WAVE of enthusiasm in restoring American prestige with the gun is sweeping the country.

Shooting is virile sport with a strong appeal to that inherited protective instinct that made our forefathers the greatest marksmen in the world.

The best place to learn to shoot is at a trapshooting club, but novices shy at the idea of making a start in the company of a bunch of experienced shots. To satisfy the demand for an organized arrangement for beginners, we planned a

NATIONAL BEGINNERS DAY SHOOT

at which your inexperienced brother, son, wife, daughter, or friend may learn in company with various other beginners.

Briefly, the plan provides two trophies—

A FOB FOR MEN, A SPOON FOR WOMEN

The bronze fob illustrated at the right is for the best score made by a beginner, man or woman, at each of these beginners' shoots. The sterling silver Nemours teaspoon is for each woman, beginner or experienced, who makes the best score at each of these shoots.

BEST HUNDRED CLUBS GET CUPS

A handsome bronze cup trophy will be given to each of the hundred clubs having the greatest number of beginners contesting in these shoots.

Any club may hold a shoot any day or days in August.

Write at once for full details and conditions.

LET EVERY MEMBER GET A MEMBER

Get every member of your club to pledge himself to bring at least one beginner. Here is your chance to double the membership of your club and do a real service for your brother, son, wife, daughter, or friend.

Get the details quickly from

YOU CAN'T CUT OUT A BOG SPAVIN or THOROUGHPIN

BUT YOU CAN REDUCE THEM WITH

ABSORBINE

without laying up your horse. Does not blister or remove the hair. ABSORBINE penetrates quickly and is healing, cooling and soothing—strengthens and invigorates tired, lame muscles and tendons—allays pain and inflammation—reduces soreness and lameness.

ABSORBINE is purely herbal, and safe to use anywhere. In addition to being an effective liniment, it is a powerful antiseptic and germicide. Therefore, ABSORBINE applied to a sore or wound kills the germs, makes the wound antiseptically clean and promotes rapid healing. Effective in Poll Evil, Quitter, Sores, Lacerations, Bruises, Cuts or Speed Cracks.

Mr. Fred White, Box 676, Payne, Ohio, writes: "I purchased a bottle of your ABSORBINE and used it as you directed. The puff all disappeared before I had the bottle quite all used up."

SEND FOR FREE HORSE BOOK F

which gives valuable information about the care of horses and cattle. It is well worth having and is yours for the asking without expense or obligation.

FOR SALE

RACING AND BREEDING MATERIAL
from the establishment of the late

WENDELIN J. MILLER
of Chico, Cal.

The death of Mr. W. J. Miller causes to be put on the market the choice assortment of Broodmares, Youngsters and Race Winners with which he achieved such signal success in recent years, including

JOHN MALCOLM (2) 2:11½

stake winner, world's champion two-year-old pacing gelding (1913), by Dan Logan 2:07½, dam Susie Miller by Prince Ansel (2) 2:20½, etc. Now four years old and can show as much or more than any pacer in California. Prime for this year's races.

CAPITOLA (2) 2:17¾, (3) 2:14½

stake winner, fastest two-year-old pacing filly of 1912, public trial in 2:06½ as three-year-old, by Dan Logan, dam Lulu Mack by Arthur Wilkes, etc. A great race mare for her class.

BONDALEAN (2) 2:20½

winner of second money in two-year-old division, Breeders' Futurity, 1914, and absolutely the best one in sight for this year's three-year-old pacing stakes. Entered and paid up. Trialed in 2:15 last year. By The Bondsman, dam Katalina 2:11¼ by Tom Smith 2:13¼, etc. As great a youngster as the country affords today.

TWO-YEAR-OLD FILLY

by All Style 2:10, dam Katalina 2:11¼. Staked, paid up. Good prospect.

LULU MACK

(dam of Capitola (3) 2:14½), by Arthur Wilkes, sire of Maymack 2:04½, etc., dam Lady Merrill by Tilton Almont, sire of the dam of Monte Carlo 2:07¼, etc. Good breeder and a proven producer.

BAY FILLY

three years old, sister to Capitola (3) 2:14½, never broken.

FIRST NATIONAL

bay colt, two years old, brother to Capitola (3) 2:14½. Staked, paid up. Fine youngster.

Winningtown Herald

WEATHER
It is always fair weather when you tie to the RED BALL Shooting Combination

VOL. I.-No. 1. WINNINGTOWN, JULY 10, 1915 Breeder and Sportsman Ed

NOEL WINS INDIAN HANDICAP

(Special to the Herald)

Cedar Point, Ohio: John Noel of Nashville, Tenn., won the Indian Handicap, 96x100, from 20 yards, and 20 straight in shoot-off, shooting Remington-UMC Pump Gun and Arrow Speed Shells.

GOOD SCORES HERE AND THERE

Here are some recent arrivals at Winningtown via the Red Ball Route:—

Leon Davis won the New England Handicap Championship at Hartford, Conn., with a score of 92x100 and 20 straight in the shoot-off. He shot Nitro Club shells in this event and also in winning the High-Over-All Average for the day, scoring 187x200.

F. A. Weatherhead, of Billings, Mont., won High Amateur Average at the Montana State Shoot, shooting a Remington-UMC Pump Gun and Nitro Club shells, scoring 598x650. This is the third consecutive time Mr. Weatherhead has won either this event or the State Championship.

An interesting shoot was staged recently at Round Lake, Ills. W. V. Jackson, shooting a Remington Pump Gun and Nitro Club Steel Lined Speed Shells, won the meet with 97x100.

Take the Speed Shell Express for Winningtown.

Remington-UMC, "The Perfect Shooting Combination" — the right equipment for a trip to Winningtown.

For better scores at traps or afield —Remington-UMC Arrow and Nitro Club Steel Lined Speed Shells.

Easy to load, a natural pointer—Remington-UMC Pump Gun.

NORTH { DAKOTA / CAROLINA

TWO STATE SHOOTS PROVIDE LIVE CONTESTS

J. P. White of Watertown, S. D., was in particularly good form at the North Dakota State Shoot. With the Remington-UMC "Perfect Shooting Combination," he won High General Average, 578x600, and was also high for the championship, 97x100, but being a non-resident, was not eligible, of course. E. G. Tunke, of Grand Forks, won the Governor's Cup, 95x100, shooting the same combination.

At the North Carolina State Tournament, W. L. Hefner of Hickory won the Championship, 98x100, shooting a Remington Pump Gun. Only a few more State Championships yet to be decided—less than ten—then it will be "On to the Grand American Handicap" for the winners.

THE HONOR ROLL TO DATE

Last year, 24 out of the 39 State Champions shot Remington-UMC guns, shells, or both. Apparently this is to be another year of victories for Remington-UMC shooters. As we go to press, we learn that 16 out of the 31 championships contested for so far in 1915 were won by shooters who tied to Remington-UMC.

These are the 1915 State Champions who backed their skill with Red Ball products:

E. J. Chingren, Washington
Henry Rephausen, Nebraska
Chas. Newcomb, Pennsylvania
C. H. Reilly, Jr., Utah
A. J. French, South Dakota
R. A. King, Colorado
F. S. Tomlin, New Jersey
R. H. Bruns, Indiana
Jas. M. Barrett, Georgia
E. W. Ford, Maryland
H. J. Prendergast, New York
E. C. Grice, Idaho
John R. Jahn, Iowa
J. K. Warren, Alabama
Huston Hall, Kentucky
W. L. Hefner, North Carolina

For a clear track to Winningtown, take along a Remington-UMC shooting combination.

ECHOS from the RECOR... WESTERN HANDI...

St. Louis Real "Winningtown" ... Red Ball Shooters.

It is getting to be an old st... now repeated seven times cons... tively; it seems that only sho... of Remington-UMC are ever t... counted among the winners at ... Western Handicap. This ye... splendid company of 231 sho... entered for the big event and p... tically all of the high honors ... to Red Ball Brand shooters.

A most popular win was tha... William Raup of Portage, ... who, with a Remington-U... Pump Gun and Arrow Steel L... Speed Shells captured the Ha... cap. Says "Sporting Life," ... ferring to Mr. Raup and his ... umph:

"He is one of the best fello... in the shooting game. He bo... his honors modestly, though ... had a right to feel proud ... coming out at the top of su... a bunch of shooters of t... class that contested here. ... was no fluke success, but t... direct result of superior mark... manship."

SPOHN'S DISTEMPER COMPOUND TRADE MARK

TRAINING DISTEMPER.

Ever hear of this? Yes, of course you did, but under different name. You have seen it in cases where the horse was "overtrained," worked a little too fast and regular. The nervous system gets the shock, after the voluntary muscular system has been taxed too heavily. The trouble starts in the mucous surfaces and the digestive apparatus, too, must then be impaired. He begins to cough when the glands are materially affected.

"SPOHNS" is your true salvation. It restores the appetite and normal functions of the whole system. The action in such cases is remarkably rapid and sure for recovery when you use this remedy according to instructions with each bottle. Only 50c and $1 a bottle; $5 and $10 a dozen. Sold by all druggists, horse goods houses, or express prepaid by manufacturers.

NEW EDITION OF JOHN SPLAN'S BOOK **"LIFE WITH THE TROTTER"** PRICE $3.00 POSTPAID

"Life With the Trotter" gives us a clear insight into the ways and means to be adopted to increase pace, and preserve it when obtained. This work is replete with interest, and should be read by all sections of society, as it inculcates the doctrines of kindness to the horse from start to finish."

PEORIA, ILL.	Aug. 2-7
BURLINGTON, IA.	Aug. 9-14
GALESBURG, ILL.	Aug. 16-21
DUBUQUE, IA.	Aug. 23-28
DES MOINES, IA.	Aug. 30-Sept. 3
HAMLINE, MINN.	Sept. 6-11
MILWAUKEE, WIS.	Sept. 13-18
SPRINGFIELD, ILL.	Sept. 20-25
SEDALIA, MO.	Sept. 27-Oct. 2
MUSKOGEE, OKLA.	Oct. 4-9
PHOENIX, ARIZ.	Nov. 15-20

GRAND CIRCUIT.

DETROIT, MICH.	July 26-31
KALAMAZOO, MICH.	Aug. 2-7
GRAND RAPIDS, MICH.	Aug. 9-14
MONTREAL, ONT.	Aug. 16-28
NEW YORK (Empire City), N. Y.	Aug. 30-Sept. 4
HARTFORD, CONN.	Sept. 6-11
SYRACUSE, N. Y.	Sept. 13-18
COLUMBUS, O.	Sept. 20-Oct. 2
LEXINGTON, KY.	October 4-16

A LESSON FROM THE BLUE GRASS.

There was a time in the history of the Golden State of California—in the early nineties, to be more exact—when the breeding of the trotter ranked next to agriculture and mining in the three leading industries of the commonwealth. Those were the days of the district fair, the large breeding farms, and open betting. Maladministration caused the downfall of the former, and the abuse of the betting privilege contributed to the decay of horse racing, both in harness and under saddle, and the consequent "undoing" of the big breeding farms. Not only in California did this state of affairs come to pass, but in all the great horse centers of the east conditions were quite similar. The real producers of the horse industry, the breeders, "stood" for the bookie until the bookie put the business on the run, whereupon a longsuffering public stepped in and in one drastic move put a quietus on both booking and breeding. Aiming at the objectionable portion of the business, the reformers of the various state legislative bodies pot shotted the flock—betting, racing and breeding. Of the three classes of men composing the groups back of the three branches, those of the professional betting brigade, whose malodorous operations were directly responsible for the whole agitation against the sport as a whole, were hurt the least, while those engaged in the breeding end of it—most innocent of all—were the hardest sufferers. It is a poor bookie who cannot flop from the betting ring at the trackside to a graft protected basement or top story gambling joint in short order, there to pursue the uneven tenor of his work of picking the pockets of those some hundreds of suckers that are born daily; the "casual horseman" who raced a few horses for the sport of it was, while deprived of his pleasure, not hard hit in pocket, for as a rule he had an income from other interests; to the breeder, however, the man who had extensive investments in lands and horseflesh and who made breeding his profession, the blow was of the regulation knockout variety. The results are too painfully impressed upon the mind of every horseman on this coast to make it necessary to review them here, but there is a way out. Impress these few words equally indelibly upon your memory as are the conditions just alluded to—there is a way out. That way lies through the enactment of legislation providing for pari mutuel betting under the supervision and control of state racing commissions, no more striking example of which can be found than in the state of Kentucky, the situation there being well reviewed in the following contribution to The Horseman from the pen of Henry M. Jones:

Famous Elmendorf Farm is to pass into history as a breeding institution. This is but natural in the United States, as there have been few sons of great breeders who have kept up or completed the work of their fathers. It is for this reason that the foreign breeders have accomplished far greater results in founding great families than has been done here. But it is not of the passing that interest should center, but of the conditions existing when the yearlings were sold in New York recently, compared with the forced sales made in South America and other foreign markets a few years since, when adverse legislation all but annihilated the breed. In this country there was no market; in fact, the attempted sales were simply pitiful. Many well-bred yearlings were sold for $50 to $75, bought by traders, not by horsemen. And now in a few short years, although depression in business has been written and spoken until it has become a nightmare, a sale the equal of any held in boom days is held. Thirty-five yearlings sell for $44,725, an average of $1,277. One brings $12,500, another $6,000, another $3,000. Then from A. B. Hancock's stud eleven head bring $16,175, averaging $1,470. These colts were untried, only halter broken, and sold on individuality and breeding, and are bought for racing prospects only.

If the history of racing the thoroughbred covering the same period is looked into the change is equally phenomenal. The plant at Lexington, probably the oldest in the United States, having been founded in 1821, had been bankrupt for some years, and only $150 to $200 purses were offered when a meeting could be given. Even such meetings would scarcely pay out. The stabling and grounds were in such a condition that but few trainers cared to risk their horses there. What is it today? One of the best equipped racing plants to be found anywhere, track made level, inside sand track for winter and wet weather, stables full, and building new ones every year. Purses $500 to $600; handicaps, $1,000 to $1,500; added money stakes (real stakes, not guaranteed purses with 5 per cent deducted from money winners) with $2,000 to $2,500 added money.

It is just as impossible to realize the transformation in this meeting as it is to realize that yearlings are bringing prices that they did. There must be some wonderful cause that raised this business from the mire that adverse legislation and the conscienceless gambler had plunged it into. It can be easily explained. A few breeders of thoroughbreds in Kentucky, realizing that all was gone unless quick action was taken, put their shoulders to the wheel and began the education of legislators. They showed them that one branch of the horse business, that business that has brought more new money into Kentucky and made the value of her lands greater than any other industry; that business that had made her famous in all parts of the world where the horse is known and appreciated, was on the brink of destruction and unless at once put upon a legitimate business basis, and protected by the laws of the state, it must bankrupt the majority of breeders and the state lose her prestige. The result was a law establishing the Racing Commission, which has absolute jurisdiction. It says to racing associations that they shall not give purses of less than a certain sum and that they shall give certain class races every day. It will not permit fraud, and only last week ordered an owner and his horse off the tracks of Kentucky for complicity in attempted fraud. They have power, backed up by the state, with no appeal to some tribunal that fears the effect of the decision upon some member and glosses it over. The only motto is "For the greatest good of the horse and racing." It is neither theory nor experiment. It is a reality, has been tried and delivered the goods.

It would be well for the American Association of Trotting Horse Breeders to profit by the calamity that befell the sister interest. Begin at once to organize its members in each state and let them educate their legislators to the great necessity of protection to this interest. Even go farther—carry it into the halls of Congress and show the representatives that racing must be protected or this country will be an importer of horses for its actual needs. Already owners of thoroughbreds have had to import yearlings, and others will do so this fall. It may be possible that the near future will see trotting colts imported from those countries that we have supplied if there is not a determined effort to put racing upon a strictly legal basis, so that it can demand the protection of state laws such as is given to any other legitimate industry.

CALIFORNIA'S MAGAZINE.

That portion of the reading public which was expecting the "California Almanac" to come from the press this month was agreeably surprised when that heralded publication appeared in the form of "California's Magazine," the publishers having found, after their work had gotten well under way, that the field into which they had entered offered far too much for an annual volume to cover. As a consequence, the cornerstone number, which embraces the matter originally planned for the almanac, and much more, appears under date of July first and will be followed at quarterly intervals by regular issues.

California's Magazine is the most pretentious publication that has yet appeared extolling the resources of any state, both in the scope and character of its contents and in its typographical beauty. It is modern to the last degree from the latter standpoint, flawlessly printed on heavy plate paper and profusely illustrated with the finest of half tones and color process inserts. Its avowed purpose is "to carry California to the world," and its seven hundred pages have done so most ably, and, praise be, without subsidy from transportation companies or real estate exploiters.

Very largely to the personal efforts of Professor E. J. Wickson, former Dean of the Agricultural College of the University of California, is due the high degree of excellence attained by the new magazine, as it was under his guiding hand that the material was assembled and put into concrete form. Endowed with an energetic spirit and real enthusiasm for the work, aided by a practical knowledge and a wide acquaintance that enabled him to go to authoritative sources for his matter, he has set a record that will not soon be surpassed. Not an important natural resource has been overlooked, and the various departments are not only of practical value but furnish far more interesting reading than do the general run of works of this kind.

California's Magazine will appear quarterly from the presses of the California Publishers Co-operative Association at an annual subscription price that is in reality far less than the worth, in dollars and cents, of the initial number, and is deserving of every success.

WEATHER REPORTS FROM THE CLIMATIC PARADISE.

Harness racing began in earnest last week, but with the inevitable weather interferences which have afflicted the north since early spring. In consequence many northern-trained horses were rather short of work, but despite this fact, many highly creditable performances are recorded. The most important meetings of the past week were at Detroit, Mich., Marion, O., Cuyahoga Falls, O., and Conneaut Lake, Pa. Mendota, Ill., in the Illinois Valley Circuit, fared as badly as Streator the previous week. However, what racing there was was on the brilliant order. Next week the Grand Circuit opens at North Randall, let us hope with a velvet track and under cloudless skies.—Horse Review.

THE CANADIAN SPIRIT.

"I am happy that it was held, and it quite fulfilled my expectations. If we had dropped the fair this year it would have thrown us back five years. It would have been hard to resurrect it from its ashes and it would have been heartrending after the years of hard work it had taken to build it up." With these staunch words was the closing chapter of this year's Calgary Industrial Exhibition, staged and carried out faithfully under almost every imaginable handicap, written by President Dewey. The spirit shown by our Canadian friends is one that we can recommend to California fair managers unreservedly while they are in the slough of despondency. Profit by it in the future.

Good Afternoon's Sport at Exposition

The weather man seems to have no consideration for the horses, horsemen and sport lovers that frequent the exposition course, as the cool winds, fogs and raw weather that militated against the fullest success of the meeting there in June is still very much in evidence. Last Sunday morning was warm and clear, but by noon the wind had an edge on it that relegated B. V. D.'s to the closet and awoke fond memories of the comforts to be derived from the ownership of boyhood's "red flannels." During the course of the afternoon the sun shone but little, and many of the crowd in the grandstand who had come to the grounds earlier in the day when there was promise of summer warmth reluctantly gave in to the demands for bodily comfort and hit the trail for the shelter of the exhibition palaces and sheltered courts.

Those who came prepared for a bit of bay district weather, however, had the pleasure of witnessing some very interesting contests, none of the five events coming under the head of "walkovers," though in a couple of cases the winners were pretty clearly the best of their fields and were never in serious danger of defeat.

The 2:15 pacers were the first to face Starter Clements, and when it came to getting away the hoodoo man put the jinx on them, crossed his fingers and turned his back. First, King Pointer threw a shoe, causing a short delay while it was tacked on again; then when all was serene and they came back out, the King's sulky collapsed as he turned in scoring, giving Charley Lercari a tumble but doing no injury to either horse or driver, as Charley and one or two boys got the big pacer by the head in short order. The field was then sent to the paddock while a heat of the next race was contested, and when the word was finally given, Tom Murphy, apparently overlooked by the starter, was left lengths back along the outside fence. Hamburg Belle and the Pointer horse surged to the front the whole route, the latter lasting better in the stretch and winning under a hard drive, Senator H. breaking coming out of the turn. Lost shoes caused another delay in the second heat, and when they got the word Senator H. was well behind the leaders while Tom Murphy, placed in the first heat, was on a break. At the half and around the turn King Pointer, Palitea, Hamburg Belle and Emma M. were well bunched, but in the stretch Schwartz swung a bit wide and D. D. Hanks, who had been sitting still behind Senator H. in fifth position, advanced the spark and came through on the pole for a handy win. In the third and final heat it was a case of the Senator all the way, with Emma M. his nearest competitor.

Charley Silva added a bit of bulk to his baggage for the return trip to Sacramento by annexing the trophy for the free-for-all trot with Kid Cupid, who was on his good behavior and trotted two steady miles, with Muggins his best company, the first heat being a close one between the pair until almost to the wire, when the local trotter flew up. J. C. Simpson was unruly and was placed on his own protection early in the scoring, while John Mack failed to live up to expectations. He may be a very fast horse when he is right—in fact he worked better than ten at Los Angeles before coming here, according to the dope sent out from that speed factory—but if Sunday's performance was a fair sample he is everything but a "gentleman's fun horse," even if he were a two-minute trotter.

The free-for-all pace brought out four free-legged sidewheelers and they proceeded to put up a "really and truly" horse race. Charley Silva drew the pole with the ex-champion two-year-old gelding, John Malcolm, and set sail with visions of another trophy dancing before his eyes. W. J. K. broke on the turn, and before reaching the half, with Dick W. leading by virtue of a longer neck and head, John followed suit with one of his bad breaks, George Woodward and W. J. K. both passing him before he settled. Dick W. won from Woodward by about a length, and the Malcolm boy made up a lot of territory when he settled. In the second heat the four went away buzzing, Silva taking the lead from the outside and W. J. K. making another one of "them things" about where he made the first one. Down the stretch there was an evenly spaced procession of John Malcolm, George Woodward, and Dick W., but Ottinger went into the turn in second place. John had a good lead into the stretch but Dick stood Ot's drive in great shape and forced John to pace in 2:09¼ to beat him by a few feet, the drive getting a good hand from the crowd. For the next time out the crowd expected a duello between John and Dick, but W. J. K. had on his pacing clothes and got by his danger point without breaking, showing head and shoulders ahead of George Woodward down through Hungry Hollow. At the half the four were bunched closely, but John led into the turn, with W. J. K. lapped outside him. The wise ones couldn't see anything but John if he kept pacing, as they figured the time too hot for the Kenney horse, but the latter was there with the punch and pulled away from the little brown fellow for a clean win in 2:10¾. Dick W. had the best of the summary by one point and Ot hastened to the hardware like a fond mother after a lost child. It was one of the nicest races of the season, the four starters all going clean and all wearing good plain names —"John," "Dick," "George" and "W.," the latter standing for "Bill."

Bradmont straight-heated the 2:12 pacers by outfooting Happy Dentist and Delilah in the last few rods of each mile, both the old favorites lasting well and finishing gamely both times out. Rosie O. made every post a winning one in the first heat of the slow class, negotiating the mile in 2:21, but gave way to Victor Pointer in the succeeding heats. The two are nicely matched at present, but with a bit of age the filly looks to be the making of the better horse, as she is nice mannered and fast, with a lot of time to improve in if all goes well. Harry Cowell, one of the most ardent amateur sportsmen to be found in any country, presented the club with three of the trophies for the day, the other two being the gifts of Billy Roeder and Luke Marisch, respectively. Here are the details:

First race—2:15 pace:

Senator H. ..... (J. M. Kidd)	5	1	1
King Pointer ..... (H. Campodonico)	1	4	5
Hamburg Belle ..... (J. Ginocchio)	2	2	4
Emma M. ..... (W. Malough)	3	3	3
Palitea ..... (John Kramer)	4	5	3
Tom Murphy ..... (E. T. Ayres)	6	6	dr

Time—2:15½, 2:17½, 2:16½.

Second race—Free-for-all trot:

Kid Cupid ..... (C. F. Silva)	1	1	
Muggins ..... (H. Cohen)	2	2	
St. Patrick ..... (J. J. Ryan)	3	3	
John Mack ..... (S. H. Cowell)	4	5	
J. C. Simpson ..... (F. Goularte)	5	4	

Time—2:14, 2:15.

Third race—Free-for-all pace:

Dick W. ..... (A. Ottinger)	1	2	3
John Malcolm ..... (C. F. Silva)	4	1	2
W. J. K. ..... (W. J. Kenney)	3	4	1
George Woodward ..... (S. H. Cowell)	2	3	4

Time—2:13, 2:09¼, 2:10¾.

Fourth race—2:12 pace:

Bradmont ..... (G. J. Giannini)	1	1	
Happy Dentist ..... (J. J. Ryan)	2	2	
Delilah ..... (F. Goularte)	3	3	
Pointer Bell ..... (Kidd & Luce)	4	4	

Time—2:14¾, 2:16¼.

Fifth race—2:22 mixed:

Victor Pointer ..... (D. W. Keating)	2	1	1
Rosie O. ..... (J. J. Ryan)	1	2	2
Peaches ..... (F. E. Burton)	3	3	3

Time—2:21, 2:20, 2:25.

ALBERTA'S DEMONSTRATION TRAIN.

One of the wonders of the present day world is the progress made in recent years in transforming western Canada, especially that portion of it lying to the east of the continental "back bone," from range to farm, from primeval wilderness to an advanced stage of civilization and productivity that is not surpassed in many regions that have been settled by the white man for a much longer period. Not many years ago numerous cattlemen from this country removed to Alberta and Saskatchewan "where there was range and lots of it, and no nesters to bother with," and proceeded to establish themselves, as they thought, on a permanent basis. Then came the great tide of settlers that froze out the cowmen practically "overnight" and as if by magic transformed the public domain to private demense, the work of decades in the American west being accomplished in the Canadian west almost in a matter of months.

There were many things that contributed to the rapidity with which millions of acres of Canadian prairies were put into a state of successful cultivation, chief among them being the lessons so skilfully drawn from our own ups and downs, successes and failures, and so graphically impressed upon the settler by one or both of the organizations whose energies were bent to the task of making the land a productive one—the dominion government and the C. P. R. When really heavy settlement began the homeseeker had at his disposal a fund of information gleaned from the experimentation of his predecessors that gave him a definite working plan which, faithfully followed, would enable him to reap the fullest fruits of his efforts from the start. The work of educating the farmer has never lagged since its inception, culminating in the modern demonstration train which carries into all settled sections the lessons to be learned from the practicing of farm efficiency and modern methods. We have the same movement in this country but on a lesser scale, the following description in the Farm and Ranch Review, of the present train in use by the provincial government of Alberta giving a graphic idea of the campaign of education that has been the source of western Canada's unrivaled progress:

A representative of the Farm and Ranch Review visited the Provincial Government Demonstration Train during the first day it was in Calgary. This train consists of twelve cars, including two of pure-bred horses and cattle, one of grains and grasses, one of models of buildings, one devoted to dairying and poultry work, one of wild game and fowl, one of domestic science work.

This train is undoubtedly the best that the Alberta department has yet equipped and we believe the best that has ever run in Canada. Not only is it all carefully and very tastefully arranged, but everything is done with an eye to the practical. It is equipped with a staff of able lecturers and demonstrators and during the first part of its trip on the Aldersyde and Foremost-Coutts branches of the C. P. R. drew large crowds at every point. In some places this ran as high as a thousand people.

In the car equipped by the Weeds and Seeds Branch and the Field Husbandry Department of the Schools of Agriculture, thirty-five varieties of grasse are on exhibit. All the natural and wild grasses o economic importance in Alberta are in the exhibit Over fifty varieties of forage crops altogether ar shown. Among the leguminous crops are commo red clover, alsike, dutch or white clover, swee clover, and five different varieties of alfalfa, includ ing Siberian, Grimm and Baltic. These three are th hardiest varieties. Grimm and Baltic have don splendidly in Alberta and Siberian, though it is no as good a yielder, is able to withstand our winte even better than the first two. Peas, vetches an dwarf beans are shown in the straw and threshed. There is a beautiful exhibit of barleys, both threshed and in the sheaf, of all the leading varieties.

All the noxious and poisonous weeds of the province are shown in flower and also threshed in bottles. All the official grades of grain containing both spring and fall wheat, are shown both in sheaf and in glasses.

Alfalfa, showing both procumbent (leaning), and upright strains of the same variety grown separately, is shown. This characteristic can be found in almost any of the alfalfa varieties. An interesting bacteriological exhibit is displayed in the shape of glasses containing the roots of legumes covered with nodules containing nitrogen fixing bacteria which have the power of extracting free nitrogen from the air and storing it in the soil. It is this power which makes the legumes our most valuable soil-building plant. Below are cultures for each species of legumes and the seeds of each of these legumes to which the cultures can be applied. A standard soil classification showing ten grades of soil, sand, light sandy loam, sandy loam, loam, clay loam, heavy clay loam, clay, humus, alkali, and gumbo shows the farmer the various grades of soil and enables him to identify his own more closely and adapt suggestions for soil treatment to his conditions in better manner.

Probably the most interesting part of this car is a fruit exhibit supplied by the Dominion Experimental Farm at Lethbridge and the Alberta Schools of Agriculture. It consists of apples, crab apples, bush fruits, cane fruits, ripe tomatoes, cucumbers, squash, etc. Pictures of various phases of school work are hung about the car and the whole is carefully named, placarded and distributed so as to minimize the necessity of elaborate explanation.

The Agricultural Schools and Demonstration Farms car, three-quarters of which is made up of students' work, contains models of a large frame barn, with stables underneath, a hip roof barn with two thresh floors, a poultry house, piggery, colony houses, wagon racks, wooden tank, axe and hammer handles, all kinds of cabinet work, including tables, knife and fork boxes, model joints, book racks, hat and coat racks, etc. In blacksmith work chains, cold chisels, screw drivers, iron tongs, whiffle-tree and neck-yoke irons, clevises, and hooks, ets., are shown. This part of the exhibit is really remarkable in that it demonstrates the exceedingly high standard the students have attained in manual training at these schools during their first two years.

In the Demonstration Farm department a model dairy barn with a spacious loft, similar to the barns on the various demonstration farms, and showing both the King and Rutherford systems of ventilation, is exhibited. A model of a cheap barn 72x36 with no storage room above and with the lower part similar to that of the expensive barn and which can be built for $700 is also shown. This barn can be added to as the means of the builder warrants. Miniature apparatus for handling hay, stalls, watering outfit and silo are shown. A large container of ensilage taken from the silo at Vermilion and in good condition at this late season, gives the staff an opportunity of explaining the advantages of silage, even in Alberta. Blue prints of many up-to-date barn and house plans free to anyone, decorate the walls of this car.

In the dairy section the effect of bacteria in the deterioration of milk and cream and the necessity of keeping such in first-class condition is well demonstrated. A milk cooler and a water tank which can be placed between the pump or spring and watering trough shows a very cheap and efficient means of cooling milk and cream. Butter in clean, white tubs and boxes and butter put up in filthy pails and soap boxes gives a vivid idea of the proper means of marketing this produce. Mr. Scott, in charge of this believed there would be at least five cents a pound difference between butter put up in these vessels. Jars of butter at three stages, namely, when churning should cease, after washing, and after salting, is a very simple and yet valuable part of the exhibit. A herd testing outfit and charts emphasizing various parts of the dairying industry finish this exhibit.

In the poultry department the result of the egg laying competition from December to June are shown and a case of commercial poultry food is to be seen. The value of trap nests, leg banding, and keeping of record sheets is well demonstrated. There are models of various types of poultry houses, showing interior fixtures, methods of ventilation, chicken brooder coops, colony houses, dry mash hoppers, drinking fountains, fattening and shipping crates, an A-shaped brooder house and a protected run with feed hopper. Placards giving most valuable and concise hints, pictures of the poultry plant and fixtures at Edmonton and a new poultry bulletin adorn the walls.

The general live stock car contains models of small hog houses, showing various methods of ventilation, and sheep rack for feeding either grain or hay,

omesteaders stable with thatched roof made of brush nd the sides built of the same material, a horse barn nd swine pens in the colony house style for summer se, the interior and exterior of a swine breeder's ouse showing the distribution of the various pens o best advantage, a home-made feed cooker and the sential parts of a home-steaders piggery.

The live stock for demonstration purposes and representing the most important breeds of the province is kept in two separate cars.

In the same car is a wool exhibit put up by the Dominion Government showing the various grades of western wool and the benefits of grading are explained to wool growers from the train.

In the next car is an exhibit from the Department of the Provincial Veterinarian and Game Department. All the poisonous weeds of the province which in various places do considerable damage every year are shown and the antidotes are explained. On the walls are charts showing different diseases of the legs and feet of a horse. These diagrams make very clear the cause of the various diseases of the bones and feet, in fact it is one of the most graphic descriptions we have ever seen. In addition there are bones to illustrate the anatomy of the various parts. This part of the exhibit is designed to help out the farmer who is far from a central point where the services of a good veterinarian can be obtained. It is in charge of Dr. Talbot, Provincial Veterinarian.

In the exhibit of wild animals and birds a real attempt is being made to interest the public and increase the public education in regard to the various game laws and seasons. About one hundred birds of Alberta are shown, including those of economic importance both destructive and beneficial. Many of the larger game, including mountain sheep, coyotes, etc., are exhibited and are very fine specimens indeed. The skins of the best fur-bearing animals are shown. The Hungarian pheasant and partridge, both of which have been introduced into the province recently and have increased rapidly, are to be seen. The pinette grouse which has gradually worked its way west from Minnesota until last year it reached Alberta is exhibited.

Probably the most interesting car and one which has attracted the greatest attention, so far as it appeals to every householder in the province, is that devoted to women's work. In one end are many labor-saving devices which save the housewife endless steps. There is a kitchen cabinet, fully equipped, washing machine and wringer, ice cream freezer, bread mixer, and a dozen other neat yet cheap contrivances that every housewife should have. Do not fail to see this. In the laundry exhibit is shown the proper method of washing white and colored goods, in the doing of which many housewives make serious mistakes. Blueing tests are shown.

In the sewing section the work done by the girls at the schools of agriculture from plain sewing, mending, patching, darning, fancy work and dress making, up to finishing a complete set of clothing, is shown.

Samples are exhibited of preserved fruits and the best methods of preserving them are explained. A very interesting part indeed is a properly set table for family dinner While probably it is not absolutely essential that farmers set their tables in any exact manner, still there is nothing which is quite so nice as a properly set table. It gives a finished touch, and cannot help but add to the dignity of a home, giving the farmer himself, as well as his children, a respect for this kind of thing which is all too lacking amongst them. Women and girls should not fail to see this.

In the home nursing department the furnishings of a sick room, showing a home made bed rest, bed tray, and home medicine cabinet are shown. This is well worth seeing and many valuable hints can be obtained from this department for farmers who are far away from medical assistance. A baby's table with all nursery equipment is very interesting to young mothers. The car contains many suggestions for house furnishings, window curtains and shades and the walls are decorated with pictures of the work carried on in the girls' department at the Agricultural Schools.

COLORADO ASSOCIATION BUYS OVERLAND PARK.

The beautiful Overland park, embracing 164 acres of rich land, including the race courses, has been purchased by the stockholders of the Colorado Agricultural Fair and Racing Association for $150,000. The property was owned by Henry Wolcott and was under lease by the association. The sale followed the successful racing meeting just closed at the Overland, the profits of the season being invested in the property. This transfer means the investment of a large sum of money, including the building of a new grandstand and other decided improvements The stockholders of the Fair and Racing Association include W. O. Reynolds, Ramon Solis, John O. Talbott, W. W. Finn, Mart Watrous, James McGill and John Quinn, all residents of Denver. The new grandstand will be located on a knoll to the north of the park where the far stretch turn is at present, which will necessitate a change in the grading of the course. In addition the new comers have under consideration the building of an automobile speedway that will encircle the entire property and give a course that will measure two miles and a half in extent.—Field and Farm.

Records Fall as Grand Circuit Opens

North Randall, O., July 19, 1915.—While it was generally admitted that there was more speed on tap at the track here than at any time in its history, the records hung up at the opening of the Grand Circuit racing season here today were faster than even the most sanguine booster of the trotter had anticipated. Not only was a new track record for two-year-old trotters established, but the afternoon witnessed the fastest opening heat ever trotted on the big line, and the reduction of the pacing record for The Edwards stake for the wigglers eligible to the 2:10 class. Favorites delivered the goods with but one exception and the average time for aged performers was 2:05¾ for the nine heats necessary to return three winners.

The 2:07 pace went to Single G., the Indiana bearcat, in three straight heats, Frank Patch and Rastus furnishing the hottest part of the competition, with Martin Brennan and The Climax, the combination that has already attracted considerable attention through their earlier performances this season, not far away. Rastus, sent home from Phoenix last fall by Lon McDonald when he went on to the coast, was a right oily pacer today and forced the winner out in the second heat in 2:03¾, a reduction of three and a half seconds in his winrace record.

Lee Axworthy, the Pastime Stables' good four-year-old trotter, showed quite a bit lame when Andrews brought him out for the 2:08 trot, but similar ailment could be borne with fortitude by other campaigners, judging from the two heats he reeled off in 2:05¼ and 2:06¾, a new mark for the opening trot of the season. Andrews repeated for his patrons in the Forrest City Sweepstakes for two-year-old trotters, the highly touted Volga never being in danger, apparently, and setting a new mark of 2:13¼ for two-year-old trotters over this course.

The only upset of the day was in The Edwards, in which Russell Boy routed the wise men by administering a trimming to a field of a dozen high class pacers, in which Hal Boy ruled the favorite on the strength of his showing at San Francisco. A hungry looking gentleman named Murphy who has a small stable of some thirty or forty horses at the local track, with which he expects to go on down the big line and as far west as Phoenix and San Francisco, snared the first heat from the favorite in 2:04¾, Russell Boy barely escaping the flag. In the second heat McDaniel camped on the rustic gentleman's tail for a win in 2:03¾, with Murphy "trying" but falling a little short. Russell Boy had troubles in the third heat, which went to Queen Abbess, who was pacing consistently all the time, with Hal S. again second. For the fourth heat, which was a highbrow affair for heat winners only, the judges considered that the outsider would have a better chance with an inside driver, so "Pop" Geers was called on to pilot the black fellow, the wily gentleman from sunny Tennessee carrying Murphy's roan gelding to a break at the head of the stretch and winning as he pleased. The day in detail follows:

North Randall, O., July 19, 1915.

2:07 pace, purse $1,200:

Single G., b h by Anderson Wilkes.....(Gosnell) 1 1 1
Frank Patch, br h by The Patchen Boy.....(Cox) 2 4 2
Rastus, br g by Liberty Boy.....(McDonald) 4 2 3
The Climax, bl h by Gov. D. R. Francis (Brennan) 6 3 4
Beth Clarke (Valentine), Rose Equity (Ruthven), Alcy E. (McMahon) also started.
Time—2:06½, 2:03¾, 2:05¼.

2:08 trot, purse $1,500:

Lee Axworthy, b h by Guy Axworthy (Andrews) 1 1
Bright Axworthy, b g by Axworthy.....(Murphy) 2 4
Bonington, ch h by Bellini.....(Dickerson) 8 2
Wilgo (Marvin), Lucile Spier (Shank), The Duchess (McDonald), Dago (Grady), Reusens (Rodney), Grand Marshall (Snow) also started.
Time—2:05¼, 2:06¾.

The Edwards, 2:10 pace, purse $3,000:

Russell Boy, b h by Rustic Patenter..... (McDaniel-Geers) 9 1 7 1
.....(Murphy) 1 2 2 3
Hal S., ro g by Hal Chaffin.....(White) 4 4 1 2
Queen Abbess, br m by The Abbe....(White) 4 4 1 2
Hal Boy (M. Childs), Camelia (Cox), Lustrous McKinney (Rodney), Patrick M. (Stokes), Thistle Patch (Snow), Hal Conner (Geers), Miss Miriam (McMahon), Walnut Grove (Ruthven), O. U. C. (F. Childs) also started.
Time—2:04¾, 2:03¾, 2:06½, 2:09¼.

Forest City Sweepstakes, two-year-old trot, value $1,500:

Volga, ch f by Peter the Great.....(Andrews) 1 1
Native Judge, b c by Justice Brook.....(Murray) 2 2
Sis Bingen, bl f by Bingen.....(McAllister) 3 3
Time—2:16¼, 2:13¾.

Second Day.

Tuesday, July 20—While the time made at today's session of the Grand Circuit Speed Brokers' Association was hardly as sensational as that of yesterday, only two heats out of the eleven failed to come under the 2:10 figure, and they missed it by fractions of one second only, while the track record for three-year-old trotters, formerly held by Lee Axworthy (the lad that on yesterday set a new mark for the Grand Circuit's opening trot) was reduced a quarter of a second.

After the 2:19 trotters had been given a careful once over by the talent, Bud Murray and Al Mack were accorded a whole lot of respect, justifying their backers' confidence by romping home in one-two-three order, the fastest heat required being one in 2:09¼. Loe Blossom showed considerable improvement in manners over the form displayed in her engagements at the exposition meeting last month, for while she was not equal to the task of taking Al Mack's measure she outranked a number of other good trotters and was a consistent second at the finish of each heat. She is entered advantageously on down the line and promises to be useful and profitable if she "keeps coming" in steadiness and behavior, as she has an ample abundance of speed.

The 2:12 pacers tramped three merry miles, the home contingent in attendance deriving a lot of satisfaction from Charley Valentine's victory with Judge Ormonde over Tommy Murphy with Peter Farren, the race being in reality a duel between these two fast pacers. The Columbus trainer showed the way to the wire for the first two heats in 2:05¼, each, Murphy winning the third in time two seconds slower. Clara Walker, piloted by Cox, was the best of the balance of the field, and the Portland, Oregon, pacer Imbro, making his first start on the big line, was fourth for Marvin Childs.

The real feature of the day was the North Randall Sweepstakes for three-year-old trotters that could qualify for the 2:18 class, Tommy Murphy scoring his first win of the meeting with the Walnut Hall filly Bondella, out of Bondalin by The Bondsman. This lassie clipped a second from her two-year-old record by trotting the first heat in 2:09, and in the final heat cut the North Randall track record for the age and gait from 2:08 to 2:07¾ in brilliant style. Colorado Range, George Estabrook's "hope" as a successor to the lamented Colorado E. (3) 2:04¾, was a consistent second in Lon McDonald's hands.

Leila Patchen and W. L. Snow were the class of the 2:05 pace, their performance helping to bolster up interest in the event very much indeed. Del Rey was the logical pick of the bunch, but in three sizzling drives Snow carried the ex-Californian to breaks that put the race at her disposal, Nutmoor, another California native son, annexing third position in the summary. The figures follow:

July 20—2:19 trot, purse $1,200:

Al Mack, b h by McLintock.....(Murray) 1 1 1
Loe Blossom, ch m by Lepide.....(F. Childs) 2 2 2
Todd McGregor, ch h by Cochato.....(Rodney) 6 4 3
Sarah Douglas (Floyd), Emma Dillon (Nolan), Allerta (Snedecker), King Bellini (Dickerson), Lusitania (Marvin) also started.
Time—2:10¼, 2:09¼, 2:10¾.

2:12 pace, purse $1,200:

Judge Ormonde, bl h by Ormonde....(Valentine) 1 1 2
Peter Farren, b h by Peter the Great (Murphy) 2 2 1
Clara Walker, b m by Early Reaper.....(Cox) 1 3 3
Imbro (M. Childs), Hedgewood Patchen (McDonald), Bud Elliott (Geers), Hedger (Rea), Present Queen (McAllister) also started.
Time—2:05¼, 2:05¼, 2:07¼.

North Randall Sweepstakes, for three-year-old trotters eligible to 2:18 class, value $1,570:

Bondella, b f by Walnut Hall.....(Murphy) 1 1
Colorado Range, b c by Colorado E.....(McDonald) 2 2
General French, b c by Justice Brooke....(Murray) 3 4
Leonore McKinney (Andrews), Prince Todd (Moore), Deroche (Geers), Harlem Express (Dickerson), Denali (Cox) also started.
Time—2:09, 2:07¾.

2:05 pace, purse $1,200:

Lelia Patchen, bl m by Dan's Brother.....(Snow) 1 1 1
Del Rey, b h by Nutwood Wilkes.....(Cox) 3 2 2
Nutmoor, b h by Nutwood Wilkes.....(Majers) 2 4 4
Strathstorm (Murray), The Assessor (McMahon), also started.
Time—2:06¼, 2:04½, 2:06¾.

Third Day.

Wednesday, July 21—Twelve heats from 2:04¾ to 2:08¾, the average for the round dozen being a bit faster than 2:07, furnished plenty for the spectators to talk about today. Tommy Murphy had a full day's work, as he had an entry in each event, winning two first and two fourth moneys.

Lou Jennings, who with The Climax has been making an excellent showing in the minor meetings prior to the opening of the big show, carried Martin Brennan to the front in the 2:11 trot after losing the first heat to Guy Nella, of the Geers stable, the latter lass also being a hot contender in the second heat and causing the winner to go the route in 2:06¾. Laramie Lad consistently improved his standing as the race progressed, being second in the final heat and outranking Tommy Murphy's highly touted Lulu Lumine.

Bingen Pointer, the favorite, delivered the goods in straight heat order in the 2:15 pace, never being in anything like grave difficulties, Billy Law being the best contender in the first and second heats and Rella E. racing into place in the third. In the 2:09 pace, however, the talent got the most severe jolt of the meeting to date, Fred W., a top heavy favorite, going down to defeat before Tommy Murphy's Major Ong, who rambled the first heat in 2:04¾ and the second in 2:06¼. Fred W. was trying and was second in the second heat and won the last, giving his backers at least the consolation of knowing that they had a run for their money.

The race of the day in which the greatest interest centered, however, was The Ohio stake for 2:09 trotters, which witnessed the first meeting of the horses that are pitted against each other in the main stakes of the season through the circuit. Peter Scott, the thirty-thousand-dollar "hold-over" trotter in the Murphy stable, got away safely with the big end of the money, but there was a feeling in the crowd that the best horse may not have won at that, as that other good son of Peter the Great, Peter McCormick, was second the first heat in 2:06½, won the next in 2:05½, and was again second in the third in 2:07¾. At the conclusion of the latter mile protest was made claiming that McMahon helped Murphy by carrying Peter McCormick wide in order to let Peter Scott through, but the judges had apparently seen nothing

wrong. Sure it is that Shuler's big brown horse is a wonderful trotter. The summary:

July 21—2:11 trot, purse $1,200:
Lou Jennings, br m by Todd.....(Brennan) 2 1 1
Guy Nella, b m by Guy Axworthy.....(Geers) 1 2 3
Laramie Lad, b g by Master Bo.....(McDonald) 5 4 2
Lulu Lumine (Murphy), Fair Virginia (Cox), Pass All (Colburn), John R. Dillon (Andrews), Baby Doll (Quinn) also started.
Time—2:07¼, 2:06¾, 2:08½.

2:15 pace, purse $1,200:
Bingen Pointer, b h by King Bingen.....(Snow) 1 1 1
Billy Law, bl g by Law King.....(Squires) 2 2 8
Bella E., b m by Searchlight.....(McAllister) 7 6 2
Jean (Murphy), Vandola (Powell), Rex Heart (Valentine), Crescent Simmons (McMahon), Presolite (Geers) also started.
Time—2:06¼, 2:06½, 2:08¾.

The Ohio, 2:09 trot, purse $3,000:
Peter Scott, b h by Peter the Great....(Murphy) 1 2 1
Peter McCormick, br h by Peter the Great (Shuler)2 1 2
King Clansman, br h by The Clansman (McMahon)3 4 3
Worthy Prince (Cox), McCloskey (McDonald), Albaloma (Quinn), Lizzie Brown (Andrews) also started.
Time—2:05½, 2:05½, 2:07¾.

2:09 pace, purse $1,200:
Major Ong, b g by Major Gantz.....(Murphy) 1 1 4
Fred W., b g by Modern Chimes.....(White) 3 2 1
Tredel, b h by Tregantle.....(Ray) 5 3 2
Altawood (Valentine), Aconite (Cox), Symbol Meata (McDonald), Fleeta Dillon (Shuler), Ruby K. (Dempsey), Fred Russell (Hersey) also started.
Time—2:04¾, 2:06¼, 2:08¼.

Fourth Day.

Thursday, July 22—The weather man rubbed the velvet all off his antlers last night and proceeded to "horn in" on the proceedings at North Randall today, the races being delayed in starting so that only four of the five events could be raced off over a track that was naturally not as fast as on the preceding days. Two races went in straight heats, the 2:20 pace to Pat Carmody and the 2:15 trot to Mirthful, but the others were split. A good big field faced Starter Walker in the Tavern "Steak" for "trotters that had never beaten 2:14¼ in a race." that being the clause by which the Association sidestepped the no record rule for losing performances, Lettie Lee winning the first heat with Miss Directed hot on her trail, and The Guide some positions back From then on, however, there was nothing to it but Edward F. Geers and his son of Peter the Great, Lettie Lee having to be content with the second cut from the "steak." The Eno, out in front at the three-quarters, choked and fell, but the field by good fortune got by without further mishap.

Geers also had the winner of the 2:17 trot in the bay horse St. Frisco by San Francisco 2:07¾, this event bringing out about the best contest of the day. Pop and the four-year-old annexed the first heat in 2:13¼ from Tommy Murphy with Strafford, but the Poughkeepsie pair came back with a heat in 2:08¼, with the Tennessee-Kentucky combination second, and The Proof, with Billy Andrews up, finishing a nice fourth after having been well back in the ruck in the first heat. The more Andrews felt of the California trotter the better he liked him, apparently, and the pair romped away with the next heat in 2:10¾, St. Frisco second and Strafford fifth. "Heat-winners" was the call for the fourth heat, but Strafford had had a sufficiency for one day and went to the barn, leaving Geers and Andrews to trot it out, the former winning in 2:12¼. This is the third race of his career for Keefer & Spencer's trot horse, The Proof, and he gained a world of respect from the spectators who saw him race today. The summaries:

July 22—2:20 pace, purse $1,200:
Pat Carmody, br h by Al Stanley...(Whitehead) 1 1 1
Hal Plex E., b h by Empire Hal.....(Geers) 2 5 2
John H., b g by Locanda.....(Cox) 5 3 3
Virginia G., Grace Ongale and Marriott also started.
Time—2:08¾, 2:10¼, 2:11¼.

Tavern "Steak," for trotters that never beat 2:14¼, purse $2,000:
The Guide, b h by Peter the Great.....(Geers) 6 1 1
Lettie Lee, b m by Moko.....(White) 1 3 3
Miss Directed, br m by Directwell....(McDevitt) 2 5 2
Todd Temple, Roy Miller, Mary Warren, Precious Crescent, The Toddler, Montferris, Sadie S., Dick Watts, Brooklyn Hall, June Red and The Eno also started.
Time—2:06¾, 2:08¼, 2:09.

2:17 trot, purse $1,200:
St. Frisco, b h by San Francisco.....(Geers) 1 2 2 1
The Proof, br h by The Exponent...(Andrews) 8 4 1 2
Strafford, b h by Moko.....(Murphy) 2 1 5 dr
Empress of Russia, Henry F., Tommy Todd, Baron Bates, Dolly Dixon, Mawitza and Orlettre also started.
Time—2:13¼, 2:08¼, 2:10¾, 2:12¼.

2:15 trot, purse $1,200:
Mirthful, b m by The Star of Patchen (Murphy) 1 1 1
Bacolli, b c (3) by Bertini.....(Andrews) 4 3 2
Jack K., ch g by Silverlinch.....(Gray) 2 4 3
Blue Feather, Worthy Bingen and Lady Cochato also started.
Time—2:10½, 2:10¾, 2:09½.

OFF FOR NEW ZEALAND.

The passenger list of the Union S. S. Company's royal mail steamer Marama, which cleared from this port Wednesday morning for Wellington and Sidney, included the names of Logan Pointer, Trixie Pointer and Bonflene—names that will no doubt become very familiar to the ears of New Zealand horsemen before Freeman Holmes gets through with them. Incidentally it may be mentioned that The Bondsman's "brood mare stock" has taken a jump since Mr. Holmes made his recent purchases, owing to the brilliant performance on Wednesday at Cleveland by the three-year-old filly Bondella, whose two heats in 2:09 and 2:07¾ stamp her as a very high class trotter. She is out of a daughter of The Bondsman and had a record of 2:10 as a two-year-old. All three of the Holmes consignment are good natured scamps, and before the Marama cast loose from the pier many of her passengers and crew had made friends with their equine fellow passengers.

TOMORROW'S MATINEE TO BE AT STADIUM.

Owing to the fact that the race track enclosure at the exposition will be in use for other purposes tomorrow, the San Francisco-California Driving Club will hold its customary Sunday matinee back at "the old familiar place," the Stadium in Golden Gate Park. Owing to the superior footing at the park speedway many of the horses now racing elsewhere receive all of their work there, and the return will not only be a welcome change for the club members, but for the public as well, as many matinee devotees find the long trip to the exposition track inconvenient. Cups have been donated for five events, for which the following entries have been made:

First race, 2:25 mixed—P. F. Kane's Marin, R. Consani's G. J. P., R. Roberts' Aerolite, R. Kehoe's Hello Girl, Dan Healy's Silver Logan, J. J. Ryan's Rosie O., J. Holland's Laddie G.

Second race, 2:18 pace—J. Ginocchio's Hamburg Belle, J. Doran's Listole, F. Goularte's Delilah, Ed Ayres' Tom Murphy, H. Campodonico's King Pointer, D. W. Keating's Victor Pointer, William Malough's Emma M.

Third race—free-for-all pace—A. Ottinger's Dick W., H. Cohen's Vera Hal, George J. Giannini's Bradmont.

Fourth race, free-for-all trot—H. Cohen's Muggins, J. J. Ryan's St. Patrick, R. Combatalade's Birdeye, F. Goularte's J. C. Simpson.

Fifth race, 2:15 pace—Joe Kidd's Senator H., J. J. Ryan's Happy Dentist, McDonnell and Conlan's Jack, Kidd and Luce's Pointer Bell.

CALGARY, ALBERTA.

Calgary, Alta., July 7, 1915.—In the face of about every possible discouragement that could well appear, the Calgary Industrial Exhibition that came to a close here this afternoon was well patronized and tonight Manager Richardson and his associates are of the opinion that the project will about break even, though it will be some days before final figures are available. The attendance for the five days was 77,640, a decrease of nearly 12,000 from last year's total, but this had been anticipated. Between seventy and eighty thousand dollars was paid out by the exhibition, and the stimulus given to local business and the amount of money placed in local circulation by the holding of the event is not to be estimated.

The racing throughout was keen and interesting, nearly six thousand dollars being distributed among trotting horse men and a goodly amount going to the followers of the runners. Speculation was brisk and in only one event was it necessary for the judges to impose penalties for unsatisfactory racing. The summaries of the trotting and pacing events follow:

Calgary, Alberta, July 1, 1915.

2:09 pace or 2:04 trot, purse $700:
Nellie G., bl m by Simored.....(Matheson) 2 1 1 2 1
King Bond, b h by The Bondsman..(Lewis) 1 2 3 1 2
Dean Swift, b g by Almaden D.....(Haag) 4 3 2 3 3
Soumise, b m by Billy Dunlap....(Leggett) 3 4 4 4 4
Time—2:16½, 2:15, 2:17½, 2:16½, 2:19.

2:15 pace or 2:10 trot, purse $700:
Hal Chief, br h by Hal B.....(Matheson) 1 1 1
Scarlet Trent, b h by Parovas.....(Brown) 6 2 2
Garibaldi, b g by Zombro.....(Vance) 2 5 4
King Okla, br h by Symboleer.....(Lewis) 3 3 3
Roxey Hal, Lomona and Miss Mercury also started.
Time—2:18, 2:14½, 2:16.

July 2—2:30 pace or 2:25 trot, purse $500:
Jim Mayburn, br h by Will Mayburn(Giroux) 2 4 1 1 1
Altabana, b h by Urbana Mac.....(Lewis) 1 2 2 2 2
Jessie Waters, b m by General H..(Kenner) 3 1 3 3 2
Easter Light, b h by Ray O'Light..(Haag) 4 3 dr
Time—2:24½, 2:32½, 2:26½, 2:24¼, 2:25.

2:25 trot, purse $500:
Katie Todd, br m.....(Haag) 8 1 1 1
Senorita the Great, bl m by Peter the Great..
.....(Dompier) 1 4 2 2
Lady Garland, b m.....(Kirby) 2 2 3 4
Adaline, ch m by Johnline.....(Mitchell) 3 3 4 3
Oro Monbells, Carbon, Don Almo, Mercury and Alta Mac also started.
Time—2:22¼, 2:22¼, 2:22½, 2:23¼.

July 3—2:22 pace or 2:17 trot, purse $600:
Lady Halford, ch m by Young Hal(Vance)7 4 2 1 1 1
Miss Eileen, bl m.....(Kirby) 6 1 1 3 7 2
Molly, b m by Knox.....(Leggett) 1 3 3 2 3 ro
Minnie B. B., bl m.....(Haag) 2 2 6 5 ro
Mildred Direct, Maxine W., Hal Stewart, Aurelia Lou and Joe the Limit also started.
Time—2:21¾, 2:19½, 2:20¾, 2:21¼, 2:22½, 2:25.

2:14 trot, purse $500:
Copious, b g by LaCopia.....(McGirr) 1 3 4 1 1
Midnight Oro, bl h by Oro Wilkes (Wright) 5 1 1 2 2
Dan Matthews, b g by Eagle Blood (Brown) 2 2 2 3 3

Round and About

Single G. 2:03¾,
Russell Boy 2:03¾,
Hal S. 2:04¾,
Queen Abbess 2:06½,
Volga (2) 2:13¼,
Lee Axworthy (4) 2:05¼,
Were all the results of the first day of the Grand Circuit at North Randall.

◈◈◈

The Canadians are racing this week at Brandon, the storm center then shifting to Regina.

◈◈◈

And once more we recommend to your consideration those purses at Vancouver, B. C., and Spokane, Wash., for which entries close on August first. Do not overlook them.

◈◈◈

Wilbur Lou (3) 2:10¼ gets two brand new trotters, both two-year-olds, through the meeting at Hemet last Saturday. Of course the babies are futurity candidates.

◈◈◈

Tommy Murphy's entries scared away a lot of folks from the opening of the Michigan Short Ship at Detroit—and then Tommy failed to appear! The Detroit folks lost both ways from the jack.

◈◈◈

Fiesta Lou, the first performer to be credited to Wilbur Lou (3) 2:10¼, reduced her yearling record of 2:25 last Saturday to a two-year-old mark of 2:22½ in a race over the two-lap track at the farm.

◈◈◈

Moody Leggett of Hanford, who suffered a broken leg some weeks ago at the opening meeting of the Canadian circuit, was back in the sulky at Calgary and was in the money with both Molly and Soumise.

◈◈◈

Mantua Maker, the twenty-four-year old daughter of Red Wilkes, recently dropped her nineteenth foal, a filly by Gen. Watts, and will be bred back to that son of Axworthy. Nine of her produce are in the list, one is a sire, and two are producing dams.

◈◈◈

Both Hanford and Fresno have announced definitely that they will have no horse racing this season, the former not having a fair of any description. A little slow music will be about right—not the shivery, Eliza-crossing-the-ice kind, but some real, plain, old wail, like "Massa's in de col', col' groun'."

◈◈◈

Dean Swift 2:08, one of the best winners of the season of 1914 on the northwestern circuit in Lon Daniels' hands, has so far failed to get the brackets this year for Harvey Skaggs and George Haag. According to the Albertan's reports of the Calgary meeting he is inclined to fade in the stretch.

◈◈◈

"What sort of odds can you get on pari-mutuel betting?" queries a correspondent. Sometimes you get plenty, as exemplified by the Reno machines, paying 35 to 1 for one event recently, and almost 85 to 1 on Tom Chapman's win. It all depends on the patronage.

◈◈◈

I. L. Borden boarded an overland flyer on Thursday morning of last week to take an eastern trip that was to combine business and pleasure. He planned going to New York by way of Cleveland, where he expected to see his horses, and may drop in at Detroit long enough to witness the racing of the M. & M., in which either Albaloma or Baby Doll will probably be a starter.

◈◈◈

Scarlet Oaks, carrying the colors of George Wingfield's Nevada Stock Farm at Reno, won the feature event of the opening day at Reno, since when other members of the same stable have also made good by showing their fields which way the track runs. The horses of Charley Clark's stable arrived from Latonia a few days ago and will participate in the racing until time to come to the exposition for the meeting to be given by the Golden Gate Thoroughbred Breeders' Association, of which Mr. Clark is president.

◈◈◈

Horsemen throughout the west will regret to learn that on Wednesday of last week "White Hat" McCarty, one of the most famous of the older generation of horsemen of the "picturesque" school, was sent to the detention hospital after having been found on the street in a condition of mental derangement, diagnosed as the result of acute alcoholism. Only a few days before, Dan had taken his daughter to the same institution to be put under observation for symptoms of insanity, later reports tending to confirm her father's action.

◈◈◈

Alhambra Prince, the trotting show stallion owned by Charles W. Winter of Alhambra, has again been returned a winner since his picture adorned our front cover a few weeks ago, being awarded first prize in Class F of the Elks' flower parade at Los Angeles on July 14. The wheels and gear of the buggy were decorated with mountain ferns dotted with pink oleander blossoms, the body a solid mass of pink oleander, while the Prince carried the Elk colors in foretop, tail and on his right front leg. Mr. Winter is a good decorator and the Prince is a great young show horse, so the combination is a happy one.

Detroit next week—and the M. & M.

◈◈◈

The appropriation for the Arizona State Fair for 1915-1916 was cut down by the legislature, but there are still some fourteen thousand dollars available for this year's harness races, the program for which will soon be announced. They still plan to get the horsemen on the back trail from the exposition, and are laying all arrangements with that end in view.

◈◈◈

And now comes one Kinney de Lopez 2:23 seeking and obtaining admission into the ranks of trotting sires. His first performer is Don de Lopez (2) 2:25, dam Eradiate by Geo. W. McKinney, the record having been made in the second heat of the 2:30 trot at the neighborhood meeting at Hemet last Saturday. There will be plenty more to follow, and now the question is, which of the Hemet two-year-olds would win a race limited to them only, a "Kinney" or a "Wilbur"? Both brands seem to have quite a bit of lick at the trot.

◈◈◈

An eastern contemp. recently evolved the following: "The Beaver, favorably mentioned for the Chamber of Commerce stake, is a very fast pacer, but when he acts up he has a few stunts that even Columbia Fire forgot in his palmiest days." Either this is "old stuff" that The Beaver has long ago forgotten, or else the eastern scribe has him mixed up with Max Rochon's other son of Searchlight, The Badger, who, when "in the vein," can make Al Jolson's rapid fire changes seem like one continuous dirge.

◈◈◈

They may call him "Uncle Mike," or "Daddy Mike," or any other old name if they will, but Mike Bowerman is one of the youngest "boys" now training at Lexington, Ky., judging from the way his two and three-year-old trotters are stepping for him. He holds the 1915 record for two-year-olds there with Hermione B. 2:18, and has stepped his three-year-old trotting filly, Golden Axworthy, in 2:13½, last quarter in 31¾ seconds. Both youngsters are by the rising young sire, Morgan Axworthy 2:17, son of Axworthy 2:15½ and Kinglyne, sister to Bingen 2:06¼.—Horse Journal.

HEMET, CALIFORNIA.

Hemet, Cal., Saturday, July 17—The "breeders meeting" staged this afternoon at the track at Hemet Stock Farm by the Hemet Driving Club attracted a nice crowd of home-folks who are always interested in seeing the home grown horses perform, the various events serving as a portion of the education of the futurity candidates bred and owned by Hemet Stock Farm. When Messrs. Doble and Blackwell went north early in the spring to take part in the exposition races, in which the Farm's entries annexed the larger portion of the money hung up for three-year-olds, Frank Rees remained at home with the babies, the progress made by them under his tutelage being amply manifested by today's performances.

Goldsmith Lou (2), by Wilbur Lou (3) 2:10¼—Little Louise A. 2:17 by Boodle 2:12½, starting to beat 2:30¼ trotting, went the route in 2:29, while Billy Boyd (2) by Wilbur Lou—Lady Zombro 2:24¼ by Zombro negotiated his mile in an even 2:30. Goldsmith Lou is the first of the get of Wilbur Lou bred by the farm and is one of Mr. Doble's especial favorites. Another Wilbur Lou two-year-old, Fiesta Lou, was a heat winner in the 2:18 pace, acquiring a new record of 2:22½, while Don de Lopez (2) by Kinney de Lopez 2:23 won the second heat of the 2:30 trot in 2:25. The Don is the first performer for his sire, one of the purest gaited trotters on the coast and a very fast but always unlucky horse. H. G. Stanley got the fields away in nice shape, the day's details being as follows:

Hemet, Cal., July 17, 1915.

To beat 2:30¼ trotting:
Goldsmith Lou (2) ch f by Wilbur Lou (3) 2:10¼—Little Louise A. 2:17 by Boodle 2:12½ 2:29
Billy Boyd (2) ch c by Wilbur Lou (3) 2:10¼—Lady Zombro 2:24¼ by Zombro 2:11 ..... 2:30
2:18 pace, purse $50:

DAIRY SHORTHORNS IN A CALIFORNIA SETTING.

It is almost sixty years since the first purebred Shorthorn cattle were introduced into California by the late Wm. D. M. Howard, and in the time that has intervened the breed has established itself in a most substantial way in the Golden State. Primarily a beef animal, the milking strains have been developed in certain branches of the family until in that line they have attained a high plane of usefulness in the dairy, and represent about the very best type of the dual purpose cow. Dairy Shorthorns have set some wonderful records for milk and butterfat production, and there is almost no resemblance between the beef from the dairy Shorthorn and from the various breeds that for generations have been bred solely with milk production as the end in view. They are good dispositioned cattle, "good doers" either on pasture or in the feed lot, and are an "all 'round" kind that pay a good profit steadily.

Importance of State and County Fairs

(BY HAWLEY, IN THE HORSE BREEDER.)

Nothing has done more to maintain the interest in the light harness horse than the custom that has prevailed in this country for many years of holding state and county fairs where trotting meetings are given. The American trotter is in a sense a national institution, is admired not only by the students of breeding and the enthusiastic followers of the Grand Circuit, but the races in which he takes part form a national sport for the country people. In large cities, where trotting meetings are given on an elaborate scale and where the best horses in training are to be seen, there is found an entirely different element from that which gathers at the various fairs held in the autumn. In the cities many other forms of amusement are to be had, and the trotting meetings, which last throughout the week, attract many men and women who take only a casual interest in the sport, and who look upon is as one of the numerous pastimes which they can enjoy.

The fairs, including, as they do, the agricultural exhibits and live stock shows, draw from the rural districts, in which live the yeomanry. The farmers and stock growers with their families look upon a fair as their yearly holiday, and, no matter how strong is the attraction in the form of other exhibitions, the trotting and pacing races form the main feature. The contests for supremacy enthuse the country people to a pitch of excitement because, throughout the year, other forms of pastime are lacking. The sports, such as baseball, golf, tennis, shooting and riding, are enjoyed by a comparatively small percentage of the people living in the rural districts, and these have come to look upon the harness racing which is furnished by the fairs as something that belongs to them, that is, in fact, their chief excitement and their greatest pleasure.

The great fairs, such as those given at Brockton, Mass., Springfield, Ill., Minneapolis, Minn., Milwaukee, Wis., Hartford, Conn., Allentown, Pa., have a daily attendance ranging from 25,000 to 50,000 people, and on special days, on which there are attractions in the form of exhibition miles by famous trotters and pacers, and contests between fields of fast horses, the number is increased two-fold. Here is where the light harness horse is best appreciated, for here he presents a spectacle that can be furnished to the country people in no other manner. He arouses greater enthusiasm, even though he may be far inferior to the champion which is found in the Grand Circuit, for the reason that he does not have to compete with other attractions so numerous in the more thickly settled communities and larger cities. At state and county fairs the trotter reigns supreme, and his appearance is looked forward to from one year to another with greater interest than is found among the pleasure seekers who have so much else to interest them.

The average attendance at a Grand Circuit meeting if put at 5,000 means that approximately 200,000 people witness harness racing as given by the chain of meetings beginning at Cleveland and ending at Lexington. Many of these take but an indifferent interest in what is going on before them, a few are drawn to the trotting courses by the opportunities furnished to back their judgment, others go because of the social side of racing, and a few because of their interest in breeding and their familiarity with the horses, owners and drivers. On the other hand, the state and county fairs, which are given each year in almost every state of the Union, attract as many millions, and, while only a comparatively few of the visitors are students of breeding and racing, they are the real enthusiasts whose support has made harness racing the national pastime. At these fairs, not only is the trotter seen in active contests, but is on exhibition in the various rings for stallions, broodmares and foals. The enormous crowds that congregate on the fair grounds are interested in the show rings, are enthused by the trotting and pacing races, and, in this manner, the light harness horse occupies a place in their affections which is rarely gained by a Grand Circuit performer.

The average Vermonter does not know Uhlan by his record of 1:58, made at Lexington, but by his wonderful mile made over the track at White River Junction. The millions of people who have seen Dan Patch 1:55¼, do not think of him solely because he paced the fastest mile ever made by a harness horse, but because they have seen him at many state fairs in his great struggles against time. They have been brought in close touch with him, and, whether or not he succeeded in accomplishing the task put before him, he lives in their memory not as a Grand Circuit performer, but as the star attraction at one fair or another at which the visitors are largely from the rural districts. The country people who have no opportunity of seeing such races as The Transylvania, The Merchants and Manufacturers Stake, the futurities, or any other of the classic events, are familiar with the winners, the champions of their day, through the columns of the press or by hearsay. It is the winner who performs in their own locality, the trotter or pacer who is victorious at their own state or county fair that is given their allegiance. If their interest in harness racing and in the wonderful record-breaking performances were confined solely to what is written, they would soon forget the existence of even the star performers.

The races scheduled at state and county fairs create an interest that leads many men into breeding ventures, into the ownership of a colt or filly which may develop into something worthy of being trained and started near the home of the owner. A vast majority of the trotters and pacers in training are produced by small breeders, by the farmers who own but one or two mares. These men, as a rule, have been taught to admire the light harness horse by seeing him in his struggles for supremacy in races given at the local fairs. This interest has been increased by continued attendance at these autumn meetings, and sometimes has led to extended enterprises, larger studs, and greater expenditures. It is probably true that ninety per cent of the owners of all the trotters in training today live either in the country or in small towns, and, while a few of these, and necessarily a very few, engage their horses in the most important events of the Grand Circuit, the great majority find their chief interest in racing at the fairs held in the communities in which they live.

While the importance of the Grand Circuit cannot be overestimated, and while the market for the best horses in training is regulated by success or failure in the important events, the breeding industry is supported by the farmers, or by those who live in the smaller towns. The buyers of high priced breeding stock or of first-class racing material doubtless come from the cities where is found the greatest wealth, yet the producers of the major portion of our light harness horses are not the owners of great breeding establishments, no matter how extensive may be their operations, the men engaged in agricultural pursuits, raisers of live stock, citizens of smaller towns being the real supporters of the industry. There are, perhaps, a dozen large breeding establishments in the United States, the output of which would amount to 600 foals, yet the many thousands of trotting-bred colts and fillies produced yearly are furnished by the small breeders, and these invariably live in the rural districts.

The degree of interest taken in harness racing, as between state and county fairs and Grand Circuit meetings, is shown by the amount of enthusiasm at the former and the lack of it at the latter. When Uhlan trotted in 1:58 at Lexington, there was a murmur of applause, yet, had the same effort been made at one of the great state fairs and before the enormous crowds which gather on such occasions, there would have been heard a shout, a roar of enthusiastic approval and acclaim that would have shaken the stand from foundation to roof. Desperate finishes between champions at Grand Circuit meetings occasionally create mild enthusiasm, yet nothing like the frenzy, the tremendous outburst that greets a victor when he passes under the wire before the thousands of country people who are the spectators at one of the great state fairs.

The sport of racing the light harness horse does not hold first place in the affections of the inhabitants of large cities, yet he is the idol of the countrymen. A visitor to a fair such as is given at Brockton, Mass., would be impressed with the interest that is taken by the occupants of the stand, a majority of whom know little about the contestants other than their names. He will find in any of the agricultural districts in the west a greater enthusiasm, a more spontaneous outburst over a contest which is close than at any meeting in the Grand Circuit, and it is this enthusiasm, this keen delight in the sport of racing that has resulted in the maintenance of the breeding industry the past half century. The student of breeding, the sportsman who is familiar with record-breaking performances, the battles for supremacy in the so-called classic events has become accustomed to the appearance of champions, and he takes even the most extraordinary achievement as a matter of course. On the other hand, the man who lives on the farm or in a small town has not become satiated through his familiarity with the trotter when seen at his best, and is more quickly aroused, more easily thrilled, and gives vent to his enthusiasm on the slightest occasion.

Of the many thousands of trotters foaled each year only a few are furnished a field of usefulness by the great trotting meetings of the year, and the others, and these are in the vast majority, make up the list of performers at the smaller meetings or those given in conjunction with the annual fall fairs. Racing the light harness horse is an American institution, and appeals to the American citizen as such, yet it should be remembered that the American citizen does not always live in the great cities of this country, but in the rural districts, in the farming sections and in the smaller towns. The admirers of the light harness horse are found by thousands in the cities in which Grand Circuit meetings are held, while hundreds of thousands of the lovers of light harness racing live in the country, and it is to these that the state and county fairs appeal.

If the practice of holding fairs, both state and county, should for any reason be abolished, or if light harness racing should no longer be a feature of these institutions, there would be little left except the Grand Circuit, the Great Western Circuit, and the few other chains of meetings in the various sections of the United States. The result of this would be that comparatively few of the trotters and pacers trained each year would find a field of usefulness, and the market values would shrink to such an extent that the breeding industry would practically be destroyed. The output of the more extensive breeding establishments is bought with a view of racing in the richest and most important events, yet a very small per cent is found capable of competing for these prizes, and the balance is campaigned over half-mile tracks, many of which are controlled by fair associations. At any state or county fair where harness races are given, the entrance fees can be made smaller than where racing is given alone. A great state fair which draws tens of thousands each day is not dependent solely on the entrance fees to make up the purses, and it is becaus of this that, in the near future, much of the best racing will be found at the agricultural expositions given by fair associations.

The popularity of the trotter is not found so much in fashionable circles, in communities in which every conceivable form of pastime abounds, but it exists in the farming sections, in the country, in small communities. It is not the rich men of this country who support racing, although this is the case to a certain extent in Grand Circuit affairs. It is the small breeder, the farmer, the townsman, the tiller of the soil, the stock raiser, the merchant in the village. Fairs are not supported by the inhabitants of large cities, and, with few exceptions, do not appeal to the man in the metropolis; but they are the mainstay of the industry of breeding the light harness horse, sheep, cattle, swine, as well as the agricultural products of the farm. Agriculture and stock raising are the pursuits of millions, and the fair is the meeting place, where these wares are exhibited.

CANADIAN INVADERS MAKE SAFE RETREAT.

Winnipeg, June 28.—Mac Rochon and Joe Carson returned to Winnipeg today from the June meet of the Panama-Pacific Exposition and on hearing of their arrival I looked them up. When they are in Winnipeg they are never hard to find in the daytime and when I entered the Leland they were racing it all over again before an interested bunch of spectators, who by financial depression and domestic responsibility had been forced to stay on this side of the international boundary.

To have a reserved seat in the front row of the grand stand at Frisco and witness the big stake races, is all that exceeds one of Joe Carson's descriptions of a good horse race.

It was well on in the afternoon when I joined the group and the liquidating department had ceased dispensing operations several hours before there was an adjournment. "They knew the Canadians were there all the time," said Joe as he wound up for the night, "and we got a piece of money every time we started. My horses," he said, "are headed for the Great Western and will start at Davenport the last week in July. In the meantime they will make a few starts through Nebraska and I'll join them when they hit the middle west. The time intervening gives me a chance to spend a few days at home," said the genial Joe, "and then you know I wanted to see that Mac got back safe. I am glad to see you are going to have a good meet here in connection with the big patriotic week," he remarked, as he climbed into Grand Opera, the big automobile he bought after the memorable meeting of College Gent and the crack eastern pacer at Brandon two years ago, "and I'll stick around and give the boys a chance to speculate."

The Beaver, Mac Rochon's pacer, started in three events at the big fair. He won one, was second in another and got fourth money in the big $20,000 pace. "I am well satisfied with the results which would have been better had we not played in such hard luck in drawing positions, for our horses were good and we were in the game all the time. I am sending The Beaver, Senaca Boy and Alberta Dillon over the Grand Circuit and if we have no hard luck we'll go back and take another crack at them in the fall."

Mac says California is all right, only for the climate. "We had to wear our overcoats most of the time. It's a hard track on horses," said the genial proprietor of the Leland, as he continued, "the big winds off the bay removing all the top dressing every day and keeping it very hard. We came through all right, though, for we shipped good, sound ones and they are all in good shape for the big campaign before them.—R. S. H., in the Canadian Sportsman.

On the last day of the meeting at Calgary the five-year-old pacing mare Betsy Hal by Hal D., driven by W. R. McGirr, dropped dead a few yards after passing the wire in the second heat of the 2:30 pace or 2:25 trot. She was owned by Hector Noel of Gravellburg, who paid a thousand dollars for her when she was a three-year-old, and was valued higher at present. She had worked in 2:15 over a northern two-lap track and Canadian papers credit her with a record of 2:22¼, presumably acquired this season, as she doesn't show this way to the close of 1914.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

DOG BREAKING AND PSYCHOLOGY.

At first sight dog-breaking and psychology appear as far as the poles asunder, and it is only when the fact is recognized that one branch of it—called sometimes "animal," sometimes "comparative psychology" deals with the characteristics and processes of the animal mind that the connection becomes clearer. If it is of value to the golfer or lawn tennis player to have some knowledge of the laws of nature as affecting his inanimate ball, it is of far more importance for the breaker to look into the laws which take cognizance of the nature of the dog's mind and the way he learns; in the one case the data are constant and precise, in the other it is a living entity that must be dealt with and the breaker must adapt his methods to meet the infinite variations in things that live. Unless he appreciates the general law, he cannot hope to contend successfully with each variation as it presents itself to him.

Prodigies such as calculating boys, or—according to Maeterlinck—the Elberfeld horses, add, multiply, and even abstract cube roots without an adequate knowledge of arithmetic; so consistently successful breakers—and they are few and far between—achieve success without even a bowing acquaintance with psychology. This is not because their methods are not in consonance with its conclusions, but because by their intuition—their "dog-sense"—aided by their experience, they apprehend and apply them.

A would-be breaker devoid of "dog-sense" starts on his first gundog; he knows what a dog of the breed should do, but that is all; no book on the subject or friendly advice is available to give him the benefit of the experience he needs. In order to attain the desired end he tries now this method, now that. He abandons those methods that he finds are not successful, and persists in and elaborates those that are. He proceeds purely on a system of hit or miss—if it can be called a system; his powers of reasoning are of no avail—he is not in possession of any data from which to draw an inference; after many misses he at last hits on a method that succeeds: he knows not the why or wherefore of his success—all he knows is that this particular method has achieved it; he is unable to appreciate the underlying principles which guided him to success; he is solely in the concrete and the particular. This method meant to him success; this is all he knows. The unsuccessful methods are abandoned because they did not result in or mean success; this abandonment is not dictated by his reason any more than it is his reason which prevents him putting his hand in the fire or drawing a razor across his finger; these acts mean to him burns or pain, so he forbears from them. They are all alike, "little bits of experience," and nothing more.

Just as the novice breaker learned to break the dog, so does the dog learn. Reason—in the sense of "explaining his own acts and the causes of phenomena"—does not enter into the education of the dog whether he teaches himself or is taught by man. The actions that are followed by discomfort get stamped out, and those that are followed by satisfaction get stamped in; the result is the cumulative effect of "little bits of experience" and the consequent formation of a habit—nothing more.

Follow the dog-breaker in his further attempts with other dogs. Having found one method successful with his first dog, he seeks to apply the same method with his second and subsequent ones. Each dog he expects to be something like the former ones; he approaches the new expecting it to be like the old; he begins to generalize, to put his particular experiences side by side and extract a principle—a principle, too, that he may adapt to any variations from the type that may present themselves in future; if by chance he discovers that the principle does not act as his former experience has led him to anticipate, he seeks the why and wherefore of his non-success, and if necessary modifies his principle so as to fit it in not only with his new but also with his previous experience. He passes from the concrete and particular to the abstract and general.

It is when we come to this power of generalization, of formulating a general principle, of seeking and appreciating causes that the breaker's processes part company with those of his dog. Many are the recorded instances of dogs learning to open doors. Professor Lloyd Morgan, in "Animal Behaviour," mentions the case of a dog of his own; in none of them is there any evidence that the dog knew why the placing of his paw or head in contact with the latch resulted in the opening of the door; to each dog the particular action that led to the opening of the particular door was no more than a "little bit of experience"; having learned to perform it, he was no nearer knowing how to open a door with another form of latch or probably even another door elsewhere with a similar latch; he had no conception that the latch was connected with the opening of the door or that raising or depressing it meant getting in or out; it was his own act alone that had that meaning. Psychology, then, teaches the dog breaker that it is useless to assume that there is a "why," "wherefore," or "because" in the canine mind; that the only successful method of tuition is to see that the actions he desires to stamp out are connected with discomfort and those he would encourage with satisfaction to his pupil; that such connection can only be established by the closeness in point of time with which the discomfort or satisfaction follows the act, and that if not frequently repeated is soon lost or never really formed; in other words, that unless these conditions obtain he can never rely upon his dog knowing what it is that he is being punished for or for which he is rewarded. Psychology does not pretend to teach the breaker of what that discomfort or satisfaction should consist; although this is left to him, his ultimate aim should undoubtedly be to eliminate all elements other than the effect on his dog's mind of his own approval or disapprobation expressed in no more forcible manner than hard words. It does not, moreover, pretend to teach the breaker whether he should rely more on stamping out or stamping in, but there can be little doubt that a breaker who unduly relies on punishment for stamping out can never hope that his approval will be summum bonum to his dog.

And is there nothing that psychology can learn from dog-breakers? Most psychologists look askance at anecdote; they accuse its purveyors of starting with the assumption that their dogs are possessed of human—even superhuman—wisdom, and trying to prove their case by recording every act of cleverness and suppressing every stupid one; they liken the anecdotist to the scientist who sets forth to prove microbes very small and very close together, or the stars very large and very far apart; in consequence they insist on test conditions. That dog-breakers may be free from their ban is shown by the following passage from "Animal Behaviour": "The skilful trainer utilizes the natural instinctive tendencies as a basis; and by a system of rewards and punishments, leads the intelligent"—meaning thereby the hit or miss as opposed to the rational—"modifications of behavior along lines directed by his deliberate purpose. The conditions are largely those of experiment, and they bring out the play and range of intelligence"—meaning as above—"in a way that would otherwise elude our observations."

Psychologists are not in agreement on imitation—perchance the breaker might have something to say on natural "backing"; they assert that a dog can not be taught anything by being put through the performance—what about "dropping," and perhaps some systems of teaching retrieving and a correct delivery? They are, moreover, skeptical as to the ability of the handler to control his dog without words or signal—merely by his will power, animal magnetism, rapport, thought transference, whichever you will: on this there are few successful handlers that would not have strong views.

Comparative psychologists are no mere idle inquirers; their researches into the animal mind are directed to the elucidation of the evolution of the human mind from instinct, through "intelligence" to reason—a course which they aver the mind of each individual human being runs between the cradle and the grave. What is the connecting link between "intelligence" and reason? What is the boundary line between the two? Is it possible now or in the future for any animal but man to pass it?

Each breaker who pursues his hobby or his calling with a seeing eye can, out of his experience, contribute his mite to the solution of the mystery.

LIABILITY OF EXPRESS COMPANIES.

That express companies are liable for damages when they unnecessarily delay dogs in shipment is an established fact, though it is not generally known to the members of the dog fancy. A case of damages for delay in transit was compromised in Decatur, Ill., in which a certain express company paid $100 damages because they failed to deliver a certain dog to a dog show on schedule time. It being claimed by the owner of the dog that his dog was seen by the judge of the show and that the judge said the dog would have won first had it reached the show in time. That same fancier received $50 damages from the same express company because a puppy had contracted a cold while en route to a dog show and the cold developed into a case of pneumonia resulting in the puppy's death. The case is of special interest to dog fanciers because so many express companies try to convince shippers that an express company assumes no responsibility for loss of prospective profits—as was the case of the dog consigned to the show.

The report in a New York paper that there was to be a terrier show at George S. Thomas' place, Hamilton, Mass., was somewhat premature it seems. In fact, Mr. Thomas is said to know little about the affair.

NEW GAME AND FISH LAWS.

California game and fish laws received numerous amendments at the hands of the last Legislature. Changes in the open and closed seasons, and several additional prohibitions constitute the main features of the new law which will take effect August 8. Meanwhile the old fish and game laws are still in force, except where the seasons have been pruned by county officials.

Of first importance is the new district act, which divides the State into twenty-nine districts, where there were but six before. For all practical purposes, however, sportsmen are concerned principally with but four districts and what controls therein. The Ellery Arms Company has anticipated the State officials by issuing a chart of general fish and game information, a summary of which follows, and will no doubt be of interest to sportsmen at large.

The changes in the deer hunting laws are worthy of more than passing attention. The killing of spike bucks as well as does and fawns is prohibited throughout the whole State. Further, deer hunters must retain the skin and portion of the head bearing the horns of any buck and for ten days after the close of the season. This part of the animal must be produced upon demand of any fish and game deputy under penalty of a misdemeanor.

Under the new law, which goes into effect August 8, the open seasons for bucks are: Districts 1 and 23 (the latter embraces parts of Sierra, Placer, El Dorado and Nevada counties), the open season runs from August 15 to October 15. In Districts 2 and 3 (the coast, Sacramento and San Joaquin valley counties from Mendocino to Santa Barbara), open season starts August 1 and ends September 15, six weeks instead of two months, as formerly. In District 4 the season is open during the month of September only. It is also illegal to sell deer meat, and two bucks per season is the individual limit. To kill an elk is a felony punishable by two years' imprisonment. Antelope, mountain sheep, beaver and sea otters are on the protected list and may not be hunted.

The season on doves has been changed; hereafter the open season throughout the State is three months, from September 1 to December 1. The limit will be 15 instead of 20 per day.

The season on valley and desert quail in all districts opens as formerly, on October 15, but closes December 31 instead of February 15. The limit bag has been reduced from 20 to 15 per day and from 40 to 30 per week.

In connection with this, and for claimed quail protective reasons, the open season on cottontail and brush rabbits has been set ahead from August 1 to October 15, running the same period as the quail season does. The limit is now fifteen per day, or thirty during one week.

The new laws affecting water fowl in general make the State game seasons conform with the federal seasons. Thus, the open season for all water fowl permitted to be killed, such as ducks, geese, snipe, brant, mudhens, etc., now will run from October 15 only to January 1, instead of March 1, as formerly.

Heretofore there has been no closed season nor limit for geese. The open season now provided will be from October 15 to January 31, and the limit bag will be twenty-five per day and not over fifty a week, which limit also applies to ducks, excepting wood-ducks, which are protected until 1918.

The limit on English snipe, black-breasted and golden plovers and yellowlegs will be fifteen a day and only thirty a week. Curlew and all other shore birds are protected by federal statute.

Sage hens can be shot from September 1 to December 1 in all districts, the limit being four a day and eight birds only a week. Mountain quail and grouse, in the Sierra country districts 1 and and 23, can be shot from September 1 to December 1. Limit, ten mountain quail a day, or twenty per week, grouse, four a day or eight a week.

Tree squirrels can be shot in any game district from September 1 to January 1. The limit is twelve squirrels only in one season.

The rod and reel fishermen can get plenty of fish for himself and friends, but he is barred from selling his finny prizes unless he obtains a commercial fishing license.

The season for hook and line fishing of striped bass is open all the year round. The sale limit weight is not under three pounds, but any rod fisherman may retain five bass under that weight caught in one day. The limit daily catch between September 25 and November 14 is five.

Salmon can be taken by hook and line or with a spear all the year round in every water of the State except from September 25 to November 14, when the daily limit is three fish.

Sacramento perch, sunfish and crappie may be taken with hook and line in catches of twenty-five a day between May 1 and November 31, wherever they may be found.

The embargo has been taken off catfish.

Black bass open season in districts 1, 2 and 12 runs from May 1 to November 31. District 12 embraces north San Francisco bay, the San Joaquin river and the Sacramento river as far north as Cosumnes. In Districts 3 and 4 the open season begins March 1 and closes December 1. The daily limit is twenty-five, to be taken with hook and line only; sale is prohibited, and the size limit is nothing under seven inches in length.

For the protection of the black spotted trout at spawning time District 23 has been created of Lake

Tahoe and the Truckee river drainage basin, in which the open season for all trout has been set forward to run from June 1 to October 31. In all of the other districts of the State the open season for trout is from May 1 to November 30. The daily basket limit is fifty fish or ten pounds and one fish. In District 2, from December 15 to February 4 (in coast streams), the daily limit is cut down to two trout a day. Golden trout can be caught during August and September, twenty per day, none less than five inches long.

At the Traps

Pacific Coast Trapshooting Tournament—A special report from San Diego states:

"The tournament was originally scheduled to be held on July 5, 6 and 7, as these dates fitted in nicely with two other tournaments on the Pacific Slope. The dates were changed at the request of the Pastime Gun Club, the request being made by said club on the strength of a telegram received by it from Dayton, Ohio, stating that fifty shooters in a special train would arrive in San Diego on the morning of July 7, and asking that the dates of the tournament be changed accordingly. Contrary to the advice of The Interstate Association to investigate the situation closely before making any change, the club requested that the dates be made July 8, 9 and 10, and the Association acquiesced. Much to the disappointment of the officers and members of the club, not one eastern amateur put in an appearance, and as at least three California men were kept from participating in the tournament by reason of the dates being changed, the local management were somewhat outspoken in their denunciation of those responsible for the situation. The San Diego Union, the local morning paper, referred to the matter in a decidedly uncomplimentary manner, and the 'fifty shooters from the East' came in for sarcastic comment on numerous occasions during the progress of the tournament."

The balance of the report is substantially the same as appeared in last week's issue.

The purse distributions were the following:

Pacific Coast Handicap Purse—54 entries at $8, $432.00; 3 penalty entries at $12, $36.00; 21 entries for targets only. 78 total entries, $468.00; added to the purse, $200.00; total purse, $668.00.

Winners: H. Pfirrmann 98, $133.60; J. F. Couts 98, $106.90; A. Ervast 98, $86.85; H. M. Williams 98, $86.80; W. H. Rodden 97, $60.10; H. B. Havens 96, $46.75; J. F. Dodds 95, $30.70; H. P. DeMund 95, $30.70; S. A. Bruner 95, $30.70; R. N. Fuller 95, $30.70; D. Holohan 95, $30.70; S. R. Smith 94, $2.65; L. M. Packard 94, $2.65; R. P. De Mund 94, $2.65; Toney Prior 94, $2.65; H. Ogilvie 94, $2.65.

Preliminary Handicap Purse.—62 entries at $5, $310.00; 2 penalty entries at $7, $14.00; 2 penalty entries for "targets only," $4.00; 15 entries for "targets only," 82 total entries, $328.00; added to the purse, $100.00; total purse, $428.00.

Winners: C. Julian 98, $77.05; W. G. Warren 97, $64.20; E. M. Barber 97, $51:35; A. Julian 95, $37.10; R. N. Fuller 95, $37.10; R. H. Bungay 95, $37.10; H. B. Havens 94, $19.65; W. S. Peace 94, $16.95; H. Ogilvie 94, $16.95; W. G. Harris 94, $16.95; A. G. Wilkes 94, $16.95; W. B. Twitchell 93, $6.40; H. M. Williams 93, $6.40; T. Wilkes 93, $6.40; R. H. Bixby 93, $6.40.

Squier Money-Back Purse, three days—50,000 targets at 1c each, $500.00; 65 entries first day at $1, $65.00; 68 entries second day at $1, $68.00; 60 entries third day at $1, $60.00. Total purse, $693.00; losses paid back, $263.00; surplus, $430.00.

Winners: J. F. Couts 339x350, $49.45; J. Weisser 339, $49.45; D. Holohan 337, $43.00; R. P. De Mund 336, $34.40; O. N. Ford 335, $34.40; A. Julian 334, $30.10; W. G. Harris 333, $22.90; Toney Prior 333, $22.90; W. G. Warren 333, 22.90; C. Monoghan 332, $14.30; H. Pfirrmann 332, $14.30; R. H. Bungay 332, $14.30; Lee Couts 331, $7.50; R. N. Fuller 331, $7.50; H. Ogilvie 331, $7.50; Tom Wilkes 331, $7.50; J. Plaskett 330, $4.30; R. N. Arnold 329, $4.30; W. B. Twitchell 329, $4.30; H. Havens 328, $4.30; C. A. Sage 328, $4.30; A. G. Wilkes 326, $4.30; H. P. De Mund 325, $4.30; W. S. Peace 325, $4.30; H. Williams 324, $4.30; S. Brunner 323, $4.30; W. Eilert 323, $4.30.

Optional Sweeps, July 8, 9 and 10—350 regular program targets. 11 entries at $5, $55.00 purse.

Winners: J. F. Couts, 143-98-98—339, $16.50; D. Holohan, 146-96-95—337, $11.00; R. P. De Mund, 146-94-96—336, $8.25; W. G. Harris, 141-95-97—333, $6.85; Toney Prior, 142-94-97—333, $6.85; R. H. Bungay, 141-95-96—332, $5.50.

Optional Sweep, July 8—19 entries at $1, $19.00 in each event. Event No. 1 each 15 paid $2.35; No. 2 each 15 paid $3.15; No. 3 each 15 paid $2.35; No. 4 each 15 paid $2.35; No. 5 each 15 paid $2.35; No. 6 each 15 paid $3.80; No. 7 each 15 paid $1.45; No. 8 each 15 paid $3.15; No. 9 each 15 paid $2.35; No. 10 each 15 paid $2.10. 14s did not count.

Optional Sweep, July 8—150 targets. 11 entries at $5, $55.00 purse. R. P. De Mund 146, $13.75; D. Holohan 146, $13.75; L. Couts 144, $8.25; J. F. Couts 143, $6.85; R. N. Fuller 143, $6.85; Toney Prior 142, $2.75; H. Ogilvie 142, $2.75.

Optional Sweep, July 9—15 entries at $1, $15.00 in each event. Event No. 1 each 20 paid $7.50, 19 paid 75c.; Event No. 2 20's paid $1.65, Event No. 3 20's paid $3.00, Event No. 4 20's paid $3.75, Event No. 5 20's paid $5.00.

Optional Sweep, July 9—100 targets. 11 entries at $5, $55.00 purse. J. F. Couts 98, $13.75; Tom Wilkes 98, $13.75; D. Holohan 96, $8.25; W. G. Harris 95, $6.85; R. H. Bungay 95, $6.85; H. Pfirrmann 94, $1.35; Lee Couts 94, $1.35; W. G. Warren 94, $1.35; R. P. De Mund 94, $1.35.

* * *

Interstate Tournament—Programmes are out for the California-Nevada Trapshooters' Association fourth annual tournament on the Golden Gate Gun Club's grounds, August 5-6-7. Ten 20 target events, $2.00 entrance, and $25.00 added to each—200 singles is the bill for the first day. Eight 25 bird races, $2.50 entrance, $30.00 added is the second day's schedule. The last day's card calls for five 20 bird matches, $2.00 entrance, $20.00 added and one 1 event, $5.00 entrance, $100 added.

Seven trophies—Hunter Arms, Sorenson, Peter Du Pont, Reed, Roos and Hunter Arms No. 2, will shot for the second day in the 25 bird events, his guns to win. Each trophy has three "legs" on it. two individual wins goes for permanent ownershi These events will no doubt bring out a big entry. Th 100 bird race purse will be divided high guns, nur ber of moneys determined by the entries. Oth purses will be divided Rose system 5-4-3-2.

Get a programme in the sporting goods stores, write to Secretary Ted Riley, Humboldt Bank Bldg San Francisco.

* * *

Golden Gate Monthly Shoot.—Ten squads of sho gun enthusiasts were on the firing line at the Golde Gate Gun Club blue rock trap ground at West Al meda station July 18. "Pop" Merrill was high gu in the regular club programme of 50 birds. Tone Prior was next up with a string of 47. Merrill, Prio A. G. Wilkes and Knight broke every bird in th opening club medal match.

Five 19s were high guns in the challenge troph shoot and eight gun pointers pulverized every san saucer in the 10-bird event. Charley Spencer, th St. Louis expert, missed but one bird out of 5 chances. Miss Meyers and Miss Avery proved tha women know how to point a shotgun gracefully an effectively. The scores follow:

C. G. Spencer*	20	20	9	4
C. A. Merrill	20	19	9	4
Lon Hawxhurst*	19	19	10	4
R. C. Reed*	19	19	10	4

On a Brief Visit—Charles G. Spencer of St. Louis, the great pump gun artist, was in this city for several days last week and gave our sanctum the once over. This was his initial trip to San Francisco and like every other Eastern visitor who has had a look in here he regretted to leave—he will be back again, however, they all come back. He landed first at San Diego where he did some long run stunts during

Tenth Pacific Coast Handicap, San Diego, Cal. Summary of scores. Wednesday, July 7—A: Practice day, 100 singles, 16 yards. Thursday, July 8—B: Regular program, ten 15 bird events, 150 singles, 16 yards. C—Special event at doubles, 25 pairs, 50 birds. Friday, July 9—D: Regular program, five 20 bird events, 100 targets, 16 yards. E: Preliminary Handicap, 100 singles, unknown angles, 16 to 23 yards rise. Saturday, July 10—F: Regular program, five 20 bird events, 100 singles, 16 yards. G: Pacific Coast Handicap, 100 singles, unknown angles, 16 to 23 yards rise. H: Total breaks in regular program, 350 singles. I: Total score in regular program and both handicap events—650 singles. J: Total score on all targets, singles and doubles—700.

e Pacific Coast Handicap—157 being his best showg and incidentally the top run of the shoot. He ntinued his smokeless powder fireworks at Los geles the following week. Last Sunday at the lden Gate shoot he was high gun, 98x100. An erage of 98% during his Coast trip is certainly me single stick shooting to take notice of. This ight be expected, though, from a shooter who holds e world's long run record—565 straight, made at ola, Ills., 1909.

GRAND AMERICAN HANDICAP.

The Interstate Association's sixteenth Grand American Trapshooting Tournament will be held in Grant Park, Chicago, Illinois, under the auspices of the Chicago Association of Trapshooters, August 16, 17, 18, 19 and 20.

From 1900—the year in which the first Grand American Trapshooting Tournament at Targets was held—until the present time, The Interstate Association has spared no pains to arrange all details of this great annual tournament. This year more than ordinary care and forethought have been bestowed upon the preparations. This was necessary, inasmuch as the management of the Association recognized had a new problem to solve, viz., the successful carrying out of an extremely difficult program on new grounds under new conditions.

However, as in the past, nothing was left undone that could add to the pleasure and comfort of the most of sportsmen who, year by year, attended the Grand American Tournament in increasing numbers, so this year will the management work diligently for the same end to meet equally the new conditions.

Never in the history of trapshooting in Chicago has there been as much enthusiasm shown nor has any trapshooting tournament ever been held that will have the co-operation and support of as many prominent and influential business men, including all the city, country and gun clubs and other organizations. The General Promotion Committee is composed of representatives from nearly every trapshooting organization in the vicinity of Chicago—aggregating thirty-nine trapshooting clubs.

The program for this year's tournament is not materially different from that of its predecessor, held last year. That program was so happily devised that it won the approval and support of the trapshooting fraternity to a marked degree. The schedule of events, in the main, follows the policy adopted by The Interstate Association in respect to its Grand American Trapshooting Tournaments, and which have proven in practice to be popular, equiable and successful.

As was the case last year, The Interstate Association will donate numerous trophies to be competed for. These trophies will be well worth winning, and the winners will have the satisfaction of having something besides cash to take home with them as proof that they have defeated "the best in the land at the greatest trapshooting tournament in the world."

To handle a handicap tournament, and handle it successfully, is always a difficult matter; sometimes the effort succeeds, more often it fails. It is with a direct knowledge of this condition of affairs, a knowledge born of experience, that ten traps will be installed under the 'Section System," slightly modified. By using ten traps the management confidently believes that, barring inclement weather, it will be possible to finish each event on the day it is scheduled to be shot with a total of 700 entrants.

Many suggestions were offered during the past year to The Interstate Association looking to a different system of dividing the moneys. All such suggestions, however, were rejected, the management of the Association preferring to stand by its colors, basing its belief in the soundness of the principle of "high guns to win" on the successes of the past.

The program for America's premier trap shooting meet, briefly outlined, is as follows:

Monday, August 16—Preliminary Day, Grant Park Introductory, open to amateurs only: 200 single targets, unknown angles, $20 entrance—targets included, 18 yards rise, high guns, $100 added. Squads will not be divided into sections this day.

First Day, Tuesday, August 17—The Chicago Overture, open to amateurs only: 100 single targets, $25 entrance—targets included, 16 yards rise, high guns win—not class shooting, $100 added. Thirteen dollars of the entrance money will be divided on the scores made at the 100 targets, one money for each 10 entries or fraction thereof. The remaining $10 will be divided on the scores made at each 20 targets ($2 per event), one money for each 10 entries or fraction thereof. The scores made in The Chicago Overture will be included in the official averages for 1915, as the tournament is registered.

The National Amateur Championship at 50 double targets, open to amateurs only: $10 entrance—targets included, 16 yards rise, high guns, $100 added to the purse. The winners of first, second and third moneys will each receive a trophy, presented by The Interstate Association.

The National Amateur Championship at 100 single targets, 16 yards rise, no entrance fee and no charge for targets. Open only to the winners (or to the runners-up) of "The Interstate Association's State Amateur Championship" competed for at the tournaments given by the several State Associations holding Registered State State Tournaments in 1915. The winner will be presented by The Interstate Association with a silver trophy costing $100 wholesale.

Each winner of a State Championship (or the runner-up) will be presented with $50 by The Interstate Association, provided he competes in this event. Optional sweepstakes, $10 entrance, one money for each 10 entries or fraction thereof.

Second Day, Wednesday, August 18—Preliminary Handicap, open to amateurs only: 100 single targets, $7 entrance—targets included, handicaps 16 to 23 yards, high guns, $100 added. The handicaps contestants receive for the Grand American Handicap will govern in this event. The number of moneys into which the purse will be divided determined by the number of entries. First, second and third highest scores will each receive a trophy, presented by The Interstate Association.

Third Day, Thursday, August 19—The Grand American Handicap, open to amateurs only: 100 single targets, unknown angles, $10 entrance—targets included, handicaps 16 to 23 yards, high guns, $500 added to the purse. The number of moneys will be determined by the number of entries.

The winner of first money is guaranteed $500 or more and a trophy; winner of second money guaranteed $400 or more and a trophy; winner of third money guaranteed $300 or more and a trophy; winner of fourth money guaranteed $200 or more and a trophy; winner of fifth money guaranteed $100 or more and a trophy. If first, second, third, fourth and fifth moneys fall below these amounts, the difference will be made good by The Interstate Association.

Regular entries must be made on or before Saturday, August 7, and must be accompanied by $5 forfeit. Penalty entries may be made after August 7, up to 5 p. m. Tuesday, August 17, by paying $15 entrance—targets included. An entry is not transferable, and entrance money cannot be withdrawn after entry has been made.

Fourth Day, Friday, August 20—Consolation Handicap, open to amateurs only: 100 single targets, $7 entrance—targets included, handicaps 16 to 23 yards, high guns, $100 added. The handicaps received for the Grand American Handicap will govern in this event. The number of moneys will be determined by the number of entries. The contestants making the first, second and third highest scores will each receive a trophy, presented by The Interstate Association. Any entrant who has been a money winner (regardless of how small the amount) in the Preliminary Handicap or Grand American Handicap will not be eligible to take part in this event.

There will be a total of $3,750 added money and Interstate Association trophies for the winning shooters.

The handicap committee is constituted as follows: O. P. Goode, Chicago, Ills., chairman; C. D. Coburn, Machanicsburg, Ohio; J. F. Wulf, Milwaukee, Wis; J. K. Warren, Birmingham, Ala.; Ray E. Loring, Marsailles, Ills.

Elmer E. Shaner, Treasurer of The Interstate Association, will be secretary of the committee, but will not have a vote in the handicapping of contestants. The committee will meet at Chicago, Saturday, August 14, but handicaps will not be announced until the next day.

Professionals and paid representatives are barred, even from shooting for "targets only," from all scheduled events. An extra trap will be installed for the use of professionals and paid representatives only, and a special 100-target event will be arranged each day for their benefit.

Several match races between well known professionals will be shot. In order that the spectators can follow the shooting without confusion, time permitting, each match will be shot as a separate event—100 targets per man—and they will start about 3 p. m. each day.

The following schedule has been arranged up to the time the program went to press:

Tuesday, August 17: Ben Schwartz vs. J. E. Dickey, W. D. Stannard vs. H. W. Cadwallader, C. G. Spencer vs. L. S. German.

Wednesday, August 18: J. S. Fanning vs. Murray Ballou, Jr., C. A. Young vs. Art Killam, J. R. Taylor vs. Homer Clark.

Thursday, August 19: F. G. Bills vs. Ed. O'Brien, T. A. Marshall vs. P. J. Holohan, Fred Gilbert vs. W. R. Crosby.

Friday, August 20: D. D. Gross vs. C. E. Goodrich, H. C. Kirkwood vs. R. R. Barber, R. W. Clancy vs. Walter Huff.

It is expected that several more match races will be arranged, due announcement of which will be made on the bulletin board on the shooting grounds.

The "Little Joker" trap will be another feature of the tournament with daily special events arranged.

For programs or other information address E. Reed Shaner, 219 Coltart Avenue, Pittsburg, Pa.

FISH LINES.

Whether up or down stream fishing produces best results or not is a question that will be argued until doomsday. Will Neal claims that fishing from horseback, as he has done many times in the trout streams of Montana, has unusual advantages over any other system. Riding down stream he has whipped out a trout almost from under the horse's hoofs. The theory is that the fish are used to horses and cattle and will not stampede as they do when the two-legged wader comes down stream.

Trout angling conditions at many favorite resorts are prime and fine baskets of speckled fish are landed daily by many local rodsters and their families who are enjoying an outing spell in the Sierra regions.

Lake Tahoe fishing is said to be all that could be desired, particularly at the Emerald bay fishing grounds. There, however, it is necessary to get one's spoon, or other lure, far down in the depths—100 or 150 feet, to secure the large lake denizens. Cascade and other near-by creeks offer the choice of smaller trout and possibly a more pleasing fight with a fish landed with lighter tackle. F. C. O'Conner, Mrs. O'Conner and Barry O'Conner during a two weeks' sojourn landed daily limits. One catch, nine trout, weighed just nine pounds.

At Boca and other Truckee points splendid sport is reported. Mr. and Mrs. James Maynard, Fred Schultz, Ed Schultz and Mrs. Schultz Sr. were the latest arrivals at that point. Al Ray and Al Polette's ten days' fishing was amply rewarded with limit baskets.

Bait fishing with grasshoppers and helgramites, produced but fair catches at Belden recently. The same may be said of Keddie and Nevis fishing spots. Near Blairsden, in the Feather river, its branches and the mountain lakes, the sport is said to be better. The main river is clear and normal.

Several anglers had the good luck to land five-pound trout. Spinning spoons and beaverkill, Hoffland's fancy, Hardy's favorite, red spinner and black gnats were the killing lures. Albert Gruenewaldt reports fishing is improving at Big Bar and will be better every day.

Al Wright's stay for two weeks at Quincy was good for daily limits of eight to fourteen-inch trout, in fine condition. At Shady Rest a number of San Francisco and Oakland visitors have enjoyed good sport. The fishing now in Grizzly creek is particularly commended.

Indian creek is near Taylorsville, in Plumas county, where Will Eaton and Tom Maguire of the California Angler's Club have been picking up daily limits of proper sized trout.

Big and Little Stony creeks, near Fouts Springs, have been prospected recently by Joe Springer, Milton Frankenburg, John Cattermole, Charles Gibbs, Arthur Brand, Howard Nauman and others. The verdict was, "the best of trout fishing can be had."

George Dawson tried the American river near Riverton, Placer county, for a week. No difficulty was experienced in getting daily limits of trout.

Chris Morehouse has been trying the upper reaches of the San Gregorio and its branches—La Honda, Alpine, Harrington and other brushy-hidden confluents, and with good results.

* * *

Striped bass anglers were sent up in the air on Wednesday by a telephone communication from Chief Otterson of the Napa Fire Department that a huge fifty-pound bass had been caught by a Napa rodster in the creek "near the tannery." The Wingo visitors—Joe Gaborino, Charles Reynard, Al Palmer, Louis Siminio and others are reported to have landed a dozen bass last Sunday, the fish ranging from ten to twenty pounds.

Evidently there is a run of large striped bass in Napa creek at present, for the record sized bass taken in our waters was landed Wednesday last week by C. Ross, a Napa angler. This monster bass scaled seventy-six pounds and it took Ross an hour and a half to land it.

* * *

Salmon fishing off Santa Cruz still continues very good. The fish are running a little larger than the previous week.

Peters Points.

At the Texas State Shoot, Temple, Texas, June 22-24, users of Peters shells were successful in a number of the principal events. In the State Team Championship event Messrs. E. F. and Sam Forsgard, the latter shooting Peters shells, won the title with 50 straight, the same score being made by the professionals, L. I. Wade and H. A. Murrelle, both using "P" shells. In the State Championship, single targets, Mr. Phil. Miller tied for first with 99x100. Messrs. Wade and Murrelle won second and third professional averages respectively and also won the State Championship at double targets, 27x15 pair. Three of the Interstate Association medals went to users of the "P" brand.

Interstate Association Tournaments—

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

July 19, 20, 21, 22—Pacific Indians, F. C. Riehl, Secretary, Tacoma, Wash.

July 24—Chehalis Rod and Gun Club, W. S. Short, Secretary, Chehalis, Wash.

July 28, 29—Delta County Gun Club, Nick Powell and R. A. King, Managers, Hotchkiss, Colo.

Aug. 5, 6, 7—Fourth annual tournament California-Nevada Trapshooters' Association. Auspices of Golden Gate Gun Club, West Alameda trap grounds. T. D. Riley Secretary, Humboldt Bldg., San Francisco.

August 10—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

November 4—Williams Gun Club, F. E. Lowe, Secretary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

Hog Cholera and Its Prevention

The University of California Experiment Station advises all hog owners to vaccinate their swine against hog cholera as soon as the danger of exposure is suspected. The late summer and fall is the time when hog cholera is most prevalent. Epidemics have already started in several places in the state, and even in localities supposed to be free from the disease farmers are warned to keep their hogs isolated and to watch for signs of sickness.

Hog cholera in the living sick does not present symptoms which positively distinguish it from other affections. If one of the hogs gets sick it should be removed at once from the herd. Before it dies a veterinarian should be called to kill and autopsy the animal and take temperatures on the others. This will usually show whether or not the disease is cholera. Do not wait until the animal dies, for if cholera is present great losses will result from its spread unless the healthy hogs are immunized at once.

If pigs get off feed or show any sign of sickness the probability of its being cholera should be considered, since nine out of ten sick hogs have this disease. Recent investigations have shown that most of the so-called cases of swine plague, infectious pneumonia, contagious sore eyes, staggers, and oftentimes paralysis, are really hog cholera, and the failure to recognize the underlying cause of such conditions has resulted in much unnecessary loss.

Owing to the expense of vaccination and the danger from carelessness in the use of virus, this station recommends the immunization of hogs only in infected localities, except in case of valuable swine which are to be shipped for exhibition or breeding purposes. There are two methods of immunizing hogs against cholera. In one the serum alone is used, producing an immunity lasting from thirty to ninety days; in the other, a small amount of virus (virulent hog-cholera-producing blood) is injected simultaneously with the serum, but at a different point in the body of the animal. This latter is known as the "simultaneous method" and will produce lasting immunity, except in suckling pigs and small shotes, in which case the immunity may disappear as they mature. Some serum manufacturers and others in their efforts to sell serum have advised all hog owners to immunize, stating that hog cholera is so prevalent that no farmer can afford to run the risk of keeping a susceptible herd. Under California conditions general vaccination at present would be desirable only in certain badly infected districts, while in other localities it would be a needless expense. The general use of the simultaneous method in non-infected districts may spread hog cholera, although we have seen no evidence that it has ever done so, while the use of serum alone would be a waste of money, for the reason that the immunity from this method is so short.

There is often a difference of opinion among veterinarians as to when to use the serum alone and when virus should be used with the serum. As previously stated, vaccination is not advisable unless there appears to be danger of cholera infection.

In infected herds this station usually advises the simultaneous method on all healthy hogs, except sows heavy with pig or with litters less than six weeks old. Such sows and their litters may receive serum alone, but should be re-immunized with serum and virus six to ten weeks after farrowing. Temperatures should always be taken and the animals which have over 104 degrees F. should be considered already infected and given serum alone, using a 50 per cent increased dosage.

Pigs from immune sows, although somewhat resistant, are not always free from the liability of having cholera. Some litters may be farrowed in infected pens and go past weaning time without becoming infected, while others get cholera within two or three weeks after farrowing. The pigs should be closely watched and if any show signs of cholera they should be given the serum alone. This will usually carry them well past weaning time, when they can be given the simultaneous treatment. If the herd seems to be extraordinarily susceptible to cholera, however, it will be necessary to give the serum alone more than once in order to carry them several weeks past weaning. Pigs given the simultaneous treatment soon after weaning sometimes lose this protection within a few months. To acquire a long-time immunity, pigs should weigh at least fifty or sixty pounds at the time of receiving the simultaneous treatment. At this weight the immunity usually lasts the ordinary lifetime of the hog. Certain swine raisers in this state whose herds are constantly exposed to infection and who have developed a thoroughly immunized lot of brood sows are able to permanently immunize the pigs at six weeks of age by injecting a slightly increased dose of virus (2 c.c.) and a small dose of serum (15 c.c.).

All hogs giving visible symptoms should be killed or placed in isolation pens without vaccination. It is a waste of money to treat visibly sick hogs. Notices should be posted, warning visitors to keep out, and the premises should be considered infected for at least thirty days after the disease has disappeared. Linen posters, 14 x 11 inches, printed as follows, can be obtained free by writing to the Veterinary Division, University of California, Berkeley, California:

WARNING

The hogs on these premises have been vaccinated with

VIRUS AND SERUM.

No visitors allowed in these pens or fields.

NOTICE

The hogs on these premises are free from cholera.

Owners of infested herds are

WARNED TO KEEP AWAY.

No visitors allowed in hog pens or fields without permission.

Trespassers will be prosecuted to the full extent of the law.

(Signed).....

In exposed herds where no sickness is present the use of the simultaneous method is advised. The vaccination of sows heavy with pig and those having litters less than six weeks old should be postponed and such animals isolated in pens protected from the possibility of infection.

Regarding the immunizing of small pigs against cholera, it has already been mentioned that the immunity frequently disappears in from four to six months, therefore it is advisable when a sickness is present to postpone the vaccination of pigs until they weigh at least fifty pounds. The sows on which such pigs are suckling should not be given virus with serum until the pigs are treated. When it is deemed necessary, serum alone may be used on sows and their pigs, but after an interval of several weeks they should be re-immunized by the simultaneous method.

The use of the so-called double method, consisting of serum alone, followed in ten to fourteen days with serum and virus, has not proved satisfactory under California conditions. Unless an interval of at least three weeks is allowed to elapse between injections immunity appears to be much shorter than that conferred by the simultaneous injection.

The information furnished in this bulletin should not be considered as sufficient to quality the average hog owner to use serum and virus. Persons who desire to perfect themselves in the technic of vaccination so that they may vaccinate their own hogs are advised to write to the Veterinary Division and arrange to take the personal instruction which is given at certain times at the hog serum laboratory. Persons who come for such instruction should plan to stay at least two days.

The University of California manufactures anti-hog-cholera serum and is authorized by act of the legislature to sell it at actual cost of production to any bona fide resident of the state who is engaged in hog raising. At present the cost is 1½ cents per cubic centimeter, the same charge being made for both serum and virus. Both must be kept cool and used as soon as possible after being received. Neither serum nor virus is returnable for credit. This station will not send virus except for use by a qualified man and then only in case hog cholera exists in the locality, one exception to this being that for the accommodation of breeders who desire to sell immune stock or to protect hogs which are sent to fairs arrangements can be made to have the swine immunized, provided the work is done by a representative of this station and the owner agrees to hold the hogs in strict quarantine for at least thirty days after immunization.

All applications should specify in writing the amount of serum and virus desired or the approximate weights of all hogs to be treated. In case serum is ordered by telephone or telegraph a confirming order signed by the owner of the hogs should be sent by mail. Serum will be shipped only when cash accompanies the order, or C. O. D.

HOW TO BECOME A TIMER.

Manager The Horseman's Correspondence School—Have recently been appointed to act as timer at one of our leading fairs and write to you for instructions as to how to act, as I have never been in a judge's stand before. The secretary of this association owes me money and gave me this job, so that I will stop pushing him so hard. Yours, T. I. MER.

You are going to take some such a job, when you know nothing about it, and if the other timers have no more experience than you have, we can see some warm arguments ahead and at any time you are liable to run amuck of either one of the two Big Bill H's (Knight or Gocher), and then you may never work an official watch again. The two above named gentlemen are bugs on suppression of time, but the majority of the timers officiating today are taking a chance in time suppression and you can do the same.

You should buy or borrow a stop watch, one of those kind of time pieces that have two hands on them, which start and stop independent of each other. You can buy these all the way from three dollars to $300, just as strong as you want to g Many of the most prominent timers of the day ar satisfied with borrowing, as almost any driver wi loan you his watch when he knows that you are t time in his races, as it gives you a splendid chanc to return the favor, by helping him go in slower tim than he really went.

Never feel under any obligation that the time re istered on your watch must agree with that on th other watches, as history does not record a cas where three watches agreed when in the hands o three official timers, working in a stand during race. Many watches in the hands of spectators ofte agree on the time of a mile, but never in a stanc Sometimes the disagreement is caused by accident but more often because one or two of the timers ar helping out some friend in the race.

The proper time to start your watch when timing a race is when the pole horse is going under th wire, but a timer wants his watch to register slower mile than the real one should be; he should start his watch when the horses are down the stretch some five or ten yards, then when the heat is finished the watch will show slow. If you want a faster mile than the horse is going, start your watch after th horses have passed the wire. We should not giv the above inside dope away, but you seem so sincere we cannot help obliging you.

It is not often you will be called upon to give a faster mile than the horse stepped, and this happens oftener when an association has a fast track record and desires to lower it; then they engage some fast horse to come there and go on exhibition against time. Of course the track may not be in shape to induce extreme speed, but this is easily remedied by the timers, who should start their watches when the horse has passed the wire about ten yards. Of course the first quarter will be very fast and the other three much slower, but do not mind this, as very few people will notice the discrepancy and you please the track officials by giving their course a new record. A first quarter in 28 seconds and the next three in about 32 only looks funny on the judge's book, but if anything is said you can say that "the horse went boiling to the quarter, but the back stretch was bad and he slowed up." This makes you look wise and gives the track credit it does not possess.

As a timer, you will always have the drivers flirting with you. They give you a pleasant smile whenever they meet you, and will even entertain you with drinks and cigars if you will accept. All this is done so that they can use you afterwards. Watch these men run into the stand after they finish a heat, forgetting all about their horses. They will come at you strong with such expressions as: "Keep me in such and such a class," or else: "I want to start over at so-and-so next week, and entries do not close until such and such a day, so, gentlemen, please don't spoil my chances, keep me good in that class." The excuses are numerous and you must be flinty hearted to withstand some of these pleas.

Some timers accept the job and time with a regular watch without the stop attachment. This takes great care as you must screen your watch from the eyes of the other timers. Let them announce the time they have first and then you agree with either of them. This will please the man you agree with and he will be your friend until you agree with the other fellow. The writer has seen a number of instances where an entire race meeting was timed by three men, none of which had a stop watch. They timed by watching the second hand on their regular watches and they got away with the trick, too. You can imagine the time lost in figuring the quarters, as these men were obliged to take their eyes off the horses to watch their clocks, but a few seconds here and there did not matter.

If you are in a tight place in timing, because some driver wants you to give him a few seconds, refer him to the judges and let them decide. As an incident relative to the above, a driver some years ago in the East won a race in faster time than he wanted. He ran to the stand without studying stragetic points and asked for three seconds to be given his horse, and when he was fined and suspended for making the request he woke up to the fact that he had tackled a strict lot of judges. The timers' stand was on the other side of the track. Of course this may never happen to you.

Some drivers control certain tracks and give orders to the association of what they want done, and in cases of this kind the secretary or president of the track will tell you that he wants horses protected. These officials may hand you a list of the records of all horses that will start during the meeting and when handing this list to you they will say, "Keep all these horses in their classes," and you must either do it or get out. If you agree to these terms and suppress time, you must expect an ovation from the grandstand such as "Rotten," "Get a new watch," "Who told you you could time?" Wear a vacant stare in a case of this kind and be impervious to comment.

There is no salary attached to the job of timer and your only pay will be honor, although you may work the association for a meal or two, but all other expenses you must pay out of your own pocket. Time suppressors are never handed any graft, and should the Big W's get after them and compel an attendance at the board meeting, the timer must foot all the bills to the point of contact.—W. H. Shields in The Horseman.

THE FARM

URE-BREDS—WHY PREFERRED TO MONGRELS.

When the desired qualities came to e fixed in a whole family of animals was but natural that these animals hould be highly valued and that a ecord should be kept of them. So it as that "stud books" and "herd ooks" and "registers"—in which the ames of different animals were set own along with those of their ances- ors—came into being. Now every reed has its records, and if an animal annot find a place in the register of is breed—and he cannot unless his ncestors' names are recorded there—e is not considered a pure-bred, says Progressive Farmer.

It needs but a moment's thought to how any one why pure-bred animals re desirable for breeding purposes nd why one who wishes to improve is live stock can afford to pay several imes as much for an animal whose amily history is known for genera- ions back as one of uncertain breed- ng. Even if the "mongrel" or "scrub" —the animal of unrecorded and un- known parentage—looks to be all that he breeder desires, the wise breeder will not use him. This is especially rue of sires, as their qualities may e handed down to a great number of descendants . There are two reasons for this. One is that the animals can- not be registered; the other, and more important, is that no one can tell with any certainty just what kind of de- scendants the mongrel sire will have. It is one of the laws of nature that qualities, both good and bad, may be inherited not only from father and mother—dam and sire—but from an- cestors farther back. If the family, or strain, has been bred for many years for a certain purpose, desired qualities all the time being strengthened and undesirable ones lessened as much as possible, it is almost certain that all members of the family will inherit most of the qualities which belong to the family. If, on the other hand, the animal is the product of crosses of different breeding, one can only guess what qualities will be transmitted, or how many unsuspected qualities from unknown ancestors will show in the offspring.

For these reasons the man with a large dairy herd, for example, can af- ford to pay several hundred dollars for a Jersey or Holstein bull rather than use a scrub or beef bull. It is prac- tically certain that the daughters of the Jersey or Holstein will be at least fair milkers, because they will inherit milking qualities from many genera- tions. The beef bull's daughters will inherit the tendency to lay on flesh rather than that of giving milk, while the scrub's daughters may, for all the dairyman knows, inherit all sorts of qualities, good, bad and indifferent.

The same general rule holds good with all classes of livestock; and in the future we shall learn to keep pure- breds as sires, even on the general farm.

It is a well recognized fact, though one too often overlooked in selecting sites for orchards, that cold air settles to the lower levels. For this reason it is often colder at the lower eleva- tions than it is at higher points in the same locality. This is what is meant by "atmospheric drainage."

Cussing the Rules of Racing

is a favorite pastime of a good many people in the harness horse game, the fault finders sometimes having a real grievance and sometimes not. I lose more money by adhering to the rules than any trainer on the coast, and

Here is the reason:

You, Mr. Race-Goer, can recall days on certain California tracks when

Durfee Horses

WON EVERY RACE ON THE CARD. But for the rules, you would have seen DURFEE HORSES win first and sec- ond in every race; but for the rules you would have seen DURFEE HORSES one-two-three in a few races, and you might have seen DURFEE HORSES win all the money in certain events. I had the goods and

I still have them

but so long as I can race but one to a class, what earthly use can all of them be to me? In other hands they would be dividend paying stock, and I offer you anything I own at a price based fairly on his or her earning capacity. I make no reserve on any horse my personal property—take the one in any class that suits you best and I will race the "leavin's." I will sell any part of a collection of thirty head, every one as represented, in- cluding proven race horses good in their class, the best racing prospects on this coast, matinee horses, sta- llions, brood mares, stake colts that can show, all bred in the purple.

See them at Los Angeles or San Francisco, write me for any desired particulars.

William G. Durfee

SPOKANE
Interstate Fair
SPOKANE, WASH.
September 13-18, 1915.

Half-Mile Track—National Trotting Association.

All communications to Geo. P. Larsen, Sec'y, Spokane, Washington.

All Races on Three-Heat Plan.

WEDNESDAY, SEPTEMBER 15
2:11 Trot $750
2:15 Pace 750

THURSDAY, SEPTEMBER 16
2:25 Trot $750
2:18 Pace 750

FRIDAY, SEPTEMBER 17
2:18 Trot $750

SATURDAY, SEPTEMBER 18
2:15 Trot $750
2:11 Pace 750

CONDITIONS:

All events to close August 1st. Five per cent to enter; 5 per cent deduc- tion from money winners.

Money divided according to Rule 4.

Money divided 50, 25, 15 and 10 per cent. Summary money 75 and 25 per cent.

Famous Spokane Derby and World's Championship Relay Races will be given this year. Special folder con- cerning running races sent on applica- tion.

Our program will be so arranged that races held at Walla Walla on Monday will be given by us on Thurs- day, and so on.

The Walla Walla Fair Association together with this Association will do everything to arrange for cars and service on the part of the railroad companies, so there will be no delay in getting horses to Spokane in plenty of time.

Third Edition Within One Year of Pub- lication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were pub- lished 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horse- men of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's cam- paign. The facts are clearly presented. Nothing is left to guess work. The lan- guage is lucid. Both theoretical and practical views are outlined and com- pared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the adver- tisement but proves disappointing when received.

Many professional trainers have pur- chased the book and have found it in- teresting. Despite the war, over 300 copies have been sold in Europe and Aus- tralia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

1915 WINRACE
—and—
ELIGIBILITY BOOK

The National Trotting Association Win- race and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains offi- cial reports of all races and time record meetings held by members of the Na- tional and American Trotting Associa- tions as well as copies of all special re- ports received by the two Associations, and all reports of non-association meet- ings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which pre- sents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Asso- ciation issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very vo- luminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nom- inator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eli- gibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any ad- dress for $2.00 by

Third day Relay Race.

THURSDAY, SEPTEMBER 30

2:20 Pace, 3 heats	$ 700.00
2:12 Trot, 3 in 5	2,000.00
2:15 Pace, 3 heats	700.00

Fourth day Relay Race.

FRIDAY, OCTOBER 1

Free-for-all Pace, 3 in 5	$ 700.00
2:20 Trot, 3 heats	700.00
Three-minute Trot or Pace, 3 in 5	300.00

Fifth day Relay Race.

SATURDAY, OCTOBER 2

2:12 Pace, 3 heats	$ 700.00
2:09 Trot, 3 heats	700.00
2:25 Pace (closed)	500.00

Sixth day Relay Race.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

For conditions of relay and any other information address

W. AL. JONES, Secretary and Manager, Salem, Oregon.

SAVE-THE-HORSE TRADE MARK REG'Y.

PROVES ITS WORTH

These show why the drvggists say: "They come again for Save-The-Horse"

J. H. Cail, 55 William St., Portland, Maine, Jan. 11, 1915, writes: Troy Shemical Co., Binghamton, N. Y.—In October purchased through Riker-Jayns—druggists, a bottle of Save-The-Horse for my driving horse Dan Sox. Most of my acquaintances laughed and said there was no cure.

He had a Blood spavin and was dead lame. He was never trained but is the best road horse in Portland.

I started using Save-The-Horse and in five weeks he was all over the lameness. He goes as sound as he ever did in his life and, since November, I have been working him every day. He can step just as fast as ever, not one mite stiff in any way. I have since cured a cockle on a work horse of two years standing.

A friend of mine has a valuable trotting mare that last summer had two large windpuffs come on behind. He used ——— and had his horse in the barn six weeks; it did no good; ½ bottle of Save-Tthe-Horse cured her entirely. You are at liberty to use this letter if you want to. I cannot say too much for your medecine.

SIDE BONES AND WINDPUFFS

H. C. Alexander, Buckhannon, W. Va., R. No. 4, Apr. 1, '15, writes: Troy Chemical Co., Binghamton, N. Y. Perhaps you think I was not pleased with your medicine but I am. It cured my horse of a bad case of Side Bone and has taken off two windpuffs on same horse. Think that Save-The-Horse is all you recommend it to be.

WHY THEY HAVE FAITH

Wm. H. Allen of Holtzworth Bros. Livery, Gettysburg, Jan. 6, '15, writes: Troy Chemical Co., Binghamton, N. Y. I have been in the livery business for years and used your remedy for splints, spavins, ringbones and most every kind of lameness, and it has always been successful. But now I have a case that puzzles me although I have it located. Though I would ask your advice. * * *, etc.

Throughout the whole World Save-The-Horse has stood up and "MADE GOOD" Under Every Test.

Save-the-Horse Does Not Blister
Does Not Discolor or Destroy the Hair Nor Leave a Scar
Horse works as usual.
THE RESULT IS PERMANENT.

$5.00

Every bottle is sold with a binding contract to refund money or cure any case of BONE and BOG SPAVIN, THOROUGHPIN, RINGBONE (except low), CURB, SPLINT, CAPPED HOCK, WINDPUFF, SHOE BOIL, BROKEN DOWN, INJURED TENDON and OTHER LAMENESS.

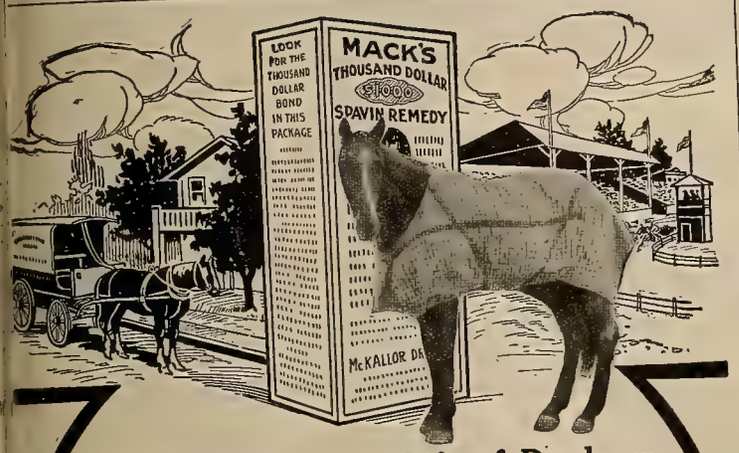
PARKER GUN WINS PACIFIC COAST HANDICAP!!

Look

Read



Remember

Mr. Henry Pfirrman at 18 yds. scored 98x100 targets. Mr. J. Foster Couts Jr. at 21 yds. scored 98x100 targets.. On the first shoot-off both contestants scored 20 straight, and on second attempt Mr. Henry Pfirrman won, landing the much coveted prize.

In the double target event, shooting at 25 pairs, Mr. J. Foster Couts Jr. scored 48x50, winning first; Mr. Tony Prior scored 47x50, winning second. By scoring 341x350 targets at 16 yards and 279 out of 300 at 21 yards, Mr. Guy Holohan was high on all single targets for entire program.

All of these contestants shot
34 INCH BARREL PARKER GUNS
In 1914 Mr. Pete O'Brien at Portland won the Pacific Coast Handicap with his "Old Reliable" Parker, and the Grand American Handicap has been won 9 times out of 25 offers with same make of gun.

For further particulars relating to guns of gauges from 28 to 8, address Parker Bros., Meriden, Conn; New York Salesroom, 32 Warren St.; or A. W. Du Bray, Resident Agent, San Francisco, Cal., P. O. Box 102.

Between Him and a Life of Drudgery

stands that old reliable, infallible spavin remedy as a constant protection against the hundreds of limb diseases that might any day make him worthless for the track—that might at any time relegate him to the "minor league" of horsedom—the life of drudgery on delivery wagon or truck. Is your horse so protected? Have you a bottle of

The Only Spavin Remedy in the

Mack's SPAVIN $1000 REMEDY

World Sold Under a $1000 Bond

on hand? Is your horse insured against limb diseases? Mack's $1000 Spavin Remedy has cured thousands of horses of many of the most persistent limb diseases known. It is absolutely guaranteed to cure Ringbone, Thoroughpin, Curb, Capped Hock, Shoe Boil, Sprung Knee, Ruptured Tendons, Sweeny, etc. It goes right to the seat of the trouble and quickly restores bones, muscles and tendons to their natural condition. No "blistering"—no scars—no blemishes.

You Can't Lose
If Mack's $1000 Spavin Remedy fails to do as we claim, we will refund every cent you paid us. We have a deposit of $1000 which we must forfeit if we do not do exactly as we say. Send for a copy of this bond—read it.

Your Druggist Will Obtain It for You
if you ask him. Price $5 per bottle. If he refuses, remit $5 to us and we will see that your order is filled without delay.

Free Book Horse Sense No. 3

On picture of horse mark with an X just where swelling or lameness occurs, then clip out coupon and mail to us with a letter, telling what caused the lameness, how long horse has been lame, how it affects the animal's gait, as of horse, etc. We will tell you just what the lameness is and how to relieve it quickly.

Absolutely no charge. Write today.
Send us the Free Diagnosis Coupon, get absolutely free, a copy of our book, "HORSE SENSE." Describes and illustrates diseases of horse's limbs, shows correct name for every part of horse, and tells valuable facts every horse owner ought to know.

A Practical Treatise on the Training of Hounds

Training the Hound

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

WEATHER
It is always fair weather when you tie to the RED BALL Shooting Combination

VOL. I.-No. 2. WINNINGTOWN, JULY 24, 1915 Breeder and Sportsman Edition

THREE NEW RED BALL WINNINGS

Telegraphic Dispatches Tell of More Good Scores Made by Shooters of Remington-UMC

Pacific Coast Handicap: San Diego, California:

Preliminary won by Charles H. Julian of San Diego, 98x100 from 18 yards, shooting a Remington-UMC Pump Gun and Arrow Steel Lined Speed Shells. Unusual interest in Mr. Julian's performance because of the fact that he has but one arm, making his victory all the more creditable.

Mississippi State Shoot: Vicksburg, Miss.:

Championship of State won by G. M. L. Key, 95x100, shooting Remington-UMC Pump Gun and Arrow Shells.

International Championship: Winnipeg, Man.:

E. Lemke of Grand Forks, N. D., won International Championship, 49 x 50, shooting Remington-UMC Pump Gun and Nitro Club Shells.

GOOD SCORES HERE AND THERE

Here are some recent arrivals at Winningtown via the Red Ball Route:—

Leon Davis won the New England Handicap Championship at Hartford, Conn., with a score of 92x100 and 20 straight in the shoot-off. He shot Nitro Club shells in this event and also in winning the High-Over-All Average for the day, scoring 187x200.

F. A. Weatherhead, of Billings, Mont., won High Amateur Average at the Montana State Shoot, shooting a Remington-UMC Pump Gun and Nitro Club shells, scoring 598x650. This is the third consecutive time Mr. Weatherhead has won either this event or the State Championship.

An interesting shoot was staged recently at Round Lake, Ills. W. V. Jackson, shooting a Remington Pump Gun and Nitro Club Steel Lined Speed Shells, won the meet with 97x100.

Take the Speed Shell Express for Winningtown.

Remington-UMC, "The Perfect Shooting Combination" — the right equipment for a trip to Winningtown.

For better scores at traps or afield —Remington-UMC Arrow and Nitro Club Steel Lined Speed Shells.

Easy to load, a natural pointer—Remington-UMC Pump Gun.

THE HONOR ROLL TO DATE

Last year, 24 out of the 39 State Champions shot Remington-UMC guns, shells, or both. Apparently this is to be another year of victories for Remington-UMC shooters. As we go to press, we learn that 17 out of the 33 championships contested for so far in 1915 were won by shooters who tied to Remington-UMC.

These are the 1915 State Champions who backed their skill with Red Ball products:

E. J. Chingren, Washington
Henry Rephausen, Nebraska
Chas. Newcomb, Pennsylvania
C. H. Reilly, Jr., Utah
A. J. French, South Dakota
R. A. King, Colorado
F. S. Tomlin, New Jersey
R. H. Bruns, Indiana
Jas. M. Barrett, Georgia
E. W. Ford, Maryland
H. J. Prendergast, New York
E. C. Grice, Idaho
John R. Jahn, Iowa
J. K. Warren, Alabama
Huston Hall, Kentucky
W. L. Hefner, North Carolina
G. M. L. Key, Mississippi.

For a clear track to Winningtown, take along a Remington-UMC shooting combination.

ECHOS from the RECORD WESTERN HANDICAP

St. Louis Real "Winningtown" for Red Ball Shooters.

It is getting to be an old story—now repeated seven times consecutively; it seems that only shooters of Remington-UMC are ever to be counted among the winners at the Western Handicap. This year a splendid company of 231 shooters entered for the big event and practically all of the high honors went to Red Ball Brand shooters.

A most popular win was that of William Raup of Portage, Me., who, with a Remington-UMC Pump Gun and Arrow Steel Lined Speed Shells captured the Handicap. Says "Sporting Life," referring to Mr. Raup and his triumph:

"He is one of the best fellows in the shooting game. He bore his honors modestly, though he had a right to feel proud of coming out at the top of such a bunch of shooters of the class that contested here. It was no fluke success, but the direct result of superior marksmanship."

WHAT A DIFFERENCE A FEW HOURS MAKE!

Taking for the inspiration of his pencil the apt slogan "Oh, what a difference a few months make!" that clever cartoonist and jokesmith, Robert L. Dickey, has provided the readers of our esteemed contemporary, the Horse Review, with many a hearty laugh during the weeks just passed. In his customary keen way, Dickey has graphically portrayed the truth of the adage that the only certain thing about horseracing is the uncertainty of it. He has dealt largely with the difference a few months can make, but there are equally striking examples to be drawn from the changes a few weeks have made, and now comes one of the "best yet" and resolves itself to a matter of a few hours, rather than weeks or months.

Down at Youngstown, Ohio, George Dietrich was the man behind the gun for one of the greatest early meetings ever held over a two-lap track. There were plenty of split heat races and numerous heats below 2:10, while on July 13 there was a six-heat trot that will live long in memory—probably for other reasons than that it was a classic as a real contest, the why of the wherefore being thusly, my children: The first race was won by that good daughter of the dead Todd, Lou Jennings, with Tom Patch second and Electric McKerron third, both of them heatwinners. As announced by various reports from the track that day the time hung out from the timers' stand for the first heat, won by Tom Patch, was 2:10¼—a performance worthy of note, any way you look at it. That night or early the next day (the exact hour being of no moment) Tom Patch succumbed to an attack of acute indigestion, unfortunately for his owner and also for the trotting world in general, as we shall never have too many horses of real merit.

So far, so good, but now comes the rub. With Thomas dead and gone comes the announcement that the timers made a "mistake" in their record of the first heat, and that the proper time was 2:08¾—which, if true and substantiated and established as the official time, merely means the following small things: Tom Patch becomes the fastest trotter by Joe Patchen and his second one for the 2:10 list; he becomes the first 2:10 performer to be credited to a daughter of Poteen, an Ohio-owned stallion; he becomes, moreover, a world's champion trotter, ousting Joe Bowers as holder of the record for a first heat in a race on a half-mile track for stallions, consequently bringing a championship credit to himself, his sire and dam, his breeder, owner and driver (which in this case is one and the same person) and also to the Youngstown track. In the light of these possibilities it would be interesting to know by whom the demand was made for the "correction" of the time.

In any case, if the record is established—and just how this can be accomplished without someone's fair reputation being "speckled" it is rather hard to see—it will always be viewed with more or less suspicion, and about all that can be said for the gentlemen occupying the timers' stand is that they were either party to an attempted fraud, or sadly lacking in competence and fitness for their position.

ANOTHER ONE FOR THE BOOK.

Some years ago that resourceful and widely experienced gentleman, Murray Howe, sent out into the wide world that comprehensive little volume, The Excuse Book. Any trainer, no matter how thick of wit, could, from a perusal of its pages, lay in a stock of alibis that were guaranteed to ward off the wrath of any and all persons whatsoever, owners and judges in particular, under any conditions that might arise, no matter how complicated or unexpected they might be. The work of Mr. Howe was the last word in completeness, as it was thought at the time that he had tracked down and reduced to a state of captivity every excuse roaming the trotting horse world from the big line to the outermost portions of the bushes. Horsemen were proud of Murray's work, and, needless to state, so was Murray. It was the apple of his eye, to use a homely phrase, or, in the lingo of the sanctum of that esteemed contemporary, the Horse Review, it stood unquestionably as his "magnus opus"—"magnus," in this instance, having no connection with that eminent genealogical expert and preparer of "only authoritative racing reports," Judge Magnus Flaws.

For all these years, the charming brochure has stood as the exemplification of work well done. Of course, in the passing of time, with the resultant change in ways and means of racing and its conduct, there have arisen numerous excuses, ultra modern, that upon first hearing bear the earmarks of originality, but which upon investigation prove to trace directly to the good old foundation stock, many of those most original in appearance being found to have two top crosses to the old horse, being clever combinations of different parent strains.

Imagine Mr. Howe's chagrin, then, when one bobbed up serenely last week at Cleveland that, to the best of our knowledge and belief, has roamed at will through all these years. We may be wrong, we have often been fooled before, and we have not a volume of the excuse book at hand in which to make the research necessary to the "authoritative" substantiation or repudiation of our theory. However, we think the one referred to is a genuine maverick.

Of course, it is a blow to Mr. Howe, if we are right, to be compelled to acknowledge the shortcomings of his life's work, especially as the one excuse that escaped it was advanced by a gentleman with whom he enjoys an intimate acquaintance of long standing—a gentleman, by the way, to whose original authorship many of the alibis in current use may be directly credited, all of which have found honored place in the Howe booklet.

But—to proceed.

The time is July 21, along in the afternoon.

The place is the race track at North Randall.

The girl—excuse us—we mean the race, is the 2:09 trot, the classic Ohio.

To be more exact, two heats have been raced and the field is rounding the turn into the stretch for the last sprint to the wire.

In the lead on the pole is that battle scarred hay destroyer King Clansman, with Richard McMahon at the helm; in his wake the twin propellors of the armored cruiser Peter Scott are sending that craft right along for Admiral Murphy; from the bridge of the super dreadnaught Peter McCormick, Commander Shuler rings the engine room signal for full speed ahead and Peter begins plowing up alongside of King Clansman, whereupon Chief Tactician McMahon, instead of holding hard aport and rounding the buoy on the inside course, flips his helm to starboard and goes wide, carrying Peter McCormick out still wider and allowing Peter Scott to slip through close hauled and take the short shoot to the wire and win, Peter McCormick, nevertheless, making a challenge that landed him comfortably in the lead of King Clansman.

Now follows a protest by Commander Shuler that in carrying him wide on the turn, McMahon was "helping" Murphy, and the judges request McMahon's presence in the stand.

And right here Dick smeared mud all over the reputation of Murray's work for completeness.

Can you name his excuse?

Not in a million years!

He carried wide, gentle readers, because in his judgment it was the one way to avoid a collision!—at least so sayeth our advices from the scene.

A collision!

And the judges stood for it!

Honest!

And he himself leading the field!

As usual, one judge was for sustaining Shuler's protest, but the others did not believe the result of the race had been affected or that McMahon was guilty of helping.

Now whether or not Peter Scott was helped he most assuredly was not hurt, while Peter McCormick equally certainly did not have the same chance to win that would have been his had he not been carried out. He was second the first heat in 2:06½ and won the second, out in the clear, in 2:05½, so he most certainly "figured" as a possible, or rather probable, winner of the third heat, especially when it is taken into consideration that Peter Scott, from his position "in the hole," would under ordinary circumstances have been compelled to swing out to third position to get an open shoot for the wire.

But—where was the collision coming from?

A "rear ender" could come only from Mr. Murphy, who is not in the habit of deliberately driving over men and horses squarely in his path and moving at the rate of speed usually displayed at this portion of 2:05 to 2:08 miles.

A "side swipe" could have come only from Peter McCormick, and while it is a matter of record that Mr. Shuler has at one time and another indulged in a few rather wild drives, the probability of danger from that source could hardly be lessened by the course pursued by Mr. McMahon.

Whence came the danger of a collision?

We ourselves are unequal to the solving of the riddle, and submit it to the "strategy boards" among our readers. For the best set of plans and specifications we offer as a premium a one-time-a-day ticket to "September Morn" on the joy zone, good for a week. Write on one side of the paper only and enclose postage for return. Contestants must sign their names in full, though in case of the "September Morn" tickets being awarded to a married man we promise not to reveal his true identity in these columns.

Certainly not!

FAIR NUMBERS.

Both the American Horse Breeder and the Western Horseman have recently put out special midsummer "fair numbers," the Western Horseman's effort being especially pleasing. "Down east" the fairs are on the boom, and here in California, with more natural reasons for holding fairs and making them successful than in any state in the union, we are facing a summer with about four fairs in view, one with no horse racing and the others classes confined to county horses. A few years more of progressive legislation and we will not even have these. However, the deeper the valleys the higher the hills, and someday we will get out in the sunlight.

Stadium Matinee Is Highly Enjoyable

For the first time this season the Stadium in Golden Gate Park was the scene of a light harness matinee last Sunday afternoon, and though the sun steadfastly refused to shine and the breeze was cool and damp there was a nice crowd on hand to cheer the winners on their way. The footing over the three-quarter track is much better than that at the exposition grounds, and throughout the afternoon there was present more of the feeling of friendly sociability that should be manifest at a gentlemen's matinee than is usually in evidence at the P.-P. I. E. plant. Cups for the occasion were donated by various members and friends of the club, and the boys raced for them like they were worth a million apiece.

Aerolite Jr., purchased not long since from Frank Goularte by Richard Roberts, was the logical choice for the slow class of the day, and delivered the goods in straight heats, winning the first from Rosie O. by half a length, the pair having a sizable lead over the balance of the field. In the second heat Rosie O. led the field around the turn, out in second position, but Aerolite Jr. hung to the pole and assumed the lead before reaching the half, not being headed again. Marin, who was well back at the half, passed Hello Girl before reaching the three-quarters and was promising trouble for the leaders when he broke in the stretch under Kane's drive.

The troublesome Tom Murphy drew the pole in the 2:18 pace and went away in the lead with King Pointer right with him and Lady Listole a none too good third for a good portion of the mile, the balance of the field bunched in a second section until well into the stretch. It was a case of Murphy all the way, with Lady Listole making a game drive and snatching second from King Pointer. Murphy failed to get away so well next time, and the first turn past the stand was third to King Pointer and Lady Listole. Five horses were close together at the half, Murphy leading around the turn but failing to stand off the rush of Hamburg Belle and Emma M., the former coming from well back and winning with Emma's nose at her wheel. In the final heat Billy Malough's mare won by two lengths in a sturdy finish, but Hamburg Belle had one point the best of the summary.

The free-for-all pace was conceded to either Vera Hal or Dick W. from the start, Bradmont and Pointer Belle having been "promoted" for the day simply because there was no other class for them, and while the first mentioned pair had the best of the argument at all times neither of the others was disgraced by any means. Dick drew the pole and went to the front with Vera in the trail, Bradmont making about his first break of the season shortly after the word was given. Coming into the stretch Cohen took out for the drive and the pair raced head-on to the wire, the little mare winning by a scant neck in 2:10 flat, a rattling good mile for the day and track. Dick spoiled a couple of scores the next time out and Vera went away in the lead, with Ot following a bit back, going just that way into the stretch. Ot searched the Athadon gelding for what he had, but Vera was the best by a length in 2:09½, with Pointer Belle and Bradmont going their miles a shade better than 2:11.

Al Schwartz drove his second winner of the day in the free-for-all trot when he put over St. Patrick for Jimmy Ryan, the Irish horse having a mighty close run for the money from the Butchertown favorite, Birdeye, who lost the first heat owing to a break in front of the stand. In the second the roan boy kept to the trot and finished gamely, St. Patrick winning under a stiff drive by not over a head in 2:16.

Senator H. broke soon after getting the word in the last race, for 2:15 pacers, and it was Jack all the way, though Happy Dentist threatened for a few moments in the stretch. The old king pin was game and trying, but didn't square away good in the straps, "feeling 'em" quite a bit under the drive. The last heat provided the third eyelash finish of the afternoon, Senator H. coming through the stretch with a rush that carried him to the wire only a nose behind Jack, who stood McDonnell's drive in good shape and paced his best heat yet this season, a mile in 2:14.

That the day's program was raced off smoothly and without delay was due largely to Marshal Joe Vint and Starter J. J. Ryan, Joe getting the horses out and Jimmy sending them away without any delays in scoring. Seldom were more than two trials required to get every horse on his gait—something that the spectators appreciated greatly, and, incidentally, something that Jimmy's predecessors this season had a hard time doing. The summaries:

2:25 mixed, cup presented by Claremont Hotel:

Aerolite Jr.	(R. Roberts)	1	1
Rosie O.	(J. J. Ryan)	2	2
Marin	(P. F. Kane)	3	3
Hello Girl	(R. Kehoe)	4	4
Silver Logan	(Dan Healey)	5	dr

Time—2:20, 2:22½.

2:18 pace, cup presented by A. Ottinger:

Hamburg Belle	(J. Ginocchio)	4	1	2
Emma M.	(W. Malough)	5	2	1
Tom Murphy	(E. T. Ayres)	1	3	4
Lady Listole	(T. Doran)	2	5	3
King Pointer	(H. Campodonico)	3	4	6
Victor Pointer	(D. W. Keating)	6	6	5

Time—2:16, 2:15, 2:16¾.

Free-for-all pace, cup presented by Tom Finn:

Vera Hal	(H. Cohen)	1	1
Dick W.	(A. Ottinger)	2	2
Pointer Belle	(Kidd & Luce)	3	3
Bradmont	(G. J. Giannini)	4	4

Time—2:10, 2:09½.

Free-for-all trot, cup presented by Richard Roberts:

St. Patrick	(J. J. Ryan)	1	1
Birdeye	(A. Combatalade)	2	2
Muggins	(H. Cohen)	3	3

Time—2:17¼, 2:16.

2:15 pace, cup presented by Al Schwartz:

Jack	(McDonnell and Conlan)	1	1
Happy Dentist	(J. J. Ryan)	2	3
Senator H.	(Joe Kidd)	3	2

Time—2:15, 2:14.

THE 2:00 PREFORMERS.

Every season after the races have been brought to a close and the chill winds of winter make gossip an indoor substitute for the outdoor sport, we are wont to discuss the possibility of a new 2:00 performer making his or her appearance in the season that is to come. Those winter speculations are inclined to be too optimistic as regards the 2:00 proposition. I have won enough hats to supply a small haberdashery (if I had collected all of the wagers, but I didn't), betting that this and that season's crack wouldn't score in even time or better. It's the safest bet there is, take it from me, for the 2:00 stunt is something very extraordinary, even in these days when so many fast horses show up each year.

At the close of 1914, just three trotters were in the ultra honor class, Uhlan 1:58, Lou Dillon 1:58½ and Major Delmar 1:59¾. Eight pacers had reached the coveted goal, viz., Dan Patch 1:55¼, Directum I 1:58, Minor Heir 1:58½, Audubon Boy 1:59¼, Star Pointer 1:59¼, Frank Bogash, Jr. 1:59¼, Prince Alert 1:59½ and William 2:00. Just eleven in all out of these tens of thousands of horses that have raced, and from the great number that possessed better than 2:00 speed but could not carry it over the eight furlong route. In a gabfest anent horses, it's easy to predict 2:00 for your favorite; the words roll off the tongue with the greatest ease, but when the candidate gets out on the track for the tilt against the watch, how different the proposition is! Watch in hand and my heart full of hope, I have timed numerous 2:00 aspirants, but usually it seemed when they were finishing that the hands of the watch were speeding at an abnormal rate, whereas the horse appeared to be stepping slower and slower each stride.

Now I have decided that a race against the watch is the hardest of contests. Did you ever consider the excuses that are offered by drivers when their 2:00 candidates fail? No. 1 is that the driver of the pacemaker rated the mile badly; No. 2, that instead of remaining a trifle behind to the head of the stretch, the pace-making driver insisted upon keeping alongside, and as a consequence the horse pulled his head off and tired; No. 3, "I couldn't get anywhere near the pole, for it's soft down there"; No. 4, "I told him (the pacemaker) to take me over the half in 59½ seconds, and instead of that we were there in 1:00½," or, to switch the cut, the pacemaker went to the half faster than the instructions called for.

Be it the fairest, stillest day, excuse No. 5 is always pulled—"It may seem still enough up there in the grand stand where you are sitting, but let me tell you that there is a gale of wind blowing down the back stretch." No. 6, "I made a mistake in warming up my horse. He should have had a heat in 2:06 or better in order to open up his pipes." No. 7 is used when the time made is around 2:01: "What in the blazes do those timers mean? I got it in 1:59¾, and half a dozen of my friends that stood right under the wire had it in the same notch—robbers!" etc. But the one excuse that is always ready to be taken from the bag is No. 8: "I looked at my watch when we passed the three-quarters and saw that I was there in just 1:30. The horse was full of pace and was fighting for his head, when the runner grabbed him at the head of the stretch. But that blankety-blank sprinkler had flooded the track from the seven-eighths home, making a mud puddle right at the pole where he turned around and stopped to light his pipe or something. Well, when I struck that spot the horse slipped and I had to take him back quick to keep him from falling down." No. 9 refers to pads, and, like No. 4, is a double-barreled excuse. "I saw that the track was as hard as cement, and, like a d—d fool, I had the smith put on some pads. I should have known better, for pads always anchored the horse"; or, "knowing that the track was a little soft, I cut his pads out and he couldn't pace a lick. Just wait till next week. This bird will skylark a mile in 1:59 or I will say that I don't know a horse from a cow."

But leaving all these excuses aside, when you tackle 2:00 you are up against something that is not as soft as schmeerkase or custard pie. If it were possible to rate every quarter in 30 seconds, there would be many additions to the 2:00 list, but such rating is not within human possibilities. Any horse that accomplishes the thirty-mile an hour trick must have a lot of reserve for use in the stretch. In other words, if before reaching that critical point he had been asked to step even an eighth of a mile to his supreme limit, it's a cinch that it took enough out of him to make him finish tired near home, and thus lose. That old saying, "You cannot eat your cake and have it, too," is applicable in this case. Straining a horse in any part of the mile up to the stretch is like eating the cake. You may have a few crumbs left, but the cake itself has been devoured.

Returning to the winter gossip, you can bet that the admirers of the fast pacers of 1914 have picked their favorite and proclaimed with earnest vehemence that the steed will beat 2:00 this season. I have heard of half a dozen horses being so selected, and their backers were just as confident as if the stunt was as easy as rolling a barrel down hill. Among those named were Anna Bradford (3) 2:00¾, Earl Jr. 2:01½, Peter Stevens 2:02¼, Napoleon Direct 2:02¼, King Couchman 2:02½, Possibility 2:02¾, Leata J. 2:03, R. H. Breat 2:03¼, Billy M. 2:03¾ and Our Colonel 2:03¾. Each and every one of these pacers is a genuine speed merchant, and all have demonstrated their class in actual races, but if from the ten two 2:00 ones are produced, that is about all we could hope for or expect. From the group I would select four as having the best chance, Anna Bradford, Napoleon Direct, Peter Stevens and R. H. Breat. Perhaps this last selection will seem out of place, in view of the fact that Breat's record is only 2:03¼, while that of some of the others is faster. But be pleased to remember that Breat was only a four-year-old in 1914, also that it was his first season out, and that seasoning is always required to enable pacers to carry their clip. Breat is a strange horse, queerly gaited, wears a lot of boots and hobbles, isn't at all flashy as to gait, or a fancy gelding individually, but, oh my! how he can step! I was clocking him one day in a race and saw him suddenly slip past his field with Nick Grady sitting still as a mouse. I didn't suspect that the horse was stepping fast, for he seemed just loafing along, but when I split and looked at the time he had done the quarter in :29¼. Then I took another observation and Breat's easy means of locomotion again impressed me. Breat, too, has that other important essential, perfect tractability. He can be rated without the least difficulty, and takes just enough hold to steady him.

Anna Bradford will have to improve only slightly to do the trick, and I guess she could have turned it last fall had Tommy Murphy so elected. There was just one other pacing mare that was as oily as to gait as Anna, and that was Citation 2:01¼, but "Sadie" wore the straps. Anna has more action than the mare that Dick McMahon raced with such success, but as a piece of thoroughly balanced and finely adjusted pacing machinery, Anna, to my way of thinking, never had a rival among either sex. Should Napoleon Direct succeed, he will be the highest acting pacer to achieve such an honor. In 1914 he wore elbow boots and needed them, for he not only strides high in front, but has a peculiar back flip which carries his front feet to his elbows. Mr. Geers has stripped the boots off, but it's very likely that when the stallion is stepping at top clip they will have to be replaced. Napoleon's hind action reminds me of that of the Axtell family of trotters, the same elastic swing being noticeable. My first view of the horse was at North Randall just previous to last year's meeting. I sat with Murray Howe and a bunch of horsemen, and distinctly recall that I remarked that the stallion could never get anywhere with the way of going he had. The other men agreed with me, adding a few observations anent Napoleon that were not calculated to compliment him. But he fooled all of us, and I am willing to admit it and beg forgiveness. Mr. Geers had in Ess H. Kay 2:00¾ another boot wearing pacer. Ess H. Kay is by Direct Hal p. 2:04¼, while Napoleon is by Walter Direct p. 2:05¾, a son of that horse, so you see a lot of front action sometimes crops out in the Hal family. Napoleon Direct is not only a fast horse, but he evidenced his ability to go heats and race game. Like Anna Bradford and R. H. Breat, it was his initial season on the turf, and the same thing applies to all three. They are fresh and should improve materially, because of the seasoning and experience they have had.

Strange as it may seem, and in view of all the great trotters and pacers that he has trained and driven, Mr. Geers has yet to ride a mile in 2:00 or better. His nearest approach to it was with Ess H. Kay 2:00¾, and with The Harvester 2:01. It would seem deplorable if the Grand Old Man of the sulky failed at some time in his wonderful career to team one in 2:00 or better; but that contingency is scarcely possible in view of his vigor and ability. But the very fact that 2:00 honors have been denied the great horseman provides additional proof of how very difficult the task really is. I am confident that even time will be beaten frequently in ten years from now, when horses are better bred and speed has had that period of advancement.

The hardest stake pacer to beat in 1914 was Peter Stevens. When he started in his North Randall race, I thought he was a beaten horse after observing how much effort Walter Garrison had to make to land him winner of the first heat. But Peter grew stronger in the second and third rounds. Subsequently I observed that it was only Peter's way, and that he seemed to improve with each heat, pacing the final after the manner most horses do their opening heats.

When we come to consider the 2:00 proposition, we begin to realize and appreciate what a truly great horse Star Pointer 1:59¾, the pioneer, must have been. It was in 1895, or just twenty years ago, that he took his record, and with all the efforts of breeders and trainers towards speed production and development since that period, only seven other pacers have scored in 2:00 or better, and only five of these have equaled or lowered Star Pointer's record.

And speaking of Star Pointer's greatness, let us consider how great a trotter Uhlan 1:58 is, for his

record equals that of Directum I 1:58, despite the fact that pacing is recognized to be a far faster means of equine locomotion than is trotting. The trotting 2:09 performers number only three, Uhlan, Lou Dillon 1:58½ and Major Delmar 1:59¾, as against eight pacing performers. Of the pacers only two wore hobbles, viz., Frank Bogash Jr. 1:59¼ and Prince Alert 1:59½.

Just thirteen drivers have ridden officially credited miles in 2:00 or better, namely, H. C. Hersey and M. E. McHenry behind Dan Patch; H. C. Hersey and Charley Dean behind Minor Heir 1:59½; Ray Snedeker behind Directum I; Dave McClary behind Star Pointer; J. Y. Gatcomb, behind Audubon Boy 1:59¼; Tommy Murphy, behind Frank Bogash, Jr.; Mart Demarest, behind Prince Alert, and W. W. Marvin, behind William 2:00. So you see H. C. Hersey is the only man who can boast of having driven two horses in 2:00 or better.

Millard Sanders drove Lou Dillon to her record of 1:58½, and her owner, C. K. G. Billings, drove her a mile to wagon in 2:00. It was Alta McDonald who gave Major Delmar 1:59¾ his record, and to Charles Tanner is due the credit of driving Uhlan 1:58 to his world's record trotting mile.—Marque, Horse Review.

LAST CALL FOR VANCOUVER AND SPOKANE.

If you are going to the northwest with your stable and have not yet made your entries for the Vancouver Exhibition, August 13 to 21, and the Interstate Fair at Spokane, September 13 to 18, right now is the time to fill out your blanks and get them in the mail, as August first is the date set for the closing entries. At Vancouver there are seven events open to all comers, ranging in class from the free-for-alls to the 2:25 and 2:30, these purses aggregating $4,500, while for two- and three-year-olds bred and owned in the Pacific northwest there is another thousand dollars, four hundred for the babies and six hundred for the three-year-olds. Race and show horses have been allowed to pass to and from western Canada without restriction for some time, and Secretary Rolston advises us that on August second the embargo in force against livestock from certain states on account of the foot and mouth disease will be lifted, so that livestock exhibitors as well as campaigning horsemen will be enabled to join in the big doings at Vancouver without hindrance. The track there is in excellent shape and American visitors are sure of a hearty welcome and the best of treatment.

At Spokane, Secretary George P. Larsen will receive entries for 2:11, 2:15, 2:18 and 2:25 trotters and 2:11, 2:15 and 2:18 pacers, the purses being of a uniform value of $750. Races are on the three-heat plan, and horsemen may race on Monday at Walla Walla and start the same horse in the same class on Thursday at Spokane, and so on through three days at each city, the associations having joined forces in making special arrangements for the quick transportation of horses from Walla Walla to Spokane. The "interstate" is the one best bet of the inland empire country, and by patronizing it properly horsemen will pave the way for its continuance, with more events as well as larger purses.

Also bear in mind that on August 13 entries close at Salem, where the best meeting of the season west of the Rockies, barring, of course, the fall session at the P.-P. I. E., will take place September 27 to October 2.

WINNERS OF $500 OR OVER AT CLEVELAND.

TROTTERS

Peter Scott	$1285.00
Lou Jennings	1150.00
The Guide	900.00
Volga	810.00
Peter McCormick	785.00
Bondella	750.00
Lee Axworthy	750.00
Margaret Druien	720.00

Purcell	587.50
M. Childs	527.50

California B., the Athasham gelding taken east by Charley DeRyder, topped the summary in the 2:27 trot at Malvern, Iowa, for Earl Beezley, the fastest time being 2:17¼.

Rain and Heavy Footing at Detroit

Last Day at Cleveland.

North Randall, O., July 23—The 2:03 pace here today served to enlighten a good many folks as to the why and wherefore of the falling through of the negotiations having for their object the coupling of Anna Bradford and Pop Geers for the hippodrome classes. Some few days since when the silent gentleman from the sunny south advanced as his reason for not welcoming Anna with open arms that he himself had a right likely free-for-all pacer in Napoleon Direct, there was some skepticism audibly expressed in many quarters—a skepticism that, by the way, is not much in evidence now. Down among the stables the darkey boys are having a song-session after the old campmeeting style, the burden of the leader's plaint being to the effect that "Marse Ed's sho' got one free-for-all paceh," to which the fervent response comes in chorus, "Now we know, niggah, dat am so," for Napoleon didn't do a thing today but pace Flower Direct, Earl Junior, Peter Stevens, Pickles and R. H. Breat into the ground with two sizzling miles in 2:02¾ and 2:03, the first heat being only a quarter of a second removed from Nap's former record of 2:02½ made last year at Columbus in the Hotel Hartman stake. Evidently Edward had a pretty good idea of what he was talking about, and he and the chestnut son of his old favorite seem mighty likely to figure in some of the free-for-alls unless hard luck interferes.

Walter Cox celebrated getaway day by making his only win of the week, but what a win it was! Margaret Druien, Joan, Star Winter, Rythmell and Newzell were the great quintette that appeared for the 2:05 trot, Hazel Laing being the only scratch from the original list of entrants. Closely pressed by Mike McDevitt and Captain Shaw's great trotter Joan, Cox and the daughter of Peter the Great went the first heat in 2:04¼, hanging up a new season's record for campaigners of her gait. In the second heat she equaled the mark of 2:05¼ set earlier in the week by Lee Axworthy, being kept close company by Star Winter, who had brought up the rear guard in the first mile.

Lou Jennings, heroine of the famous six-heat race at Youngstown on July 13 and winner of the 2:11 trot here on Wednesday of this week, scored her second win of the meeting in today's 2:13 class, not allowing a heat to get away from her. Ben Gregor trotted a nice race, consistently second at the wire in each heat, with Victor Star and F. A. L. the best of the balance of the field. The "shoestring" stable's daughter of Todd has trotted five winning heats this week for Martin Brennan in the average time of just faster than 2:07¾ and has a nice credit on the ledger.

Glenwood B. and Nap Lajoie scrapped out the 2:21 trot without doing any damage to the inner fortifications of the 2:10 list, the latter weakening after annexing the first heat and finishing third and seventh in the following ones, Helen Worthy and Director Russell taking his place as contenders. In the Fasig Sweepstakes for three-year-old trotters, carried over from yesterday on account of the rain, only two babies appeared, Rusticoat showing Native King the way to the wire in 2:10½ each heat, making the third clean win of the week for the Pastime Stable. The details:

North Randall, O., July 23.—2:21 trot, purse $1,200:
Glenwood B., b h by Ben Burns.....(Purcell) 2 1 1
Nap Lajoie, br g by Jack McKerron (Valentine) 1 3 7
Helen Worthy, b m by Barongale.....(Murphy) 3 2 5
Director Russell (Snedeker), Celia Dillon (Chandler). Col. Riser (Brennan), Loe Blossom (F. Childs), Coastess Mobel (Cox), Lettie Hall (Nolan), Zomidotte (Geers), Poinsetta (Murray) also started.
Time—2:10¼, 2:10½, 2:10¼.

The Fasig Sweepstakes, for 3-yr.-old trotters, value $750:
Rusticoat, ch c by Axworthy.....(Andrews) 1 1
Native Spirit, br f by Native King.....(Cox) 2 2
Time—2:10½, 2:10½.

2:03 pace, purse $1,500:
Napoleon Direct, ch h by Walter Direct....(Geers) 1 1
Flower Direct, b m by Direct's Star....(Whitehead) 2 2
Earl Jr., gr h by The Earl.....(Cox) 3 3
Peter Stevens (Snedeker), Pickles (Mott), R. H. Brett (Grady) also started.
Time—2:02¾, 2:03.

2:05 trot, purse $1,500:
Margaret Druien, b m by Peter the Great.....(Cox) 1 1
Joan, br m by Directum Spier.....(McDevitt) 2 5
Star Winter, b g by Ed Winter.....(McDonald) 5 2
Rythmell (Shank), Newzell (Andrews) also started.
Time—2:04¼, 2:05¼.

2:13 trot, purse $1,200:
Lou Jennings, br m by Todd.....(Brennan) 1 1 1
Ben Gregor, b g by Tommy Gregor..(Whitehead) 2 2 2
Victor Star, b g by Star Simmons....(Valentine) 3 5 3
F. A. L. (Gosnell), Lucy Van (Cox), Electric McKerron (Kane), Alice McGregor (McAllister), Great Isle (Murphy) also started.
Time—2:06¾, 2:07, 2:09½.

OPENING DAY AT DETROIT.

Detroit, Mich., July 26, 1915—Owing to recent rains that made the Blue Ribbon track heavy during a large portion of the afternoon, the record making time that was a feature of the opening day of the Grand Circuit last week at North Randall was not in evidence here today, but every race had one or more heats below 2:10 and the contests were good. Hazel Laing, piloted by Billy Andrews, took the opening event, the 2:08 trot, in straight heats, driven out in the first two by Bright Axworthy and in the last one by The Duchess. The roan mare improved as the race went on, but by the use of the point system was outside the money to Dago and Grand Marshall, neither of whom had a second to their credit.

Al Mack repeated his North Randall performance for Bud Murray in the 2:18 trot by straight-heating a field of thirteen trotters, St. Frisco trotting second to him in each heat for Pop Geers. Behind them there was a hot fight for the small money, a rank of 5-8-4 copping the third cut for Allerta, while fourth money was divided between Colonel Rizer and Willow Mack. Aconite, in the Hotel Griswold stake, hung up the fastest time of the day for Walter Cox, with Major Ong and Alta Wood hot on his trail.

The feature event of the day as a real contest was the 2:08 pace, in which Alonzo McDonald hit his stride and made the first win that has fallen to him since the close of the P.-P. I. E. meeting at San Francisco. Strange to say, too, Lon made his win today with the lass that was a rank disappointment on the far western trip, the bay Tennessee mare Margot Hal. Only three pacers came out when the bell rang, Margot, The Climax and Fred Russell, and for two heats The Climax looked like a winner, though closely driven out once by Fred Russell and again by Margot Hal, who was not on the best behavior in the world. In the third heat the little mare kept to a pace and went to the front at the half, to stay there to the wire. Fred Russell was a winner all the way in the fourth, Margot breaking in the stretch when she was nearly on even terms, and in the fifth The Climax set sail as though to clinch matters by a decisive win. He tired after passing the half however, and McDonald brought his mare home in the lead, having the best of the standing by one point. The summaries:

Detroit, Mich., July 26, 1915.

2:08 trot, purse $1,000:
Hazel Laing, ch m by John A. McKerron.....
.....(Andrews) 1 1 1
Bright Axworthy, b g by Axworthy....(Murphy) 2 2 4
Dago, b g by General Forrest.....(Grady) 5 3 3
Grand Marshall (Snow), The Duchess (McDonald), Baby Doll (Quinn) also started.
Time—2:09½, 2:09¾, 2:11.

2:18 trot, purse $1,000:
Al Mack, b h by McLintock.....(Murray) 1 1 1
St. Frisco, b h by San Francisco.....(Geers) 2 2 2
Allerta, ch m by Directum Kelley....(Snedeker) 5 8 4
*Colonel Rizer (Brennan), *Willow Mack (Ruff), Banker Bingen (Dempsey), Maggie Bond (Barrett), Princess Margrave (Hall), Emma Dillon (Nolan), Todd McGregor (Rodney), Lusitania (Marvin), Sara Douglas (Floyd), McMahon (McMahon) also started.
*Divided fourth money.
Time—2:11¼, 2:11, 2:09¼.

Hotel Griswold, 2:10 pace, purse $2,000:
Aconite, b h by Aquilin.....(Cox) 1 1 1
Major Ong, b g by Major Gantz.....(Murphy) 2 3 2
Alta Wood, gr m by Allanwood.....(Valentine) 3 2 3
Symbol Meath (McDonald), Hal Conners (Geers), Rella E. (McAllister), Ruby K. (Dempster) also started.
Time—2:09, 2:07½, 2:08¾.

2:08 pace, purse $1,000:

Time—2:11¾, 2:10, 2:09¼, 2:11¼, 2:15.

Second Day.

Tuesday, July 27—Indiana grabbed the big moneys in the pacing classic, the Chamber of Commerce stake for 2:07 pacers, here today, though it was by the grace of the point system of placing that second money went to a Hoosier reinsman. So far as the big end of the stake was concerned there was nothing to it but Single G., Curt Gosnell bringing the Barefoot pacer down in front of the bunch in one-two-three order. Outside of the winner, the real hero of the race and the victim of hard luck and the point system was the little western pacer Hal Boy, from Marvin Child's stable. Second in the first heat in 2:03½ and in the last in 2:05½, a break in the second caused him to finish eleventh, setting him to fourth money when the summary was cast up, both Rastus, never better than third, and Judge Ormond, once second, outranking him. The field of fourteen was the largest that ever started in the event, and while no records were broken the time was excellent. Russell Boy, the outsider who grabbed the Edwards at Cleveland, put on a performance that delayed the start of the race considerably and caused Geers to be put up in place of McDaniel, without much improvement resulting.

Billy Snow brought Leila Patchen down in front in the first heat of the 2:05 pace in 2:06, but the black mare got in trouble and finished fifth in the second whirl, Cox winning with Baron A. in very slow time. Leila came back on her good behavior, and put it over the Baron with a mile in 2:05 and another in 2:09. Lou Jennings maintained her reputation for reliability by winning the 2:13 trot in straight heats, with Victor Star and F. A. L. her nearest competitors. Only one heat of the 2:22 pace was raced, resulting in a pretty contest between Jean and Hedgewood Patchen. The pair alternated in the lead and the heat was in doubt until the last several yards, when the mare forged to the front and stayed there. The summary:

July 27—2:05 pace, purse $1,000:
Leila Patchen, bl m by Dan's Brother..(Snow) 1 5 1 1
Baron A., b h by Baron Medium.....(Cox) 2 1 2 2
The Assessor, ch g by Walter Direct(McMahon)3 3 3 3
Harry the Ghost (Hopkins), Strathstorm (Murray), Nutmoor (Majors) also started.
Time—2:06, 2:11½, 2:05, 2:09.

2:13 trot, purse $1,000:
Lou Jennings, b m by Todd.....(Brennan) 1 1 1
Victor Star, b g by Star Simmons....(Valentine) 4 2 3

F. A. L., b g by Anderson Wilkes.....(Gosnell) 3 3 5
Worthy Bingen (Murray), Electric McKerron (Kane), Blue Feather (Cox), Sadie S. (Murphy), Montferris (Mott), Roy Miller (Grady) also started.
Time—2:09, 2:08, 2:08¾.

Chamber of Commerce, 2:07 pace, $5,000:
Single G., b h by Anderson Wilkes.....(Gosnell) 1 1 1
Rastus, br g by Liberty Boy.....(McDonald) 5 3 3
Judge Ormonde, bl h by Ormonde....(Valentine) 8 2 4
Hal Boy, b g by Hal B.....(M. Childs) 2 11 8
Camelia (Cox), Fred W. (Martin), Patrick M. (Stokes), Hal S. (Murphy), Russell Boy (McDaniel and Geers), Lustrous McKinney (Rodney), Alcy E. (Whitney), Miss Miriam (McMahon), Thistle Patch (Snow), Queen Abbess (White) also started.
Time—2:03½, 2:03¾, 2:05½.

2:22 pace, purse $1,000 (unfinished):
Jean, b m by Flosko.....(Murphy) 1
Hedgewood Patchen, ch g by Hedgewood Boy.....
.....(McDonald) 2
Marriott, b m by Frank Be Sure.....(Marvin) 3
Lady Aubrey (Snedeker), Grace Ongale (Squires), Hal Plex E. (Geers) also started.
Time—2:10¼.

Third Day.

Wednesday, July 28—A continuation of the unsettled weather conditions that made the track heavy when the races began Monday, and interfered with the completion of yesterday's program, put the Blue Ribbon plant out of commission today and the entire card, including the classic M. & M. and the unfinished 2:22 pace, was carried over. Thirteen starters were declared for the big trot.

Fourth Day.

Thursday, July 29.—While racing was resumed today the track was in very poor shape—sufficiently bad to cause owners of heavily staked trotters to refuse to take a chance of accident, with the result that the M. and M. was again carried over. Mudlarks were in their element, and not a heat was raced faster than 2:11.

Tommy Murphy had a good day by winning the 2:22 pace (unfinished on Tuesday) and the 2:15 pace, while in the other events he got a split on second and third money. Walter Cox and Clara Walker headed the summary in the 2:11 pace after a hard five-heat battle, and Guy Nella brought home the big end of the 2:10 trot for Ed Geers after dropping the first heat to Lulu Lumine. Weather conditions tonight are more promising, and it is thought that the M. and M. can be raced tomorrow over a fair track. The summary:

Detroit, Mich., July 29, 1915.
2:22 pace, purse $1,000 (first heat in Tuesday's report):
Jean, b m by Flosko.....(Murphy) 1 1
Hedgewood Patchen, ch g by Hedgewood Boy....

VICTOR VERILHAC DIES IN STOCKTON.

Secretary Luke Marisch of the San Francisco-California Driving Club was apprised by wire Wednesday morning of the death of Victor Verilhac of this city, the end coming at Stockton after Mr. Verilhac had been in poor health for some time. Mr. Marisch at once arranged for the removal of the body to this city, and funeral services were conducted Friday morning at ten o'clock from the undertaking establishment of Valente Marini Marais & Company on Green street.

Victor Verilhac was among the well known and popular members of the local amateur circles, good company, a good driver and a good sportsman, ready to back his opinion in generous sums and a cheerful loser when the other man was right. Prominent among the horses he handled was the chestnut pacer Little Dick, a good winner both in the matinees and on the circuit, Mr. Verilhac driving him to his record in 1910 at the Yolo County Fair at Woodland, his mile standing as the fastest of the meeting.

QUARANTINED CATTLE NOT TO BE SHIPPED INTO CALIFORNIA.

Dr. Chas. Keane, State Veterinarian of California, has taken the position that the Show Herd of dairy animals which was quarantined at Hawthorne Park, near Chicago, Illinois, will not be permitted to enter California for any purpose during 1915. While Dr. Keane feels that the quarantine would not have been raised on these cattle by the Department of Agriculture if there was any danger of them transmitting foot-and-mouth disease to other animals, the general impression prevails in most parts of the country, and especially among exhibitors who desire to show animals at the Panama-Pacific International Exposition, that the International Dairy Show Cattle should not be permitted to be shown at San Francisco.

BENEFIT MATINEE AT SACRAMENTO.

It has been the custom of the members of the Sacramento Driving Club to give a matinee during each season at which admission is charged, the proceeds going to a most excellent cause, the furtherance of the good work being done by the Home of the Merciful Savior for Invalid Children. It is the popular event of the summer with Sacramentans who enjoy harness racing, and as a rule the amateur drivers from this city send up a number of their horses to join in the sport and help along the good cause.

This year will be no exception, and tomorrow afternoon at Agricultural Park the horsemen of the two cities will race for the benefit of the unfortunate little folks, and a large attendance is expected. The program for the day will consist of four races, to which the following entries have been made at this writing, it being possible that there may be some additions or changes before the races are called:

Free-for-all pace—Teddy Bear, Charley Silva; Dick W., A. Ottinger; Vera Hal, Harold Cohen; W. J. K., W. J. Kenney.

2:12 pace—Bondalean, Charley Silva; George Woodward, Harry Cowell; Bradmont, George Giannini.

Free-for-all trot—Columbia T., Charley Silva; Moko Hall, Frank Ruhstaller; Muggins, Harold Cohen; St. Patrick, Jimmy Ryan; John Mack, Harry Cowell; Birdeye, A. Combatalade.

2:15 pace—Jim Donnelly, Frank Wright; Colonel Mazuma, Dr. Weldon; J. C. Simpson, Frank Goularte; Victor Pointer, Dan Keating; King Pointer, H. Campodonico; Aerolite Jr., Richard Roberts; Senator H., Joe Kidd; Jack, McDonnell & Conlon.

Given a good day and track, the contests that should develop from these fields will surpass those of many professional meetings, and the day should be a most entertaining one. A number of local sport lovers in addition to those actively engaged in racing will be in attendance. Thanks to the co-operation extended by G. W. Luce, freight traffic manager of the S. P., in supporting the charitable enterprise, the local horses and all their "tack" will be transported to Sacramento and returned to this city at the company's expense, a courtesy appreciated highly both by the horsemen and by those who are to be the beneficiaries of the day.

SAVAGE, MINNESOTA.

Savage, Minn., July 17—The first record meeting of the season at the International 1:55 establishment was rained out last Saturday after two young trotters by Dan Patch had been given standard records, the second attempt of today being more successful, the day's activities placing Dan within one notch of the coveted century mark as a sire, while three former record holders made material reductions in the figures previously credited to them. One of the pleasing performances of the afternoon was that of George Gano under saddle, the champion of the Gambetta Wilkes family pacing within a second of the world's record held by Krüger for that gait and "hitch." George takes kindly to the new way of going, and the next attempt by him will in all probability witness the establishment of a new championship mark. The details:

Savage, Minn., July 17, 1915.
To beat 2:12 pacing, under saddle:
George Gano, b h by Gambetta Wilkes (Anderson) 2:13
To beat 2:29½ trotting:

Ned Patch (3) b c by Dan Patch.....(Anderson) 2:26¼

TROTTING STALLIONS "SUBMARINED."

A New York dispatch of July 10 brings the information that through the torpedoing by a German submarine of the Guido, a vessel which was conveying the latest shipment of the Fasig-Tipton Company to Russia, the five American trotting bred stallions on board were lost. It will be recalled that some time ago the Fasig-Tipton Company announced the purchase of the following stallions for shipment to Russia: Redlac 2:07½, Ormonde 2:08¾, Lord Brussels 2:09½, Harry Dillon 2:10, and Donald McKay p. 2:07½. On June 12 they were shipped on the steamer Idaho.

It appears that the horses arrived safely at Hull, the destination of the vessel, and there were transferred to the Guido, and it was while on board the latter that they fell victims to the fearful invention which has been so frequently availed of during the progress of the European war. The sinking occurred off the coast of Scotland, so the dispatches say.

Fortunately the stallions were insured, so that the monetary loss occasioned through their deaths will not be great. It is reported that the foreigners have placed another order with the Fasig-Tipton Company to duplicate the shipment at as early a date as possible.—Western Horseman.

NOTES and NEWS

The M. & M. was rained out Wednesday.

◈◈◈

Kalamazoo next week—and may the weather man have mercy upon her!

◈◈◈

George Lowery went to Davenport last week, to be on hand when Spriggan and Dicto started.

◈◈◈

Dr. Burns, Jr., with his bum wing fired, is running out at the Simmocolon Stock Farm, Ypsilanti, Mich.

◈◈◈

J. Malcolm Forbes 2:08, heralded some months since as a genuine "come back," has gone wrong again for Ed Geers.

◈◈◈

John P. Boileau, well known as an able official and a pleasant gentleman, will officiate as starter at the interstate fair at Spokane, September 13 to 18.

◈◈◈

R. C. H. 2:18, the Montana trotter that Marvin Childs made into a 2:10 caliber performer at Pleasanton last winter, has been a winner up north in the Walker stable.

◈◈◈

The Davenport meeting incurred the displeasure of the weather man this week and he has seriously interfered with Frank Kenney's big trotting revival there. The project deserved better luck.

◈◈◈

It's hard to dope 'em out these days. After Russell Boy's performance in the Edwards a wise observer predicted that he would probably prove troublesome in the Chamber of Commerce. He was, too—but only to the starter.

◈◈◈

As Napoleon Direct went away three lengths to the bad at Cleveland in that 2:02¾ mile and Pop Geers drove most of the way in "Chandler's Channel," the overland route, the chestnut pacer must have gone the route close to two minutes.

◈◈◈

College Gent and Hal McKinney gave the natives something to talk about down in Nebraska when each won a heat in 2:09¼, equaling the track record established last year by the homely but honest little pacing mare, Minnie Chimes. The Gent lasted best and won the race.

◈◈◈

Curley Brown, promoter of the running meeting at Havana, Cuba, last winter, has been spending a few days in his old familiar haunts on this coast, and talks glowingly of the way racing is coming back in the east. The Cubans took to it like a duck to water and the outlook at Havana is excellent.

◈◈◈

Jeremiah Broderick, an old time horseman who rubbed many of the early champion performers and who is now located at Hamaknapoko, Hawaiian Islands, has been visiting San Francisco in the interest of the Hawaiian Commercial and Sugar Company to purchase heavy mares. He returns next week with fourteen head.

◈◈◈

Secretary Harry Shepard has announced the complete program for the Grand Circuit meeting at Columbus, and a great one it is. Including the futurities to be raced there and the specials proposed a round hundred thousand will be raced for. The Columbus dates are September 20 to October 2, entries closing on September 7.

◈◈◈

With three fatal accidents in less than sixty days as a result of auto and motorcycle racing, it is probable that Agricultural Park at Sacramento has seen the last of that form of "sport." The track was built for horses and its activities in the future bid fair to be limited to the less hazardous and more enjoyable contests.

◈◈◈

Knight of Strathmore 2:03¾ won the free-for-all pace at Aurora, Ill., on July 16 in straight heats, pacing one mile in 2:07½, which is some rambling for a two-lap track at this season. Owing to the fact that Sam Hawley is on the shelf temporarily, crippled, Al Russell had the mount behind the Bleiler horse.

◈◈◈

Suldine, John W. Considine's candidate for the two-year-old trotting divisions of this year's Kentucky futurity and a number of other eastern fixtures for the age and gait, is working like a clock for Hunter Moody at Lexington. A recent mile in 2:14 was "pickings" for him, and it is pleasing to note that Carrietta's yearling and also the Prince Ansel youngsters are making steady progress.

◈◈◈

The gentlemanly conductor of the orchestra is courteously requested for another selection of the same brand as that rendered last week for Fresno and Hanford. The last word from Santa Rosa is to the effect that harness horse activities there will be confined to a matinee or so in September—and this is where Lou Dillon was born and where for years the greatest contests of the coast have been staged! "Sic transit gloria mundi"—translation furnished upon application to the Horse Review.

Marvin Childs needs a charm of some kind to aid him when the drawing for position starts. In the big stake here he was twelfth, and in the first heat of the Edwards he was assigned the same position. After finishing third in 2:04¾ he drew eleventh place and finished third again in 2:03¾, the long miles contributing very largely to his defeat.

◈◈◈

The Empress wore her winning clothes at Malvern, Iowa, and put over three straight for H. G. Armstrong in 2:17¼, 2:17¼ and 2:15¼, while Hal J. took second money to Dan Mack in the 2:11 pace. The track record before the race started was 2:09¾, but Hal J., May Davis and Danica didn't do a thing but make Dan Mack pace three heats in 2:09¼ to win.

◈◈◈

No local matinee tomorrow, as the fun folks will congregate at Sacramento to engage in the annual charity matinee. Parties going up from this city (and quite a number have signified their intention of making the trip) should arrange to check overcoats at the Oakland mole and make the change in underwear, going and coming, between Benicia and Suisun, as "the valley," thank you, waxes quite warm during the day.

◈◈◈

Ovieda 2:05, fastest of the get of Bob Fitzsimmons 2:07¼, contracted pneumonia while on the Nebraska circuit and died on July 7 at West Point, where Warren Dennis had his string entered. Ovieda was owned by Hamilton Brothers of Sugar City, Idaho, and her loss was a severe one as she was one of the best mares that has appeared in the northwest. Among her engagements were two races at the fall meeting at the exposition.

◈◈◈

August 11 is the date set for the annual celebration of the San Francisco butchers, the big doings being slated to take place at the exposition. A card of harness races, for which the exposition people have furnished the prizes, will be one of the features of the occasion, the races, while open to all local amateurs in good standing, being held under the auspices of the San Francisco-California Driving Club. W. J. Kenney will do the starting.

◈◈◈

Of the California-trained horses starting at Cleveland only two, Peter McCormick 2:05½ and The Proof 2:10¾, were heat winners, the former in the Ohio and Keefer & Spencer's trotter in the 2:17 trot. The machine paid a good dividend on the latter's winning heat, as two sharpshooters who bought $2 tickets on him straight pulled down $221.30 "per each," which is a pretty fair kind of profit. The lad went an "improving" race for Billy Andrews, finishing 8-4-1-2 in 2:13¼, 2:08¼, 2:10¾ and 2:12¼.

◈◈◈

L. L. Gilpin of Richfield, Utah, who purchased a number of California horses a little over a year ago, writes that Maud Jay C. (dam of the good trotter and speed sire Nearest McKinney 2:13¼) by Nearest 2:22 has foaled a fine filly by Mesa Grattan, a well bred son of Grattan 2:13 who through accident was never raced, though showing standard speed as a three-year-old with but little work. The lass is named in many of the colt classics and Mr. Gilpin has great hopes for her future.

◈◈◈

G. W. Davis of Vacaville is enthusiastic concerning the progress made by the Demonio fillies which he sent to Lou Mativia at Dixon this spring for their first training. The one out of Kitty Bellairs has been taken home to grow a bit more after having progressed by easy stages to a half in 1:07, with the last quarter in :32¼, but the one from May Norris, possessing a lot of speed and a bit of willfulness along with it, has been left for a course of lessons in the straps. Mativia is also handling for Mr. Davis the four-year-old gelding by Demonio out of Mamie Airlie by Prince Airlie (sire of the dams of Airlie Demonio 2:05½, Potrero Boy 2:08¼, etc.), and both owner and trainer are confident that he is the making of a very fast horse. All three were bred at Suisun Stock Farm.

◈◈◈

Single G. 2:03½, the Indiana bearcat in Curt Gosnell's stable, annexed the Chamber of Commerce at Detroit Tuesday in straight heats. Pop Geers carried off the choicest cut from the Tavern "Steak" and Tommy Murphy took the Ohio into camp. Last winter the Indiana teamster was given up for dead; not many weeks ago the silent man from Tennessee emerged from the hospital after having been compelled to undergo an operation; still more recently the wizard of Poughkeepsie was severely jolted by lightning. In the face of these things and viewed from this distance of some steen hundred miles from the field of battle, it would seem that the main cause of Hal Boy's misfortunes is that Marvin Childs is just naturally too blamed healthy. He ought to swallow a chew of "star," or adopt some such simple expedient in an effort to fall in line with the season's fashions for winners.

FROM THE OREGON STATE FAIR GROUNDS.

The track here has taken on considerable more activity the last few weeks, several new strings of horses having arrived. The track is heavy and no specially fast workouts are recorded. It is expected, with the work being done, that the track will be in the best of condition before fair time.

Billy Hogoboom is one of the recent comers, with the good horse Alerdau 2:09¼. He will be raced around the circuit.

Geo. Swisher arrived from Medford July 9. He has Grace N. p. 2:18, Hallie B. p. 2:24, St. Michaels p. 2:15, Robert Kenzie, green trotter by McAlzo, the star of his string; Oregonia, three-year-old trotter by Bonaday, and Nellie Mack, a green trotter by Unamack. All are performing like race horses.

J. R. Sawyer has Lena Patch, by Oregon Patch, and Hal Edna by Hal B. Like the others here they give much promise now.

Dr. A. G. Smith has Complete 2:17½, trotting, and Helen Hal, a green pacer by Hal B., that looks extra good.

Ed Keyt's two horses, Wild Girl 2:18½, and Edith M., a green trotter by R. Ambush, are still working well.

Sam Bush has Sallie H., green, by Hal Norte, and Don Diablo, green, by Bonaday, both showing promise of speed, and he is jogging Ben Greco, another good Bonaday.

J. B. Stetson is still working very satisfactorily the C. A. Harrison string, Tosora (3) 2:26½, Bonniquee, two-year-old pacer by Count Boni; Hal Regent, two-year-old pacer by Hal B.; Maggie Ansel, yearling filly by Prince Ansel, and Kinney Benton, two-year-old by True Kinney. Besides these Stetson has Novella 2:29¼, and Bon Cupid, a four-year-old trotter by Bonaday.

Alex Grant is still here with Francis J., that has made a season here. He has given the horse a few good workouts and declares he was never more fit to race than right now. Wm. Howell, the banker and sheepman of Boise, Ida., who is well known as a horse fancier, last week purchased from C. A. Harrison the yearling standard bred trotting stallion, Kinney Benton, by True Kinney (2), dam by Prince Ansel (3) 2:20¼. Kinney Benton is a handsome colt and a very promising trotter.

J. B. Stetson has recently purchased the classy trotting mare Novella 2:29¼, by Letrado (3) 2:25, son of Alcone, dam by Alaska, a Larabee-bred mare. Rev. H. C. Stover, who is a true lover of the sport of harness racing and knows a good horse, owned the mare, but could not well race her himself, and Stetson feels that he has secured a great prospect. Stetson has sold his Expedition stallion, Excellency, and D. Misner, one of the leading garage and auto men of Salem, is now owner, which is certainly a good omen. We have seen horsemen getting autos for so long, it is good to see things go the other way once in a while.—Rural Spirit.

BABIES TROT FAST AT LEXINGTON.

Georgetown, Ky., July 17—The past week was the first one providing training weather at the Lexington track for the past month, and the trainers took advantage of the fact and stepped their charges along some pretty brisk miles. The two-year-olds were pretty busy and some lively miles were stepped off during the week, the youngsters lowering the season's record more than once during the time. The fastest mile recorded was that of the bay colt, Suldine (1) 2:24¾, that H. C. Moody stepped with him in 2:14. The youngster was taken away very fast, reaching the half in 1:05½, with the second quarter in :32¼. At this point his driver, noticing that the pace was too fast, took him back and he jogged the next quarter in 35½ seconds, then brushing home in 33 seconds, making the mile in 2:14. The next best mile was that of the black colt in the stable of Gene Bowerman and owned by A. M. Spottswood, a well known lumberman of this city. The colt trotted a mile in 2:16 earlier in the week, while this morning he brushed a quarter in 32 seconds and an eighth in 15¼ seconds. Hermione B. (2) 2:18, the fast Morgan Axworthy filly in the stable of Mike Bowerman, trotted a mile in 2:21 with the last half in 1:05.

Possibly no work of the week attracted more attention than did that of the yearlings in the stables of Wick Curry and H. C. Moody. The youngsters in the Curry barn were all by J. Malcolm Forbes 2:08 (three in number), and were worked in the afternoon when there were not many people on the rail, but the report of their performances soon spread. Mary Magowan, a bay filly out of Irene Wiggins, by Wiggins 2:19½, trotted a mile in 2:30, last quarter in 35 seconds. Emma Magowan, a sister to U. Forbes, trotted in 2:30½, and a brown colt out of Mendosa Worthy (4) 2:17¾ trotted in 2:34½. Each of these youngsters is now ready to enter the list as soon as they are asked, which will probably be at the next breeders' meeting.

Moody worked the brown filly by Morgan Axworthy, dam by Wiggins, a half in 1:13, which was done handily. She is the property of Moody and Hart Bros., of Flemingsburg, who bred her. Anselila, a bay filly by Prince Ansel out of Ila Moko, trotted a mile in 2:35, last quarter in 35 seconds. Verbena Ansel, out of Verbena Mack, by Directum Spier 2:11¼, trotted a mile in 2:35, last quarter in 34¾ seconds. Senator O'Brien, by Peter the Great 2:07¼, out of Carietta 2:18 (dam of Suldine, Silent Brigade (2) 2:14¾, Hester C. (1) 2:21¾, etc.), trotted a half in 1:13¼, and a quarter in 35 seconds.

Roy Miller dropped some of the members of his stable down the past week. Thorn Worthy and Baby McKinney were worked a mile in company in 2:14¾, last quarter in :32¼. Roya McKinney repeated two miles in 2:14¼ and 2:14; the two-year-olds, Olivia Worthy, in 2:22¾, and Ashland Worthy in 2:18—Western Horseman.

At the Home of The Harvester 2:01

There was a day when the breeding farms of California were famed around the world, and when the stories concerning them and their produce made interesting reading in countless journals, both class and general in scope. With the changing years the large farms of the Golden Slope have passed from realities to mere memories, and only in certain sections of the east are plants maintained for the production of the trotter that compare in any way with the older establishments of California. Newest and in many ways most interesting of the eastern farms is Curles Neck, Virginia, where in an auspicious natural setting, enhanced by every man-made accessory imaginable, Mr. C. K. G. Billings has established the home of those great champions, The Harvester 2:01 and Lou Dillon 1:58½, with many worthy lesser lights of the trotting world to keep them company. We have had numerous accounts of Curles Neck and its horses, but none more comprehensive and more interesting throughout than the following from the pen of a correspondent of the New York Herald, to whose columns our indebtedness is acknowledged, with thanks:

Curles Neck, the home of the fastest trotting stallion and the fastest trotting mare in the world, is one of the many picturesque and interesting plantations which lie along the James River in Virginia. When C. K. G. Billings purchased this five thousand acre farm for breeding trotters some of his New York friends who had established their studs in the famed blue grass region of Kentucky thought it a great mistake to send The Harvester 2:01, Lou Dillon 1:58½ and other celebrated horses to Virginia, where comparatively few great trotters or runners are nowadays raised. It is not certain that Mr. Billings, before he bought the place, weighed very carefully the question as to whether he could raise more trotters or faster ones in Kentucky than in Virginia. Those who know him best are inclined to the belief that other considerations turned the scales in favor of the Old Dominion.

Walnut Hall, Elmendorf and Castleton are splendid farms, and there are many more in the beautiful country about Lexington, but with all their silvery streams of running water that ripple and murmur over beds of limestone on their way to join the Ohio you cannot run a seagoing vessel like the Vanadis, drawing fourteen feet of water, up to your front door at any one of these Kentucky places, as you can at Curles Neck. And that is something in favor of the James River location to a man who can go aboard his yacht off Fort Washington, in the Hudson, or at Oyster Bay, in the Sound, and the next day land at his own dock on his Virginia Farm.

A Sportsman's Paradise.

Then, again, it is not likely that the owner of any stud farm in Kentucky can shoot on his own place deer, wild turkeys, swans, geese, canvas backs and mallards, not to mention quail, snipe, teal and such like smaller game. Mr. Billings' Virginia estate is something more than stud farm. It is a veritable sportsman's paradise. In the great horseshoe bend of the broad, majestic river which almost makes an island of Curles Neck, wild creatures of every kind find a safe retreat, except in the shooting season, and the fields and forests and marshes are overrun with them.

Viewed from the topmost portico of the modern Colonial brick dwelling house which stands on a low bluff close beside the James, the scenery all about is of rare beauty and absorbing historical interest. Off to the west, directly across the stream, the country stretches away for miles in the wooded neck formed by the serpentine course of the James and the Appomattox rivers, where General "Ben" Butler, in his memorable attempt to operate against Richmond from the South, while Grant was hammering away at the North, got his army hemmed in by General Beauregard, or "bottled up," as was said of him at the time. What a wonderful scene the now placid James must have presented on that May day in 1864, when Butler's army of 40,000 men, afloat on its surface in a motley array of screw and sidewheel steamers, canal boats, schooners, tugs, ferryboats and barges, came crawling up the stream from Fortress Monroe to land at Bermuda Hundred, just around the bend from Curles Neck!

War Time Memories.

Toward the south one sees above the distant treetops down the river, far beyond the duck marshes, a cluster of belching smokestacks, where a city of 17,000 inhabitants has in the last few months sprung into existence as if by magic around Grant's old military house, at City Point, to manufacture munitions for the greater war than that of fifty years ago. When the visitor turns to the east and north he sees, scarcely two miles away, the rugged outline of Malvern Hill, with its dark green foliage as a background for the intervening multi-colored fields of waving and ripening grain.

Through the farm, in the middle distance, runs the Newmarket road, or river road, and half a mile beyond is the Long Bridge road, which marks the northern boundary of the plantation. It was over these roads that a large part of General Lee's army marched to strike the retreating columns of McClellan when he made his last stand at Malvern Hill, near the close of the fruitless Peninsular campaign in June, 1862. And it was here the Confederate troops were shelled and driven back "half a mile below the upper gate at Curles Neck" by federal gunboats lying in the river near the point where Mr. Billings and his friends now shoot ducks. Up the river road, on the night of June 14, 1862, General J. E. B. Stuart led his twelve hundred dashing Confederate cavalrymen after their brilliant raid entirely around McClellan's powerful army. And down the same highway intrepid Phil Sheridan, afterward president of the Washington Park Jockey Club, rode in command of the two divisions of federal cavalry which crossed the James River near the farm line on the night of July 26, 1864, and fought a running engagement all the way east to the foot of Malvern Hill. Though fifty years and more have gone by the ploughshares frequently turn up the bones or accoutrements of some Union soldier who may have fallen that morning. Twice this happened in tilling the fields last spring.

The Original Race Horse Region.

But let us get back to our horses; for Curles Neck and the country round about are as rich in traditions of the turf as in those of war. In the days when Virginia cavaliers, with their broad domains and their long retinues of servants and slaves, lived like the barons of England, this was the original race horse region of America. Before the first white man had penetrated to the wilds of Kentucky the wealthy planters along both banks of the James River were raising fast horses and racing them for money, tobacco and plate. The court records of Henrico county, in which Curles Neck is located, disclose three trials growing out of horse races in the year 1677, with Thomas Jefferson, Jr., the grandfather of President Jefferson, and Benjamin Harrison, the ancestor of two other presidents, among the witnesses or litigants. There were regular meetings, with races open to all, as early as 1739, and perhaps much earlier. The climate and soil of the peninsula seem to have contributed to the production of fleet, stout runners, and the ascendancy of Virginia on the turf was for many years undisputed, nor was it wholly lost until shortly before the civil war.

To one of the great plantations along the James, which one is now unknown, there came in 1730 a stallion called Bulle Rock, said to be the first English race horse brought to America. It is possible, of course, that others came before him, but if so the antiquarians have never found a trace of them in all their patient searching of early Colonial newspapers and court records. Bulle Rock is reported to have been a son of the Darley Arabian, progenitor of Eclipse and so many of the great race horses of the present day.

Sons of Godolphin Arabian.

Buffcoat, a dun stallion by the Godolphin Arabian, that other great progenitor of modern thoroughbreds, died in Virginia in 1757, according to all the stud books.

Lofty, another son of the Dodolphin horse, stood at the stables of Thomas Goode, across the river from Curles Neck, in 1762. Crab, a grandson of the Alcock Arabian, came over from England in 1746. Selim, a son of the celebrated Othello, or Black-and-All-Black, was there in 1752, and was owned by Mr. Goode, a prominent breeder and turfman of that period. Monkey, by Lord Lonsdale's Bay Arabian, landed at Brandon, twenty miles down the river from Curles Neck, in 1747, Nathaniel Harrison having imported him when he was twenty-two years old.

Colonel Daingerfield, perhaps the ancestor of Colonel Foxhall A. Daingerfield, the great horse breeder who managed Castleton so many years for James R. Keene, brought the bay stallion Gift, by Cadormus, into Kent county, across the Chickahominy from Curles Neck, at a little later period. Brabaham, a noted grandson of the Godolphin Arabian, and Starling, by the Belsize Arabian, were imported prior to 1766 by Captain William Evans, who lived in Surrey county, on the other side of the James. Almost opposite him, on the peninsula, lived William Lightfoot, of Sandy Point, who imported nearly a dozen well bred stallions, beginning with Bolton in 1759 and including Saltram, by Eclipse, Hambletonian, Jack Andrews, Oscar and Precipitate, all noted sires in that early day.

The Randolphs at Curles.

Local tradition has it that Curles Neck was once the property and home of the original American rebel, Nathaniel Bacon, who organized Virginia democracy against the landed aristocracy and burned Jamestown over the dead of arrogant old Governor Berkeley and the royalists in 1676. But the Neck was very soon after this date owned by Richard Randolph, son of Colonel William Randolph, of Yorkshire, England, who settled at Turkey Island, adjoining Curles, and died there in 1711. Richard Randolph of Curles, as he called himself, married a direct descendant of the Indian princess Pocahontas. He was the grandfather of John Randolph, of Roanoke, celebrated as horseman and statesman.

In a cornfield on the Turkey Island estate not more than one hundred yards across the line from Curles there is still to be seen the fresh walled family burying ground of these early Randolphs, but the granite slabs which cover the ancient graves are so matted over with vines and weeds that all the names are hidden save those of Isham Randolph and his wife, Elizabeth, who have slept there since 1742.

The will of Richard Randolph, which was extant when Hugh Garland wrote his life of John Randolph, in 1851, disposed of 40,000 acres of the choicest lands along the James, the Appomattox and the Roanoke rivers.

Paid $1,000,000 for Improvements.

Curles—the neck was omitted in Randolph days—came into the possession of, the late Charles H. Senff, of the American Sugar Refining Company, in 1892, sadly run down after the ravages and neglect of the civil war period and succeeding years. Mr. Senff was a chemist, interested in scientific agriculture, and he expended $1,000,000 or more on the historic seat of the Randolphs to demonstrate what he knew about farming. For three hundred miles of underdraining he paid almost $300,000. That was one item. Then to enrich the soil of the 3,000 acres under cultivation he shipped barge loads of stable manure from New York, Baltimore and Washington direct to the dock at Curles until he had put $105,000 worth of fertilizer back upon the land. That was another little item. The construction of eighteen miles of good roads was another. Buildings enough to make a very fair village were put up, these including a modern mill and grain elevator, as well as barns for hundreds of cattle and horses, and cottages for a small army of farm hands and other laborers.

Mr. Billings Reorganizes.

After he had thus improved the place Mr. Senff began to stock it with cattle. Nearly a thousand acres were seeded to alfalfa and blue grass, and it was his intention to increase this acreage until all the available lands were utilized and then raise beef for export direct from the Curles dock to Europe.

When Mr. Senff died, about three years ago, Mr. Billings bought the splendid estate as it stood, stock and all, for something like $350,000. He has remodeled and refurnished the dwelling house in sumptuous style, carried the dock to deep water, built new barns for his trotters, constructed a perfectly appointed mile track and made many other improvements befitting the home of a trio of two-minute trotters, and, let us hope, of many future two-minute trotters.

The new owner of Curles has reorganized the farm and is now breeding trotters for pleasure and for the market. He intends to sell every colt as a yearling by auction in New York, after the fashion of the breeders of race horses. The first crop was marketed last winter, and Mr. Billings had the satisfaction of seeing them bring higher average prices than any lot of like age offered under the hammer in many years.

In reorganizing his forces Mr. Billings engaged Ed A. Tipton to manage the breeding enterprise and J. E. Colenso, a graduate of the Wisconsin Agricultural College, to manage the farming operations. Mr. Tipton is too well known to need a certificate of efficiency further than to say he had charge of Marcus Daly's famous stud of trotters and runners when that lamented breeder and sportsman was sending futurity winners from Montana to sweep the Eastern race tracks. One of the first things Mr. Tipton did at Curles was to make Thad Logan, of Uhlan fame, his superintendent, and then get his old right bower, trusty Larry Murphy, to look after the brood mares, as he had done twenty years before at Mr. Daly's Bitter Root Ranch. "Dutch" Busch, who is just as efficient with stallions as Murphy is with mares, has charge of The Harvester and Bion.

Russian and American Trotters.

Bion is a pure Orloff stallion that Mr. Billings bought in Moscow on his last trip to Russia with Uhlan, Lou Dillon and The Harvester. He had trotted in 2:12 on a half-mile track and was regarded as one of the representative horses of the breed. When we stepped into his box on the day our little company had gone down from New York to see the farm and the horses, and Busch called the docile gray fellow away from his feed without laying a hand on him to pose for inspection, the writer's first thought was, after taking in at a glance the superb lines and proportions of the stallion:—"What a pity our breeders have not established a type as distinct and as perfect as the Russian in building up the American trotter of today!"

Bion has all the character of his Arab ancestors about the head and neck and more of it again in his high set tail and elegance of form at the croup. He is a horse of abundant size, bone and substance, and as you look him over you try in vain to think of any work short of heavy draught that he could not do. Mr. Billings is keeping this grand horse for public service, free to all Virginia farmers who care to send their mares to him.

In the adjoining box we renewed acquaintance with the stallion that Mr. Billings is breeding all his

[Concluded on page 12.]

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

WOOD DUCK NEARLY EXTINCT.

[By Harold C. Bryant.]

The wood duck is the most beautiful of all our ducks. Its only near competitor in this respect is a close relative, the mandarin duck of Asia. But even the brilliancy of coloration in this species is superseded by that of the wood duck. Formerly the wood duck was to be found through the low country west of the Sierras. At the present time it is but a rare local resident of the Sacramento and San Joaquin valleys and westward to the coast. It has always been rare in Southern California, where favorable conditions are lacking. A specimen taken at Ramona, San Diego county, furnishes the southernmost record. The wood duck frequents timber-bordered streams and fresh-water sloughs, especially in the oak belt. It can not be considered a distinctly migratory species, for in most instances it is permanently resident within the State. Occasionally a slight migration toward the north in April and to the south in October is noticeable.

The crest and bright coloration of the wood duck is so conspicuous that the bird is usually recognizable at sight. The pure white under parts and the crested head crossed by white stripes are striking characteristics in the male. The female, although lacking the bright coloration to be found in the male, displays more metallic colors than do females of other species of ducks, and in addition is to be recognized by the white eye-ring which extends back of the eye as a white streak.

Wood ducks seldom stray far from the secluded wooded streams and sloughs which constitute their habitat. Occasionally one may be started from the ground in an oak forest or from the limb of a tree overhanging a stream. But more often they are seen swimming in some secluded slow moving creek or river. This bird is one of the few ducks to select a hole in a tree for a nesting site. Usually the nest is built above the water and from fifteen to fifty feet above the ground. Quite often the nest itself, which is composed largely of debris from the cavity and lined with down, is placed several feet below the entrance to the hole. The hollow end of a broken off branch is frequently selected, as is also the deserted hole of a red-shafted nicker or other woodpecker. A large number of eggs, usually ten to fifteen, are laid. The wood duck returns to the same nesting site year after year. Unlike most ducks the male is usually to be found in the near vicinity of the nest and he apparently stands guard while the female is incubating. The young either tumble out of the nest, or, as some observers have asserted, are carried to the water one by one in the bill of the mother.

The wood duck is noted for the swiftness and grace of its flight. The bird is very much at home in a thick growth of trees and it flies about among the branches with apparent ease.

As a rule the wood duck feeds upon aquatic insects and plants found along the stream where it makes its home. But in addition, the bird often forages about the woods in search of other food. They have been seen feeding in corn and wheat fields and still more often on acorns. The stomach of several examined have contained large quantities of acorns.

The flesh of the wood duck is said to be delicious, and for many years certain hunters preferred to hunt this duck to the exclusion of all others. Our only hope of making use of this bird as food lies in artificial propagation. The bird is readily domesticated and there is no good reason why it can not be raised in captivity and sold on the market. At present there is a brisk demand from breeders and pleasure parks for it.

Some of the early writers state that the wood duck was very common in California in their day. In many places in the State, as, for instance, in Marin and Sonoma counties, wood ducks were to be found in numbers previous to 1889. There have been no reports of the occurrence of this species in many of the same localities in recent years. Individuals are occasionally reported as having been seen along the Sacramento river and in the vicinity of Gridley, Butte county; but further than this, and an occasional one reported by a collector or market hunter, the species is now almost unknown. During the season 1895 to 1896 there were sold on the markets of San Francisco and Los Angeles 440 wood ducks. During the season of 1910 and 1911 but six of these ducks were sold on the markets of San Francisco, and during the following winter not more than two or three.

It can be seen, therefore, that the wood duck, although formerly very abundant in California, is now nearly extinct. Most of the eastern States have protected this species for several years, and fortunately the federal migratory bird law now gives this duck total protection in this State. It is to be hoped that this legislation has come in time to save this most beautiful species.

Drink Jackson's Napa Soda.

A MORNING ON THE BIG SULPHUR.

The norhern boundary of the great extent of territory on the northwest coast of America, that was once held and ruled over by a Czar of all the Russias, is a beautiful, winding, willow-fringed stream, which flows in a great right angle northwest, down past rolling hills and through fertile valleys to the broad Pacific, where it slips over a wide sandy bar into the foaming, pounding surf. This stream has received its name from its old associations, and now every winter it is up the Russian river that the great fish go when the early heavy rains have swollen all the tributary streams, and the river itself has become yards deep where it rushes to the sea.

When the swirling, sweeping rain-storms drive across the bare fields and broad vineyards; when the leaden clouds hang for days along the higher ridges, and every little gully holds its tumbling torrent; when the requiem of the æolian pines is not quite all sadness but has a promise of something in it that is not of death, but of its opposite; then it is that the great steelhead trout from he sea, the five, ten, and fifteen-pound fish, make their way up the flooded Russian river, far up to where its tributaries tumble their foaming way down from the hills. Then bravely up these lesser streams, battered and bruised in angry waters by hidden rocks, braving a myriad of dangers from natural and unnatural enemies, do the great trout swim, obeying a prompting that comes from they know not whither; unconsciously living their lives as they are given them to live, and losing their life-spark in the shallows if need be, that their kind may continue to exist.

On a road that skirts the deep canyon of one of these smaller streams was I, one fine fresh April morning in the years gone past—an hour before the sun could be expected over the hills, and only four miles to go in the little bobbing cart before we should come to the great milky pools where the curling, foam-flecked eddies softly unfold over the gravelly beds where lie the "salmon." We were going fishing on Big Sulphur Creek—not angling for the little eight-inch fish that are the pride of a summer creel, but for the heavy fighters that would soon be making their way back whence they came.

As we drove up a little hill and to the very brink of the precipice of the Blue Slide, a long series of pools came into view that looked deep and mysterious and promising, in the half-light between the abrupt walls, a hundred and fifty feet below us. My companion noted the waters. "Just right," he said, "just milky enough so that they can't see us." And then not another word, except to the horse, for the remainder of the drive.

When we arrived at the spot that I had seen in my day dreams for weeks, we quickly hooked up our tackle, got out the fresh pressed roe (for be it known that he who caught these big fish regularly caught them with their own freshly deposited ova, or not at all), and scrambled down the hillside, over the new lush grass, to the pools.

I chose for my first attempt a wide, deep pool at the foot of some hundreds of feet of white tumbling rapids, reasoning that here some of the fish making the long up-stream journey would linger awhile and rest. And my reasoning proved correct, for on the second cast, as my bait was slowly drifting along the pebbly bottom, sending little quivers up the line, it stopped as if caught on a rock—and there was no rock there. With a quick twist I firmly planted the hook and then put as much strain on my rod as its six ounces would stand. Slowly the fish started, making its way up the pool, remaining out of sight in four or five feet of murky water, while the taut line trembled in the current.

Up, up the pool he went, clear to the foot of the foaming rapids, while I grudgingly allowed him line. And then he turned, and with a steadiness that seemed to betoken a mind decided, he went swinging with the current. I now thought that truly the fish was lost, for once in the roaring rapids below, weight and current would be too much for my light tackle. But the strain of the little bamboo told, for the great trout slowly turned and swam back into deeper water. Here he remained almost motionless, moving only a foot or so either way, and when repeated twitchings of the line roused him he only made his way under a large boulder, in about six feet of water, and sulked. Ten minutes had elapsed, and at this rate it would have been an hour before he was creeled, so desperate measures were resorted to.

First, small pebbles, and when these were of no avail, larger stones, were thrown into the pool. All failed to start the fish, and it was not till a long alder pole was brought into play, and after much jabbing around the bottom, that the "salmon" moved. And then a quick slackening of the line gave almost too little notice of what was happening as up came the huge bulk, clearing the surface and twisting back in the air toward the line. The trick failed, and the fish struck the water with a resounding slap. Twice the great trout did this and then started wildly rushing 'round the glimmering pool. The death struggle was on! How my arms ached holding the little split bamboo almost double, and how the taut line buzzed in the current!

The fish made the wild circuit of the pool a half a dozen times, and then settled into the current. But his strength was leaving him. No longer he held against the strain of the rod, but came to the surface slowly, shaking his head fiercely from time to time. No longer could he resist the steady, unrelenting pressure, and after a twenty-five minute battle the fish fish, an eight and one-half pound male, was brought to gaff.

The second fish was hooked in a smaller pool some two hundred yards below the point of the first encounter. It was a small, five-pound male, and felt the gaff after a ten-minutes' struggle. This fish was hooked in the roof of the mouth, and was thereby greatly handicapped in its attempt to escape, being literally drowned.

In another large pool, still farther down the stream, two fine fish were hooked and lost, one played for five minutes before freeing itself. (Was there ever an angler's tale without the big fish lost?)

I now made a wise decision and proceeded back, over the rocks, upstream, to a pool in which we had not yet cast bait. Here, after two unsuccessful tries, I hooked the prize fish of the day; one that took the bait while moving, cleared the water a dozen times in its efforts to free the hook, sulked for ten minutes, and put the poor little rod under such a strain that the tip used that day has not yet become straight. After fifty-two minutes of fighting, this fish was landed and turned out to be a female weighing fourteen and one-quarter pounds. In all my memories of fishing, the one of this catch, I believe, will be as the bright, full moon 'mid the stars of a calm, clear night.

Two more of the royal fish, taken further up the stream at the head of the series of pools, and three that my companion had taken, along with the first three caught by myself, composed our morning's catch. We had sixty pounds in all, and as we drove back to lunch down the winding canyon of the Big Sulphur, I turned over in my mind the events of the morning, how this fish leaped and how that one sulked, that I might carry memories back with me to the smoky rim; so that in the days to come, when memories of a necessity must allay the attacks of angler's fever, I might live over in fancy that outing on the rocky stream with the big steelhead.

THE DEER SEASON.

Tomorrow will no doubt be observed by an army of buck hunters who will be out in the hills of Marin, Sonoma, Alameda and Santa Clara counties, for under the fist of county supervisors the deer season had been set back until August 1.

Deer hunters have not brought into this city many bucks during the past fortnight. Reports from Marin county are that bucks are numerous and does almost a nuisance.

The "sooners" have been busy to quite an extent in that county, so it is reported. The custom is, when a deer has been poached, to dress and cut up the carcass immediately and then get the meat in town concealed in sacking.

Sonoma county sportsmen anticipate a good hunting season. Although the bucks were temporarily immune from rifle bullets in Sonoma, there is no closed season on knife and fork attacks on juicy venison steaks. Captain Virgil Butte was host in Santa Rosa to the following-named guests: Hugo Hadrich, Bob Welch, C. A. Dorcas, Capp Collins, Tom Hutchinson, Harry Wise, Charles Higgins, A. R. Whiffler, Gene Bailey, Jack Dalton of Fresno, Charles Goss, Bert McKissick of Reno, Ben Hall, Frank Bane of Eureka, Cecil Burroughs, Ernest Rogers, Frank May, Roy Smith of San Francisco, John Purcell, Bill Dixon, Charles Bane, F. H. Davis and Neil Hitt. The star feature of the menu was a huge buck Butts bagged in Mendocino county.

Prospects for Alameda county deer stalkers are apparently good. Stockmen and others who have recently been over the Livermore range report plenty of deer, but few fawns. A bunch of ten deer was seen one day. The scarcity of fawns this season is attributed to the raids of coyotes.

Good deer hunting is reported in the vicinity of Fouts Springs. Master Howard Nauman shot a fine three-pointer in that section recently. Near the Alley ranch in Lake county four bucks were secured by an automobile party consisting of Dr. and Mrs. Isaac Burke of this city, Joseph King of Oakland, W. A. Gordon and Miss Winnie Gordon of Fulton.

Deer hunters down Salinas way are having fairly good luck in bagging stag bucks. "Duke" Hargous gathered in a 132-pound stag. Dr. and Mrs. F. C. Thurbell and Ernest Thurber returned with a buck that weighed 155 pounds, killed in the Gabilan range. Bear valley hunters have also been successful. Near Emmet Jack Johnson and C. J. Smith got a fine forked horn that dressed 125 pounds. George Bonnei and Al Bryant bagged their bucks near San Felipe. Claude McHenry and Irving Wilson dropped a 125-pound buck near Cienega.

Frank Maskey states that deer are numerous near Bartlett Springs. In the Bass lake region, Madera county, bucks are also said to be numerous.

Rev. C. Todd Clark of Santa Rosa and party bagged four fat bucks in the hills back of Lower Lake, Lake county, a section said to be well stocked with deer. Laury Adams' fine four pointer was killed near the Pile ranch in Mendocino county.

A Halfmoon Bay gun club hunting party, composed of Mark Iverson, Fred Simmons, Andy Gilchrist, G. Cutler, Fred Campbell, worked over the San Mateo hills last Sunday morning without results in a heretofore favorite ground. Iverson had the only chance offered the party, a big four-pointer that dodged the bullet sent after it.

Santa Cruz deer hunters have been getting a few bucks in the Mill creek "chalks" region. Dan R. Trout, James Maddock, H. Hartman, Lewis Fogarty and Fred Canham enjoyed a successful hunt in that region. Maddock, who is a veteran deer hunter, dropped a buck about 400 yards away.

* * *

Sacramento hunters have been getting dove limits in the valley sections this season. The birds probably come down from the hills to a warmer district. G. M. Elliott, Charles Simpson and S. F. Eberhardt bagged limits near Lincoln.

Doves are reported to be plentiful in San Joaquin and Butte counties. The season will not open in Yolo county until September 1.

NATIONAL RIFLE ASSOCIATION NOTES.

Rifle shooting is having a great boom in the country just at the present time, interest undoubtedly having been considerably aroused in target shooting owing to the almost universal demand for a better state of preparation for the country's defense. Not only the regular services but the civilians at large and students of colleges and schools are taking considerable interest in rifle training and local, inter-State and national tournaments will be numerous during the next three months.

As a result of this present agitation and state of mind, all the States are taking increased interest in the big national shooting event to be run off by the Government at Jacksonville, Fla., in October. Maryland and Pennsylvania are the only States in the Union which have positively declined to give their National Guard the benefit of training a team for these matches. Three other States are doubtful, but are making every effort to overcome the difficulties so that they can be represented. They are California, Washington, and Virginia. The U. S. Navy has also declined to send a team notwithstanding the navy representatives have made splendid records in past years in the competition. For the first time, these matches have been thrown open to teams of cadets from military schools and colleges.

Never before has the Government been so generous in its efforts to make this great shooting tournament a success, the last Congress having appropriated $50,000 towards assiting the States in paying transportation charges of their teams to Florida and while there, the enlisted men will be allowed cammuted ration of $1.50 a day. The range in Florida is a new one, second only in size to the Camp Perry range and second to the famous Sea Girt range in its natural beauty. Adjutant General Foster of Florida and his aides have spent years of labor in perfecting and beautifying this range which is located on the St. Johns river, twelve miles from Jacksonville.

The interest of civilians throughout the country is shown by the organization of Government rifle clubs in almost every State in the Union, as well as in Porto Rico, Alaska, Hawaii, and the Canal Zone. In the last six months over 200 clubs have been organized and this number could have been more than doubled if the Government had been able to offer range facilities to the many clubs applying for charters. To these clubs there have been issued by the Ordnance Department of the Army since the first of the year 806 Krag rifles and 550,150 rounds of ammunition.

To test the efficiency of these club members with the military rifle, a national competition was organized and a trophy presented by the War Department which represents the championship of the United States among civilian Government rifle clubs. In this competition 26 of the most progressive of these clubs have entered teams and the competition is now going on under the supervision of Army and National Guard officers, each club being represented by ten men shooting a course of firing the same as is followed by the National Guard in their record shooting. It is expected that the scores made in this competition will equal if not excel those that Uncle Eam's soldiers will make later in the Jacksonville matches.

The National Rifle Association of America, with offices in Washington, D. C., has begun a campaign for 100,000 members at $2 each, the receipts from same to constitute a fund for the express purpose of putting rifle shooting in this country on a plane with other sports such as baseball, football, etc., especial attention being given to the installation of indoor ranges in schools and colleges, Y. M. C. A. buildings, and practically wherever sports of any kind are encouraged. It is claimed that every new member will mean a qualified marks man and from a patriotic standpoint the plans of the National Rifle Association commend themselves to all citizens who believe that we need a better state of preparation in this country. The plans of the Association have the endorsement of the highest officials of the War Department.

Interest in rifle shooting will be stimulated at the camps of instruction for students now being held at Plattsburg Barracks, N. Y., Presidio of San Francisco, Cal., Ludington, Mich., and Chickamauga, Ga., by the donation of trophies and medals by the National Rifle Association of America for team and individual records.

GRAND AMERICAN HANDICAP.

Trapshooters the country over are taking considerable interest in the Grand American Handicap that will be held at Chicago, August 16 to 20, inclusive. From present indications there will be an entry list of 750 amateurs and fifty or more professionals.

Every day of the five there will be an event that alone would make the meet notable. A summary of the programme includes the following: Introductory Shoot, National Amateur (single target) Championship; National Amateur (double target) Championship; Preliminary Handicap, Grand American Handicap, and the Consolation Handicap.

The best shots from forty odd States will be among the contestants for the National Amateur Championship.

Just where the grounds are located and an intimation of hotel accommodations, etc., nearby, can be inferred by glancing over the cut shown on page 12.

It is requested that entries for the Grand American Handicap be made in ample time to permit the sending of receipt, and for it to reach the maker of entry prior to his departure for Chicago. All entries must be accompanied by the maker's full name and address. When making an entry by mail, remittances covering the amount of forfeit ($5) should be made by bank check, draft, post office money order, or express money order, or registered letter.

Admittance to the shooting grounds will be free to every one during the entire tournament. Excellent lunches a-la-carte, at reasonable prices, will be served daily at the Restaurant Tent.

The Chicago Association of Trapshooters will provide a large tent containing lockers, with individual locks, and a separate locker will be assigned to each entrant desiring one. Lockers will be rented to those who desire them at one dollar for the week's shooting. Each applicant will be required to deposit two dallars, of which amount one dollar will be refunded on return of the key when through with the locker. Lockers can be reserved in advance by writing E. B. Shogren, Secretary, 1052 Otis Building, Chicago. The locker tent will be in charge of a competent watchman, but as contestants will have free access to this tent at all times, they will be responsible for their own belongings. Neither the Interstate Association nor the Chicago Association of Trapshooters will be responsible for the contents of lockers under any circumstances.

Guns, ammunition, etc., may be shipped by express prepaid to E. B. Shogren, Secretary, care of Lincoln Warehouse & Van Company, 4259 Drexel Boulevard, Chicago, and they will be carefully cared for and delivered to the shooting grounds free of charge. All such shipments must be prepaid, and have owner's name and address marked on the outside of the box. Shipments on which the charges have not been prepaid will positively not be accepted.

A plentiful supply of Remington-UMC., Winchester, Peters, United States and Western Cartridge Company shells, loaded with the different brands of powder, in standard loads, will be for sale on the grounds.

Regular entries for the Grand American Handicap must be made on or before Saturday, August 7. Entries mailed in envelopes bearing postmarks dated August 7 will be accepted as regular entries. All entries must be made on application blanks, and they will be received by Elmer E. Shaner, Treasurer, the Interstate Association, 210 Coltart Avenue, Pittsburg, Pa.

PACIFIC INDIANS.

[Special Report by Westfield.]

The Pacific Indians held their eighth annual tournament and pow-wow at Tacoma on July 19-22 inclusive, with a record attendance and some of the best shooting was done that the trap shooting annals of the Pacific Coast record.

The tourney was held on the beautiful range of the Tacoma Gun Club, at Manitou Grove, than which a prettier location may not be found in all the wide West. President Hal Sullivan and Secretary Carl Coon, with Capt. Jack Cooper as Field Captain, had everything in perfect shape for the big event; the comfort of the guests was looked after in every detail, and as a result it was the universal comment that a pleasanter shoot has never been held in the State. Charlie Dickendorf and Ralph Wilson had charge of the office, while Capt. D. W. Fleet and Frank Riehl, as President and Secretary of the Indians, looked after the general welfare of all.

We again followed the plan of giving many fine trophies and minimizing the money end of the game. Purses were eliminated, and the only money involved was forty cash average prizes to the total of $600, which was hung up on the high gun plan for general average purses, first money being $50 and lowest $6.

There were ten sets of sterling silver spoons given to ten high places each day, no one contestant to win more than one prize. Also, a long run trophy each day, two low prizes daily and a sterling trophy daily for lady shooters. Finally, the three Indian average prizes, and a half a dozen fine special trophies. Altogether there were fifty-one trophies shot for which became the property of the winners; and these, with the daily ties to be shot off, kept up a degree of interest and good-fellowship such as the writer never witnessed in any mere money tournament—and he has seen many.

One new feature worth mentioning and that seems to have justified itself, is what we may call "The Indian Handicap." Under this plan we created t handicap distances to govern contests for spec trophies. Those who shot under 88 in previous p gram events stood at 16 yards; those averaging 88 93 stood at 19 yards; those over 93 stood at 21 yar The point of this is that every man made his ov handicap and there was no possibility of any diss isfaction with the work of any handicapping co mittee. Another year we will modify this, wi handicaps as follows: under 88, 16 yards; 88 to 18 yards; 92 to 95, 20 yards; over 95, 22 yards. worked out beautifully with us, and was ordered be followed in future.

Considering the conditions of business, the atten ance was better than expected, and gave us a ne record. We had 81 men on the firing line throug the week, and about 70 shot each day's events.

White Flyer targets were used, thrown from thre automatic traps, and the general shooting averag was of a very high degree of excellence, with a nun ber of perfect squad scores, and many honor runs from 50 to 136 straight.

On practice day, Geo. Stacy, of Yakima, Leste Reid and Frank Riehl tied high score with 98x10 for the Davis sterling cup. Reid won on shoot-of and donated the cup back to the Indians for anothe shoot, Indian Handicap.

The first day Frank Troeh was high with 11 while Les Reid, H. Poston, F. and A. Riehl, tied fo second with 116. On this day's specials Stacy wo the Davis trophy, and the annual contest for th Pacific Indians' diamond badge, symbolic of triba championship, went to Frank Riehl on a score o 69 x 70.

The second day Ed Ellis was the star performer losing but one target on the program, and also captur ing the long run of the day. In the specials Frank Troeh won both the Hart sterling trophy and the Davis special cup, shooting for both from 21 yards.

The third and final day's program honors went t Mrs. Ad. Topperwein, who missed but one target of the 160 booked. In the specials the Everding handi-cap trophy was won by Troeh, while the three Indian class trophies went to Troeh, Garrison and F. Campbell.

For the general tournament average on the total of 400 targets there were four ties—L. H. Reid of Seattle, P. J. Holohan of Portland, Mrs. Ad. Topperwein of San Antonio and Frank Riehl of Tacoma, each of whom lost twelve targets only. Frank Troeh took second place and fifth money with 386, and Geo. Hambright third with 383, the Pacific Indians making no distinction as to amateurs or representatives. Segregating the classes, the professional honors went first to Reid, Holohan, Mrs. Topperwein and F. Riehl; second to Hambright and third to D. Rhodes, with a total of 375. Amateur first, Frank Troeh; second, Abner Blair and W. A. Hillis; third, C. E. McKelvey, E. E. Ellis and A. A. Riehl.

Notes.

This program was shot at a total cost of $20 entrance fee to Indians and non-Indians alike, including all trophies and average moneys; for $12 total shooting for trophies only and for $4 per day to shooters entering for one day only; this, of course, not including the ties and special events, entry for which was optional.

Altogether the meet was so satisfactory that no bid for next year's meeting place was entertained other than that of the Tacoma Gun Club, and it was unanimously voted to hold the ninth annual gathering in the City of Destiny.

The tribe is in splendid shape and elected twelve new braves: W. B. Taft and R. W. Kinser, Seattle; E. H. Keller and Al Stroger, Portland; A. C. O'Conner, Spokane; Dave Kayles, U. Uubrey, A. Z. Smith, V. V. Eisenbeis, F. Campbell and A. Riehl, Tacoma, and M. A. Rickard, Corvallis, Ore.

The officers who will handle the affairs of the organization for the next year are: H. R. Everding of Portland, Tyee; C. E. McKelvey of Seattle and J. G. Weatherwax of Aberdeen, first and second vice Tyees; F. C. Riehl, Herald-Custodian.

It is said of Mrs. Topperwein that she "almost fainted" on being handed the $42.50 as her share of first average. She explained this by saying it had been so long since the word "professional" did not bar her from getting real money out of a shoot, that she hardly knew how to act.

Ted Doremus of DuPont fame was one of our honored and much appreciated guests, and was awarded a trophy as the guest who came the longest distance to our shoot.

The Indians have adopted an "Honor Roll" of past members and boosters, and press representatives who "take notice" of our work.

The Tacoma newspapers were especially courteous to us in this meet, and the Portland Oregonian went so far as to send a special representative to report the shoot from the grounds.

The "Old Timer" event—black powder shells—pulled off as a surprise on the afternoon of the third day, was one of the big hits of the meet, with Fred Sumner, Bill Hillis, Ed Morris and Frank Riehl, en costume, as star performers.

Even with ninety-odd prizes awarded, some of the best shots went home minus a trophy, which is the old, old story—and the fascination of every shooting match.

Next year everything will be bigger and better still.

The score sheets forwarded with the above account of the shoot were incomplete, we hope to make amends next week.

AT THE TRAPS.

Return Shoot—The Alhambra Gun Club of Martinez defeated the Big Time Gun Club shooters of Sacramento Sunday in a 100-bird shoot when they smashed 1,233 blue rocks to the Capitol City gunners' 151. Some good scores were made, and as the winners only shot 82 more birds than the losers the result of the outcome was always in doubt.

Odbert and Higgins were the high men for Sacramento. Higgins is a professional. He made 89, while Odbert scored 88 broken birds. For the Alhambra team E. Hoelle and A. G. Wilkes each broke 92. Barney Worthen was a close second, with C. H. Knight and A. G. Flickinger each scoring 91.

At noon the Schenk ranch, where the blue rock range of the Big Timers is located, was turned into about as toothsome a site as one would want to see. A large tent had been pitched and a big dove stew and roast pig dinner awaited the hungry hunters.

Each team consisted of fifteen men. As the Alhambra clug only had twelve shooters with them who wished to compete, three Sacramento men, W. Faust, J. Gusto and W. Ogg shot with them.

Following are the scores for the team shoot; each man shot at 100 birds in 25 bird sections:

Alhambra Club—					
F. K. Burnham	22	22	21	25—	90
C. H. Knight	22	21	23	25—	91
E. Hoelle	19	24	25	24—	92
B. Worthen	21	25	22	23—	91
A. G. Wilkes	24	25	22	22—	92
A. G. Flickinger	24	20	24	23—	91
Roy Avery	23	22	22	23—	90
Tom Wilkes	20	20	21	23—	84
Dr. Merrithew	22	23	21	19—	85
W. Veale	21	19	15	17—	72
Col. Dorsey	19	20	22	18—	79
C. A. Haight	21	18	21	20—	80
W. Ogg	19	21	18	17—	76
J. Gusto	16	14	22	12—	64
W. Faust	16	15	14	11—	56
Total					1,233

Big Time Club—					
Gorman	19	15	19	19—	72
F. M. Newbert	20	22	20	24—	86
Ilgner	19	18	21	21—	72
Patterson	15	15	24	22—	76
F. Ruhstaller	19	9	10	13—	51

Brennan	19	22	21	18—	80
Stoner	20	14	17	18—	69
Tuttle	21	17	15	16—	69
Jost	17	22	20	23—	82
Neo. Newbert	14	13	21	14—	62
Total					1,151

* * *

Interstate Shoot.—The West Alameda trap ground has been put in proper shape for the California-Nevada three day tournament next week—August 5, 6, 7. Indications point to a large attendance of shooters from the bay counties sections, the San Joaquin valley and a delegation from the southern end of the State.

AFTER DARK SHOOTING WITH 28-GAUGE GUNS.

When Fred Teeple announced that he was going to put up a place on the pier at Venice, where those who chose could shoot flying targets at night, many took the statement with a grain of salt. Now that he has made good and his range is an accomplished fact, we all say, "Well done," and when we learn that in two months he threw over one hundred thousand targets we repeat, "Very well done."

It stands to reason that any sport, or game, that demands the light of day can only afford enjoyment to a limited number of people, because so many cannot spare broad daylight—working hours, in other words, whereas the great mass of people can much more easily devote evenings in the pursuit of their favorite recreation, whatever that may be.

So it has come about that Teeple's place at the end of the pier is crowded; in fact, the only valid criticism comes from those who would shoot but can't, at least as much as they would like, owing to the restricted space which allows only five to compete at one time.

There has been, and still is, to some extent, a belief among many sportsmen that any gun of narrower gauge than the standard 12 is a mere toy, so the practical illustration that Teeple is giving the public of what can be done with 20-gauge double shotguns, is certainly a move in the right direction, for it is educating sportsmen by proving to them that small bores are thoroughly practical and efficient guns when properly loaded and handled.

Possibly with the view of subduing the noise as much as possible, Teeple selected 20-gauge guns, Parkers, and furthermore as the loads used are factory loads, Selby's such as one may buy in any gun store, the object lesson given on his range cannot fail to be instructive.

The writer, however, having used a much smaller gun than a 20 on game, i. e., a 28-gauge, conceived the idea of having some of his friends, good shots of course, make the experiment; so on the night of July the 17th at 9:30 p. m., the following scores were made with these small bores, and when it is known that barring Doctor Fitzgerald none of the others had ever seen the guns used before, the performance is all the more remarkable.

Scores made with 28-gauge Parkers, Selby loads, DuPont Powder:

Targets—	25	25	25	25	100
M. Pfirrmann	19	22	21	21	83
F. Mellus	21	22	21	21	85
Guy Holohan	19	21	24	23	87
Dr. Fitzgerald	23	23	23	21	90
					345

From the above it will be seen that 345 targets out of 400 shot at were scored. Not only that, but fully 90% of the broken ones were pulverized; in fact, so very few were chipped that the guns and loads were pronounced perfect by shooters and spectators alike. None of the guns used are best adapted to anything but game shooting, as all are too much bent in the stock, yet these men, shooting at regulation targets and angles, barring the rise which was 10 instead of 16 yards, scored 86.2%.

The writer is firmly of the opinion that the same squad can easily reach 90% or better with 28-gauge guns made to fit them under precisely the same conditions, and good back as Teeple's range and and illumination are it stands to reason that a greater percentage could be made in daylight, as the following scores will show:

Daylight shooting with 20 bore guns: H. Pfirrman 98x100, Ralph Arnold 98x100, F. H. Mellus 95x100, Miss A. Wheeler 92x100.

Long runs, daylight shooting: Ralph Arnold 61 straight; E. L. Hedderly 52, H. Pfirrmann 46, Guy Holohan 44.

Night shooting: F. H. Mellus 96x100, H. Pfirrmann 94x100, Miss A. Wheeler 48x100.

Long runs at night: F. H. Mellus, 71 straight; A. Cosby 49, H. D. Bates 44.

To form an accurate estimate of the arrangement of the trap management and lighting effect, one must actually see the place in action, and it will certainly repay any one interested in trap shooting, while in Los Angeles, to run out to the Venice pier and judge for himself—being assured beforehand of fair treatment and possibly some education along the twenty-bore double gun line.

FISH LINES.

The California Anglers' Association semi-monthly whist party Wednesday evening last was attended by a large gathering of rodsters and their friends. The card evenings are extremely popular.

Late reports from the trout streams and mounutain lakes are of such enthusiastic import as to hurry anglers away on outing trips and cause the stay-at-home contingent spasms of envy. In Yosemite valley, the sport has improved in the Merced river and its branches. Mr. and Mrs. Charles Paddon recently found good fly fishing conditions in Merced river.

For two weeks past anglers at Dunsmuir, Le Moine, Sims, Castella and other upper Sacramento river points, have enjoyed splendid fly fishing. John Filmer, fishing near Sims, landed twenty-one trout one evening. This catch was a limit of ten pounds and one fish. The English royal coachman fly was the best killing lure.

Roscoe Havens and other local rodsters have also been getting the best of angling sport. John Wagoner intimated what is possible near Dunsmuir in the shape of boxes of trout expressed daily to city friends. How long the clear water fishing conditions will endure is a question, for that annual nuisance, the bottom moss, is to be seen floating in some stretches of the river.

The Truckee region seems to be in first-class condition, particularly so near Boca, where the local representation of Waltonians is a large one.

The Little Truckee has produced limit creels recently to every rod in commission. Round about Lake Tahoe the sport is said to be at its best, which report has taken G. B. Miller and family away for a three weeks' outing. Wynan Van Zandt's experience at Independence lake was a pleasing fishing trip. Donner and Webber lake trout fishing is also reported to be just what is desired. Among the late visitors to the San Francisco Fly Casting Club's lodge on the Truckee, near Union Mills, were Carlos G. Young, W. L. Gerstle, Mr. Brophy, W. C. Murdoch and others.

Even the novice can be a successful trout angler on the immense reservoir lake at Big Meadows. Large catches of trout, weighing from three to five pounds, are made daily. Dr. Henry Abrams and Dr. M. E. Simon had a two weeks' "cut in" on the sport.

Feather river fishing seems to be of a pleasing style at Big Bar, Shady Rest and other points. Ed Thompson has had the good luck to land a number of limits recently.

Frank Maskey and E. P. Ayres will spend two weeks on Eel river, near Robinson s pool. A fair run of steelhead made an appearance last week at Greig's pool. One 12-pounder and a number of half-pound fish were taken.

San Gregorio lagoon is worth a trout angler's attention just now. Catches of eight to twelve inch trout were recently made in Waddell creek. Santa Cruz trout creeks have yielded nice catches this month. Al Lent and Buzz Lent caught limit baskets in Aptos creek Wednesday.

Hunters may shoot cottontail rabbits the first week in August. It will then be illegal to bag bunnies until October 15, when the quail season opens.

FIXTURES

Interstate Association Tournaments—

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chicago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy, and the winner of fifth place will also be awarded. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Territories:

Aug. 5, 6, 7—Fourth annual tournament California-Nevada Trapshooters' Association. Auspices of Golden Gate Gun Club, West Alameda trap grounds. T. D. Riley Secretary, Humboldt Bldg., San Francisco.

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Secretary-Manager, Omaha, Neb.

September 24—Medford Gun Club, Dr. E. R. Seely, President, Medford, Ore.

TRADE NOTES.

Winchester Winnings.

The Pacific Coast Handicap tournament held at San Diego on July 8, 9 and 10 piled up, as usual, many victories for Red "W" guns and ammunition.

The Panama-Pacific Gold Trophy event, by far the greatest trapshooting honor ever attained on the Pacific Coast, was won by Mr. W. G. Warren of Tonopah, Nevada. Mr. Warren's shooting was classy in every detail and the San Diego Daily Union comments on his splendid victory as follows: "This Warren person is some gun man. Shake, Mr. Warren, you won the greatest trap race ever seen in the Land where Dreams Come True!" Mr. Warren uses a Winchester Model 1912 hammerless repeating shotgun and Winchester "Leader" factory loaded shells—the kind that won the Grand Prize at the Panama-Pacific International Exposition.

Mr. J. F. Couts and Mr. J. Weisser, both of San Diego, tied for high amateur average on the Interstate 16-yard targets, scoring 339x350. Mr. Couts used Winchester "Leader" factory loaded shells and Mr. Weisser used a Winchester Model 1912 shotgun. Mr. Couts also won the Pacific Coast Handicap at doubles, with the remarkable score of 48x25 pair.

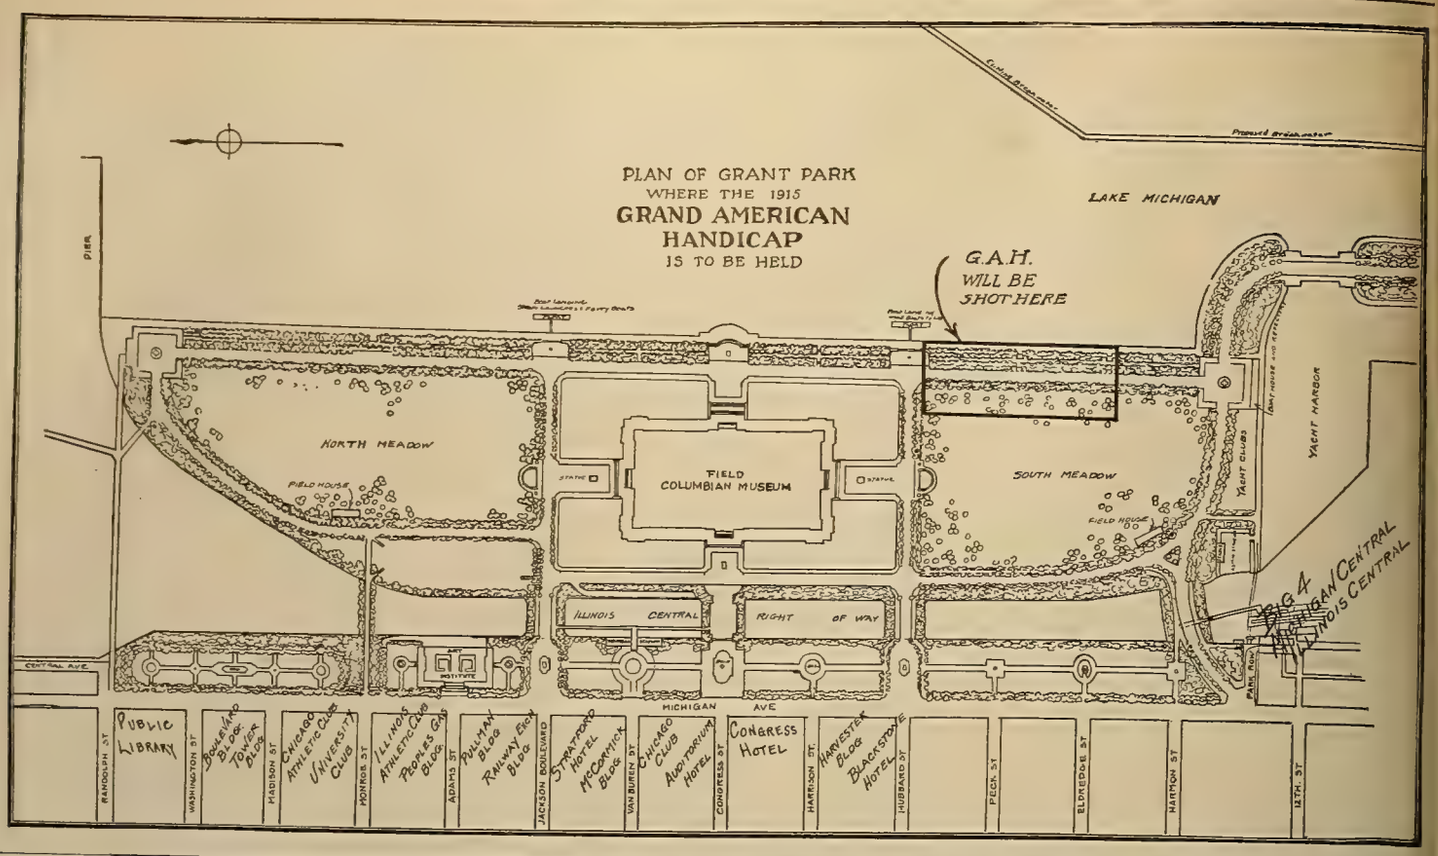
Chas. G. Spencer, the famous Winchester expert from St. Louis, Mo., was high on all targets, including doubles, scoring 672x700. Mr. Spencer always uses Winchester facory loaded shells and a Winchester shotgun. Mr. Spencer has competed in three tournaments on the Pacific Coast recently and has found it easy to pile up an unequaled record of 98 per cent on all 16-yard targets.

All of which goes to show that quality-guns and ammunition, as well as skill, furnish a combination that is manifestly unbeatable.

Peters Points.

At the North Dakota State shoot, Dickinson, North Dakota, June 28-30, Mr. W. W. Sturgeon, using Peters "steel where steel belongs" shells, won both The Interstate Championship and the State Championship. In the former event, Mr. Sturgeon broke 96 x 100; in the State event he broke 48 x 50, tying with Mr. Frank Ray of Dickinson, who also used the "P" brand. It was necessary to shoot off four times at 25 birds each time in order to decide the winner, Mr. Sturgeon finally winning with a score of 96 x 100 in the shoot-off to Mr. Ray's 95. The McCutcheon cup was won by Mr. P. Peterson of LaMoure, N. Dak., with Peters shells, score 47 x 50.

The Indian shoot of 1915, held at Cedar Point, O., June 28-July 2, was as usual practically a clean-up for users of Peters shells. Mr. C. A. Young was high professional, 486 x 500, and Mr. Woolfolk Henderson, known the country over as the winner of the four leading amateur trapshooting events of 1914, won high general average on program events, including handicaps, with the remarkable average of 865 x 900, with Mr. Young high professional on all program events, 856 x 900. The Mallory cup was won by Mr. O. L. Brailey of Toledo, 48 x 50. Mrs. L. G. Vogel and Mr. J. W. Taylor tied for second place, 47 x 50. All using Peters shells. Dr. C. E. Winslow was shooting the "P" brand also and tied for first place in the Indian Championship, 96 x 100.



Rem-UMC Notes.

The most remarkable shooting at the recent Pacific Coast Handicap at San Diego, Cal., was done by Mr. Charles Julian of the Home Club, who broke 98x100 at 18 yards.

Unusual interest was manifested in Mr. Julian's performance because of the fact that he has but one arm, making the record all the more creditable. Mr. Julian used a Remington-UMC Pump gun and Arrow "Speed" shells.

At the Los Angeles tournament a few very remarkable scores were made under adverse circumstances. Mr. O. N. Ford of San Jose, Cal., won high amateur average with a score of 484x500, using Arrow "Speed" shells. Mr. R. H. Bungay was second with 466x500, using Remington-UMC Pump gun and Arrow "Speed" shells. Mr. R. C. Reed won second professional average with 470x500 with the same combination.

The users of this popular combination are generally found to be among the winners.

AT THE HOME OF THE HARVESTER.

[Concluded from page 8.]

mares to. The Harvester in stud condition is a far more imposing horse than he was when he set the record at 2:01, and the critics then considered him to be one of the best looking trotters in training. He stands a little more than 16 hands high, weighs upward of 1,200 pounds and carries his weight without appearing the least bit gross. Though he lacks a little of the exquisite beauty of the Russian next door, he is yet a harder, cleaner, "dryer" looking horse, that you would count on to go faster and last longer than the other. If the boys at the farm have measured him accurately The Harvester is of the St. Simon type, considerably taller than he is long, while Uhlan is of exactly the opposite conformation.

Lou Dillon as a Matron.

Twenty-odd foals by the champion stallion are following their dams in the pastures at Curles this summer, and there will be nearly double the number next year if all the mares bred to him prove fertile. Mr. Billings now has forty-three brood mares and he is adding to his collection whever a choice one is found. There are some noted trotters and producers of trotters in the present band. Lou Dillon is, of course, the star of the lot. Horsemen who remember the frail looking little bundle of nerves that used to fret and fly on the Harlem River Speedway would not readily pick her out today, broad, deep and matronly as she has grown after giving birth to half a dozen foals. A sprightly bay colt is by her side this summer. The old mare—she is seventeen now—seems to have little liking for company when the cares of maternity are upon her. She was always off from the herd, with her eye on her colt, and when approached by any one except Larry Murphy she would move away as if nervous or distrustful. Lou Billings 2:08¾, the oldest and fastest of Lou Dillon's brood, is in the band but she has never as yet produced a foal. Her full sister, Gretchen B., has a fine colt and is a regular breeder.

Roan Mares and Colts.

Baroness Virginia 2:08¼, herone of the memorable six heat race for the Kentucky Futurity of 1909, crops the blue grass of the strawberry plains in close company with her full sister, Baroness Evelyn 2:12¾. Both mares are roans and both are nursing roan colts, whose color has come down to them through unbroken generations of roans from Hiram Woodruff's rare old Morgan trotter, Lady Franklin 2:29¾, foaled almost seventy years ago in the blue hills of New Hampshire. Verily, this roan is a color as hard to eradicate as it is hard to outlast when the heats are split in a race.

Over in another pasture lot are two more roan mares; one of them in type and style perhaps the queen of all the brood mares on the farm, and both derive their color from the same source—a nameless mare by a nameless sire that was foaled out in Illinois soon after the civil war. Bred to an obscure horse called Estill's Eric she produced the roan mare Nell, noted as the dam of Tom Axworthy 2:07; Belle Vara 2:08¾, and seven other trotters in the 2:30 list. Seven of the nine are roans, and one of these is Nelly Worthy 2:25¾, by Axworthy 2:15½, now at Curles. She has a remarkable roan colt by her side that can square away in the blue grass and demonstrate that "speed is born with the foal."

Nelly is as shy as Lou Dillon, and even more suspicious about kidnappers, but the pure, concentrated essence of maternal temperament is the bloodlike black mare Caracas, dam of Nahma 2:07¼. Larry Murphy says he believes she would kill a man who crossed her path the wrong way. No one was ever found who could put a harness on her, and no one but Larry could now get near enough to try it. This high tempered indomitable spirit is not to be deplored. It has distinguished the dams of many of the greatest trotters ever seen. Caracas is the daughter of Bingen 2:06¼ and Houri 2:17 by Onward 2:25¼, and she is of the type and quality which might lead almost any horseman to mistake her for a thoroughbred runner instead of the pure bred trotter she is.

To enumerate all the interesting individuals among the forty-three carefully chosen broodmares at Curles would fill a page of the Herald. There is a story worth telling about every one of them, for performance is the test of pedigree in Mr. Billings' scheme of breeding trotters, and no mare finds a place in the stud unless she and her immediate ancestors have done something great enough to show that her colts by The Harvester can be reasonably expected to win races in the Grand Circuit. Some of these mares, like Caracas, Adioo Dillon (dam of Dillon Axworthy 2:10¼), and Lucille Marlow 2:09¼ (dam of Lucile Bingen 2:08½), have already produced extreme speed. Others, like Bernice R. 2:07¼, Berta Mac 2:08, Gertrude Dillon 2:10½, Kingston Belle 2:10¾, Louise Wilson 2:10¾, Lucile Bingen 2:08½, Margaret Preston 2:10¼, Nancy Royce 2:06¼, Roberta Bingen 2:13¼, Santos Maid 2:08¾ and Zarrine 2:07¼, have shown it in public, while others, like Yosan J., Solola and Baby Axworthy, have beaten 2:10 in private, though they never gained fast records. A few, like Memories, the sister of Todd 2:14¾, have been taken undeveloped on faith in their great producing parents, but in one way or another "there's a reason" back of the selection of every mare. Seeing them together in groups in pasture the visitor is likely to be impressed by their uniformity of type and size. There are few, if any, coarse heads and necks among them, and the great majority are neat, snug, smooth, clean, well bred looking animals, apparently under 15.2 hands high.

With everything at hand that nature, care and science can provide, and with such a band of brood mares to mate with a great horse like The Harvester, it seems like a safe conclusion that Mr. Billings' new enterprise will meet with the splendid success which it merits and add another notable chapter to the eventful history of Curles.

Peace at Malvern Hill.

When we were ready to start for Richmond to take the night train which would set us down for breakfast in Herald square Mr. Colenso considerately directed the chauffeur toward Malvern Hill, and in ten minutes the powerful motor car was climbing the almost precipitous southwest slope from the river road to the commanding site of the ancient Malvern house, built of brick imported from England, but no longer standing. It is the highest point anywhere about Curles, and from here on a clear day you can look down over the winding river and the peninsula more than half way to Jamestown, where the first permanent English settlement in America was made in 1607.

The battlefield is back of the Malvern house and along the Quaker road, which begins in the dooryard and runs almost due north at the western edge of the plateau. One the eve of the fight General Fitz-John Porter, some-time Police Commissioner of New York, seized and held the strong position for McClellan, and when the forces of General Lee attacked the Army of the Potomac they encountered a veritable Cold Harbor. The Quaker road today is, as its name implies, the picture of peace, and as you pass the leafy glades and limpid brooks on the way from Malvern Hill to Glendale, or Frayser's Farm, it is hard to realize that in the closing days of June, 1862, these trees were torn to shreds and the streams were red with blood, where 200,000 men were fighting the last of the "Seven Days' Battles."

Few landmarks of the great conflict now remain, but as we neared the Glendale crossroads we came upon the historic Willis Church, at which Lee, Jackson, Hill and Longstreet held a council of war just before the disastrous attack on Malvern Hill, and which later was used as a Confederate hospital. It was on a Sunday afternoon, almost fifty-three years to a day after the battle, and as the congregation came pouring out of the quaint old white Colonial meeting house back in the grove, as an added reminder of the blessings of peace, even "Ed" Tipton looked approvingly on the assembled "psalm singers.."

THE FARM

HOGGING OFF VARIOUS CROPS.

is a well recognized principle of manufacturing that to reduce the cost of production and at the same time maintain the quality of the product means direct increase in net profits. The wide variation found on different farms in the cost of pork production would indicate that, if the method followed by the man who produces pork at the least cost were in general practice, the actual cost would be reduced more than one-third.

A careful investigation on many different forms shows that the average cost of harvesting a crop equals the cost of growing it ready to harvest. It has also been demonstrated by numerous experiments that the pig can do the harvesting of various crops without wasting any food material. It follows logically, therefore, that up to the extent that the pig can do its own harvesting there is a saving of 50 per cent on the cost of each pound of meat produced from an acre of ground where the pig does the harvesting.

It is seldom practicable to produce pork at the least cost by having the pigs harvest all of its feed, but to the extent that the pig can do the harvesting satisfactorily it is decidedly profitable to let the pig do it. Pasture grass to the extent of one-half the daily feed is probably one of the cheapest class of pork making material. Next to this comes any of the cereal crops—such as rye, wheat, barley, oats, peas, or corn, to be hogged off.

The former, who will arrange such a system of cropping as will enable him to hog off the various crops at the right season, can very materially lessen the cost of pork production. The best permament hog pasture is a combination of grasses and clovers, including alfalfa. Alfalfa alone is not satisfactory or economic hog pasture. Winter rye will furnish the earliest satisfactory feed for a season, and if there is no permanent grass and clover pasture then the rye should be supplemented by seeding early, on well prepared ground, a mixture of spring grains seeded very heavily, say 100 pounds per acre. This may include spring wheat, spring rye, barley, oats and three or four pounds of sorghum, kaffir, milo maize, or federetta. If the pasture is divided into about four separate lots so that the pigs may be changed to a new plat each week, which will give each plat three weeks rest to one week's pasturing, the same area of land will carry satisfactorily twice the number of pigs.

The earliest annual crop with which to supplement the pasture is peas and oats. To grow the peas and oats to the best advantage, manure the ground in the fall and disc, mixing in the manure well with the surface soil. The ground may be fall plowed, or plowed as early in the spring as it is dry enough to crumble from the mould board. Oisc or pack with a Campbell subsurface packer, and drill in the peas 3½ to 4 inches deep, 100 pounds per acre, then, one week after, seed 40 pounds of oats per acre half as deep as the peas.

Enough peas and oats should be seeded to take care of the pigs until the winter wheat is in the dough. If the winter wheat then is supplemented by an equal area of spring wheat they can ordinarily be kept on the wheat for four or five weeks.

March farrowed pigs that have had a light grain ration each day in addition to the pasture, will be in condition to make very rapid gains and will, in fact, make more pounds of meat per acre from each acre of wheat hogged off at this time of year than they would be able to do from the same amount of wheat harvested, threshed, rolled and fed in the most approved manner. When the wheat has become fully ripened and hardened, they could still be allowed to get a part of their daily food from the ripe wheat, but, if this is supplemented with green corn, the gain will be much more rapid than it would from the wheat alone, and the earlier varieties of corn will be in the roasting-ear stage by the time the wheat has begun to hargen.

Where land is high priced and the labor is available, the corn may be cut and fed in the wheat field or pasture lot, but it will be found that, until the corn is well hardened, the pigs will make more meat from each acre of corn, if fed to them stalks and all or allowed to hog it down, than they will from the same area of corn harvested and fed dry.

Barley, allowed to stand in the field without harvesting, will produce more pounds of pork to the acre during the fall and winter if the pigs do their own harvesting, than will the same amount of barley threshed, rolled, and fed in the house or feed lot.

Ordinarily it will be found advantageous to give the pigs every evening a light feed of some other kind of feed than that which is being hogged-off, for it is a well recognized fact that, other things being equal, the greater variety in the ration the better will be the results from each pound of feed fed.

I, in hogging-off any kind of crop, portable fence is used and only so much of the area uncovered at a time as the pigs can clean up in three or four days, there will be less waste and better gains from the same area than where they are allowed to run over the whole field. The manner however, in which the hogging-off is done must depend in a great measure upon the location of the farm, the fencing, labor, water and other factors that must be considered, but it has been demonstrated beyond the possibility of a doubt that, up to the extent that the pigs do their own harvesting, the cost of producing the meat is reduced about one-half.—C. L. Smith, Agriculturist O-W. R. & N. Company, Portland.

Another record for butterfat production in the Holstein senior 4-year class of the division covering tests begun not less than 240 days from freshing; this time by Lucille Jolie Pontiac 14478, she having produced in seven consecutive days 19.148 pounds of fat from 463.1 pounds of milk. She is owned in Ohio, and gives promise of becoming a heavier producer later on.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Money divided according to Rule 4.

Money divided 50, 25, 15 and 10 per cent. Summary money 75 and 25 per cent.

Famous Spokane Derby and World's Championship Relay Races will be given this year. Special folder concerning running races sent on application.

Our program will be so arranged that races held at Walla Walla on Monday will be given by us on Thursday, and so on.

The Walla Walla Fair Association together with this Association will do everything to arrange for cars and service on the part of the railroad companies, so there will be no delay in getting horses to Spokane in plenty of time.

Third Edition Within One Year of Publication.

CARE AND TRAINING OF TROTTERS AND PACERS

NEVER before in the history of the publishing world has a horse book gone into a third edition within one year of publication. Yet the explanation is simple—the book fills a long-felt want. Never before has this subject been treated in a distinct manner. It has been handled in connection with autobiographies of trainers, but such works are out of print or out of date, for they were published 20 years or more ago. Conditions and methods have changed since then, and former treatises are just as much out of date as the high-wheel sulkies then in vogue.

"Care and Training of Trotters and Pacers" is as modern as a 42-centimeter gun. It does not contain the ideas of one man, but of 100 of the leading horsemen of the day, including Thomas W. Murphy, Walter R. Cox, and Edward F. Geers. These ideas were converted into book form by two prominent American turf journalists.

This book enables anyone to do his own caretaking and training until it is time to send the colt to a professional trainer, or the owner can train and race the colt himself. The treatise covers the details of a colt's life from the moment it is foaled until after its first year's campaign. The facts are clearly presented. Nothing is left to guess work. The language is lucid. Both theoretical and practical views are outlined and compared. The instructions are concise and easily understood. The work contains no advertisements—it is not a catch-penny publication that looks big in the advertisement but proves disappointing when received.

Many professional trainers have purchased the book and have found it interesting. Despite the war, over 300 copies have been sold in Europe and Australia.

Price $1.00 postpaid. Cloth, illustrated, 176 pages, 5x7 inches.

1915 WINRACE —and— ELIGIBILITY BOOK

The National Trotting Association Winrace and Eligibility Book for 1915 is now ready for delivery. It is a work of 858 pages, bound in cloth and contains official reports of all races and time record meetings held by members of the National and American Trotting Associations as well as copies of all special reports received by the two Associations, and all reports of non-association meetings which appeared in the columns of the turf and daily papers in 1914 as well as an index giving the starts made by each horse. In addition to this, it also contains an Eligibility List which presents the names of all live horses that acquired records or winraces in 1912, 1913 and 1914. When a winrace was made over a mile track it is designated by the letter (m) and if a horse also has a winrace over a half mile track within the four seconds limit fixed by the rule, it is also given and marked (½m).

Last year after the new eligibility rule was adopted, the National Trotting Association issued a Winrace and Eligibility Book, which covered 1912 and 1913. It assisted materially in the application of the new rule, but members and horse owners were frequently in doubt as to whether a horse was entitled to a time allowance. This resulted in a very voluminous correspondence and in order to obviate it in 1915, the present book has been compiled and issued as approved by the President under an order of the Board of Review.

In the matter of time allowance, a horse with a winrace is allowed one second for each year, if raced, in which he fails to equal or reduce his record or win a race, providing same is claimed by the nominator when making the entry. If a horse was not raced in 1914, he is not entitled to a time allowance and a reference to the index in this book will show whether he was raced or not, while by referring to the summaries, it can be determined whether he equaled or reduced his record or won a race. Also in order to give all the information possible, the reports of meetings contain all races at half mile heats as well as at mile.

This book presents reports of 1,400 meetings at which 12,673 horses started in 8,730 races and 939 performances against time, for which the premiums amounted to $3,228,617.82, while the Eligibility List presents the names of over 14,000 horses.

The 1915 Winrace and Eligibility Book will be sent postage prepaid to any address for $2.00 by

Sixth day Relay Race.

CONDITIONS:

Five per cent to enter and 5% from money winners.

All races, except the One-mile Handicap Dash close August 13, 1915. Entrance fee, 5% of purse, 5% deducted from money winners.

One-mile Handicap Dash for Trotters and Pacers, handicap distances to be announced by the judges at 1:30 o'clock on the day of the race; standing start from pistol shot. Entries close September 14. Five per cent to enter and 5% from money winners.

The 2:08 Pace, Free-for-all Pace, 2:12 Trot, and 3-minute Trot or Pace are three-in-five, no race longer than five heats and money not decided before the fifth heat to be accorded on summary at the end of the fifth heat.

All other races are three heats, money divided: 30% to first heat, 30% to second heat, 30% to third heat and 10% to first and second horses according to rank in summary.

Should two or more horses be tied for the first place after the third heat, such horses only shall contest a fourth heat and the money divided between the first and second horses, according to rank in summary at the termination of this heat. Only winner of the race to get record.

These races will be governed by general conditions as published in last stake book, as nearly as possible.

The Board reserves right to declare any race off.

Money divided 50, 25, 15 and 10 per cent. Summary money, 75 and 25 per cent.

All races mile heats.

For conditions of relay and any other information address

W. AL. JONES, Secretary and Manager, Salem, Oregon.

INFLAMED, BOWED TENDONS

are quickly cooled, soothed and strengthened with ABSORBINE. It is powerfully penetrating and efficient, but does not blister or cause any inconvenience, and horse can be used.

ABSORBINE

is used by successful trainers, in developing fast, high-class race horses, getting them to the races fit and ready and keeping them sound and strong throughout the season. They require a dependable, efficient liniment—one that does its work well, in a mild soothing manner, and which, when used as a leg brace or wash, will stop inflammation and keep out the soreness from the strained, fatigued muscles, so that there will be no stiffness or "tying up" after a hard work-out or race.

ABSORBINE, used full strength when needed, and diluted for a wash or brace, helps the horse stay strong and win a race that otherwise might have been lost.

ABSORBINE reduces bog spavins, thoroughpins, wind puffs, shoe boils and similar swellings and soft bunches; allays pain and inflammation; stops lameness quickly.

SEND FOR FREE HORSE BOOK G

ABSORBINE, $2.00 a bottle at druggists or postpaid.

SAVE-THE-HORSE

PROVES ITS WORTH

These show why the drvggists say: "They con again for Save-The-Horse"

J. H. Cail, 55 William St., Portland, Maine, Jan. 11, 1915, writes: Troy Shemical Co., Binghamton, N. Y.—In Octobe purchased through Riker-Jayns—druggists, a bottle of Save-The-Horse for driving horse Dan Sox. Most of my acquaintances laughed and said there no cure.

He had a Blood spavin and was dead lame. He was never trained bu the best road horse in Portland.

I started using Save-The-Horse and in five weeks he was all over the la ness. He goes as sound as he ever did in his life and, since November, I h been working him every day. He can step just as fast as ever, not one n stiff in any way. I have since cured a cockle on a work horse of two ye standing.

A friend of mine has a valuable trotting mare that last summer had large windpuffs come on behind. He used ——— and had his horse in the b six weeks; it did no good; ½ bottle of Save-Tthe-Horse cured her entir You are at liberty to use this letter if you want to. I cannot say too much your medecine.

SIDE BONES AND WINDPUFFS

H. C. Alexander, Buckhannon, W. Va., R. No. 4, Apr. 1, '15, writes: Troy Chemical Co., Binghamton, N. Y. Perhaps you think I was not pleased with your medicine but I am. It cured my horse of a bad case of Side Bone and has taken off two windpuffs on same horse. Think that Save-The-Horse is all you recommend it to be.

WHY THEY HAVE FAITH

Wm. H. Allen of Holtzworth Br Livery, Gettysburg, Jan. 6, '15, writ Troy Chemical Co., Binghamton, N I have been in the livery business years and used your remedy splints, spavins, ringbones and m every kind of lameness, and it has ways been successful. But now I h a case that puzzles me although I h it located. Though I would ask y advice, * * *, etc.

Throughout the whole World Save-The-Horse has stood up and "MADE GOOD" Under Every Test.

Save-the-Horse Does Not Blister
Does Not Discolor or Destroy the Hair Nor Leave a Scar
Horse works as usual.
THE RESULT IS PERMANENT.

$5.00 Every bottle is sold with a binding contract to refu money or cure any case of BONE and BOG SPAV THOROUGHPIN, RINGBONE (except low), CUR SPLINT, CAPPED HOCK, WINDPUFF, SHOE BO BROKEN DOWN, INJURED TENDON and OTH LAMENESS.

RKER GUN WINS PACIFIC COAST HANDICAP!!

look

lead

Remember

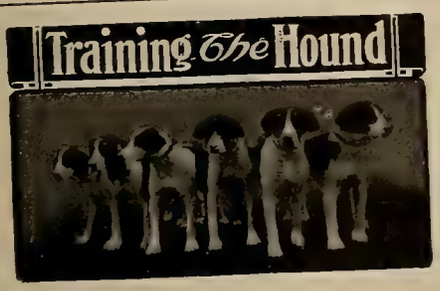
Mr. Henry Pfirrman at 18 yds. scored 98x100 targets. Mr. J. Foster Couts Jr. at 21 yds. scored 98x100 targets.. On the first shoot-off both contestants scored 20 straight, and on second attempt Mr. Henry Pfirrman won, landing the much coveted prize.

In the double target event, shooting at 25 pairs, Mr. J. Foster Couts Jr. scored 48x50, winning first; Mr. Tony Prior scored 47x50, winning second. By scoring 341x350 targets at 16 yards and 279 out of 300 at 21 yards, Mr. Guy Holohan was high on all single targets for entire program.

All of these contestants shot
34 INCH BARREL PARKER GUNS
In 1914 Mr. Pete O'Brien at Portland won the Pacific Coast Handicap with his "Old Reliable" Parker, and the Grand American Handicap has been won 9 times out of 25 offers with same make of gun.

For further particulars relating to guns of gauges from 28 to 8, address Parker Bros., Meriden, Conn; New York Salesroom, 32 Warren St.; or A. W. Du Bray, Resident Agent, San Francisco, Cal., P. O. Box 102.

Makes Them Sound **SMITH'S WONDER WORKER** **Keeps Them Sound**



Allays fever and inflammation at once, this must be done to effect a cure. UNEXCELLED AS A REMEDY for bone and bog spavins, curbs, splints, ringbones, capped hocks, shoe boils, wind puffs, thoroughpins and bunches of all kinds, bowed, strained and ruptured tendons, shoulder, hip and stifle lameness, weak joints, sweeny, cording up, throat trouble and rheumatism. Relieves pains and soreness without loss of hair or a day's let up. As a leg and body wash it has no equal, invigorates and restores the distressed horse between heats and after hard workouts.

Price $2.00 per bottle, prepaid on receipt of price. $16.00 per doz.; $10.00 per gal.

W. K. SMITH & CO., Tiffin, Ohio.

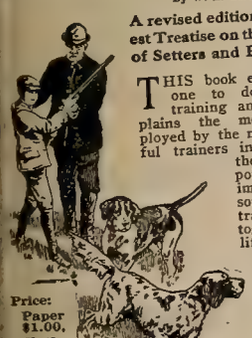
V. E. DETELS, Pleasanton Cal., Distributing Agent, for the Pacific Coast.

A Practical Treatise on the Training of Hounds

Foxhounds Beagles and Coonhounds

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; cloth, $1.50, postpaid.

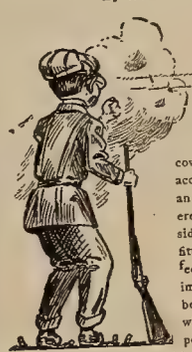
BREEDER AND SPORTSMAN, 366 PACIFIC BLDG. SAN FRANCISCO.

MODERN BREAKING

By W. A. BRUETTE

A revised edition of the latest Treatise on the Training of Setters and Pointers.

THIS book enables anyone to do his own training and fully explains the methods employed by the most successful trainers in developing the setter and pointer. The important lessons are illustrated by photographs from life; nothing is left to guesswork. The entire subject is covered, from the selection, raising and development of puppies to the conditioning of dogs and their handling in the field. The amateur is told, in lucid language, how to make a dog a high-headed, stylish worker, stanch on his points, steady to shot and wing, and a prompt, tender retriever; all of this is accomplished by simple methods, some of them never before given to the public. The instructions for correcting the faults of bird dogs and keeping them up to their training are concise and easily understood. Every man who owns a bird dog or shoots in the field should read this book.



Price: Paper $1.00. Cloth $1.50.

GUNCRAFT

By W. A. Bruette

A modern treatise on guns, gun fitting, ammunition, wing and trap shooting.

The theoretical side of the subject has been covered with a scientific accuracy which makes it an up-to-date book of reference, and the practical side of wing shooting, gun fitting, the master eye, defects in vision and other important questions have been treated in a way that will enable either the expert or the amateur to determine if he is shooting with a gun that fits him and how to decide upon one that does. It will enable him to ascertain why he misses some shots and is successful with others. The secrets of success in trap shooting, as well as the peculiarities in flight of the quail, the jacksnipe, the woodcock, the ruffed grouse, and the duck family, are illustrated by drawings and described in a way that will facilitate the amateur in mastering the art of wing shooting.

Cartridge board cover, $1.00; Cloth, $1.50

Is Your Brother a Shooter?

A WAVE of enthusiasm in restoring American prestige with the gun is sweeping the country.

Shooting is virile sport with a strong appeal to that inherited protective instinct that made our forefathers the greatest marksmen in the world.

The best place to learn to shoot is at a trap-shooting club, but novices shy at the idea of making a start in the company of a bunch of experienced shots. To satisfy the demand for an organized arrangement for beginners, we planned a

NATIONAL BEGINNERS DAY SHOOT

at which your inexperienced brother, son, wife, daughter, or friend may learn in company with various other beginners.

Briefly, the plan provides two trophies—

A FOB FOR MEN, A SPOON FOR WOMEN

The bronze fob illustrated at the right is for the best score made by a beginner, man or woman, at each of these beginners' shoots. The sterling silver Nemours teaspoon is for each woman, beginner or experienced, who makes the best score at each of these shoots.

BEST HUNDRED CLUBS GET CUPS

A handsome bronze cup trophy will be given to each of the hundred clubs having the greatest number of beginners contesting in these shoots.

Any club may hold a shoot any day or days in August.

Write at once for full details and conditions.

LET EVERY MEMBER GET A MEMBER

Get every member of your club to pledge himself to bring at least one beginner. Here is your chance to double the membership of your club and do a real service for your brother, son, wife, daughter, or friend.

Get the details quickly from

Randall Scores Double Victory in Maine

E. A. RANDALL
Maine State
Champion

E. A. RANDALL, of Portland, ran away from the field for the honors of the Maine State Shoot. He not only won the State Championship with 99 x 100, but made his victory more complete by winning the High General Average of the tournament, scoring 390 x 400. Throughout the meet, Mr. Randall shot Remington-UMC Arrow Steel Lined Shells.

Portland Won the Interstate Team Race

The Portland Team—E. A. Randall, S. B. Adams, G. A. Blanchard, W. D. Hinds and O. P. Weymouth,—all shooting Remington-UMC Nitro Club and Arrow shells, carried off the honors in the Interstate Team Match with a score of 473 x 500.

A feature of the meet was Randall's fine work the second day. He broke 199 of 200 birds and won easily from the rest of the field.

For the best results at traps and afield, shoot the Red Ball Brand—the "Winning Combination."

A BROADSIDE FROM THE ATLANTIC SQUADRON

Some months ago, shortly after the sale of Don Pronto 2:02¼ to his present owner, Dr. R. C. Simpson of Armidale, N. S. W., the American Horse Breeder commented upon the improvement in the breed of Australian trotters which should result from the importation and use in the stud of horses of his calibre, taking advantage of the opportunity to call attention to the prominence of the blood of horses that paced in the veins of many fast trotters. No sooner had the remarks gained circulation than they became the cause of the "pacing blood in the trotter" controversy, the Horse Review being especially vehement, after its usual fashion, in belittling the value of the blood of such horses in the production of trotting speed. In the light of the more than positive language used by the Review at that time the following "appreciation" from the Horse Breeder is entertaining and enlightening:

Facts Worth the Telling.

Despite the raucous and hostile cries of those who, in the columns of turf journals and elsewhere, decry the use of pacing mares, or mares by pacers as fit mates for trotting stallions of the best class, we deem it an imperative and a pleasant duty to continue pointing out such facts in the matter as have a news interest.

We have dwelt somewhat insistently on the case of Great Spirit 2:11¾, who took a 2:20 pacing record before beating 2:30 at the trot, she being the dam of Native Spirit (2) 2:09¾, and Sweet Spirit (3) 2:09½, because she was in a class by herself as the only mare that had produced two trotters to take records of 2:10 or better at three years of age or under. "Merely the exception that proves the rule," say those who will not admit that any good may come out of pacerdom. But now we have the spectacle of Nervolo Belle, a 2:11 pacing mare, whose sire and grandsire are members of the 2:10 pacing list, giving the turf the fastest two-year-old colt, and what seems likely to be the fastest two-year-old filly, in Peter Volo (2) 2:04½ and Volga, public trial 2:12, and who unquestionably is up to a 2:10 mile right now.

"Keeping everlastingly at it," is a slogan long used to advantage in business affairs, and, while the Breeder realizes that repetition of even a great truth may be overdone, the recent performances of Volga furnish a fitting background for the display of a fact that breeders should keep in mind. In the female line, the blood of horses that pace has done wonders in the speed production line, and is more prominent by its deeds today than ever before. It is possible—but not probable—that Nervolo Belle and Great Spirit are freaks in the brood mare line, but how about the champion trotter Nancy Hanks 2:04 (a natural pacer), dam of Admiral Dewey 2:04¾; or Extasy (champion two-year-old race pacer, 2:10½), dam of Lord Dewey 2:03¾; or the hoppled pacer Sarah W. 2:18¼, dam of Joan 2:04¼; or——

But what's the use! Enough is a feast, and satiety produces a most uncomfortable feeling. When the present season ends we shall, no doubt, be able to set before our readers a fresh dish of appetizing facts regarding pacing mares (or pacing-bred mares) as producers of extreme speed at the trot, the same to be eaten with gusto or shoved aside with a snort of disgust, as the mental attitude of the reader may dictate.

But it is our plain duty, as a provider of facts, to keep the menu up to the standard, and no detail of that work will be neglected.

Last winter a Chicago contemporary indulged in a series of spasms of the most violent sort because the Breeder, in calling attention to the fact that a lot of topnotch trotters had pacers for their dams, or were from mares whose sires were pacers, laid particular stress on the case of Peter Volo, a triple colt champion.

And yet in a recent issue of the Chicago journal we find the following eulogistic remarks concerning the dam of Peter Volo, she now being again in the limelight through the phenomenal speed displayed by her two-year-old daughter, Volga, sister to Peter:

"She is already the dam of three, and her breeding shows that, while Volga and Peter Volo may have a dam by a pacer, she might be expected, both on breeding and self ability, to produce champions as she has."

We are charmed to welcome to the circle of intelligent folk, who are bright enough to recognize merit in pacing mares when they have that article on tap, and fair enough to disseminate the truth, the associate editor of the Chicago publication who wrote the above.

Still, we opine the editor—that is to say, the head editor—was on a vacation when the issue of the paper containing that paragraph went to press. "She might be expected, both on breeding and self ability, to produce champions, as she has," is putting the matter even more strongly than those who love the pacer for what he has done would have deemed wise.

Still, there is no limit to the fervor of a new convert, nor any way, save casting him into a dungeon, to prevent his declaring the truth as he sees it.

CLEARING UP THE TOM PATCH RECORD.

Last week we made mention of the movement on foot to have Tom Patch's Youngstown record established as 2:08¾, expressing our doubts as to the strict propriety of such action and laying considerable stress upon our belief that the timers were guilty of either fraud or incompetence. Later advices from the east do much toward putting the entire matter in a much better light, though we are still inclined to the theory that the timers were more or less "incompetent," as the petition for the change in record is based upon the claim that two watches were wrong—and a man with a suspicious watch is not a competent timer, by any means.

On the statement of George Dietrich, who gave the meeting, one watch caught the mile in 2:08¾ and the other two in 2:10¼, the latter time being recorded as correct. Almost immediately, however, Mr. Dietrich was approached by several gentlemen who had timed the mile from 2:08¾ to 2:08, and who wanted to know the reason it was not so announced. Investigation was made at once and the two watches, by test and comparison with others, were deemed incorrect and announcement to that effect made public. No authority existed for changing the figures at that time, however, and until acted upon by the board of appeals of the American Trotting Association it remains as first announced—2:10¼. We were wrong, apparently, in stating that the movement to correct the record was started after Tom Patch's death, and we are really glad to know this not to be the case, as it removes the only taint that could attach itself to the Youngstown meeting.

THAT "RACING WEATHER."

Now that the Grand and Great Western Circuit and other central western meetings are being rained out so pleasingly (?) we wonder if among those present there are not several horsemen who look back enviously to that June meeting here at San Francisco, when from the fifth to the nineteenth every race that filled was pulled off on schedule time? By no means do we mean to insinuate that it was perfect "racing weather," but it certainly beat shipping around without getting a start, or having to race till Saturday night and then beating it for another town, to begin Monday.

THAT THIRD HEAT IN THE OHIO AS OTHERS SAW IT.

In the final, McMahon went into the lead at the first turn and set a rather slow clip, being at the three quarters in 1:37¾. Rounding the turn, he pulled to the right carrying both Peter McCormick and Worthy Prince wide and permitting Murphy to come through the opening along the rail, yet despite the fact that the favorite was given this great advantage and his opposition badly handicapped, Peter Scott was out to his last ounce when the wire was reached. While the $30,000 proposition was awarded a victory it was not the kind which appealed to lovers of good clean sport. The judges withheld their decision for some little time, but we are pleased to state that one of the officials did not agree with the "verdict" handed out.—American Sportsman.

It is a matter of deep regret that the Ohio stake, the M. & M., preliminary as some horsemen choose to call it, was marred by unfair tactics on the part of Driver McMahon for the race left a doubt in the minds of many. That doubt is the real class of Peter Scott, the $30,000 horse about which there was so much discussion during the winter. In all fairness, I must say, that single handed and alone I do not believe that Peter Scott can beat that grand going half-brother of his, Peter McCormick in the Shuler stable. It took all the energy Peter Scott had to win the first heat, Peter McCormick beat him handily in the second and would have beaten him in the third had not McMahon resorted to the "helping" that caused so much unfavorable comment.—Horse World.

But in the second round Shuler, with Peter McCormick, shot to the front and they never got to him, the decision going to the Indianapolis trotter in 2:05½, the fastest heat of the race. The big stallion now looked to have the best of the argument, but the third heat, which, by the way, was a bit unsatisfactory to a good many, found Peter Scott first at the wire and the race was his. In this heat McMahon shot to the front with King Clansman and Murphy dropped in behind with his charge. Shuler had Peter McCormick lapped on the leader at the upper turn and looked dangerous when McMahon drove wide, and Peter Scott came through at the pole. Shuler lodged a complaint with the judges, claiming that he had been carried wide by McMahon, but the gentlemen in the stand, after a consultation with the driver from Libertyville, decided that there was no wrong doing.

The decision left rather a bad taste in the mouths of the Peter McCormick followers as the black horse showed in the second heat that he possessed as much class as any of the stake trotters.—Western Horseman.

There was a disposition to attribute Scott's loss of the second heat to the fact that Murphy was a bit over-confident and thus had timed his drive too late, so the final found him still first choice at about even money. As matters transpired, Scott was favored in all respects in the decider, but for which the race might not have been his. He drew the pole, but Dick McMahon, taking King Clansman to the front, gave Murphy a nice opportunity to trail—a way of racing which he likes so well. Meantime, McCormick had received a bad send-off and was cut off before reaching the turn; also he made a short break at the quarter, and these handicaps contributed to his defeat. Clansman led to the three-quarters and appeared to have a fine chance to win the heat, but just before reaching the stretch McMahon pulled him wide, thus enabling Murphy to come through at the pole. Scott struggled gamely, but it was evident that he was a tired horse, and he beat Clansman a neck only in 2:07¾, both being whipped out. McCormick, on the other hand, had a lot left, as evidenced by the manner in which he finished. Despite all the ill-luck which he had experienced, he was trotting straight and true and fast overhauling the leaders near home, but was too late to make use of his speed and strength.—Horse Review.

Peter Scott's victory was discounted because he had some help in the deciding heat. King Clansman shot to the front, Murphy trailed to the head of the stretch, King Clansman came into the stretch in second position, Peter Scott went through at the pole and outrushed King Clansman in the stretch. Peter Scott might have won without the assistance but his victory would have been more impressive had he done so.—Horseman.

Fast Miles Feature of Charity Matinee

Secretary Charley Paine always has the track at Agricultural Park in Sacramento in shape for fast stepping with no bad after effects when racing time rolls around, and last Sunday no exception was taken from the established custom, as the track was both fast and safe and a number of the horses starting in the afternoon's events went the best miles of their careers. The fastest mile of the day was 2:07¼ and the slowest 2:16, the average time of the thirteen heats being just a shade slower than 2:11½—a showing that is hard to beat at a matinee in any locality.

Right from the jump the contests were warm. Eight pacers faced Starter Frank Wright in the first event, Aerolite Jr. having been added to the entry list after the programs had been printed. Seeing that it was Sunday and feeling that they should do something appropriate the judges proceeded to back up the scriptural admonition to the effect that the last shall be first and the first shall be last by awarding Aerolite the pole, Shorty Roberts taking the field away sizzling. Moving into the back stretch Jim Donnelley took the lead but broke at the half. The Fool and Victor Pointer cutting out the pace around the turn, with Aerolite third in on the pole. After straightening for the wire, Roberts found an open place in the middle of the track and came through for a handy win from the Oroville pacer and Victor Pointer. Pointer Belle, who would have been played favorite if any machines or pool selling had been in evidence, threw down her friends from home by coming in a bad last and failing to figure in future heats. In the second heat Aerolite got away a bit back and King Pointer rushed to the front and was never headed, though hard pressed by Victor Pointer; the last heat was a "pipe" for the big gelding and he made every post a winning one.

The field for the free-for-all trot was almost as large as that for the first event, and one of its most pleasing features was the improvement in behavior shown by John Mack, the Illinois gelding purchased after the exposition meeting by Harry Cowell. At the last matinee at the P.-P. I. E. course this lad indulged in various tantrums and showed no especial desire to trot, but he was much better in every way Sunday and won both heats of the free-for-all in time better than his record in professional company. St. Patrick drew the pole and the bunch was slow in getting away, Birdeye breaking just after the word was finally given, and John Mack and Columbia T. going quickly to the front. Down the back stretch the Bon Guy mare made a break that cost her her position, Muggins going into place around the turn and giving John Mack a real challenge in the stretch, Walter Tryon landing the Cowell entry a winner with Muggins' nose at his shoulder. Breaks by Birdeye, Muggins and Moko Hall spoiled their chances in the second heat, each one losing an advantageous position at the critical moment, and St. Patrick, well back in the early portion of the mile, finished second, John Mack going the route in 2:11 flat. John occasionally showed that a portable turntable would be a handy thing for his driver to have about his clothes at times, but he never broke a trot and attended strictly to business after getting away.

The rich and juicy peach of the afternoon's program was the Class A pace, with Bondalean, George Woodward, Bradmont and W. J. K., the latter having been shifted to that event from the free-for-all. Owner Charley Silva had the mount behind the great three-year-old son of The Bondsman and Katalina; Harry Cowell piloted his old favorite; Tim Sexton, after a temporary retirement of some weeks, came up from Oakland to drive Bradmont, and the "Three Bill" combination had its regular teamster, Will Smith. Bradmont drew the pole, with Bondalean in second position, Tim going away in the lead until past the half, with Silva right with him, W. J. K. gaining several yards down the back stretch by a fast move down the outside of the bunch. Bondalean led around the turn and well up the stretch but Smith brought W. J. K. with a whirlwind rush that landed him winner by half a length in 2:07½, a wonderful performance for both horses—one an aged fellow that had never shown so well by some seconds and the other a three-year-old, both in amateur hands.

Bondalean beat the bunch into the turn in the second heat, with George Woodward lapped with him, the pair racing that way throughout the mile. Down the back stretch, nearing the half, Smith "started through" with W. J. K., but the hole was too small when he got there and when taken back the big pacer left his feet and lost too much ground to make up. In the home stretch Silva left enough room for a passage on the pole and Bradmont made for it in one of his customary sturdy finishes, but broke when on practically even terms with the leaders. Both teamsters were "doing their durndest," and old George Woodward's nose was only inches short of his younger rival's when they flashed under the wire in 2:10½.

For the third trial Starter Wright gave them a perfect send-off, Bondalean going out for an open lead clear around into the home stretch, with Woodward second and W. J. K. back a ways. In the stretch Smith leveled with the Dexter Prince lad and the way he responded was worth seeing, his long strides landing him winner by a neck in 2:10½, with Silva's colt game to the last. The big fellow's rush was just naturally a little too fast, and "post mortem" ideas agree that if Smith hadn't gotten in bad in the second heat he could have stepped that mile not far from 2:08. Leaving out all ifs and ands it was a great little old horse race.

Teddy Bear won the free-for-all pace in straight heats by reason of pacing faultlessly while Vera Hal and Dick W. were both more or less unsteady. The little mare, for some reason, has never been at her best over the Sacramento track, and while Dick W. had more whizz than he has shown at any time this season he broke under the drive in each heat. Teddy won the first trial in 2:09, pulled up, but had to step the second one in 2:07¼ even with Dick making a break, so they were rambling some when the ascension came. Had the San Francisco hope kept his feet the mile would have been below seven, but at any rate Ottinger got the trophy, Silva presenting it to him with his compliments.

For the concluding fireworks there were four starters and three heat winners, which is coming close enough to making it "unanimous" for any ordinary purposes, especially with the non-heat-winner being the contending horse in two of the three heats. Senator H. was picked to win and did so, but only by the narrowest of margins. Joe Kidd and Jack Ginocchio figured that by no hook nor crook could the trophy escape a trip to the Happy Valley strongholds of one or the other of them, but Ed Strain threatened vehemently to include it in his baggage on the return trip to Marysville.

The Senator drew the pole, but Jack quickly went to the front, Lucia S. handicapping herself from the start by breaking just as she left the wire. Down the back stretch Jack blew up and Senator H. and Hamburg Belle both passed him, though he settled well and came on. In the stretch the Senator made a regular old he break and both the Belle and Jack went by him, the former winning by some lengths. Jack again took the lead on the turn in the second heat and the quartet paced all the way well bunched, Senator H. winning by a neck from McDonnell's little black gelding, who stood the gaff gamely and went a nice mile. Senator H. set out to win all the way in the last heat and led a closely bunched field into the stretch, Ed Strain coming strong with Lucia S. and winning from Hanks and his mount in the last few yards, thus bringing to a close the most enjoyable matinee of the season.

Fifteen horses from this city were taken up the river and took part in the racing, while a goodly contingent from here was on deck to "help 'em along," making the trip by boat, train and auto. Secretary Paine made the horses comfortable and provided all conveniences for their trainers and caretakers, and if Frank Ruhstaller and his fellow members of the Sacramento Driving Club overlooked anything in the way of entertainment and refreshments for all comers, no one could notice it. Considering the quality of the racing and the charitable nature of the event the attendance was disappointing. Cut glass trophies went to the winners, with handsome halters and speed-siring whips provided for second and third horses, respectively. Frank Wright did the starting in his usual form, Fred Lauterwasser, Sr., Jimmy Ryan and Billy Roeder occupied the judges' stand, and Millard Sanders and John Gerber testified to the correctness of the time. The details:

Sacramento, Cal., August 1, 1915.

Class C pace:

King Pointer ..... (H. Campodonico)	6	1	1
Aerolite Jr. ..... (R. Roberts)	1	5	5
Victor Pointer ..... (Dan Keating)	3	2	2

Time—2:15½, 2:13, 2:13.

ANSWERS TO CORRESPONDENTS.

Q.—What is the name and address of the owner of By Mack by McKinney? A.—Taken in January, 1910, to Patchen Wilkes Farm, Lexington, Ky.; present location not known here but can probably be obtained by applying to the above establishment.

Q.—What is By Mack's record?. A.—Year Book gives no performer by this name.

Q.—What is Willard Zibble's address? A.—1326 N street, Fresno.

Drink Jackson's Napa Soda.

RECORD MEETING AT SAVAGE.

Savage, Minn., July 30, 1915.—A warm still day and a track lightning fast, contributed the exact conditions which are absolutely necessary for breaking world records, and George Gano 2:02 took advantage of the favorable circumstances by nicking the world's mark for pacing under saddle. The former record of 2:12 made by Kruger in 1907 was reduced a quarter of a second, Gano pacing his mile in 2:11¾. The flashy-going stallion would undoubtedly have set the new record a second or more faster, but the prompter driven by Ed. Hanson choked down on the last turn and fell through the outside fence, Gano being obliged to finish alone. It was a nasty accident and at first Hanson's leg appeared to be broken, but it proved to be only a wrench, though bad enough to lay him up for a couple of weeks. Gano is expected to further reduce the saddle record, as he likes that way of going and is training unusually well this season. Murray Anderson, who is doing all the training at the International Farm this year in the absence of Railey Macey, was the man who trained Gano for the saddle record and finally rode him to victory over the watch.

Anderson uncovered a lot more speed among his pupils and the splendid work of his charges today proved beyond any question of doubt that he is a young man with marked natural ability of the highest order as a trainer and conditioner.

The three-year-old pacer Wood Patch went against his former breeders' record of 2:13½ and finished his mile in 2:10¾. As it was regular workout day and Anderson is getting the colt ready to race, the youngster started again to beat the 2:10¾ mark and reeled off the mile in 2:09½. We think this is the fastest mile by a three-year-old pacer so far this year, and is all the more remarkable on account of Wood Patch being bred and trained in this northern climate.

Gay Patch, four-year-old trotting filly by Dan Patch 1:55, dam Miss International 2:18, by Roy Wilkes, put up another sparkling performance, starting against her recently made record of 2:15¼ and acquiring a new one of 2:11. Just to show it was no fluke and that she is a real racemare, Gay repeated in exactly the same notch. She will surely make another 2:10 trotter this year for the only Dan.

Liberty Patch 2:07¾ reduced that record to 2:07½ and came back with another mile in 2:07¾.

The trotting two-year-old Carlos Patch, full brother to Gay Patch 2:11, slipped into the list with a mile in 2:29. This performance looks very commonplace in comparison to the doings of the others on the program, but furnished a special interest to the spectators when announced that it furnished the one last performer needed to make Dan Patch a century sire. Altogether it was quite a big day at the Savage farm.

Following is a list of the performances:

To beat World Pacing Record of 2:12 Under Saddle with 145 pounds up:
George Gano, b h by Gambetta Wilkes (Anderson) 2:11¾

To beat 2:13½, pacing:
Wood Patch, gr h (3) by Dan Patch....(Anderson) 2:10¾

To beat 2:10¾, pacing:
Wood Patch, gr h (3) by Dan Patch....(Anderson) 2:09½

To beat 2:15¼, trotting:
Gay Patch, b m (4) by Dan Patch.....(Anderson) 2:11

To beat 2:07¾, pacing:
Liberty Patch, b h by Dan Patch.....(Anderson) 2:07½

To beat 2:30¼, trotting:
Carlos Patch, b c (2) by Dan Patch...(Anderson) 2:29

Starter, A. W. McElroy. Representative American Trotting Association, D. W. Thurston. Timers, M. E. Harrison, Charles D. Clinton, J. H. Bogle. Judges, C. T. Linsmayer, Robert G. Watts, W. E. Stanchfield.

CORNING, IOWA.

Bert Jones, one of the well known retail cigar men on Market street, has recently purchased a good green trotter of the third generation of the McKinney family and will break into the matinee game this fall.

SALEM ENTRIES CLOSE NEXT FRIDAY.

Owing to the dearth of racing here at home this eason, quite a number of California stables have ıade entries in the North Pacific Circuit, and the ttention of owners of these and other western tables is most respectfully called to the fact that ntries for the big meeting at Salem close next 'riday, August 13.

The Oregon State Fair has been the scene of some amous contests, and for years has stood as the ıorthwest's foremost meeting for the light harness ıorses. In this "dry year in the horse business" Salem makes no departure from her custom of hang- ng up more money for racing than is offered by her ister organizations, and the program is both varied ınd generous. As prepared by Secretary W. Al Jones .he daily card is as follows, early closing events which filled June first being so designated:

Monday, September 27: Three minute trot, $300, three heats; 2:10 pace, $700, three heats; 2:25 trot, $600, three heats, closed June 1; one mile handicap dash, trot and pace, $500.

Tuesday, September 28: 2:15 trot, $700, three heats; 2:18 pace, $700, three heats, closed June 1; three-year-old trot, $2,000, closed.

Wednesday, September 29: Three-year-old pace, $1,500, closed; 2:30 trot, $500, three heats; 2:08 pace, $2,000, three in five.

Thursday, September 30: 2:20 pace, $700, three heats; 2:12 trot, $2,000, three in five; 2:15 pace, $700, three heats.

Friday, October 1: Free-for-all pace, $700, three in five; 2:20 trot, $700, three heats; 3:00 trot or pace, $300, three in five.

Saturday, October 2: 2:12 pace, $700, three heats; 2:09 trot, $700, three heats; 2:25 pace, $500, three heats, closed June 1.

In addition to these offerings, $1,500 is hung up for the Great Western Relay race, of which a heat will be raced daily, and as California has some of the best relay riders and horses in the west our buckaroo friends will find this prize well worth trying for.

Races designated as three heats are on the every heat a race system, 30 per cent to each heat and 10 per cent awarded to the first and second horse according to rank in the summary, horses tied for first position racing a fourth heat. The three in five races are on the old system but will terminate at the end of the fifth heat.

By all means, include Salem in your campaign, and remember that next Friday is your last day for entering.

TEKAMAH, NEBRASKA.

July 21—2:30 trot, purse $400:

Time—2:21¼, 2:20¼, 2:24¼.

Lee Axworthy Cuts M. and M. Record

Fifth Day at Detroit.

Detroit, Mich., July 30, 1915.—It was in 1889 that the sponsors of light harness racing in this city inaugurated what was destined to become one of the most famous fixtures of the trotting world, the Merchants and Manufacturers' stake, and with but one exception (1896), when it was raced at Cleveland, it has been contested annually over a local track, never failing to be a race of wonderful interest. Won originally by a Michigan bred horse, Hendryx by Dauntless, with the best time 2:18¾, it has drawn year after year the presence of the greatest trotters and drivers of the country. Not until 1893 was 2:15 beaten in the stake, when Johnny Goldsmith and the California mare Siva set the mark at 2:13¾. In 1898 John Kelley with Monroe Salisbury's great four-year-old, Directum Kelley, made the nearest approach to 2:10 to that time by winning the third heat in 2:11¼, and in 1901 another Californian, Eleata, put the famous classic in the 2:10 list by stepping her third and fastest heat in 2:08¾, a record that stood until 1907, when J. D. Springer came across the mountains with Sonoma Girl and cut the figures to 2:06¼. Not until 1914 was this time beaten, when Linda Wrona, winner of only third money, trotted the second heat in 2:05½, the former record having been equaled in the first heat by the unlucky Rythmell, who finished behind the flag the next time out. The names of many famous drivers have appeared in the roster of winners of the M. and M., and tonight we have a new record holder and a newcomer to the ranks of winning drivers—Lee Axworthy 2:04¾ and William J. Andrews, known more widely and much less formally as "Billy."

The M. and M. today was a great contest, with an even dozen starters recruited from the pick of the land and piloted by teamsters of similar caliber. The race throughout was clean cut and the contests of the very sharpest kind, the only regrettable feature of the event being the absence of Ed Geers, the "Grand Old Man of the Sulky" who has piloted six winners to victory in this classic. In the first heat, Andrews took his famous four-year-old out in front all the way, with seven horses coming into the stretch on almost even terms. Gradually Lee and Peter Scott drew away from the balance of the field, however, the youngster battling with his older rival and winning by a head in 2:06¼, Walter Cox and Worthy Prince outfooting the second delegation. Murphy set sail in earnest with his thirty-thousand-dollar trotter in the second heat and led to within a hundred yards of the wire, seemingly safe from attack from Andrews and his colt, who were back in the bunch. About this time Andrews began singing a little song to himself which those who were in hearing distance declared afterwards to resemble greatly that classic ballad of the two-a-day circuits, "You Don't Know Nellie Like I Do," and started to shake off the bunch that encumbered him. One by one they fell behind as Lee's rush lengthened, and in the last few feet the lad nosed out Scott in time that set a new mark for the stake, 2:04¾.

Charley Valentine had been driving Peter McCormick up to this time, but V. L. Shuler thought that he himself had the "key" to Peter a bit better than the Columbus trainer, so took the mount for the third heat. For a time it looked like McCormick, too, as he set the pace to the three-quarters in rapid time, but the big boy was going just a bit too fast and from there in the "trailers" had the legs of the party. Again Murphy and Andrews drew away together, and again went to the wire contesting every inch of the way; again Lee Axworthy's nose was in the clear in 2:04¾—and the M. and M. was over, though it took some time for the crowd to settle.

Tommy Murphy had more trouble on hand in the 2:13 pace, but had better success than in the big trot. Billy Snow and Bingen Pointer were the cause of Thomas' anxiety, as they never let up on the Poughkeepsie pair, Murphy and Ben Locanda, for a moment. Snow was always right there, and the finish of the second heat was so close that the judges waited for the development of a photographic plate before making the decision, the lens showing Bingen Pointer to have won by about as small a margin as was possible.

Ben Whitehead started in to make the 2:18 pace a runaway affair with Pat Carmody, winning the first heat in 2:08½. Old man jinx cut 'em down in the second, however, as Pat made a standstill break at the three-quarters and was distanced, Charley Valentine and the gray mare Altawood (third the first heat) winning that and the succeeding heats without great difficulties.

Colorado Range and Alanzo McDonald, second last week to Bondella and Tommy Murphy at North Randall, had the right of way in the Hotel Wayne Sweepstakes for 2:12 three-year-old trotters, though competition was not lacking. With Andrews giving all his attention to Lee Axworthy, Vance Nuckols had the mount behind the Pastime Stables candidate, Leonor McKinney, and made the Colorado colt trot the opening heat in 2:09½, while Pop Geers came along with Deroche and copped the second in 2:10¼. McDonald had the best of the argument in the final heat, as the John A. McKerron colt only forced him to trot in 2:13½ to win. The summaries:

Detroit, Mich., July 30, 1915.

2:13 pace, purse $1,000:

Ben Locanda, b h by Locanda.....(Murphy) 1 2 1 1
Bingen Pointer, b h by King Bingen..(Snow) 1 2 2 2
*Major Byers, bl g by The Abbe.....(Cox) 4 3 3 4
*Flaxy B. (Cares), Great Onward (Crummer) also started.
Time—2:08½, 2:10½, 2:09¼, 2:10.

*Divide third and fourth money.

M. and M., 2:08 trot, purse $10,000:

Lee Axworthy, b h by Guy Axworthy (Andrews) 1 1 1
Peter Scott, br h by Peter the Great (Murphy) 2 2 2
Worthy Prince, b h by Prince McKinney..(Cox) 3 4 3
King Clansman (McMahon), Peter McCormick (Valentine and Shuler), Bonington (Dickerson), The Duchess (McDonald), Albaloma (Quinn), Reusens (Rodney), Miss Directed (McDevitt), Wilgo (Marvin), Lucile Spier (Shank) also started.
Time—2:06¼, 2:04¾, 2:04¾.

2:18 pace, purse $1,000:

Altawood, gr m by Allenwood.....(Valentine) 3 1 1 1
Prestolite, bl m by Don Varick.....(Geers) 2 3 2 3
Billy Law, bl g by Law King.....(Squires) 4 2 3 2
Pat Carmody, br h by Al Stanley (Whitehead) 1 ds
Time—2:08½, 2:09¼, 2:08¾, 2:09.

Hotel Wayne Sweepstakes for three-year-old trotters eligible to 2:12 class, $600 added:

Colorado Range, b c by Colorado E..(McDonald) 1 2 1
Deroche, ch c by John A. McKerron.....(Geers) 5 1 2
Leonor McKinney, b f by McKinney...(Nuckolls) 2 4 ro
Lillian the Great (McDevitt), General French (Murray), Denali (Cox) also started.
Time—2:09½, 2:10¼, 2:13½.

Last Day at Detroit.

Detroit, July 31—Next to the M. and M., perhaps no race of the meeting attracted more widespread attention prior to its contesting than did the free-for-all pace, raced here this afternoon, as it was to witness the first meeting of the season between Directum I and William, with other cracks among the pacing stars thrown in for good measure. Frank Bogash Jr. was the only one of the original entries that failed to materialize, Ben Whitehead having the mount behind Flower Direct and His Honor, Mayor Shank, making his debut as Anna Bradford's pilot. Last year's contests between William and Directum I were not conclusive as to the actual and absolute superiority of either horse, and while Flower and Anna are both great girls and one of them, at least, a prospective two-minute pacer, the white-hot interest centered in the struggle between the stallions.

It was a real horse race, and laying aside all the ifs and ands and buts that always crop out in the "post mortems," there is little argument tonight that any but the best horse won. Things broke good for William in the start of the first heat and Marvin took him away fairly "boiling," opening up a good lead in the first quarter, the field processioned behind him—Directum I., Flower Direct and Anna Bradford in the order named. Past the half the trailers began creeping up, and at the head of the stretch Directum I. was only half a length to the bad. Under the wizardry of Murphy's reinsmanship he came steadily onward, creeping inch by inch up along William's side until he was on even terms. At the distance he pushed his muzzle to the front for a tiny advantage, and in a thrilling finish showed the way to the wire by a scant neck in 2:00¼, the fastest mile of the year and a new race record for the Detroit track.

The first heat left the wise folks guessing about as much as they were before the race, but in the following ones William demonstrated superior lasting power very decisively. Marvin allowed Murphy to cut out the pace in the second heat and the clip was much easier than that previously cut out by William, the watches showing 1:03 at the half. Here the stepping began, and the clip he had traveled in the first heat told on the eastern horse, William and Flower Direct both passing him, the former winning in 2:02, the last half having been turned in fifty-nine seconds. Murphy was expected to come back strong next time out, but last year's king pin was through. Anna Bradford showed the way to the three-quarters with Flower Direct second, William third, and Directum I. fourth, where he remained. When Marvin took William out for the brush to the wire he whizzed past the mares easily for a win in 2:04, but "the little red horse" had, to all appearances, an elegant sufficiency of fast miles for the time.

Fred Egan and Braden Direct put over a good one in the 2:03 pace, after Earl Jr. had won the first heat in 2:03½, with the Colorado pacer last. In the second heat he came from behind and copped from Earl Jr. and Peter Stevens in 2:02½, winning the third and fourth heats in much the same fashion but slower time. Margaret Druien straight-heated the 2:05 trotters, Rythmell, Star Winter and Joan, without having to trot as fast as at North Randall by nearly three seconds, and "Kentuck" Floyd's good four-year-old, The Eno, made delivery of the 2:16 trot in 2:10¼, 2:09¼ and 2:09¾, Seneca Boy and Glenwood B. splitting second and third money.

The Hotel Pontchartrain stake for 2:12 trotters was a hammer and tongs affair between Lettie Lee, Mirthful, McCloskey and Todd Temple, five heats being trotted from 2:08¼ to 2:10½. The daughter of Moko took the first two, driven out first by Todd Temple and then by Mirthful, McCloskey then coming to life to grab a pair from the girls. McDonald's gelding faded again, however, and Murphy slipped into second money by winning a heat with Mirthful, the best McCloskey got being a cut on third and

fourth money. The details:

Detroit, Mich., July 31, 1915.
Hotel Ponchartrain, 2:12 trot, purse $2,000:
Lettie Lee, b m by Moko.....(White) 1 1 4 2 2
Mirthful, b m by The Star of Patchen....
.....(Murphy) 5 2 2 3 1
*McCoskey, br g by Theodosius (McDonald) 4 5 1 1 4
*Todd Temple, br g by Todd Mac...(Snow) 2 3 3 4 3
Lou Blossom (Childs), Mary Warren (Healey), Brooklyn Hal (Snedecker), June Red (McMahon), Miss Alice McGregor (McAllister), Axtien (Harris) also started.
Time—2:08¼, 2:09¼, 2:08¾, 2:09½, 2:10½.
*Divide third and fourth money.
2:05 trot, purse $1,500:
Margaret Druien, b m by Peter the Great (Cox) 1 1 1
Rythmell, bl m by Rythmic.....(Shank) 2 2 2
Star Winter, b g by Ed Winter.....(McDonald) 4 4 3
Joan (McDevitt) also started.
Time—2:07, 2:09, 2:07¾.
2:16 trot, purse $1,000:
The Eno, ch h by The Native.....(Floyd) 1 1 1
*Seneca Boy, ch g by King Entertainer (Fleming) 2 3 5
*Glenwood B., b g by Ben Burns.....(Purcell) 6 2 2
The Guide (Geers), Director Russell (Snedeker), Tommy Todd (Snow), Empress of Russia (Murray), Precious Cresceus (Stokes), Cacus Star (Hall) also started.
Time—2:10¼, 2:09¼, 2:09¾.
*Divide second and third money.
Free-for-all pace, purse $5,000:
William, b h by Abe J.....(Marvin) 2 1 1
Directum I., ch h by Directum Kelley..(Murphy) 1 3 4
Flower Direct, b m by Direct's Star (Whitehead) 3 2 2
Anna Bradford, bl m by Todd Mac.....(Shank) 4 4 3
Time—2:00¼, 2:02, 2:04.
2:03 pace, purse $1,500:
Braden Direct, bl h by Baron Direct...(Egan) 5 1 1 1
*Earl Jr., gr h by The Earl.....(Cox) 1 2 3 3
*Peter Stevens, b h by Peter the Great....
.....(Snedeker) 2 3 2 2
Pickles (Mott), R. H. Brett (Grady) also started.
Time—2:03½, 2:02½, 2:05½, 2:04½.
*Divide second and third money.

First Day at Kalamazoo.

Kalamazoo, Mich., August 4, 1915.—None of the Grand Circuit meetings of the season have escaped the wrath of the weather man, but Kalamazoo has been the worst sufferer of all. On Monday no effort was made to race, and on Tuesday a sudden shower just as the first field was about to be called caused a second postponement. Today, under conditions that were everything but favorable, Monday's card was raced over a slow track.

Only four starters showed up for the 2:08 pace, Aconite winning in straight heats and without any trouble to speak of, Margot Hal furnishing the best of the competition. The ten-year-old gelding F. A. L. in Curt Gosnell's stable also won in straight heats, the last mile being the only one in which he had much of a contest, Charley Valentine crowding him at the wire with Victor Star.

Pop Geers and St. Frisco routed the talent by taking the United Traction for 2:08 trotters after The Eno, a topheavy favorite, had won the first heat. Floyd's youngster was game and twice came after Pop and landed in second place, but the elderly gentleman and his San Francisco 2:07¾ trotter were too good. Favorites were also rudely handled in the 2:09 trot, which witnessed Lou Jennings' first reversal of form for the season, the daughter of Todd being absolutely no good in the heavy going. Geers and Guy Nella speared the first heat, Lou bringing up the rear, and when Hazel Laing and Billy Andrews lined out the second mile about five seconds faster the favorite was distanced, with Guy Nella a good second. Charley Valentine and Lizzie Brown then took a hand in the proceedings and annexed the succeeding three heats in time that was most excellent, considering the going. The summary:

Kalamazoo, Mich., Aug. 4, 1915.
2:08 pace, purse $1,000:
Aconite, bl h by Aquilin.....(Cox) 1 1 1
Margot Hal, b m by Argot Hal.....(McDonald) 3 2 2
Ben Locanda, b h by Locanda.....(Murphy) 2 3 4
The Climax, bl h by Gov. D. R. Francis (Brennan) 4 4 3
Time—2:09¼, 2:09½, 2:09¼.
Union Traction, 2:08 trot, purse $2,000:
St. Frisco, b h by San Francisco.....(Geers) 2 1 1 1
The Eno, ch h by The Native.....(Floyd) 1 2 4 2
Todd McGregor, ch h by Cochato...(Rodney) 6 4 2 7
McCloskey (McDonald), Miss Directed (McDevitt), Princess Margrave (Hall), Loe Blossom (F. Childs-Cox) also started.
Time—2:12¼, 2:13½, 2:12½, 2:13½.
2:09 trot, purse $1,000:
Lizzie Brown, b m by The Bondsman....
.....(Valentine) 4 4 1 1 1
Guy Nella, br m by Guy Axworthy..(Geers) 1 2 2 7 4
Hazel Laing, ch m by John A. McKerron..
.....(Andrews) 5 1 3 3 3
Bright Axworthy (Murphy), Grand Marshall (Snow), Dago (Grady), Reusens (Rodney), Lou Jennings (Brennan) also started.
Time—2:12¼, 2:09½, 2:09¾, 2:09¼, 2:11½.
2:13 trot, purse $1000:
F. A. L., b g by Anderson Wilkes.....(Gosnell) 1 1 1
Victor Star, b g by Star Simmons....(Valentine) 5 2 2
Nowaday Girl, b m by MacDougall.....(Lasell) 2 5 4
Great Sale (Murphy), John Gwynne (Shuler), Dick Watts (Rodney) also started.
Time—2:13¼, 2:11½, 2:13¼.

And Then It Rained.

Kalamazoo, Mich., August 5—A heavy shower at 2:30 o'clock this afternoon made it necessary to postpone the Grand Circuit harness races until tomorrow.

———o———

Hi Hogoboom, who is planning to make his annual invasion of Oregon as usual this fall, has recently worked the green trotter The Bulletin (2) 2:28½ in 2:17, and his other Palo King trot horse, Honest Boy, a half in 1:05, with a quarter in :31. Marlin, the big pacer, is rounding to after an enforced letup from a slight lameness, and has gone the route this year in 2:09½, free legged. He is especially enthusiastic over a yearling colt by Jim Logan 2:01¾ and out of a Palo King mare, labeling the lad as the best pacer of his age he has yet seen.

SOME ENTRY LISTS—AND OTHERS.

During the course of a season a horse journal receives many entry lists of racing and fair associations, and it is interesting, although not always satisfying, to note the varying degree of completeness and accuracy in them. When it comes to the publication of these lists, or utilization in correcting race summaries, the impression of their quality becomes particularly strong upon the individual commissioned with the job of making "copy" out of them. Sometimes—not often, but sometimes—when the climbing mercury produces a wilting collar and a profuse perspiration said individual is likely to voice his appreciation of some lists he peruses in words that curl and hiss. Usually the slow class events are the most provoking in cases where the owner, secretary, printer, proofreader, and possibly a few other "middle men" have conspired to put on paper weird, unearthly cognomens that should, if ever carried, drive horses to drink or barb wire hopples.

The responsibility for such lists, we believe, rests more with owners than with any of the other parties to the conspiracy, for it is true that owners are extremely negligent in preparing entries. In several instances we recall, the names of performers, through careless writing of entries, have been distorted until, incorporated in official volumes in the revised form, it became impossible to identify the horses with the names originally bestowed by the owners. Perforce, the latter given cognomens were accepted as final.

The reader will readily understand, we think, the difference in identifying the record animals from the recordless ones, for herein the official volume of the Year Book plays its part. For instance, if in the free-for-all pace at Brown's Corners a terrifying combination of characters should appear like this—"Skywenzcs Tzla," a few pulls on the corn-cob pipe, a hurried trip through the index of Mr. Best's latest effort, a glance at the map of the United States and some shifts of the cipher code accomplishes the desired result, and behold, we have Tipperary Tom 2:04¾, ready for publication. Likewise if the class in which "Mnxtoubsyc" is entered seems to betoken that he or she has paraded before grandstands in years gone by, the above operation is repeated (with occasional variations), and our dauntless typewriter digests the unearthly aggregation of letters and makes out of it clearly and plainly "Lad of the Rockies" 2:02½, a sweet going pacer that has faced the starter an hundred times or more, and always got by.

But the green events—yes, the green events, there's the rub! No friendly official volume lends a helping leaf. The compiler of the Year Book, from his official domicile in the Windy City, has never cast an eye on a vast number of so-called names which are distressing the printer, blinding the proofreader, puzzling the reader, and making out of the horse journal man who is over-careful an irredeemable sinner, or a raving madman.

So, with all the good intentions in the world, but lacking greatly in confidence, the scribe tackles the great problem of how "Mhglosxytrnwolds" should be arranged to appear in his paper. There appears to be no precedent established for such cases. No rule is there whether vowels or consonants should lead or the slightest guide for putting a new cognomen on the noble steed that is concealed somewhere underneath the wilderness of the alphabet, which a misguided compositor has gathered carelessly in a convenient corner and fired into the maw of a relentless machine. But a name he must have and it's up to the man at the typewriter keys to provide something more euphonious than the above appears. Then the temperament of the worker shows forth. If, perchance, he should lack the finer instincts, and spend his leisure hours hanging over the back fence arguing with his neighbor over the real truth about the defeat of Jack Johnson, the Thaw case, or why Mrs. Brown went down town and never took her husband along, the wanderings of a depraved mind are sure to be illustrated in his interpretation of the miscellaneous assemblage as "One Round Hogan," "Billy Boozefighter" or others of a par value.

But if the operator of the keys be a man who is versed some in the knowledge of the publicist, he may construct from the same helpless jumble "Grape Juice Bryan the Second," "King Roosevelt," or another of similar tone. Likewise, he who has the artistic sense developed highly may build from the illegible mass which binds the poor animal to the paper, a sweet sounding title, suggesting Christmas chimes, babbling brooks, or a moonlit sea. The possibilities are limitless, but in all cases the nature of the "reconstructor" is indelibly attached.

Thus may the reader, if he desires to while away a few leisure moments, amuse himself with the entry lists and determine the human capabilities and frailties of the man behind the typewriter in the office.

But, the majority of the lists which appear—and blessings on the authors in this world and the next—show much effort on the part of the overworked secretaries. If they have had proper aid from the printers, they are lists not only dependable, but extended in information, with name, sex, color of the animal, and with name and address of owner complete. Each year there is apparently some progress in this respect, and from the abominable creations of a few years back, we trust the near future will produce a condition where it will be the exception for lists to appear with little more than the number of entries incorporated.—Western Horseman.

TRAINING AT NORTH PACIFIC TRACKS.

Centralia-Chehalis.

Quite a little bunch of horses are working at t Southwest Washington fair grounds, half way t tween Centralia and Chehalis, Washington. Wo has jut been done that puts the track in first-cla condition, so it will be fast—as it always is—aga this year. There are always good accommodatio good water and plenty of grass, something not fou at many tracks, and as fair time draws near mo horses are expected.

C. W. Todd, with Tom Gorman in charge, has t old campaigners, Haltamont 2:05¼ and Bonnie A trim 2:12. Both are looking well. They are entere all the way round the circuit.

J. S. Sanford has Indian Hal 2:14¼, owned by Sa Agnew and J. G. Wilson of Centralia, and Halmett by Hal B. The latter is owned by Agnew alone. H has been changed from the trot to the pace and i showing quite a lot of speed, and Indian Hal is stron and going good. Both of these are entered aroun the circuit.

Holton Martin has quite a string. Only one o them is certain to be raced, though the others may Mary W., a green mare by Malcolm, owned by Geo Woods of Satsop, Wash., is entered here and at Elma Wash., and gives promise of "doing things." Marti worked her the other day alongside of Indian Hal an Haltamont, with several watches held on her, makin the mile in 2:27 or better, last half in 1:11, and las quarter in 34½ seconds, on a track five seconds slow

Two mares owned by Arthur Remington, of Olym pia, are in Martin's charge, and both are working very nicely, but probably will not be raced. They ar Floramel, a full sister to Irene 2:19¼, by Martin's Florida, and Alta Zoe, by Zombrook, son of Zombro dam by a son of Altamont.

He also has three of his own horses, Baryta, by Burion, dam by Bay Bird, is a big handsome horse that has made a season. So has his old horse Mar tin's Florida, by Florida M., son of Hamiltonian 10. Both look well and Baryto may enter a late closing race. A four-year-old colt by Martin's Florida, a full brother to Irene, completes the string.

Henry Helman is expected up from Salinas, Cal., in a few days with five or six horses.

There are also a few runners at the track. F. Heavner has Ducal Crown and Sallie Mint, and G. W. Robinson has Alchemist and Lieut. Sawyer. All of these horses raced at Independence and Monmouth.

The free-for-all trot has been re-opened as a late closing event. Col. Woods of Missouri has been employed as starter and everything points toward a successful meet.

Spokane.

We have as many or more horses in training at Spokane this year than ever before, and the track has been in the best possible condition all summer. The weather, of course, has been somewhat against training on account of the rain, but our horses are all in good condition and quite a few of them will get their drivers and owners to the cashier's office after the races.

First on the line is T. A. Huson with a nice pacer, Gazelle Deer, and three nice trotters that are learning to go very well. Next on the list is the Hon. Dan Rice, with Lottie Dishman, that has always been a good consistent race mare and never looked better in her life. On down the line is Dave Young, with Nellie J., two three-year-old pacers by Gyr Falcon, and two other three-year-olds. Next is Eddie Thomas with Truxton King and Peter R., and many trotters will not beat the Peter R. horse in 1915. Next down the line is E. C. Payne with Glenrose, Big Squaw, Teddy Ham, and Jerusha Dillard, all being prepared for the Northwest circuit, and Rastus and Squaw Dillard on the schooling list. Next is John Gordon with Fritzie Ruben and a black gelding out of Umatilla, and John thinks very well of him. The last man down the line is a Mr. Maxwell, with Sister Norte, and a chestnut mare by Sherlock Holmes, and two or three green ones. Mr. Maxwell is a stranger to the Northwest racing fraternity, but seems to know the game.—Rural Spirit.

Drink Jackson's Napa Soda.

NOTES and NEWS

Matinee Sunday at the exposition.

◈◈◈

Lee Axworthy's second and third heats in the M. and M. in 2:04¾ certainly stamp him as a wonderful trotter.

◈◈◈

Miss Perfection won one of the few races pulled off at Davenport for Charley DeRyder, 2:11¼ being the fastest time.

◈◈◈

Ed Geers, much to the disappointment of thousands of friends, failed to have a mount in the M. and M., the Guide not being in shape to start.

◈◈◈

Sam Hoy and Elmo Montgomery moved their training quarters last week from Woodland to Sacramento, where they are holding forth at Agricultural Park.

◈◈◈

Welcome grand old Dan Patch to the ranks of century sires. The one hundredth performer arrived last Friday and is a two-year-old trotter, Carlos Patch (2) 2:29.

◈◈◈

Westerners extend the glad hand to Fred Egan and Braden Direct, the Colorado pair winning a great race Saturday at Detroit. A second heat in 2:02½ is some rambling.

◈◈◈

Four harness races will be staged Wednesday afternoon at the P.-P. I. E. course in connection with the butchers' day celebration. The fields are good and some nice sport is expected.

◈◈◈

Several California stables will ship to the northwest this week or next to take in the North Pacific circuit, winding up at Salem early in October in ample time to pull in here for the fall meeting at the exposition.

◈◈◈

There are persistent rumors down east that the Grand Circuit meeting at Empire City Park will not be given. Similar rumors were current last season concerning the June meeting at the exposition, too, so you can't always tell.

◈◈◈

The ways are all greased for the launching of that good ship "Running Meeting" on August 21 at the exposition track, as Reno will close a few days early in order to allow horses there to be on deck for the opening here as originally planned.

◈◈◈

Colonel Jim Thompson, having manufactured some speed at San Jose and had his fair share of what breeding is being done with L. H. Todhunter's good youngster, Peter McKlyo (3) 2:12½, is back at the old familiar place at Agricultural Park, Sacramento.

◈◈◈

The Great Westerners finally got in a day's racing Thursday at Peoria, only one Californian starting. Charley DeRyder and Madam Mac pulled down second money in the 2:27 pace and the brown mare evidently was pretty good, as Sayde Densmore had to travel one mile in 2:08¼ in order to win.

◈◈◈

George Gano 2:02, with Murray Anderson weighing in at 145 pounds, clipped a quarter of a second from Kruger's saddle record of 2:12 last Friday at Savage, and a further reduction will no doubt be made before the season is over. Eddie Hanson, driving the runner in the flight against the watch, got a nasty fall by reason of his mount choking down and going through the fence, but no permanent injuries resulted.

◈◈◈

Believing that "home" was the most comfortable place for both horses and men during the summer, Budd Doble recently shipped back to Hemet Stock Farm with the stable that has been in training at San Jose since April. The youngsters of the family got away with the greater portion of the money in the exposition stakes for three-year-olds, and will be back for more at the fall meeting, with others for the two-year-old divisions of the classics.

◈◈◈

Though there will be no State Fair this season, Secretary Paine's salary is coming along regularly and C. W. is putting in good hours seeing that the grounds are not only maintained but considerably improved. Buildings are in excellent condition and a new one or so being provided for, while vines and shrubbery have been put out in profusion and the system of well kept lawns considerably extended. Some day California will have a real fair ground.

◈◈◈

C. D. Stevens, who has been making such a favorable impression at Reno as a starter, has been engaged to officiate in a similar capacity at the Golden Gate Thoroughbred Breeders' Association meeting here. Stevens handled the barrier last fall at Phoenix and showed that he knew his business, and he should, as he took all his early lessons from Mars Cassidy. His vocabulary is hardly so startlingly picturesque as Cassidy's, but the results attained are quite similar.

◈◈◈

Kalamazoo and Peoria were both rained out during the early part of the week.

◈◈◈

Through an unfortunate accident, Superintendent Dowling of Woodland Stock Farm recently deemed it advisable to put to death the double producing matron Lauress by Mendocino, one of the most highly regarded mares on the farm. She was the dam of the pacer Laura Rodgers 2:11¼ and the two-year-old trotting filly Sadie Ansel (2) 2:23½, the Considine candidate for this year's stakes. Lauress' 1915 foal, a spunky chestnut stud by Prince Ansel, is being raised "by hand" and is doing famously to date.

◈◈◈

Dick Johnson, who has been at Woodland since April with a few horses belonging to Robert Ogden of Dunnigan, has been making nice progress with the older ones, recently working Alta W. at the trot in 2:22¾ and Gipsey Girl in 2:14 pacing, the former being by Iran Alto out of Yolo Girl by Lynwood W., and the latter by Stanford 2:23½ from a daughter of Alexander Button. Mr. Ogden plans to construct a training track at home this winter, and with any sort of luck at all Dick expects to be ready to go to the races with a few horses next season.

◈◈◈

Since returning home from the exposition Harry Dowling has devoted most of his attention at Woodland to the farm's futurity prospects, and has some good material to work on for both the two- and three-year-old trots. Ruth Ansel has worked in 2:19 with a half in 1:06, while the other three-year-old Yolo King is credited with a mile in 2:23, a half in 1:05 and a quarter in :31¾. Among the two-year-olds Joe Watkins and Jim Hardeman are going good halves and quarters, but the likeliest one is the Prince Ansel—Lauress filly, Sadie Ansel, who has gone the route in 2:21, with a half in 1:07 and quarter in :31. Harry is also handling six yearlings, all trotters and all making nice progress. The Lexington contingent is stepping along, a letter last week stating that Anselot (brother to Lottie Ansel, Prince Lot, etc.) had trotted a half in 1:16 with a quarter in :36½, while Verbena Ansel had tramped the middle distance in 1:12½.

FALLACY OF EARLY COLTS.

"To everything there is a season, and a time to every purpose under the heaven." With the advent of two- and three-year-old stakes, there has arisen a desire to have the foal come as early in the year as possible, believing that the additional strength gained by a month or two of age enables the colt to stand the severe strain of training and racing. Investigation of dates of foaling of our greatest young horses, that is the champion colt performers, would seem to prove that breeders are antagonizing nature in early breeding, and while they may produce size and strength do not produce tissue of champion quality. But one champion colt of the past eight years was foaled before April 1st, and he only two days prior to this date. Evidently the breeding season has been fixed by nature for the greatest benefit of the coming generation, that birth may take place at a time when proper food is plentiful and climatic conditions most acceptable. It is well known that almost all animals, except man, have a stated season for the propagation of their species. It is also highly probable that the primitive man had a breeding season. The spring and summer are the seasons for the amours of birds and many species of fish, while the immense tribe of insects select the finest part of the year.

The breeding season is associated with a stimulus which is manifest by exceptional vigor and bodily conditions, which is demonstrated by the pregnancity of the male and restless activity of the female. It is further demonstrated by hypertrophy of the organs, congestion of the mucous membranes, and the activity of correlated glands. It is evidently the result of definite stimuli, which are partly external and partly internal. The migration of the birds is invariably the result of an increase in the size of the ovaries and testes and when these begin to shrink, after the breeding season is over, they depart much more quickly than when they came.

In the horse the male has no rutting season, therefore is capable of copulation at any time, but the female has only a restricted period which recurs every eighteen days. These periods usually begin in the early spring and continue through the summer but with less intensity and shorter duration, but can be produced at other times by stimulus of food or drugs. But nature does her work with full preparation and at seasonable time perfectly, so the question must arise, if heat produced by external or artificial stimulus will also increase the ovarian metabolism so that there may be follicles present in suffciently mature condition to admit of ovulation, or if ovulation should take place, can an ovule produced under such abnormal conditions, although fertilized by a perfectly normal sperm, be expected to mature an embryo with the highest potentialities of the race?

It has been proven that "heat" and ovulation are not necessarily associated, it frequently requiring the stimulus of coition to cause the egg to be shed, even under normal conditions and when service is had under such forced conditions it is doubtful if ovulation takes place at all. We think this is the chief reason why so few mares get with foal when bred before the seasonable time. And should they produce from the abnormally early service, the egg is too immature to develop the best results. But should a good colt come at an unseasonable time, there is no argument that it would not have been better had nature's course been followed. This would seem to be indicated by the dates of birth of athletes and ball players, as it has been recently found by investigation that the best were born from April to October.

The best colt trotters have been foaled from March 29 to June 2, as the following dates show. Peter Volo, March 29; The Harvester, May 18; Native Bell, April 9; Colorado E., June 1; General Watts, June 1; Justice Brook, June 2; Anna Bradford, May 17. These colts were all champions in races, and their environment must have been perfect from conception. When mated, their sires and dams must have been in that condition, which unrestricted nature alone can impel, and from April to July her best constructive work is done. It is during this period that seeds untouched by the hand of man germinate and reproduce their kind. It is at this time that the greatest growth is made by plant life and the most perfect fruit is formed. Animal life is but the replica of plant life and undomesticated animals following natural instincts reproduce their kind at this season. Can man improve upon nature?—H. M. Jones, in The Horseman.

MODIFICATION OF QUARANTINE BRIGHTENS OUTLOOK AT P.-P. I. E.

The west is hungry for live stock, and now that there have been modifications in the quarantine that has been maintained because of the foot-and-mouth disease, business will be resumed and breeders and dealers can fill their delayed orders.

According to the new bulletin, Arizona, Colorado, Idaho, Nevada, Nebraska, North Dakota, New Mexico, Oregon, South Dakota, Utah, Washington and Wyoming can ship animals into San Francisco accompanied by a certificate of inspection issued by a duly authorized federal or state veterinary inspector and the mailing of a copy of such certificate to the State Veterinarian at Sacramento, California.

Horses, poultry and pigeons can be shipped from any part of the United States to San Francisco, but before making shipments of any kind, the veterinarian of the state from which the shipment comes, and the veterinarian of California should be consulted.

From Delaware, Iowa, Indiana, Kansas, Michigan, Minnesota, Missouri, Montana and Tennessee, cattle, sheep or swine may be shipped into this state after securing a permit from the State Veterinarian of California.

From Arkansas, Alabama, Florida, Georgia, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina and Texas, all classes of live stock, except cattle, may be brought into California if accompanied by a certificate of inspection issued by a duly authorized State Veterinary Inspector, and the mailing of a copy of such certificate to the State Veterinarian by the transportation agent who receives such live stock for shipment.

The tuberculin test naturally applies to cattle, except those that are intended for exhibition at the Exposition. There are several other states that are in process of being cleaned up, and it is reasonably safe to assume that within plenty of time in advance of the show dates at San Francisco, every section of the United States will be privileged to make shipments of live stock.

CROUCH & SON BUY FAMOUS HEREFORDS.

J. Crouch & Son, owners of the Lafayette Stock Farm, Lafayette, Ind., hitherto the most extensive importers of Percheron and Belgian draft stallions and mares in this country, have purchased the entire herd of Herefords owned by J. W. Van Natta. Included in the transfer are some ninety-five head, among them the herd bulls Perfection Fairfax 6th and Tippecanoe 7th, together with all the famous show and breeding cows and young stock. Messrs. Crouch & Son have been accumulating some good cattle for some little time past and now by the purchase of this Van Natta collection step at once into the front rank among the breeders of whitefaces.

There need be no question as to their future success. Their methods are those that do not admit of failure. They have built up the largest horse importing business at present in existence and they number among their clients more rich men than all the others put together. They are well known wherever heavy horses are bred and the liberality of their policy and the magnificence of their exhibits are too well known to need more than passing mention. If they go into the business of exhibiting their cattle, which it is quite likely they will unless they have changed mightily within a few months, the other breeders will have to step some to hold their present locations.—Live Stock World.

COMMUNITY HORSE BREEDING.

[By E. A. Trowbridge, Breezers' Gazette.]

Community breeding has been a potent factor in live stock improvement and agricultural prosperity. During the past ten years it has received considerable attention and has been responsible for much advancement. Co-operative effort has had to develop under many different circumstances and as a result of different stimuli, but it has developed.

As community breeding is generally conceived of it consists of a number of individuals, interested in the same breed or type of animals, banded together, usually operating under a constitution and by-laws with elective officers and stated places and dates for meeting. Their co-operative effort is for general advancement of the breed or type in question and the particular development and advancement of that breed or type in their own community. This community interest in efficient farm animals carries with it the development of agricultural practices and community prosperity, and the particular advancement of those individuals directly interested.

These are the facts as observed by a casual study of conditions in localities known as community breeding centers. But it must be fully realized that back of these easily discerned facts there lies some impelling force which furnishes the basis for development. Where community effort is on a permanent footing this force is usually found in the form of an economic possibility and a man or group of men. Without the former any organization must die of its own failure to give results; without the latter a good cause may become obscured and discontinued for lack of attention and effort. At the base of the entire superstructure of formal organization must lie the ability and desire to co-operate, to work with others and for others, to be willing to share the responsibility as well as the results, and really to become possessed of the community plan and spirit.

This is the foundation of co-operative effort without which satisfactory results are at least uncertain. Where these fundamental factors are present, however, it is quite possible for community effort to establish remarkable results, even without the aid of a close organization controlled by well-defined rules and regulations. It is probably true that in such cases even greater results could be secured by the closer and more readily used organization, but some good has been done in this direction without it.

It is such a community that is here concerned. In 1898, just at the beginning of the period of rejuvenation of the horse business, S. Kann, a horse buyer of Eau Claire, Wis., was in need of more horses to supply the trade. He had heard that it might be possible to pick up a few serviceable horses at Mondovi, a town of 1,500 people 25 miles south of Eau Claire. It was in this section that I was reared on a farm. Eau Claire was a thriving town of 25,000 people in Wisconsin, liyng about 80 miles southeast of the Twin Cities. It lies at the southern edge of the vast Wisconsin pinery or lumber region which flourished and made millions for men in the latter years of the last century. As the timber has been cleared away, however, clover, corn, oats and the thrifty stock-farmer have occupied the land, consequently there has been a constant demand for horses, either for "the woods" or for the farm.

Mr. Kann, facing a shortage of stock, finally billed the town and one Saturday morning in the spring of 1898 made his first appearance in the streets of Mondovi to buy such horses as he could use from any among those offered for sale. He found a few good chunks weighing up to 1,500 pounds, but most of the horses offered were of less weight. He found many all-purpose horses weighing from 1,100 to 1,300 pounds, showing both trotting and draft blood and not satisfactorily filling his requirements. Naturally he bought those that suited at good prices and those which did not suit but which he could sell at prices in keeping with their actual value for his purpose. He left with their owners those horses that were too leggy or light-boned or wasp-waisted or otherwise unfit. The buyer's success is securing horses was such that his weekly visit became regular and by his presence the attention of farmers, bankers and merchants was called to the possibilities of the draft horse business.

A few men in the locality had been sufficiently far-sighted to bring draft stallions to the community a few years previously to this time and it was soon observed that the horses that brought the highest prices were the get of Greely, Telemac, Bylander, Emir, Cinq Mars and the few other pure-bred draft stallions, which had left their impress upon the stock of the community. Farmers were anxious to make their horse business profitable, but up to this time no such opportunity had presented itself. They had bred horses that suited their purpose very well, but now discovered that the rugged, heavier sorts commanded better prices. As a consequence the next spring saw an increased patronage of draft stallions. Grade draft mares changed hands among farmers and were put to breeding. The owners of draft stallions were glad to see the buyer in town. Mare-owners solicited his opinion of stallions and it was given with a frankness and conservatism which had great weight in moulding the draft horse ideal of the community.

The weekly appearance of the buyer on the streets and his constant preference for rugged, sound, stout horses of draft horse lineage had a cumulative effect. Owners of good draft stallions saw the demand for the services of their horses increase. In the beginning mare-owners were not particular, past the point of securing draft blood regardless of superiority of type and quality, but by the gradual process of education through observation and experience they became more critical and were satisfied only with stallions of real merit. With this impetus there was soon felt a need for more good draft stallions. The purchase of these horses demanded money, ability and confidence in the business of producing heavy horses profitably.

Among those who had been able to look into the future was Hon. W. L. Houser, an editor and a farmer and at that time Chief Clerk of the Wisconsin Assembly and later Secretary of State for Wisconsin. He had purchased a high-class Percheron stallion and a Clydesdale. He also purchased a few pure-bred mares of each of these breeds. The stallions were put into public service and did a good business.

Attention had been turned toward the draft horse business and its possibilities observed. The value of good breeding stock was being more generally appreciated. More mares were being bred and greater care was exercised in their reservation and selection. There was no longer a question as to the business possibilities of owning good draft horses so long as the supply did not exceed the need. More men brought purebred draft stallions into the community for public service and the business assumed gradually expanding proportions. As the years passed the weekly visit of the buyer gave financial proof of the wisdom of draft horse production. His regularity in appearance and conservatism and honesty in dealing made for permanency and confidence. The increased interest led to a closer study of demands and an appreciation of merit and a general education as concerns the management of horse affairs.

Several agencies were lending aid to this development of a safe, sound business in a farming locality. The Wisconsin Farmers' Institute with such men as Geo. McKerrow and H. A. Briggs on the lecture platform was encouraging sane, conservative and constructive methods. The college of agriculture of that state each year sent its representative to act as judge of the live stock at the Buffalo County Fair, held at Mondovi. To the short course in agriculture were going many young men from that community, most of whom were returning with the unmistakable evidence of instruction from such men as Henry, Carlyle, Moore, Alexander and Humphrey. Later came the stallion law which put the mare-owner in a safer position as regards the public service horses.

To the farmers of the community all these influences were forcing the same general conclusion, namely, the wonderful possibilities of draft horse production in that locality. Not the least important of these influences was the buyer with big checks for good horses. A few years ago Dr. A. S. Alexander of the agricultural college at Madison helped in the organization of a horse breeders' association, which has been of much service to the people interested. After thirteen years the community had come to know this horse buyer and late in 1911 on one of his weekly trips Mr. Kann received a handsome medal valued at $65 and accompanied by a statement of appreciation signed by 200 farmers, merchants and others.

It is now more than sixteen years since the horse buyer made his first trip. With one exception no other buyer had made a serious effort to buy horses in that locality. The people know this one man and depend upon him. During this sixteen years the status of horse affairs at this point has changed materially. The number of horses produced in the community has greatly increased. The quality of horses had been greatly improved. Where a half-dozen purebred draft stallions were doing a fair business in 1898 there now can be found 20 good pure-bred stallions doing a good business within a radius of six miles from this town. Where many geldings were once kept for farm work brood mares, which produce foals besides, are now used. Horses for sale are not as numerous as in the past. They are sold as soon as they arrive at a marketable age. The percentage of misfits and culls produced and offered for sale has gradually decreased. Good stallions and mares are now highly appreciated. International prize winners have replaced some of the grade stallions of the earlier days. Many purebred mares ha been purchased by farmers and are now working a raising salable breeding horses.

From the locality have gone horses that have ma both reputation and money for their produce Among these horses are Princess Fortune, tw champion Clydesdale female at the Internation Principal, winner of the stallion division of the N tional Percheron Futurity at the Iowa State Fair 1913, and also champion Percheron stallion at t Wisconsin fair in 1914; Honorable Baccaratt, an ternational prizewinner as a yearling, also first-pri three-year-old Percheron stallion at the Wiscons State Fair in 1914; Queen Tizzie, first-prize two-ye old Percheron mare and American-bred champion the Wisconsin State Fair in 1908; Amaryllis, a cha pion Clydesdale mare at the Wisconsin State Fai Primrose, a first-prize winner as a yearling and tw year-old; King Coco, High Mark, Winsom Prince Grand Triumph and many other show horses.

There have been sold from this center an avera of 400 horses each year for the last 16 years at average of $200 per head, which means that the dra horse business has added to the receipts of t farmers of the vicinity during that time a total $1,280,000. Thus this community has progressed the production of horses. Horse production has con to be one of the integral profit-producing projects the average farm, besides serving as aid in oth production. It has become general and not high specialized; that is, there are a few good horses pr duced on every farm rather than a large number

Excellent types of the pure bred draft stock in California SHIRE MARES

both imported and "California bred" at Henry Wheatley's Salvador Stock Farm, Napa—The actual cost of production is no greater than that of raising grades, and the profits sufficiently large to offset the increased cost of foundation stock.

This type of development lies at the basis of suc cessful community production of grade draft horse for the open market. The changes which have oc curred in present stock and annual receipts are no the results of a large outlay of capital but of constan improvement through grading up.

The horse business has assumed commanding pro portions. It helped to start the community toward better ideals as regards production. The horse busi ness has made smoother the path to the organizatior of local dairy cattle clubs and the efficient teaching of agriculture in the city and rural schools. In short it furnished the impetus which brought this com munity to a realization of its possibilities.

While this town is not known as one where the community breeding of draft horses has been conducted, yet at the basis of its progress lie the factors which make community breeding centers possible It has been a community breeding center, yet it would hardly recognize itself under that name. A more thorough organization might yet be perfected and bring with it some additional benefits and a realization of even greater results. It must be said, however, that this community has accomplished remarkable results in breeding grade drafters for profit since I left it to take up animal husbandry instruction first in Wisconsin and later at the University of Missouri.

No breeds of dairy or beef cattle have as yet been found hardy enough to stand the winters in the interior of Alaska without excessive expense for food and protection against cold. As a result milk sells for 50 cents a quart and the beef that is consumed in the country consists almost wholly of cold-storage meat brought from the outside, although occasionally a herd of steers is driven in from the coast, the trip to Fairbanks taking a month or six weeks. To partly remedy this situation it is proposed by the Alaska Experiment Stations to cross the yak and the Galloway with the hope of producing an animal hardy enough to withstand the severe conditions in interior Alaska. This was suggested by the fact that the yak, which is much used by the Mongolians for meat and milk, as well as for work, is extremely hardy, obtaining his feed through the long and extremely cold Mongolian winter practically without assistance. According to the director of the Russian experiment station at Irkutsk, Siberia, the yak pastures through the winter under the open sky and obtains feed from last year's dead grass dug from under the snow. Crosses of the yak and ordinary domestic cattle are easily obtained and are common in Mongolia, where they seem to thrive under primitive and severe conditions.

ROD, GUN AND KENNEL

CONDUCTED BY J. X. DeWITT

ROOK SHOOTING.

The English rook, though classed in the list of "rmin," affords sport in the spring to both the oner and his peregrines, as well as to the gunner. ook shooting cannot be considered a very supe- r form of sport, yet it comes during the gunners' season, affording him amusement when game ds are tabu.

The particular charm about rook shooting is that is carried on at a fascinating time of year, when ring has really asserted itself, and the general roundings are delightful. The weather is usually rm, which mitigates what would be otherwise an treme discomfort, i. e., standing about beneath the es, which is necessitated in the participation of e sport. There is a certain amount of pleasure, so, in bringing down the young rooks from the top- st branches of some towering elm, when one members the havoc committed by their sable ances- rs among the pheasant and other game birds' eggs ring the breeding season, for rooks are arch- bbers and miscreants where eggs are concerned.

The shotgun is hardly ever used in the sport, most ople preferring a small-bore rifle. Rook shooting ith the latter weapon may be either easy or diffi- lt, depending on the character of the trees in which e nests are built, and the state of the weather the time of shooting.

Rooks have rather peculiar preferences with regard the trees in which a rookery is formed; sometimes ey occupy low limber and at other times the tallest ees are chosen in which to form a colony. For reference, if high elm trees are available they will nvariably be chosen by the birds, and when such is ne case rook shooting becomes a sport requiring no mall skill on the part of the gunner. A rook sitting n the topmost twig of a tall elm tree affords an xceedingly minute mark, more especially if the tree s swayed by the wind.

The young birds only form a mark for the gunner, he older members of the rookery circling high in ir, far out of shot, loudly cawing a warning to their ffspring who are in danger from the rifles; a warn- ng which in most cases is utterly and entirely neg- ected by the youngsters. The old birds are far too unning to ever come within range, although they manifest extreme anxiety for their offspring.

The young birds, when sufficiently well grown, hop from the nest cnto some adjoining branch, where they remain motionless; these are termed "branch- ers" and form the by no means easy target for the shooter. The greatest skill on the part of the gunner is required when the branches are swayed by a gentle wind, which also influences the course of the rifle bullet, as well as causing the target to move in like manner. The usual method of successfully cop- ing with the young rook on a moving limb, is to note the place where the branch reaches at the extreme limit of its swing, and then shoot at the instant when it begins the return movement.

Much ammunition will be wasted before the novice can make a fair average of kills. Should a strong wind be blowing, not a bird will be seen out of the nests, for the old birds teach them as soon as they are hatched to lie low when a gale is raging. During severe storms many nests are overturned and the young blown out, a lesson which has often been a warning to the parents to be later transmitted to their offspring.

In the early days of May the shooter watches the rookery closely for signs of the first birds to leave the nests. When the trees are very high a glass is required to see them clearly, and the first thing to be noticed is a black beak protruding from the side; the following day a head appears, and then the bold- est of the brood is to be seen in full view, perched on the side of the nest. It is useless to use the rifle until the young birds sit well out on the adjoin- ing branches, for when hit they invariably fall back into the nest, the last effort always directed to crawling into their home of sticks. The parent birds use every inducement to attract the youngsters out onto the nearby branches, well knowing that it is a necessary preliminary to their flying. They bring food to them and caw noisily until the young ones come out and fetch it, the boldest individual in the lead, after which the rest soon follow the example. Then it is time to go out with the rifle and do execu- tion among the sable colony.

Occasionally a falling bird will stick fast in the branches or fork of a tree, necessitating a climb on the shooter's part to extricate it unless he be accompanied by some village urchin, ready to risk his neck and his clothes in the ascent.

As an edible quantity, young rooks are excellent when made into a pie, the breast parts alone being used in its manufacture. It depends largely on the weather, as to what the quality of the young rooks will be like, during the eight or ten days of the rook shooting season. Wet weather, with the ground moist and earth worms and slugs plentiful will be respon- sible for full broods of rooks all plump and in good condition. If such be the case the shooting should be begun early, as the youngsters then mature quickly and are soon able to fly. If the season be dry, with the ground hard and a scarcity of insect food, it means hard labor for the parent birds to gather enough supplies for the nestlings, the result of which means heavy losses amongst the broods.

People aver that it is only during hard times that rooks plunder the nests of other birds for their eggs, but such is not the case, even though originally it may have been so; for once let young rooks be brought up an an egg diet and they will ever after have a craving for such delicacies, which they will enjoy to the uttermost upon every available oppor- tunity. A rook never leaves tell-tale shells lying near the rookery, or even near the plundered nest, but carries them to a distance, where the eggs are sucked by the sable thief. When feeding their young on an egg diet the rooks suck the contents of an egg into their throats, then fly to the rookery and disgorge the mass for the benefit of their offspring eagerly awaiting it with cavernous mouths fully dis- tended.

During heavy gales many young birds are blown from the nests, to fall and lie around at the foot of the trees, a fact taken advantage of by foxes and other prowling creatures, who make periodical visits to the vicinity of the rookery. Hard frosts in April also destroy the fertility of many eggs, just at the time they are being laid, which also help to decrease the future colony. There is an old saying that rooks will not form a colony on an estate unless the pro- prietors be of the aristocracy, and should such a place change hands and a nouveau riche or other person come into possession, the rooks will leave their favorite trees in disgust. It is certainly a very curious fact that in many instances rooks have done this, returning when people of higher rank have once more occupied their favorite estate. I myself can name more than one instance in which it has oc- curred, and though it smacks somewhat of the super- stitious, it has nevertheless often been known to occur.

As previously stated, a small bore rifle is the usual weapon used to shoot rooks, though I have seen a cross-bow very successfully manipulated. My father had one made for him with a steel bow, attached to a stock, the bow being strung by pulling a lever at the side of the stock. This cross-bow shot round, leaden bullets with extreme accuracy and force, with the advantage also of being perfectly noiseless.

During the short period that rook shooting is available, a great many men practice with the rifle, who otherwise would prabably never handle such a weapon from one season to another. For young people learning to shoot it is a useful lesson, foster- ing a love for rifle shooting, which in after years may lead them to do good service for their country.

Although the humble rook is but a very small fac- tor in the rounds of the sporting seasons, it yet nev- ertheless has its uses, both as an insect destroyer and as a target for the gunner.

THE WHIRLIGIG OF TIME.

The current number of the Kennel Review takes issue with the Boston Dean of kennels scribes, on several matters of accuracy in respect to Coast doggy affairs and winds up in the following manner:

"In a pinch, we could accommodate our friend in a 'mud slinging' contest, but we do not like to get started as we never know when to stop, so will close this uninteresting—shall we call it—argument, by reprinting an editorial from a recent issue of the Pacific Fanciers Monthly, of which Charles R. Harker is editor, and by the way, Mr. Harker was some N. D. B. A. scrapper himself, until he, like a lot more of us, finally tumbled to the fact that we were only wasting our time in trying to put the A. K. C. out of business, although to take the advice of some peo- ple, we should never know when we had enough but keep butting our brains out—unless the heads were 'solid ivory.' Here is the editorial referred to:

'One by one the recalcitrant leaders of the National Dog Breeders' Association are finding their way back into the old time fold of the A. K. C. The latest to be reinstated are C. W. Buttles, editor of the Kennel Review of Kansas City, and A. F. Hochwalt of Ohio, both of the most virulent type of N. D. B. A. men, a short time back, but when the N. D. B. A. went on the rocks it was either go back or get out of the game entirely, and as the A. K. C. very wisely made no exceptions, they are now about all back again where they were five years ago.'"

My eye! But what an odd way to "carry the news to Mary." Why not come out into the canine sun- shine with quills uplifted and trumpets fly-blown? It would look more consistent than tiptoing into meeting by slipping through the back door.

A bit inaccurate, too. A number of the original and prominent N. D. B. A.'s are still lined up to the original principles and state they will so remain.

PAICINES RANCH GAME FARM.

It is not the progress so far made that most im- presses the visitor to the breeding pens of the Pai- cines rancho, where wild game by thousands is being propagated to stock the 10,000 acre game preserve, though the sight itself is impressive, but rather a contemplation of what the effect will be on the wild game population of San Benito county in ten years if the work is kept up on a gradually increasing scale.

Already after two years of propagation of Chinese pheasants, the confines of the vast domain of the Macombers is proving too small to hold the overflow and the birds have spread widely, states the Hollis- ter Free Lance.

There is nothing to restrain them from wandering where they will after they have attained their growth. They are turned loose and gradually wander beyond the ranch boundaries. Last year 1,000 pheas- ants were released and reports from stray pairs are received from points miles away from the original hatching place.

This season Dr. H. J. Macomber, manager of the big ranch, confidently expected to release 10,000 young birds but the season was late and there were other drawbacks and now it is probable, states Dr. Macomber, that 3,000 will be about the limit.

In company with J. H. Hill, deputy fish and game commissioner, who is as enthusiastic over the results being attained by game conservation as is Dr. Ma- comber himself, and H. F. Faneuf of Santa Cruz, the writer paid a visit to the Paicines rancho and in the course of a short hour's observation of the systematic method of breeding and raising rare game birds, had his eyes opened to the magnitude of the enterprise and its present and prospective benefits to San Be- nito county—with all the cost borne by the owners of the Paicines rancho—in the only way by which it is possible to grasp the extent of the work that is being done—namely, by seeing it.

Chinese pheasants, Hungarian partridges, Mexican and Virginian wild turkeys and other imported game birds mix with California valley and mountain quail, and the wild game mingle in the parks and door-yards with peacocks, guinea fowls, chickens and other fowl. It is at once a wilderness and a paradise of bird life.

The raising of pheasants—the biggest thing so far attempted—is perfectly systematized. There are probably 40 or 50 small pens enclosed by wire mesh and each pen contains three hens and a cock pheas- ant. Every day during the laying season the two attendants of the colony visit the pens and gather the eggs which are placed in the incubator. When they are hatched the little chicks are removed to a brooder pen. In a few days the first flock is moved to an adjoining brooder to make room for the next hatch. Then another hatch comes off and the first hatches move another point down the row of pens. So in course of time twenty or more pens are filled with young pheasants, the day-old chicks gradually increasing as you proceed down the line.

They are fed on a varied diet. A small patch of alfalfa grows near the pens to furnish a fresh ration of cut green food daily. When the birds reach an age where they can eat a solid ration and are partly able to shift for themselves they are placed in a larger enclosure where the natural growth of grass and weeds give them protection. When they are matured the gates of this enclosure are thrown open and the pheasants are allowed to go at will.

The Hungarian partridges are a more difficult bird than the pheasant family to introduce into this country. There are 135 at the Paicines rancho, re- ceived direct from Hungary. Their importation was attended with difficulty because the European war was in progress at the time of shipment. They came through safely, however, and landed at the ranch without one dead bird in the shipping cages.

They are a wild and wary bird and the majority of the colony occupy an enclosure of about an acre, half a mile or so from the house and the main breed- ing pens. This acre is entirely walled round and roofed with meshed wire. A natural covert of brush and wild grasses is thus made and its inmates are protected from the attacks of wild animals. Not altogether, however, as six skunks and several squir- rels have paid with their lives recently for raids made upon the eggs and young birds. Feed is placed in the enclosure. There is a natural water supply and the birds live almost in their natural state. If they do well they will soon multiply to an extent that will make the quarters crowded. Then the doors will be opened and they will gradually melt away into the surrounding hills.

There is a bronze wild turkey gobbler on the place who is a direct importation from Virginia and no courtier of the Old Dominion ever strutted more proudly than does he before the eyes of his admiring consorts. Then there is a flock of Mexican wild turkeys, swarthy, sooty specimens. The breeds mix.

"We try to raise 300 or 400 wild turkeys every year," said Dr. Macomber, "just for our own use and to give away. There is not a domestic turkey on the place. They are all of the wild strain but they grow tame in captivity and are no more shy after the first year than the domestic fowls."

Posts and wire are already on the ground to en- close 500 acres of rolling wooded hills south of the home site as a deer paddock. When this is built two carloads of deer from Wisconsin will inhabit it. They are larger than the native species and Game Warden Hill and Dr. Macomber speculate with inter- est on the results of a cross between the Wisconsin and the native deer.

Other inmates of the deer paddock will be a male and female elk and their offspring, now in captivity on the Paicines rancho. The baby elk came into the world about three days ago. It is still a wobbly little creature who sticks close to its mother's side but gives promise of becoming a strong healthy specimen. The sire of the promising addition to the family has a pair of antlers that are altogether of too business-like appearance to invite close inspection of the baby, but it is supposed to be of the gentler sex. Last year a young elk was born to the pair but its birth was premature and it was a spindling, puny creature and lived but a short time.

Careful attendants take care of all the growing wild life in the breeding pens and keepers patrol the far boundaries of the ranch, watching for poachers of both human and animal variety who might otherwise prey upon the game population. Dr. Macomber does not shoot the game himself nor will he allow anyone to discharge firearms on the ranch.

In such surroundings the wildest creatures grow tame. Quail wander right up to the doors of the mansion. Pheasants and other strange birds are everywhere and the deer are plentiful and tame.

Which brings us back to the original question. If such progress has been made in a year or two by scientific care and conservation, how far will the results reach in the next ten years?

If for no other reason than for this preservation of the natural game and the addition of new varieties, San Benito county owes a big debt to the Macomber family. Where they are so freely expending their money the citizens of the county and sportsmen in particular can do no less than unite in giving their unanimous moral support.

GRAND AMERICAN HANDICAP.

Grant Park will be the scene of America's greatest shooting classic. August 16 to 20 will be red letter days in the history of trapshooting. For five days America's greatest shots will vie with each other for premier national honors, and trapshooters from every section of the United States will add to the impressiveness of the event.

Grant Park, Chicago, the spot which has been chosen as the stamping ground of this greatest of trapshooting tournaments, can not be excelled. Not only is it centrally located and readily from all portions of the country but it offers ideal conditions for the famous Grand American Handicap.

Situated upon the shores of Lake Michigan and laid out almost as level as the floor of a ballroom, there are not obstacles to handicap the aim of the shooter. The sky line is low and thus an excellent background is lent the targets. Unlike most trapshooting grounds, Grant Park is within five minutes walk of the leading hotels. Careful preparations are being made by the committee in charge. Ten traps—the greatest number ever used in any similar event—will be installed and with this splendid equipment and an improved method of squad arrangements and schedules there is every indication that the members of the trapshooting fraternity will immensely enjoy the full spirit of pleasure of this gala occasion.

The Grand American Handicap five-day tournament side features at Chicago, August 16 to 20, will be a series of twelve special matches at 100 birds per man between professional experts with the shotgun. P. J. Holohan of Portland, a frequent figure at local trap shoots, will be the only professional Coast participant, being matched with Hom Marshall of Kiethsburg, Ill. Trade representatives, or professionals, are barred from all other events in the big tournament, the regular program matches being confined to amateur talent only. Among the local, State and Nevada entries at Chicago will probably be Tony Prior of this city, winner of the Consolation Handicap at Dayton, Ohio, last year; Andy Flickinger of Vallejo, winner of fourth trophy and purse in the main handicap feature; Foster Coutts of San Diego, eighth money in the Grand American Handicap, 1914; W. E. Staunton of San Jose, also in the money distribution at Dayton last year; F. W. Stall of Winnemucca; C. A. Sage of Tonopah, and others.

LINCOLN GUN CLUB DOVE STEW.

Nimrods from over hill and dale, from near and far, were in attendance Sunday at the seventh annual dove stew and blue rock shoot of the Lincoln Gun Club. In response to the 1500 invitations sent out, nearly 1000 were in attendance. The some 200 members of the Lincoln club spent all of last week making preparations for the event. Their efforts were crowned with success.

The day's activities began with a blue rock shoot in the morning. Scatter gun experts from all points of the compass took part and made some excellent scores.

The main event of the day began at 1 o'clock at Leavell's grove near Lincoln. Hundreds of hungry hunters enjoyed the dove stew. Such heavy inroads did the guests make on the stew that chicken had to be substituted to satisfy all.

Salmon Running.—Good catches of quinnat salmon have been taken by trolling boats outside "the heads" for a week past. Al Wilson caught 25 and Dr. Matson 22 fine fish last Sunday.

Drink Jackson's Napa Soda.

At the Traps

The program for the California-Nevada Trap Shooters' Association tournament at the West Alameda trap shooting range this week, started with ten 20 bird events, August 5; eight 25 bird matches Friday, August 6, and five 20 bird races, followed by the Interstate Championship match at 100 birds, August 7, the closing day. Purses and trophies valued at $1500 were hung up for the crack shots of both States to compete for. The officers of the association are: F. M. Newbert, Sacramento, president; Harry Ogilvie, Lindsay, Cal., vice-president; T. D. Riley, San Francisco, secretary-treasurer; directors, George Wingfield, Reno; Frank Stall, Winnemucca; R. H. Bungay, Ocean Park, Cal.; Henry Garrison, Modesto; Tony Prior and Emil Hoelle, San Francisco, and C. A. Julian, San Diego.

The winner of the Interstate Championship or the runner-up will receive a $50 purse and be eligible to compete in the national championship match during the Grand American Handicap tournament at Chicago two weeks later. The 25-bird matches Friday were for seven valuable prizes and trophies which have been hotly contested for at three previous annual shoots of the association, permanent ownership to be acquired by two individual wins. Each trophy has a three-leg mortgage by prominent trigger pullers. This tournament will probably determine the ownership of at least four of the prizes.

Additional sets of traps and bulkheads have been installed and other arrangements made so that the big gathering of shotgun enthusiasts will be amply accommodated. This shoot will draw a larger attendance, it is believed, of crack shots from the two States than participated in the previous Pacific Coast handicaps at San Diego or Sacramento.

Twelve squads lined up for the opening day fusillade. The high squad for the day: W. G. Warren of Tonopah, Guy Holohan and H. Pfirrmann of Los Angeles, J. F. Dodds and Foster Couts of San Diego made the splendid average of 95 per cent in shooting at a total of 1000 inanimate targets, 200 per man. In the eighth event the squad smashed every bird trapped, in two other events they broke 98 out of 100.

H. Pfirrmann, the winner of the Pacific Coast handicap at San Diego recently, shot in fine form and scored high amateur average for the day, 196 out of 200. J. F. Dodds of San Diego and Tom Wilkes of this city tied for second high average, with 190 each. O. N. Ford of San Jose, Foster Couts and J. F. Downs of San Diego were third, with 189 breaks.

Eight squads of blue rock pulverizers lined up Wednesday at the West Alameda trap ground in a series of practice events, the results were:

Knock Off the Chip!—The Alhambra Gun Club of Martinez, Fred K. Burnham, president, announces a challenge to any gun club within 100 miles of San Francisco for a ten or fifteen man team match at 100 birds per man. The Martinez club has twice recently defeated a fifteen-man team of the Big Time Gun Club of Sacramento. Both occasions were most enjoyable and will be an annual occurrence hereafter. The Straits City club is particularly anxious to join issue at the traps with the San Jose powder burners, which would bring about a shoot worth going miles to witness.

Live Bird Shoot.—The California Wing Shoot Club's August trap shoot at Sobrante, Sunday l drew a small attendance of members. Ed L. Ho 31 yards, and P. J. Walsh, 28 yards, each scored cle strings in the forenoon medal match. T. D. Ril 28 yards, and C. C. Nauman, 33 yards, were the scores in the afternoon purse match. Riley s another straight in the 6-bird pool match. The sco follow:

Medal match, 12 pigeons, distance handicap, hi guns—

E. L. Hoag	31 yds.	11222 22221	22—
P. J. Walsh	28 "	12112 11122	11—
C. C. Nauman	30 "	11201 12211	11—
Toney Prior	30 "	11122 22221	20—
D. Ruhstaller	30 "	11121 11110	11—
C. A. Haight	31 "	11011 20210	21—
T. D. Riley	29 "	12210 11121	00—
Captain Du Bray	32 "	21021 22000	22—

Purse match, $50 added, three moneys, distan handicap, high guns—

T. D. Riley	28 yds.	11222 21211	22—
C. C. Nauman	33 "	11112 21111	22—
C. A. Haight	28 "	112111 21202	11—
E. L. Hoag	29 "	12121 11101	11—

Arizona Mud Saucer Fragments.—A weekly shoot of the Prescott Gun Club, 50 birds, shows the following results:

H. J. Donnelly 46, J. K. Lewis 45, C. B. Wells 42, M. M. Smythe 38, Cleve Stivers 37, J. E. Regan 33, Dan Pittman 32, Dr. P. M. Davis 31, Will Waller 31, Chas. Pittman 30, J. D. Cornish 29, Martin Guthrie 28, Geo. McClelland 24, Thos. McRae 24, Imon Buchanan 23, Clint McCuller 23, Jno. A. Davis 19, Tom Bemis 17, H. H. Higgason 15, C. H. Moore 14.

The Holbrook Gun Club tournament program was at 200 birds. Windy weather conditions handicapped high scores and the attendance was unexpectedly cut down. The results were: W. R. Black 183, M. R. Smith 179, F. M. Gold 175, E. Conway 174, C. S. Patterson 173, C. McClove 165, J. M. Patterson 163, J. S. Hulet 141, D. W. Easley 138, A. L. Rencher 138, F. E. Lowe 135.

Night Shooting.—This branch of trapshooting sport is becoming more and more popular now that devel-opments have proven its merits. We quote an ac-count of a shoot held in Kansas City:

"The largest night shoot yet held in Kansas City was touched off at Elliott's Park recently. Twenty-seven men lined up for competition on the 50-target sweepstake program, and Geo. Nicolai came out high amateur with 45 breaks, next high being 40, made by J. K. Boyd, Chas. Cooper and Ed Varner. Among the professionals a hot race was had, in which "Uncle" Jim Head came out winner with 47, closely seconded by D. W. Bovee with 46. A strong wind blew the entire evening and many a man heard the referee call lost on some of his targets because the wind caused the targets to duck out of his load.

If conditions are favorable, it is intended to hold in the near future a three-cornered telegraphic night team shoot between Wilmington, Del., Newark, N. J., and Kansas City, ten men to a team. The night shooting is such a success that several business men who cannot get away from work to shoot in the day-time are now planning to organize a night shooting club."

* * *

State Champions.—G. M. Keyes, of Meridian, Miss., 95x100, and A. C. Robison, of Vicksburg, 94x100, were winner and runner-up respectively of the Mississippi State tournament.

The North Dakota State championship was a tie shoot between J. W. Sturgeon and F. Ray, both of Dickinson, 48x50 each. Five 25 bird strings were shot before Sturgeon was the winner, 25 to 24 on the final string.

W. L. Hefner won the North Carolina State amateur championship, 98 out of 100 birds.

* * *

Ladies' Team Shoot.—A telegraph challenge shoot between five gun teams of the Nemours Gun Club, of Wilmington, Del., and the "lady trapshooters of Chicago" will take place August 12. The Chicago Dianas will shoot over one of the G. A. H. traps at Grant Park. The winning team will receive a hand-some trophy from the Du Pont Powder Company. Conditions of shoot, 50 birds per gun, 16 yards rise.

New Grounds.—Arrangements are under way by prominent trap shooting sportsmen and clubmen to install a well equipped blue rock shooting range on this side of the bay in an easily reached location, where weekday recreation shooting clay pigeons may be indulged in. San Francisco is the only large city on the Coast without a suitable trap ground, since the popular Ingleside grounds were closed.

The Golden Gate Club grounds are well patronized Saturdays and during open Sundays by numerous shooters. This trap ground fills the bill to quite an extent, but the impression is strong that a shooting ground on this side of the bay would do much to bring "new blood" into the game.

* * *

Try Outs.—Good practice scores were shot on the Golden Gate Gun Club grounds Saturday, as follows: Tom Wilkes and Paymaster Harry Williams, U. S. N., 187 out of 200 birds; Hugh Poston, 161 out of 175; C. A. Haight, 161 out of 175; Lin Hawxhurst, 147 out of 150; R. R. Carwell, 108 out of 125 Tony Prior, 93 out of 100; Miss Meyer, 83 out of 123; W. S. Pease, Elko, Nev., 91 out of 100; P. Putzer, 69 out of 80; W. R. Ellis, 51, O. N. Jones 61, Dick Reed 91 each out of 100; C. Craft, 33 out of 50; A. Adams, 18 out of 20.

* * *

Garden City Notes.—San Jose blue rock shooters, George Anderson, C. H. Nash, Mrs. Ada Schilling, Dr. A. M. Barker, R. C. Hogg, W. J. McKagney, O. N. Ford, A. F. Baumgartner, Clem Arques, E. W. Jack and others, have been holding practice matches for this week's tournament across the bay.

The initial "Beginners' day" shoot in this State, for which novices in the sport only are eligible, as already explained in the Breeder and Sportsman, will take place in San Jose this month.

ATTENTION, ANGLERS!

The eighth International Fly and Bait Casting Tournament will be held in San Francisco, August 12, 13, 14, 15, 1915, under the auspices of the San Francisco Fly Casting Club. The following circular has been issued in connection therewith:

To fly and bait casters, members of the National Association of Scientific Angling Clubs, members of the San Francisco Fly Casting Club—all interested in the sport of fly and bait casting:

The committee of arrangements of the San Francisco Fly Casting Club is pleased to advise that all is in readiness for the greatest tournament of fly and bait casting ever held. It is fully expected that many of the world's records will be broken.

The greatest number of trophies and prizes ever awarded at a fly casting tournament will be given the winners in the various events. Four beautiful silver cups will be awarded for all round champion-ship and the best individual and club averages. Thirteen elegant silver Exposition trophies as well as one hundred and thirty prizes given winners in the thirteen events on the program.

The days, the events and when same will be held, are as follows:

Thursday, August 12, 10 a. m., Club Grounds, Stow Lake, Golden Gate Park—Heavy tackle accuracy. Dry fly accuracy. Light tackle distance.

Friday, August 13, 10 a. m., Exposition Grounds, South Gardens, facing Festival Hall—¼-oz. bait accuracy. 11 a. m.—North Gardens, in front of Palace of Transportation—¼-oz. bait distance. ¼-oz. bait slam cast. 2 p. m., Club Grounds, Stow Lake, Golden Gate Park—Salmon fly.

Saturday, August 14, 1 p. m., Exposition Grounds, South Gardens, facing Festival Hall—½-oz. bait accuracy. 2 p. m., North Gardens, in front of Palace of Transportation—½-oz. bait distance. ½-oz. bait slam cast.

Sunday, August 15, 10 a. m., Club Grounds, Stow Lake, Golden Gate Park—Light tackle accuracy. Delicacy and accuracy. Heavy tackle distance.

Luncheon will be served at the meetings of Thurs-day and Sunday at the boat house at Stow Lake for the casters, their friends and visitors.

Contestants must cast in all events to qualify for the all round championship and in all bait and all fly events to qualify for best fly and bait average honors. Fee $2.00 for single event, $1.00 for each additional event. $10.00 for all the events.

A cordial invitation is extended to all amateur fly and bait casters to take part in this tournament in San Francisco, and visiting casters or those unac-quainted with our members, are asked to make them-selves known and join with us in making this eighth International Fly and Bait Casting tournament the most successful ever held.

Tackle for all events will be furnished by the club to all who are not supplied. From Sunday night to Thursday night visitors will be left to enjoy the great Exposition. The banquet will be held on Thursday evening, August 19, when the awards will be made and trophies and prizes given to the winners. That evening the annual meeting of the N. A. S. A. C. will be held.

On Friday evening, August 20, at 7 o'clock, all vis-itors will be taken to the San Francisco Fly Casting Club lodge on the Truckee river at Union Mills for a two days' fishing trip, returning to San Francisco on Monday evening.

For entry blanks and further particulars call, write or phone F. J. Cooper, Chairman, 742 Market street, telephone Sutter 4440; Stanley Forbes, Secretary of Committee, 1221 Merchants Exchange Building, tel-ephone Sutter 288; Paul W. Shattuck, Secretary-Treasurer, 638 Mission street, telephone Kearny 345; or any of the following members of the Tournament Committee of Arrangements: T. C. Kierulff, W. D. Mansfield, J. F. Burgin, J. F. Siebe, Horace Orear, W. F. Bogart, P. M. Nippert, H. B. Sperry, W. J. Davis, Jr., L. G. Burpee, Dr. W. E. Brooks, C. G. Young, F. H. Reed, C. H. Kewell, H. C. Golcher, W. L. Gerstle, Floyde Spence, Elkan Gosliner, Geo. A. Wentworth, Dr. Henry Abrahm.

Note: Attention is also called to the Northwest Fly and Bait Casting Tournament to be held at Ta-coma, August 26-29, 1915. Attention is further called to the Inter-State Fly and Bait Casting Tournament at Los Angeles, August 7 and 8, 1915.

Every fly and bait caster who can attend either of these tournaments should do so.

FISH LINES.

Millions of trout fry have been planted in many rivers, creeks and lakes of this State recently. The campaign of trout fry distribution will be carried on systematically until practically every angling water in California will be restocked.

General trout angling conditions are excellent, if reports from many points are reliable. One report in particular will be well received, and that is that there is a run of steelhead in Eel river. Numbers of half-pounders have been taken from Greig's pool, the largest steelhead landed weighing twelve pounds.

Big or Stone lagoon, about forty miles north of Eureka, also Prairie and Redwood creeks, about ten miles beyond, are now in prime fishing condition. These waters are easily accessible by machine over good roads. Excellent fishing can also be had in several other creeks by taking side trips off the main road. M. C. Wartenburg, E. Gable, R. Spahn and O. Fincke comprise one party that will take in that section incidental to a month's trip through Mendo-cino, Humboldt and Trinity counties.

The mountain lakes near Blairsden are in good shape now and offer pleasing trout fishing. Near Quincy, Al Wright's recent experience was limit catches of eight to fourteen inch trout. At Big Bar the Feather river is clear and low and fair catches have been made.

The Silver Fork of the American river, near Ky-burz, in El Dorado county, furnished daily limits for two weeks, when Fred Wrede, J. Keane and W. A. Richardson of this city; Emil Schmidt and Harry Schmidt of Sacramento; W. JJ. Scott, A. Sigwart and A. Sigwart Jr. of Oakland and Charles Hall of Stockton, wet their lines.

FIXTURES

Interstate Association Tournaments—

August 16, 17, 18, 19, 20—The Interstate Association's Sixteenth Grand American Handicap Tournament, Chi-cago, Ill., under the auspices of the Chicago Association of Trap Shooters, $3,500 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy; winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburg, Pa.

Registered Tournaments—Pacific States and Terri-tories:

Aug. 5, 6, 7—Fourth annual tournament California-Nevada Trapshooters' Association. Auspices of Golden Gate Gun Club, West Alameda trap grounds. T. D. Riley, Secretary, Humboldt Bldg., San Francisco.

September 5-6.—San Jose Blue Rock Club, O. N. Ford, Secretary.

September 13, 14—Omaha Gun Club, R. D. Vaught, Sec? retary-Manager, Omaha, Neb.

September 24—Medford Gun Club, .Dr. E. R. Seely, President, Medford, Ore.

November 4—Williams Gun Club, F. E. Lowe, Secre-tary, Williams, Ariz.

November 5, 6, 7—Arizona State Tournament, under the auspices of the Tucson Blue Rock Gun Club, W. A. Julian, President, Tucson, Ariz.

A New Book on Rifle Shooting.

"Boy Scout Marksmanship" is the title of the latest booklet on rifle shooting for boys which has just come from the press. The author is Edward Cave, editor of one of the leading outdoor life and hunting publications. The illustrations are from photo-graphs by the author and show, among other things, the proper positions to assume while shooting. There are, also, diagrams which graphically illustrate in a practical and original manner the right and wrong ways to use the sights on a rifle.

The Boy Scout marksman code; care in handling firearms; how to clean and keep firearms in good condition; positions in shooting and important things to remember, are concisely, but thoroughly, explained in interesting and readable style.

The Remington Arms-UMC Co., Woolworth Bldg., New York City, N. Y., will be pleased to send a copy of this valuable treatise on shooting with its compli-ments to anyone interested in Boy Scout marksman-ship who will send his name and address.

Peters Points.

At the Montana State Shoot, held at Lewiston, Mont., June 21, 22, 23, Mrs. Topperwein was high on all 16-yard targets with the splendid score of 447x 460, which included a run of 103 straight. In the special professional trophy event at 100 targets, Mrs. "Top" was again high gun, breaking 98x100. This greatest lady shot in the world uses a Win-chester repeating shotgun and Winchester factory loaded shells exclusively.

HOW TO BECOME A SUPERINTENDENT OF SPEED.

Manager The Horseman Correspondence School—Had the job of Superintendent of Speed thrust upon me, and as I have never done any harm to anybody I cannot figure why I should be selected to bear this burden. I know nothing about racing and have not the slightest idea as to how to act and so am asking the advice of your department.—Yours, I. N. Nocence.

We don't blame you after your spotless life for being indignant about having the position as "Superintendent of Speed" thrust into your hands, it is a long handle to have to your name and means much or little, just as you choose to make it. But let us say right here that a superintendent of speed is only another name for "goat," as anyone occupying that position is a real "angora" for the secretary, which fact you will find out before you are through.

The office itself is practically a new one and has only been created within the past few years, because if you go back into turf history, you will find that a superintendent of speed was unknown even less than ten years ago. The secretary's clerk or the track manager took care of the majority of this work in times only a few years ago, but to induce men to take the office, this name was coined so that some honor would be attached to it and also as an inducement to some poor "simp" like yourself to take the office. "Manager of Speed Department," "Chairman of Speed" and other such names are often substituted, but all mean the same thing, and that is to keep the secretary from being bothered by horsemen who have kicks or otherwise. Nowadays, where a man is working at your job, and a horseman asks a question of any of the officers, he is immediately referred to the "Superintendent of Speed."
